Russ Flank Oder Bastions

Circle Kustrin And Frankfurt

Moscow Announces Gains North And South of Hard-Pressed Berlin

LONDON—(AP)—Russian forces marching on Berlin toward northwest corridor to outflank the Oder River bastion city of Kustrin and captured Barwalde, 30 miles from the capital.

Further south, another flanking movement apparently aimed at bypassing the second large Oder River fortress town, Frankfurt, was begun with the capture of Ziegenhagen, 10 miles southeast of Frankfurt and 15 from Berlin.

On the west to Barle, troops of Marshal Gregory K. Zhukov's 1st White Russian Army also took Ziegenhagen, 10 miles northeast of Frankfurt.

The regular soldier command, the command from Moscow announced that advances toward Berlin had been made in the last few days. It said that the Russian army had captured Ziegenhagen, 10 miles southeast of Frankfurt, and that the Russian army had captured Barwalde, 30 miles from the capital.

SEVERAL OTHER RUMORS AND SPECULATIONS, however, of the Russian army's progress, were also reported. It was said that the Russian army had captured Ziegenhagen, 10 miles southeast of Frankfurt, and that the Russian army had captured Barwalde, 30 miles from the capital.

At the same time, the Russian army had captured Ziegenhagen, 10 miles southeast of Frankfurt, and that the Russian army had captured Barwalde, 30 miles from the capital.

BULLETIN.
WASHINGTON—(AP)—High Army officials told senators today the end of organized fighting in Germany probably will come within a few days. Describing the pull-out of American armor, general staff officers expressed their opinion to members of the Senate military committee that a collapse of the German army is imminent.

PARIS—(UP)—U.S. 9th Army mobile forces broke across the Elbe today and moved toward Berlin. The advance was part of the resuming "Valkyrie" drive of American divisions by unofficial accord.

PARIS—(UP)—American 9th Army tanks crossed the Elbe River today and entered Berlin. The tanks led by the 1st and 3rd divisions. They were 110 miles from Russian lines. A front dispatch said the tanks were moving toward the Brandenburg Gate. The tanks were moving toward the Brandenburg Gate. The tanks were moving toward the Brandenburg Gate.

60,000 Lbs. of Sugar
Hauled Off by Thieves
A report from the U.S. Coast Guard today said that a ship had been seized off the coast of Cuba. The ship was carrying 60,000 lbs. of sugar. The ship was carrying 60,000 lbs. of sugar.

What Shall We Do with Japan?
Should a jury of 100 be appointed, by the War Relocation Authority, to decide whether to send Japanese-Americans to the United States? First Lady Calls in Family;
Yalta Trip Wearing President

WASHINGTON—(UP)—President Roosevelt died this afternoon at Warm Springs, Ga. Secretary Stephen T. Early announced here.

Death was caused by cerebral hemorrhage at the resort where the President had been resting for some 10 days.

An immediate Cabinet meeting was announced. The four Roosevelt sons, all of whom are in the service, were notified of the President's death by messages from Mr. Roosevelt.

Mr. Roosevelt, Early and Adm. Mahan, the President's physician, arranged to leave for Warm Springs by plane almost immediately.

Mr. Roosevelt apparently had been wearing his leg to Yalta. The four Roosevelt sons, all of whom are in the service, were notified of the President's death by messages from Mr. Roosevelt.

"Chicago, the Third City of the World"

Today, when a scientist talks, the world listens. Yesterday . . . well, how many people heard, or heeded, the words of the University of Chicago's late Professor J. Paul Goode?

"Within ten or fifteen years," prophesied Prof. Goode in 1923, "Chicago will be the third city of the world . . . with even greater railroad activity than today and with wealth and opportunity unequalled anywhere."

Here was a man who used science—not a crystal ball—to foresee what was coming. And he picked the time within just a few years. For, today, Chicago is the third metropolis of the world . . . and as Prof. Goode also said, "the close of the century may see it the first."

Cities, after all, are made up of people, markets and homes. And the newspaper that is closest to the people, markets and homes of Chicago is Chicago's HOME newspaper, the Chicago Daily News.

Sports Stories Packed with Human Stuff

Some little time ago, a columnist of the Chicago Daily News recalled how a famous teacher at Yale once had explained on a lecture platform why so many intelligent people preferred the sports section to the front page.

"The sports sections," pointed out the professor, "are a record of success, the front page is almost wholly a record of frustration and failure."

Disagreeing with this view, a woman asked him which he would prefer: To have a student make a good recitation in a classroom or a touchdown on a football field.

"I told her," said the teacher, "that it would give me great pleasure to have a student make a good recitation—but I wouldn't be likely to smash my hat over it."

Fervid fans by the thousands continue to smash their hats over the exploits of the sports stars—and to doff their smashed hats in approval of the graphic, human-interest stories that have made the sports coverage of the Chicago Daily News the talk of the entire Middle West.

The Chicago Daily News provides complete, humanized coverage of every sport in season. It spotlights the thrills, the color, the personalities—all of the intimate, interesting human stuff . . . the big and little dramas that walk hand-in-hand with amateur and professional, high school and college sports.

For sports stories traditionally famous for fine writing—accurate and alive with human interest—turn to the Sports Pages of the

Nailing the Nub of Foreign News

Europe's day is done six to eight hours before it is noontime in Chicago. That is why the Chicago Daily News, with its famed foreign staff, can give you the crux of important events abroad on the day of their happening. And, at the same time, very often can tell you why they happened. It works this way!

Usually, major foreign news is beginning to take shape when the early editions of the Chicago Daily News are being prepared. Developments follow rapidly. From a dozen widely separated world posts—converging like homing pigeons on Chicago—come on-the-spot dispatches from America's foremost foreign staff.

Terse, clear messages, these. They don't dally with surface stuff. Instead, their aim is to slash through the crust of a happening . . . to reach the *why* . . . and, if it is humanly possible, to tell what it *means*.

To these uniquely trained correspondents, the nubbin of a happening lies in its significance—particularly its significance to the United States and to the world.

And it is this method, this traditional technique in reporting foreign developments, that has made the Chicago Daily News Foreign Service the most distinguished, most widely read newspaper foreign service in the world. Eighty-seven newspapers subscribe to the Foreign News Service of the Chicago Daily News.

“What Happened in the World Today?”

Eagerly, thousands of minds ask the question. Automatically, thousands of hands reach for the answer. Always in the same way. They toss a few pennies on the nearest newsstand, pick up a fresh copy of the Chicago Daily News, and swing homebound through turnstiles of traffic—armed with a complete account of the day from every important sector of the earth!

It's as simple as that—as effortless, as unailing. But it didn't happen by accident.

Those stories you read today and every day in the Chicago Daily News got there the hard way—the only way trustworthy news is gathered and published—by the legwork and brainwork of expert reporters and correspondents who went out and got their facts firsthand. Accurate as they are graphic, those stories have been gathered, written and printed through the far-flung teamwork of more than a thousand men and women—workers for the Daily News in two hemispheres—who, together with the Associated Press and United Press agencies, virtually roll the world into your lap every day.

What happened in the world today? Whatever it may be—local, national or international—it's there before your eyes . . . arresting in stories and pictures . . . accurate with the precision that is traditional with the . . .

Covers Even a Cut Finger

Ever cut your finger . . . burn your hand? Do you ever trip or fall and bruise a leg or arm—or encounter any small injury requiring a doctor's attention? Of course you do. Commonplace accidents like these are happening to people every day.

Most newspaper accident insurance policies do not cover minor accidents such as these. But the all-protection accident policy issued through the Chicago Daily News covers even the smallest of them that requires a doctor's attention.

This policy covers slight mishaps as well as the death-dealing kind—covers everything that can happen to you from head to foot—covers you at home, at work, at play—covers you every minute of the day and night.

It pays liberally even for trivial injuries. It pays as much as \$10,000 for certain kinds of death claims. It makes allowance for doctor or hospital bills—pays monthly indemnity for total disability.

Subscribers to the Chicago Daily News who have the paper delivered to their home or place of business are entitled to this all-protection accident insurance for only 1 cent a day. No examination is necessary. If you live in Chicago, call the Daily News—Dearborn 1111. If you live outside the city, you may order your subscription by writing the Circulation Department of the Chicago Daily News, 400 W. Madison st., Chicago 6, Ill.

CHRONOLOGY OF THE EUROPEAN WAR

1939

MARCH

Mar. 14—Czechoslovakia invaded by German, Hungarian, and Rumanian troops.

Mar. 16—Bohemia, Moravia, Slovakia proclaimed German protectorates.

Mar. 22—Lithuania ceded city of Memel to Germany with signature at Berlin of five-year non-aggression pact.

Mar. 31—In British House of Commons, Prime Minister Chamberlain announced British and French had pledged aid to Poland "in the event of any action which clearly threatened Polish independence and which the Polish government accordingly considered it vital to resist with their national forces . . ."

APRIL

Apr. 1—Spanish Civil War ended with communiqué by General Francisco Franco: "After having made prisoner and disarmed the Red Army, the National troops have attained with final military objective. In consequence, the civil war is over."

Apr. 6—Triple alliance of Britain, France, Poland announced by Prime Minister Chamberlain.

Apr. 7—Italy invaded Albania.

Apr. 13—France and Britain guaranteed borders of Greece and Rumania.

Apr. 14—President Roosevelt communicated to Chancellor Hitler and Premier Mussolini plea for ten year guarantee of peace.

Apr. 28—Germany denounced its 1935 naval agreement with Britain and ten year non-aggression treaty of Jan. 26, 1934, with Poland. Germany demanded return of Danzig as well as extraterritorial railway and highway connection to East Prussia.

AUGUST

Aug. 23—Non-aggression pact signed between Germany and Russia.

Aug. 24—President Roosevelt appealed to King Victor Emmanuel of Italy, Chancellor Hitler, and President Moscicki of Poland suggesting direct negotiations between Germany and Poland, arbitration or conciliation. Poland agreed to conciliation by third party.

Aug. 25—Treaty of mutual assistance signed by Great Britain and Poland. British Parliament met in special session and voted government virtual dictatorial powers. Hitler renewed demand for free hand against Poland. Poland began calling up reserves.

Aug. 28—British government urged truce again and reiterated former warnings of British action in event of German aggression. Military preparation was speeded on both sides. British shipping was recalled from Baltic and Mediterranean. Germany introduced emergency rationing.

Aug. 29—Hitler repeated to Britain his demands on Poland and refused to negotiate until demands were met. He requested audience with Polish plenipotentiary in Berlin within 24 hours.

Aug. 30—Six man cabinet set up in Germany for "defense of the Reich" with Hermann Goering as president.

Aug. 31—German government published 16-point proposal to Poland. The provisions were of moderate tenor, but before the document could be sent, communications with Warsaw were cut off. Hitler, claiming Poland had rejected proposals, gave German troops the order to march.

SEPTEMBER

Sept. 1—Germany attacked Poland from land and air without formal declaration of war. National Socialist, Albert Forster, head of Danzig Free State, proclaimed union of Germany and Danzig. France and England mobilized for war but expressed readiness to negotiate if Germany would withdraw from Poland. Italy declared intentions to remain neutral.

Sept. 2—A five-power conference to discuss crisis was proposed by Italy, but England refused to negotiate as long as German troops were on Polish soil. An ultimatum was sent to Hitler by France and Britain. Hitler replied by blaming England for encouraging Poles in policy of persecution and provocation and refused to withdraw from Poland.

Sept. 3—England and France declared war on Germany.

Sept. 5—German forces swept through Poland rapidly, cutting off Polish corridor and overrunning Upper Silesia.

Sept. 6—Anglo-French troops began advance into Saar region but were forced to withdraw after six weeks.

Sept. 8—Germans drove on Warsaw which offered valiant resistance despite heavy air bombardments, finally surrendering on September 27.

Sept. 10—Canada declared war on Germany.

Sept. 14—Polish resistance suddenly collapsed, except for Warsaw region.

Sept. 16—Russian troops invaded Poland. Polish government fled to Rumania.

Sept. 18—German and Russian forces joined near Brest-Litovsk and four days later made provisional agreement for partitioning Poland.

Sept. 29—Definite agreement was reached by Germany and Russia on partitioning Poland. Russia concluded mutual assistance pact with Estonia and Latvia (Oct. 5) by which the Soviet government was given naval and air bases and garrison rights in Baltic countries.

OCTOBER

Oct. 6—Hitler suggested a conference to discuss peace terms but England and France refused.

Oct. 8—Trade agreement was concluded between Germany and Russia by which Germany arranged for supplies of war materials.

Oct. 10—Lithuania and Russia signed fifteen-year mutual assistance pact at Moscow. Disputed city of Vilna was given to Lithuania in return for extensive military rights granted Russia.

Oct. 18—Mounting tension between Russia and Finland over garrisoning of Finnish troops along Russo-border led to conference of three Scandinavian rulers and president of Finland at Stockholm.

Oct. 19—Fifteen-year treaty signed at Ankara between England, France and Turkey. The three powers promised each other mutual assistance in event of aggression in Balkans or eastern Mediterranean regions.

NOVEMBER

Nov. 1—Germany annexed Polish corridor, Posen, and Upper Silesia.

Nov. 3—U.S.S.R. incorporated Polish Western Ukraine and Western White Russia. United States Congress passed Neutrality

Bill (cash and carry) proposed by the administration.

Nov. 7—Queen Wilhelmina of Netherlands and King Leopold of Belgium offered to act as war mediators. France and England rejected proposal November 12.

Nov. 21—Despite protests from many neutral powers, Britain declared blockade against German exports.

German-Slovak treaty signed at Berlin ceding to Slovakia 225 square miles of territory annexed by Poland in 1920, 1924, and 1938.

Nov. 26—Russia demanded withdrawal of Finnish troops from Russo-Finnish border as clash appeared imminent.

Nov. 28—Russia denounced her non-aggression treaty with Finland.

Nov. 30—Soviet troops invaded Finland and U.S.S.R. immediately recognized Bolshevik People's government set up by Risto Ryti. Russo-Finnish war fought on three fronts: From Petsamo on Arctic to center of Finland and down to Mannerheim line on Karelian isthmus.

DECEMBER

Dec. 13—British cruisers off coast of Uruguay attacked and badly damaged German battleship *Graf Spee*. After seeking refuge at Montevideo, German vessel was finally blown up at sea by own crew on December 17.

Dec. 14—Russia was expelled from League of Nations after she refused the League's demand to reopen negotiations with Finland.

Dec. 19—France and Britain decide to grant material aid to Finland.

1940

Jan. 13-14—Threat of German invasion of low countries increased.

FEBRUARY

Feb. 14—Russians began concerted assault against Mannerheim Line.

Feb. 16—Britain violated Norwegian territorial waters by sending British destroyer to rescue British prisoners from German ship *Altmark*.

Feb. 26-Mar. 19—American statesman Sumner Welles made diplomatic mission to Italy, Germany, France and England.

MARCH

Mar. 6—Russia submitted peace terms to Finland through Sweden.

Mar. 8—Finland was offered aid by England and France.

Mar. 12-13—Peace concluded between Finland and Russia. Finland ceded Karelian Isthmus, with Viborg, western and northern shores of Lake Ladoga, and various islands in Gulf of Finland. Russia received 30-year lease of Hanko peninsula and right to build railroad across center of Finland to Gulf of Bothnia.

Mar. 18—Hitler and Mussolini met at Brenner Pass.

APRIL

Apr. 8—Great Britain and France announced that to stop shipment of Scandinavian ore to Germany, three areas of Norwegian waters had been mined.

Apr. 9—Germany occupied Denmark and began invasion of Norway, seizing most seaports by surprise.

Apr. 13—British naval forces attacked Germans at Narvik in attempt to cut rail connections with iron fields of Sweden.

Apr. 20—England and France landed expeditionary force in Norway.

MAY

May 2-3—Anglo-French forces compelled to withdraw from southern Norway under pressure of German troops.

May 9-10—German armies invaded Belgium, Luxembourg, and overran Netherlands. Queen Wilhelmina and government fled to England on May 13.

May 10—Prime Minister Chamberlain resigned and was replaced by Winston Churchill. Churchill formed coalition government with representation from Labor Party. London announced British occupation of Iceland.

May 15—Netherlands Army surrendered.

May 19—General Maxime Weygand replaced General Gamelin as commander of Allied forces in France and Belgium. Swift advances carried Germans through frontier defenses. Sedan was captured and Germans forced wedge across northern France to Abbeville on channel coast by May 21.

Hitler announced reincorporation into Reich of Eupen, Malmedy, and Moresnet.

May 26—Germans began encircling movement against Allies after fall of Boulogne.

May 28—King Leopold and Belgian army surrendered, leaving some Anglo-French troops in danger of being isolated.

May 29-June 4—In miraculous evacuation of British troops from Dunkirk, major part of British army was saved, but virtually all equipment was lost.

JUNE

June 5—Germans began battle of France by advancing along whole front of Somme and Aisne rivers.

June 9—Cease fighting order given by Norwegians at midnight. British evacuated Narvik.

June 10—Italy declared war on France and Britain and opened advance into southern France.

June 14—Germans entered Paris which had been declared an open city. German rear forces began attacking Maginot Line from two directions.

June 15—Russian troops marched into Lithuania, Latvia and Estonia.

June 16—Marshal Petain replaced Reynaud as head of French government, which fled to Tours and then to Bordeaux.

June 17—French sued for peace.

U.S.S.R. announced that Estonia and Latvia had agreed to free passage of Soviet troops and to formation of new governments.

June 18—Hitler met with Mussolini at Munich to discuss French armistice terms.

United States re-affirmed policy of Monroe Doctrine and began unprecedented program of defense.

June 22—Armistice between France and Germany concluded at Compiegne. French were forced to disarm and to allow Germans to occupy three-fifths of France.

June 23—General Charles De Gaulle set up French National Committee in London to continue fight against Hitler. British government recognized De Gaulle committee June 28 and severed relations with Petain government which ultimately was established at Vichy.

June 24—Italy concluded armistice with France.

June 27—Under reported pressure, Rumania agreed to cede Bessarabia and northern Bukovina to Soviet Russia. On July 1, Rumania denounced guarantee of territorial integrity promised by France and Britain and turned to Germany for support.

JULY

July 3—British called upon French naval forces at Oran to surrender. When they refused, British opened fire, sinking or capturing most of French Fleet to prevent it falling into German hands.

July 5—As result of Oran attack, Marshal Petain broke off diplomatic relations with Great Britain.

July 10—French Parliament voted to establish totalitarian form of government making Marshal Petain dictator.

July 18—United States Democratic convention at Chicago nominated President Roosevelt to run for third term with Henry A. Wallace as vice-presidential candidate. On June 28, Republicans had nominated Wendell L. Willkie and Charles L. McNary candidates for president and vice-president.

July 20—As part of United States' tremendous defense program, President Roosevelt signed bill calling for construction of "two-ocean" Navy.

July 21-30—American Foreign Ministers met in Havana to discuss means of combating Axis Fifth Column activities and to provide for joint administration in trust of derelict European colonies in Western Hemisphere.

July 21—Lithuania, Estonia, and Latvia—under Soviet sponsored governments—asked for incorporation into Soviet Union. Request was granted on August 25.

AUGUST

Aug. 9-11—Tension mounted in relations between Italy and Greece. "Mysterious" attacks on Greek warships.

Aug. 11—Beginning of so-called "Battle of Britain" wherein Germans started widespread air attacks. British air forces countered with concentrated air bombardments on German bases in France, low countries, and industrial centers in Germany and Italy.

Aug. 17—President Roosevelt and Premier Mackenzie King announced creation of American-Canadian Joint Defense Board.

Aug. 30—As result of Vienna conference, when Rumania was subjected to pressure from Germany and Italy, and because of threatened attack from Hungary, Rumania agreed to cede half of northern Transylvania to Hungary.

SEPTEMBER

Sept. 3—United States turned over 50 World War I destroyers to Britain in exchange for two naval and air bases and 99-year lease on six others, stretching from Newfoundland to coast of South America.

Sept. 6—General Antonescu became dictator of Rumania and opened negotiations with Iron Guard. Iron Guard had been under government repression since September 21, 1939, when its members were charged with assassination of Premier Calinescu. In midst of political disorders, King Carol fled and was succeeded by his son, Michael V.

Sept. 7—German air offensive against London opened in earnest.

Sept. 15—Italy started invasion of Egypt from Libya.

Sept. 16—United States passed Selective Service and Training Act calling for registration of all men between ages of 21 and 36 for one year's training. 1,200,000 troops and 800,000 reserves were envisioned.

Sept. 21—Bulgaria occupied southern Dobrudja in accordance with agreement with Rumania September 7.

Sept. 23-25—"Free Frenchmen" under

direction of General De Gaulle and supported by British navy, tried to take over Dakar in French West Africa. Attempt was abandoned when resistance from French warships and shore batteries led to severe fighting.

Sept. 27—German-Italian-Japanese 10-year military-economic pact signed in Berlin. All contracting parties promised mutual assistance should any one of them become involved in a war with a power not then a belligerent.

OCTOBER

Oct. 4—Hitler and Mussolini met again at Brenner Pass. Also present were Foreign Ministers von Ribbentrop and Count Ciano, and German Field Marshal Wilhelm Keitel.

Oct. 9—General Charles De Gaulle, for the first time since the French-German armistice, raised the standards of "Free French" on French soil after landing from a gunboat at Duala, Cameroons.

Oct. 10—General Maxime Weygand arrived in French West Africa to organize resistance to the movement of De Gaulle.

Oct. 12—United States policy, as outlined by President Roosevelt, provided for these: Total defense of western hemisphere and adjacent oceans; continued war aid to Britain, insistence on the right of peaceful commerce in the Atlantic and Pacific; no appeasement of dictators.

Oct. 16—Registration of all United States males in the nation's first peacetime draft summoned all men between ages of 21 and 35 to local draft boards in every community. Registration was completed in one day.

Oct. 18—Under government decree, the Vichy regime under Marshal Petain barred Jews from the press, from educational and judiciary positions, from becoming officers in any military services, and with only rare exceptions, barred Jews from high public offices.

Oct. 20—The longest wartime bombing mission ever attempted during wartime was claimed by the Italian High Command which said Italian heavy bombers traveled 2,800 miles to bomb American-owned oil refineries and storehouses at Bahrain Island in the Persian Gulf.

Oct. 23—Hitler, accompanied by Foreign Minister von Ribbentrop, conferred with General Franco, head of the Spanish state, at Hendaye on the French border.

Oct. 26—Despite denial by Greece, the official Italian news agency said Greek bands penetrated into Albanian territory killing two Albanian soldiers and wounding three others.

Oct. 27—Greece was attacked by Italian warplanes. The Greeks rallied their forces after rejecting three-hour ultimatum from Italy demanding that Italian troops be allowed to occupy strategic positions in Greece for duration of the war. Premier Metaxas and George II called upon Greece to fight for independence.

Oct. 28—King George VI of Britain wired King George II of Greece saying: "We are with you in this struggle—your cause is our cause—we shall be fighting a common foe." Prime Minister Churchill sent similar message to Premier Metaxas.

—Another meeting between Hitler, Mussolini, Count Ciano and von Ribbentrop—this time in Florence.

—Daily action between British and Italians reported from Egypt and northeast Africa.

Oct. 29—United States' first compulsory peacetime service was inaugurated.

—Italian High Command announced steady gains in Greece.

NOVEMBER

Nov. 1—Britain made first air raid of war on Italian industrial port of Naples. Targets were oil storages, rail yards, and anti-aircraft batteries.

Nov. 4—Interchange of Greek and Italian air raids: British forces reported landed on island of Crete.

—Spain, which had occupied international zone of Tangier since June 14, just before collapse of France, announced that Tangier had been formally incorporated into Spanish state.

Nov. 5—Prime Minister Churchill accused Government of Eire of allowing German submarines and warcraft to obtain supplies at Eire air and naval bases denied British use. Premier de Valera of Eire declared that Britain "knew it was a lying charge."

Nov. 8—British planes attacked Loewenbray Keller in Munich half-hour after Hitler left it. During meeting Hitler pronounced Germany "unconquerable" and said "Today I reject any compromises."

Nov. 9—An official Vichy statement said France had only 20 to 25 divisions to oppose 125 German divisions at time of French armistice. All others, said Vichy, were isolated or surrounded. Only one army was intact, a force of 4 divisions, 600,000 men on the Alps facing the Italian forces.

—Daily reprisal attacks were carried out by German, British, Italian and Greek planes in customary manner.

Nov. 11—British planes flew 2,000 miles to Danzig to attack a railway station at which train stopped carrying Russian Premier Molotov to conference with Hitler. Conference went ahead as scheduled and lasted until November 14.

Nov. 15—On Nov. 14-15, German planes made night mass attack on Coventry, northwest of London. Targets were motor shops and airplane accessory plants. Inhabitants buried 200 dead in common grave and cared for 800 wounded persons.

Nov. 16—Greek high command announced Italians were withdrawing from Albanian base of Koritza.

Nov. 18—In address to provincial Fascist leaders in Rome, Premier Mussolini declared Italy would "absolutely break the backbone of Greece. Whether it is in two months or 12 months does not matter."

Nov. 19—London got its daily-nightly air attacks as other German planes returned for mass attack on Coventry and Birmingham.

Nov. 20—At Vienna, Hungarian authorities signed protocol to join Axis tripartite pact with Germany, Italy, and Japan to assure world peace under the "new order."

—United States Army Chief of Staff, General George C. Marshall, announced that United States was beginning immediately to send Britain 26 "flying fortress" type bombers.

Nov. 21—Australian Royal Air Force made its first appearance by fighting Italian planes in western Egypt.

Nov. 22—Greeks took possession of Koritza and pursued retreating Italians.

Nov. 23—Rumania joined the Axis, followed by protocol of allegiance by Slovakia. (Nov. 24)

Nov. 25—First large groups of American registrants began moving toward army camps following induction routine. Nation's draft program called for enrolling 1,932

military trainees on Nov. 25 with a total of 9,343 called during the week.

—Part of Italian fleet not disabled by Nov. 11-12 British plane raid was withdrawn from Taranto. (British had announced that one 35,000 ton battleship was severely damaged, in addition to damage of one and possibly two 23,000 ton battle ships and two cruisers.)

—14 Italian troopships were unloaded at Durazzo for Greek campaign where Italian regulars were still retreating from Albania. Fighting was continuous with losses on both sides.

Nov. 26—Governor-General of Belgian Congo declared state of war existed with Italy.

DECEMBER

Dec. 1—British retaliated with concentrated raids on Pas-de-Calais area of French coast and industrial cities in Ruhr and Rhine valleys.

Dec. 7—By this time, Germans had completed second westwall of concrete forts with guns to blast English coastal cities and channel shipping.

Dec. 8—Greeks took Argyrokastron, which had been made part of new state of Albania in 1913.

Dec. 9—Italian camp in Sidi Barrani area of Egypt was attacked by British land and air forces.

Dec. 10—Hungary and Yugoslavia signed amity pact.

Dec. 11—Fighting continued on increasing scale in Egypt. British claimed capture of Italian advance base at Sidi Barrani, 75 miles inside the border.

Dec. 13—Greeks occupied Palermo on Albanian coast.

Dec. 14—Marshal Petain dismissed Pierre Laval as vice-premier of Vichy government; his office was abolished and ex-premier Pierre-Etienne Flandin was appointed Minister of Foreign Affairs to replace Laval.

—Italian forces evacuated Sidi Barrani in Egypt as British planes raided Italian warships at Naples.

Dec. 16—British planes bombed Berlin for first time in 16 days. Marseilles and Mannheim also raided.

Dec. 20—French submarine Sfax and Frency navy tanker Rhone were torpedoed and sunk off Casablanca, Morocco, by unidentified submarines.

Dec. 21—Continued German air raids against Liverpool, targets along the Mersey river, and south Wales.

Dec. 22—Marshal Graziani reported to Premier Mussolini that Italian offensive against Suez Canal was delayed by lack of water and that lack of mechanized equipment accounted for later reverses.

Dec. 23—Prime Minister Churchill appealed to people of Italy by radio to get rid of Mussolini.

Dec. 24—Despite wartime hazards and around-the-clock German air raids, London celebrated Christmas eve with this legend prominently displayed on public placards: "Christmas is 1,940 years old and Hitler is only 51. He can't spoil our Christmas."

Dec. 25—Christmas was marked by absence of German and British planes in western Europe. But air activity was reported as usual in Albania and northeast Africa. British planes dropped Christmas gifts to children of Corfu.

Dec. 27—Air offensives began by both British and German air forces.

Dec. 29—In world-wide radio broadcast, President Roosevelt urged American people

to stand by him in his proposal to furnish Britain with ships, planes, and arms.

Dec. 30—Most severe German raid to date on London. Historic buildings for mile square were completely wrecked or badly damaged.

Dec. 31—In radio broadcast from Berlin, Hitler predicted that Germany would win the war in 1941. Said Hitler: "The war must be continued as a result of the will of democratic warmongers and Jewish capitalists. The representatives of the breaking world believe that they may achieve in 1941 what they were unable to do in 1940." He declared it was a stupid and "infamous lie" to maintain that Germany and Italy wanted to conquer the world "while the actually existing world conquerors require war in order to realize their higher interest in their capital."

—There were no reprisal raids on New Year's Eve.

1941

Jan. 1—Vichy government announced provisional budget for first four months of 1941—providing for expenditure of approximately 400,000,000,000 francs—of which 12,000,000,000 was to be used for war expenses.

—General Jan Christian Smuts, Prime Minister of South Africa, predicted that United States would soon enter war and that such intervention would be necessary for Britain to win.

Jan. 2—Rome announced that Italian fliers stationed on English channel had been recalled to join the new "German Air Corps" in Italy.

—20,000 incendiary bombs were dropped by R.A.F. on Bremen in raids lasting three and one-half hours.

—Lord Beaverbrook, British Minister of Aircraft production, praised American planes being flown across Atlantic in "steady stream."

—German High Command claimed that 190,000 tons of British warships had been sunk since surrender of France on June 25, 1940. Germany's own losses were described as "light."

Jan. 3—German spokesman denied charges by Ireland that German planes had dropped bombs on eastern countries of Eire.

—Former French Minister of Foreign Affairs, Paul Baudoin, resigned as Secretary to Chief of Vichy State, Marshal Petain.

Jan. 4—8,000 Italian prisoners were taken by British, Australian, and French (De Gaulle) forces which entered the Italian Mediterranean port of Bardia, Libya.

Jan. 5—Bardia fell. British headquarters in Egypt announced that Bardia was captured within 20-day siege. Six generals, including General Bergonzoli, commander, were said to have been taken prisoner along with 25,000 troops. According to British reports, since Dec. 9 (when British offensive began) Marshal Graziani lost 80,000 of North Africa force estimated at 250,000.

—American ambassador to Vichy, Admiral William D. Leahy, was accorded gala welcome upon his arrival at Vichy headquarters.

Jan. 6—Greek army headquarters claimed capture of 13,000 Italian troops since beginning of Italian invasion. Greek casualties were listed as 1,000 killed and 6,000 wounded.

—President Roosevelt, in annual message to Congress on State of the Union, reminded members that "dictator's peace" would bring "no security" to United States, and that "those who would give up essential liberty to purchase a little temporary safety

deserve neither liberty nor safety."

Jan. 7—Australian and British forces in Libya captured airdrome 15 miles from El Adem and began siege of Tobruk, on Mediterranean. Tobruk fell 15 days later.

Jan. 9—First unit of French Navy to rally to General Charles De Gaulle, submarine Narval, was sunk by "enemy action."

Jan. 10—German and Italian planes sunk one and damaged three British vessels in attack on British naval unit in eastern Mediterranean. Losses were: cruiser, Southampton, sunk; aircraft carrier, Illustrious, battleship, Malaya, and destroyer, Gallant, were damaged.

Jan. 15—Bombers made in United States were flying from United States to Newfoundland and then to Britain (2,000 miles) in ten hours.

Jan. 16—Secretary of War Stimson told American congressmen that United States would be in danger of invasion by air if British Navy were destroyed or surrendered. He said that if United States failed to help, Britain would face crisis in 60 to 90 days.

Jan. 17—Britain granted sea and land bases to U. S. on St. Lucia in West Indies.

—Marshal Petain, head of Vichy government, appealed to United States for food.

Jan. 19—Axis began mass air attacks on Malta.

Jan. 22—Prime Minister Churchill announced that Britain, including units of the home guard, had 4,000,000 men armed and in uniform.

Jan. 23—Colonel Charles A. Lindbergh, in opposing "lend-lease" bill—testified before the House Foreign Affairs committee: "An air invasion across the ocean is, I believe, absolutely impossible at this time or in any predictable future." He advocated negotiated peace.

Jan. 24—Premier Antonescu crushed four-day Iron Guard revolt in Rumania by setting up military regime with himself as chief.

Jan. 28—After marching 825 miles from Lake Chad, De Gaulle's Free French forces claimed capture of small Italian outpost at Murzuk, Libya.

Jan. 29—General John Metaxas, 70-year old Premier of Greece and head of military defense against Italy, died and was succeeded by Alexander Korizis.

Jan. 30—Adolph Hitler, in speech broadcast from Berlin commemorating eighth anniversary of National Socialist Party's seizure of power declared: "Whoever believes he will be able to help the English must definitely know one thing: Every ship, whether with or without a convoy, that comes before our torpedo tubes will be torpedoed." In further reference to the United States, Hitler said: "Every one who does not wish to distort the truth and who claims the opposite, knows that the German people have nothing against the American people. Germany has never had interests on the American continent unless it be that she fought along with this continent for its freedom."

—British forces captured Derna, in Libya.

—German planes sunk a 10,000 ton British ship at Bardia.

FEBRUARY

Feb. 1—German planes started concentrated attacks on British shipping along Egyptian and Libyan coasts.

Feb. 4—Italian forces quit Cyrene, ancient Greek "Athens of Africa" in Libya and British and Australian troops moved in.

—Planes of R.A.F. made 35th raid on Brest, German-held seaport on French coast.

Feb. 7—Australian troops in Libya, preceded by British tanks, seized Bengasi after cutting road to Tripoli. Among Italians captured was General Bergonzoli, who had escaped fall of Bardia.

Feb. 8—Denmark turned ten of her torpedo boats over to Germany.

Feb. 9—Prime Minister Churchill, in radio broadcast, said that Britain did not need American troops but that she needed material aid. "Give us the tools and we'll finish the job."

—In France, Foreign Minister Pierre-Etienne Flandin resigned and Admiral Jean Darlan became his successor. Darlan held Navy portfolio and was vice-premier in addition to new duties.

—German planes raided capital of Iceland.

Feb. 11—Back in United States after tour of Britain, Wendell Willkie told Senate Foreign Relations committee that U. S. should send all its bombing planes, except those needed for training, and five or ten destroyers a month to England.

Feb. 12—Italy asked U. S. to shift her Italian consuls from Palermo and Naples to points farther north away from seacoast.

—Germany claimed to have sunk 13 out of 14 British ships in convoy heading to England from points 190 miles east of Azores. Britain said only six vessels were sunk.

Feb. 15—Channel coasts, as well as Rhodes, Crete, and Malta were object of daily retaliatory air raids.

Feb. 16—Harry Hopkins returned to U.S. following four-week tour of England and told President Roosevelt that British were "desperately in need of help."

Feb. 17—Turkey and Bulgaria signed non-aggression pact.

Feb. 18—Guerrilla action in Ethiopia forced Italians to give up Danghela and other points south of Lake Tana.

Feb. 21—Germans raided south Wales—British retaliated with attacks against channel ports and Italian posts in Africa.

Feb. 24—Chancellor Hitler declared in Munich broadcast that German submarines had sunk 190,000 tons of enemy shipping, including British convoy of 125,000 tons in preceding two days. Britain said week's ship losses were 37,635 tons. Said Hitler: "I can mobilize half of Europe and will do so."

—British planes bombed Addis Ababa, capital of Ethiopia.

—First mechanized battle between German and British forces in Libya took place southeast of Agedabia. Germans claimed victory.

—British took Brava on Somaliland coast.

Feb. 26—British announced capture of Mogadiscio, capital of Italian Somaliland.

MARCH

Mar. 1—Bulgaria signed Axis tripartite alliance and admitted German troops and supplies.

Mar. 3—As result of Bulgarian action, Russia announced that it could not render any support to Bulgaria. British legation staff began to depart from Sofia.

Mar. 4—Daily and nightly raids continued by British and German planes. Targets ranged from points in Britain to Channel area, Germany, and Italy.

Mar. 6—German troops, marching through Bulgaria, reached Greek border at points along Strumm and Maritza rivers and in Rhodope Mountains.

Mar. 7—British announced that all Italian troops had been driven from Italian Somaliland and that 12 Axis ships had been seized at ports of Mogadiscio and Kismayu.

Mar. 11—President Roosevelt signed Lend-Lease bill and immediately approved a list of undisclosed quantities of war material to be transferred from American Army and Navy to British and Greeks.

Mar. 13—British attacks on Berlin, Bremen and Hamburg were marked by use, in considerable numbers, of new long range heavy bomber received from United States.

—Greeks asserted that Premier Mussolini appeared for first time in Albania to direct opening of spring drive by Italian forces.

Mar. 15—In world-wide broadcast shortwaved to Europe, President Roosevelt declared that aid to "embattled" democracies "would be increased and yet increased until total victory has been won."

Mar. 16—In response to Roosevelt's statement, Hitler declared at a meeting in Berlin: "No power and no support coming from any part of the world will change the outcome of this battle in any respect. England will fall. The everlasting Providence will not give victory to him who, merely with the object of ruling through his gold, is willing to spill the blood of men."

—British Labor Minister, Ernest Bevin, announced drafting of girls 20 and 21 and men 41 to 45 for work in war industries.

Mar. 22—In revealing for first time that Germany had battleship squadron operating in North Atlantic, German High Command claimed sinking of 22 armed merchantmen bound for England, totaling 116,000 tons. Squadron was reported to include German battlewagons, Scharnhorst and Gneisenau.

Mar. 24—Turkey and Russia pledged neutrality in event either country was attacked by third power.

Mar. 25—Yugoslavia joined Axis, resulting in outbreaks among Serbian peasantry. During revolt, Yugoslav cabinet which signed protocol quit and chief regent, Prince Paul, fled from Belgrade. 17-year old King Peter was declared ruler and took charge of army, navy and government. New cabinet was formed by Simovitch.

Mar. 27—President Roosevelt signed bill making \$7,000,000,000 available at once to produce war materials for Britain and her allies.

—Prime Minister Churchill signed agreement whereby British bases in the Atlantic would be leased to U. S. for 99 years in return for 50 U. S. destroyers already serving in British Navy.

Mar. 28—British Mediterranean Fleet sank three Italian cruisers and two destroyers off Cape Matapan.

APRIL

Apr. 1—British captured Asmara, capital of Eritrea.

Apr. 3—Axis forces recaptured Bengasi, eastern Libyan capital, from British. Headquarters of British Army of the Nile announced that evacuating troops had inflicted "considerable casualties" on German and Italian forces as they withdrew. Bengasi had been captured from the Italians eight weeks before, prior to time that German forces had been sent in to bolster Italians.

—Anti-British coup in Iraq placed Rashid Ali Al-Gailani and his pro-Nazi supporters in power.

Apr. 4—Four divisions of Tyrolean mountaineers passed into Italy as German troops march toward Yugoslavia through Hungary.

Apr. 5-6—Germans continued to encircle Yugoslavia; eight new divisions jammed roads in Hungary in march toward Yugoslav border. On April 5 Hitler declared war on Yugoslavia as German troops invaded that country and Greece.

—South African troops entered capital of Ethiopia, Addis Ababa.

Apr. 7—Axis forces in Greece occupied Western Thrace, near border of Turkey. Air action was heavy with German planes attacking Belgrade, and British and Yugoslav aircraft raiding Sofia and points in Albania. After severing diplomatic relations with Hungary, Britain sent bombers to attack towns on Hungarian border.

Apr. 8—German troops cut off Greek forces in Western Thrace by driving down Vardar valley to within 23 miles of Salonika.

—President Roosevelt promised material supplies to Yugoslav's King Peter and denounced German attack as "criminal assault."

—Axis troops in Libya recaptured Derna which British seized on Jan. 30.

Apr. 9—German tank and armored troops captured Salonika, which had been set afire.

—German communique said 2,000 British troops and six generals were captured in fall of Derna.

Apr. 10—United States undertook to protect Greenland for duration of war.

Apr. 11—Reprisal air raids were made against Brest, Merignac, Dusseldorf, Bristol, Southampton, Coventry, Birmingham, and Nottingham.

Apr. 13—In Easter broadcast from Vatican, Pope Pius appealed to belligerents to refrain from "still more deadly weapons"—also translated as "still more homicidal instruments."

—After four-day siege, German troops occupied Belgrade, capital of Yugoslavia. Berlin reported capture of 12,000 Yugoslav troops including generals and 200 officers.

Apr. 14—Axis forces continued siege to retake Tobruk, as other Axis troops in North Africa crossed into Egypt and took Solum.

—London reported that British Mediterranean Fleet destroyed Italian convoy of three destroyers and five transports between Sicily and Tripoli. Rome said only one destroyer was lost.

—German planes, in night raid on Belfast Ireland, reportedly killed 500 persons.

Apr. 16—German communique announced that German motorized units captured Sarajevo.

—London underwent its longest and most widespread air attack when 300 German planes dropped incendiary and high explosives for eight hours. Germans said attack was reprisal raid for April 9th attack by British planes on what Germans described as "residential Berlin."

Apr. 17—Yugoslav army surrendered to the Germans.

Apr. 18—Hitler flew to Greece to see for himself how things were going.

Apr. 19—In Greece, King George II took personal command and placed Kostas Kotzias as Premier in temporary military government.

Apr. 20—London admitted that Greek and British troops were withdrawing under pressure of German troops driving southward across the Plains of Thessaly. London communique said Imperial and Greek troops were inflicting heavy casualties on Axis forces by delaying action.

Apr. 23—Greek army in Macedonia and Epirus surrendered to Italian High Command of forces in Albania and to High

Command of German forces in Greece. King George and ministers had fled to Greek island of Crete—60 miles south. King George denounced surrender and said it was completed without his knowledge or consent.

—In New York City, Colonel Charles Lindbergh addressed first mass meeting of America First Committee saying that Britain had one last hope, "that they may be able to persuade the United States to send another American Expeditionary Force to Europe to share with England militarily, as well as financially, the fiasco of this war."

Apr. 24—Germans made widespread air attacks against Greek ports to hinder evacuation of British, Australian, and New Zealand troops trying to escape by sea.

Apr. 25—German paratroops landed on the Isthmus of Corinth, captured it and Corinth to prevent British from destroying the canal.

Apr. 27—German forces entered Athens without meeting resistance and the swastika was hoisted over Acropolis. Italian troops had been trying to get to Athens since October 28, but were successfully stopped by Greek forces.

Apr. 28—Declaring that he had no "honorable alternative," Colonel Charles Lindbergh resigned his commission in Army Air Corps Reserve. Resignation was prompted by news conference at which President Roosevelt classed Lindbergh as defeatist and appeaser, and likened such persons to Copperheads of American Civil War. Lindbergh's resignation was accepted by War Department.

Apr. 29—German long-range guns installed between Calais and Bologne shelled British coast once an hour from 8 a. m. to 4 p. m.

MAY

May 1—Three islands off coast of Greece—Cephalonia, Levkas, and Zanto—were occupied by Italian forces.

May 2-31—British forces ousted pro-Axis regime in Iraq.

May 3—German and Italian troops staged huge victory parade through streets of Athens.

—British Admiralty announced loss of four transports and two destroyers in withdrawal from Greece which began April 24.

May 4—Hitler, in Reichstag speech in Berlin, declared that Yugoslavia had been victim of British intrigue and he described Prime Minister Churchill as a "world incendiary" and "most bloodthirsty amateur strategist the world has ever seen."

May 5—An Italian force of 400,000 began evacuating Albania, leaving only a police force behind.

—Haile Selassie returned to his throne as Emperor of Ethiopia which he had been forced out of by Italian invasion.

—Britain claimed that R.A.F. planes, in an attack on Brest, scored direct hits on the German battleships, Scharnhorst and Gneisenau.

—President Roosevelt called for creation of world's most powerful fleet of long-range bombers.

May 6—Joseph Stalin, 62, Secretary of Communist Party, became Premier of Russia to succeed V. M. Molotov, 51. As Premier, Molotov was also Foreign Commissar. He retained this post and was named vice premier under Stalin.

May 7—Prime Minister Churchill won vote of confidence from British Parliament. House of Commons vote was 447 to 3; House of Lords vote was unanimous.

May 10—Rudolph Hess, Hitler's personal representative and Deputy in Nazi Party, mystified world by flying from Augsburg, Bavaria, to Britain where he parachuted into Scottish farmyard. Hess freely announced his identity, confirmed by photographs, and asked to see Duke of Hamilton. Reportedly he was seeking peace terms with Britain. British authorities treated him for ankle injury received when he landed by parachute, and announced that he was being held prisoner. Nazi party officials in Berlin labeled Hess as a "deluded seeker of peace" and said he was mentally deranged from conditions traceable to his participation in first World War. In official statement, Nazi party said appearance of Hess would not "interfere with continuation of war against England forced upon the German people."

—Both British and German planes made widespread reprisal air raids. Attacks covered every important port under German or British control.

May 12—Air offensives continued on both sides with heavy attacks against Hamburg, Bremen, Emden, Rotterdam, London, Pembroke, and airfields in central and south England.

May 13—Germany declared that northern part of Red Sea was in combat zone and said that every ship passing through those waters exposed itself to destruction.

May 14—Vichy government ratified collaboration terms with Germany after Vice Premier Admiral Darlan told members of negotiations with Hitler.

May 15—French people were told by Vichy chief of state, Marshal Petain, that if France were to "surmount her defeat and preserve in the world her rank as a European and Colonial power," they must follow him in negotiations with Germany without mental reservation along path of honor and national interest.

—President Roosevelt said he believed French people still cherished ideals of Liberty and free institutions, and said he could not believe they would willingly accept agreement for "so-called collaboration."

—British House of Commons revealed that 437,000 British and Imperial troops were in France when Germans invaded Low Countries. Of that number, 384,000 were evacuated safely to England, 40,000 were taken prisoner by Germans, with 13,000 presumably casualties.

May 16—In answer to Roosevelt's condemnation of his collaboration policy with Germany, Marshal Petain declared: "In May, 1940, when France was left in the lurch by Britain, America did not see fit to answer her appeal. Today, France, anxious to preserve her position as a great power . . . has certainly the right to envisage with her victory the conditions of a common reorganization of Continental Europe. This in no way means that she has the intention of attacking Britain—much less the United States."

May 19-20—Italian Viceroy surrendered to British in Ethiopia. Some 38,000 troops laid down their arms.

May 20—Estimated force of 11,500 German airborne troops landed on Greek island of Crete.

—Robin Moor, American freight steamship, was sunk by submarine while bound for Capetown, South Africa. All survivors reached Capetown by June 16 and there were no reported losses.

—Germany notified United States and other governments to withdraw their diplo-

matic representatives from Paris by June 10.

May 24—In a short fight off eastern coast of Greenland, new German battleship, Bismarck, sank British battle cruiser, Hood. In running chase of three days, British cruiser Dorsetshire finally sank Bismarck after it had raced to within 500 miles of port of Brest. All but 100 of 2,400 officers and crew aboard went down.

May 26—President Roosevelt ordered second registration for Selective Service and Training Act on July 1. On May 27, the chief executive proclaimed "an unlimited national emergency."

May 31—First cargo of food sent to Britain under lend-lease arrived at English port. It included 120,000 pounds of cheese; 4 million eggs, and one thousand tons of flour.

JUNE

June 1—British communique announced: "After 12 days of what has undoubtedly been the fiercest fighting of this war, it was decided to withdraw our forces from Crete . . . some 15,000 of our troops have been withdrawn to Egypt, but it must be admitted that our losses have been severe." Germany announced occupation of Crete next day.

June 8—British troops crossed frontier into Syria with "object of eliminating German personnel and influence from certain areas in which they are securing a dominating position . . . If allowed to proceed unchecked . . . this might endanger security of Allied efforts in the Middle East and lead to Arab countries being seized by Axis powers." Free French forces under General De Gaulle crossed into Lebanon and French-mandated Syria and Lebanon were declared free and independent by a spokesman for De Gaulle.

June 14—By executive order, President Roosevelt froze all Axis money and other assets in United States. Italy froze all property belonging to United States in Italy. Two days later State Department ordered Germany to close her consular offices and related agencies in United States by July 10.

June 17—A Washington decree closed United States borders to estimated 330,000 German nationals, "pending further instructions."

June 18—Germany and Turkey signed ten-year neutrality and friendship pact.

June 19—Germany and Italy notified United States to close all consulates in those two countries and recall employees by July 15.

June 22—Germany declared war on Russia. At 5:30 A.M., Berlin time, Propaganda Minister Goebbels, speaking for Adolf Hitler, radioed to people of Germany and the world: "We are neither Englishmen nor Jews . . . the task is to safeguard Europe and thus save all. I have therefore today decided to give the fate of the German people and the Reich and of Europe again into the hands of our soldiers." The actual declaration of war was issued almost simultaneously by Foreign Minister Joachim von Ribbentrop. The Soviet ambassador in Berlin was told by Ribbentrop that "in view of the threatening of the German frontiers by the armies of Russia, Germany has taken military measures of defense." After a short while, Moscow announced that Russia and Britain were then in "full accord." Reasons cited by the Germans for going to war with Russia included seizure of Lithuania, Estonia, and Bukovina, border attacks on Germany, and a secret Russo-British alliance.

Italy declared war on Russia effective also at 5:30 A.M. June 22. Turkey proclaimed neutrality and Slovakia severed relations with the U.S.S.R. Germany sent her troops across the border together with troops from Rumania and Finland. Russia announced it had called up army classes from 1905 to 1918 inclusive and that martial law had been proclaimed in the border areas from the Arctic to the Black Sea, including the newly acquired states on the Baltic and the area around Leningrad. A strict blackout was imposed upon Moscow and the Moscow province.

June 23—Under the command of German Field Marshals Stegmann List, Fedor von Bock, Walther von Reichenau and Gerd von Rundstedt, German invasion was launched with widely-scattered air attacks on airfields, hangars, barracks, bridges, railways and other vital installations. Russian planes attacked points in East Prussia but Russian ground troops were repulsed in trying to seize Koenigsberg. In initial stages of invasion, German troops occupied Kolno, Lomza and citadel of Brest-Litovsk on Bug River. Naval action was reported in both Black and Baltic seas.

June 24—President Roosevelt announced that United States would give all aid possible to Russia and \$39,000,000 of Russian assets, frozen on June 14, were released by Treasury Department. British Foreign Secretary Anthony Eden announced that Britain would co-ordinate military and economic assistance with Russia in "our efforts in what is now beyond doubt the common task—the defeat of Germany."

June 26-27—Finland and Hungary joined Germany in war against Russia. Albania declared war on Russia two days later, June 29.

June 29—Germans claimed capture of Minsk as other Germans marched toward Moscow and Kiev.

June 30—German and Hungarian forces took southern Polish city of Lwow, (which Germans had taken and handed over to Russians in 1939.)

JULY

July 2—In radio broadcast, Premier Stalin declared that German armies, directed by "monster Hitler" had occupied Lithuania, most of Latvia, western parts of White Russia and Ukraine. By July 5, German armies, claiming to cover 25 miles a day, had reached Dnieper river in region of Orsha, 300 miles southwest of Moscow.

July 7—United States forces began joint occupation of Iceland with British who had landed on May 10, 1940.

German and Finnish troops, marching southeast from Petsamo took five towns and forced Russians from Enso. Russian planes made daily raids on Helsinki, capital of Finland.

July 12—German High Command claimed that German troops had broken Stalin line near Dnieper "on all fronts" in drives toward Leningrad, Moscow and Kiev.

—Mutual assistance pact was signed between Russia and Britain in Moscow.

July 18—German High Command said German troops had been in possession of Smolensk, 230 miles west of Moscow, since July 16, despite Russian counter-attacks. Russian forces were said by Berlin to have started retreat from Smolensk toward Moscow along main invasion route followed by Napoleon 129 years before.

July 22-29—Heavy fighting waged in re-

gions near Smolensk, Zhitomir, and on Besarabian front. At one time, Berlin claimed that German forces were within 43 miles of Leningrad.

July 30—Russia signed pact with Polish government-in-exile in London restoring to Poland areas taken by Russia in 1939.

July 31—Italian forces arrived on eastern front to fight with German troops against Russia.

AUGUST

Aug. 4—Moscow reported that Russian planes had shot down 53 German aircraft. Russian losses set at 21.

Aug. 6—Smolensk fell to German troops after nearly a month of fighting.

Berlin claimed that 895,000 prisoners had been taken since beginning of war with Russia and that 9,082 Russian planes had been destroyed, or captured. Official German News Agency in Berlin estimated Russian dead at 3,000,000.

Aug. 7—Soviet Information Bureau listed results as: 1,500,000 German casualties; Russia—600,000. Airplanes destroyed, German—6,000; Russian—4,000.

Aug. 8—British House of Commons was informed that 25,680 British and Imperial troops were left behind as dead or prisoners in evacuation of Greece and Crete.

Aug. 12—Russia and Britain agreed to assist Turkey if that country were invaded by Germany.

Aug. 14—President Roosevelt and Prime Minister Churchill, after meeting at sea off coast of Newfoundland, issued "Atlantic Charter" setting forth eight steps toward a "better future for the world."

Aug. 16—Russia and Polish government-in-exile restored diplomatic relations.

Aug. 17—Russian communique announced evacuation of Nikolaev and Krivoy Rog after heavy fighting.

Aug. 19—German war bulletins said Odessa was under siege and that all of Ukraine west of Dnieper had been taken by troops of Hitler.

Aug. 21—Russians destroyed huge Dnieper dam to keep it from falling into German hands.

Aug. 22—Residents of Leningrad were reported throwing up street barricades as old men and women organized into home defense units to ward off expected German thrust. Finnish troops captured a city 75 miles north of Leningrad. Russians admitted loss of Nikolop 50 miles east of Krivoy Rog on Dnieper bend.

Aug. 25—British and Russian forces invaded Iran.

Aug. 27—Capital of Estonia, Tallinn, was reported on fire as German and Finnish forces closed in on it. Declared Soviet communique: "Not only Tallinn but all Estonia is burning. There is not even a sack of oats left."

Aug. 31—Soviet war bulletin declared that Leningrad and Odessa were still holding out against German attacks.

SEPTEMBER

Sept. 4—First tanker carrying U.S. aviation gasoline to Russia arrived at Vladivostok.

—U.S. Navy reported that American destroyer, Greer, was attacked by submarine on way to Iceland with mail. When submarine's torpedoes missed their mark, Greer retaliated with depth charges. Results were not immediately known.

—Berlin claimed that German air and sea

forces sank 13,088,283 tons of British shipping during two years of war.

Sept. 5—U. S. freighter, *Steel Seafarer*, was sunk by a bombing plane in the Red Sea at the entrance to the Gulf of Suez. Survivors were picked up by British vessel.

Sept. 8—Under Canadian command, Canadian, British, and Norwegian troops landed, "without enemy interference" on Spitzbergen to keep enemy from utilizing rich coal mines.

Sept. 9—National Assembly in Iran agreed to adhere to British and Russian demands and turn over all Axis nationals to Allies and to yield to Allied occupation in north and southwestern regions.

Sept. 11—President Roosevelt ordered U. S. Navy to "shoot on sight" Axis raiders caught in "defensive waters." Referring to aggressive action by planes and submarines against U. S. vessels, President Roosevelt declared: "These Nazi submarines and raiders are the rattlesnakes of the Atlantic. They are a menace . . . they are a challenge to our sovereignty . . . It is no act of war on our part when we decide to act to protect the seas which are vital to American defense. Ours is solely defense. But let this warning be clear: From now on, if German or Italian vessels of war enter the waters, the protection of which is necessary for American defense, they do so at their own peril . . . The sole responsibility rests with Germany. There will be no shooting unless Germany continues to seek it."

Sept. 18—Moscow reported that defenders of Leningrad forced Germans back ten miles and recaptured three villages.

Sept. 19—Germans announced capture of Kiev, saying that four Russian armies had been encircled 125 miles east. Next objective, declared German war bulletin, was Kharkov, in Donets basin.

Sept. 24—Rome declared that German troops had reached suburbs of Leningrad.

Sept. 27—Germany claimed that 665,000 Russian prisoners had been taken in capture of Kiev.

—Reinhard Heydrich was appointed Acting Reich Protector of Bohemia and Moravia and began reign of terror against Czechs.

OCTOBER

Oct. 1—United States extended lend-lease to Brazil.

Oct. 3—After tour of Ukrainian battlefield, Hitler returned to Berlin and declared that "Russia is already broken and will never rise again." All Europe, he said, "had escaped destruction only by the skin of our (German) teeth."

Oct. 5—Russian official losses of war were listed as: 1,128,000 men (230,000 killed, 720,000 wounded, 178,000 missing); 7,000 tanks, 8,900 cannon; 5,316 airplanes. Official Moscow estimates of German losses: 3,000,000 men; 11,000 tanks; 13,000 cannon. Rumania listed her losses to date as: 20,000 dead; 76,000 wounded; 15,000 missing.

Oct. 8—German troops seized Orel, on road to Kharkov, 200 miles south of Moscow.

Oct. 9—Otto Dietrich, Reich press chief, announced after visit to battlefield, that last defending Soviet armies, those of Marshal Semyon Timoshenko defending Moscow, were locked in two circles. "For all military purposes," declared Dietrich, "Soviet Russia is done with. The British dream of a two-front war is dead."

Oct. 15—Moscow admitted withdrawal of Soviet troops from Kalinin, 100 miles northwest of Moscow.

Oct. 16—After a siege of two months, Rumanian Axis troops took Odessa.

Oct. 17—U. S. destroyer, *Kearny*, was damaged when it went to aid convoy being attacked by German submarines. *Kearny* was escorting convoy of merchant ships 350 miles southwest of Iceland. Torpedo hitting *Kearny* killed 11 men and injured 10 others. Other U. S. destroyers escorted *Kearny* to unnamed port.

Oct. 18—Berlin announced that German U-boats in Atlantic had sunk ten merchantmen and two protecting destroyers in convoy heading toward England. German High Command denied that German submarine had torpedoed the *Kearny*.

Oct. 19—Premier Stalin announced that Moscow and areas stretching for 60 to 75 miles west were under state of siege. Traffic was prohibited on streets at night, all saboteurs, spies and enemy agents were to be shot on sight and all Moscow residents were called upon to build up city defenses.

Oct. 21—Berlin announced that Leningrad was encircled. Freezing nights and snowstorms were slowing German advances on Moscow front.

Oct. 24—Kharkov, industrial center of Ukraine with population of 840,000 was captured by Germans.

Oct. 29—Russians said they had evacuated Kharkov "for strategic consideration at a time when the Soviet Command deemed it expedient, and not when the Germans wanted."

Oct. 30—U. S. destroyer, *Reuben James*, was sunk by Axis submarine while on convoy duty west of Iceland. Of crew of 145 officers and men, 98 were missing and believed dead, 2 were known to be dead, and 45 were rescued.

NOVEMBER

Nov. 1—German government denied charges by President Roosevelt that Germany had planned to organize Central and South America into five vassal states.

—London had first air alarm since July 27.

Nov. 3—Berlin said that Kursk, Russian provincial capital between Moscow and Leningrad, had been captured.

Nov. 7—Senate voted 50 to 37 to change 1939 Neutrality Act to permit American merchant ships to arm and to traverse combat areas to carry supplies to ports of belligerent nations.

Nov. 9—Berlin announced that Soviet warship and 17 transports had been sunk in Black sea by Axis bombers.

Nov. 14—Fifteen survivors of torpedoed freighter, *Bold Venture*, arrived in Boston with report that 13 vessels in convoy of 53 had been sunk on same night (Oct. 16) that the *Kearny* had been sunk, and that two other vessels were sunk a day or so before.

Nov. 19—British forces in Libya opened a surprise offensive and advanced 150 miles.

—Violent fighting took place in regions near Moscow and Rostov. In Crimea, Sevastopol was under daily attacks by German air forces and long-range artillery.

Nov. 21—Germans announced capture of Rostov on Don river, called "gateway to the Caucasus."

Nov. 25—Representatives of 12 governments met in Berlin and signed renewal of five-year old anti-Comintern pact. Technically it was not directed against Russia but against activities of Moscow Internationale. New members: Bulgaria, Croatia, Denmark, Finland, Rumania, Slovakia and Jap puppet government at Nanking. Old

members: Germany, Japan, Italy, Hungary, Spain and Manchukuo.

Nov. 28—Moscow announced that Rostov had been recaptured with 5,000 Germans dead. Berlin's version: "Occupation forces of Rostov, in compliance with orders, are evacuating central districts of the city to make the most thorough preparations for necessary measures against the population, which, contrary to international law, participated in fighting at the rear of German troops."

DECEMBER

Dec. 4—Finnish troops recaptured Hangö naval base from Russians.

Dec. 7—Japanese attacked Pearl Harbor, plunging United States into war. Between Dec. 7 and Dec. 20, 26 nations declared war on Japan and Axis. Dec. 8, Congress voted war declaration.

—Senate vote was 82 to 0. House vote was 388 to 1. Jeanette Rankin, (R-Mont.), cast dissenting vote. She also voted against war in 1917. On Dec. 11, in response to President Roosevelt's war message, Germany and Italy declared war on United States. Congress announced that state of war existed between Axis and United States. Senate: 88 to 0. House 399 to 0. Representative Rankin voting "present."

Dec. 12—President Roosevelt announced establishment of eight defensive sea areas along Atlantic and Pacific in which non-government shipping was prohibited. Four days later, Congress approved legislation giving President Roosevelt almost unlimited powers over defense contracts, reorganization of government agencies, and alien property.

Dec. 19—Following reverses on eastern front, Hitler announced that he had taken over as supreme commander of German armed forces, relieving General Field Marshal Walther von Brauchitsch.

Dec. 22—Prime Minister Churchill visited President Roosevelt in Washington to set up Anglo-American war machinery. United States-Great Britain War Council met for first time on Dec. 23.

Dec. 25—British troops recaptured Benghazi in Libya.

Dec. 26—In address to joint House and Senate session, Prime Minister Churchill said Allies would probably be able to launch world-wide offensive against Axis in 1943.

Dec. 31—Red Army's winter offensive began gaining on all fronts.

1942

Jan. 1—United Nations declaration signed in Washington. White House announced that 26 countries at war with one or more Axis powers, in a "declaration by the United Nations" pledged not to make separate armistice or peace and to employ full military and economic resources against enemy.

Jan. 5—Foreign Commissar Molotov, in note to all nations diplomatically represented in Moscow, charged that 52,000 persons were killed in Kiev by German forces in purge of all pro-Soviet factions.

Jan. 6—Moscow announced that Red Army had retaken 572 villages and killed 10,000 Germans in five days of new Soviet winter offensive.

Jan. 15—Pan American conference opened in Rio de Janeiro calling for united effort by all American nations against Axis powers.

Jan. 21—Field Marshal Rommel launched new offensive against British in Libya.

Jan. 26—U. S. expeditionary force landed in Northern Ireland, under command of Major General Russell P. Hartle.

Jan. 29—Rome announced recapture of Bengazi by German and Italian troops on Libyan front.

FEBRUARY

Feb. 1—In Norway, Germans installed Major Vidkun Quisling as Premier.

Feb. 9—Former French liner, Normandie, bought by United States and renamed, Lafayette, was gutted and overturned by fire in New York harbor.

Feb. 16—In first known appearance in West Indies, German U-boats attacked Netherlands islands of Aruba and Curacao, 700 miles east of the Panama canal.

Feb. 23—Enemy submarine shelled California coast near Colata, eight miles north and 12 miles west of Santa Barbara.

—Russian troops entered Kharkov and launched new offensive on central eastern front.

MARCH

Mar. 4—U. S. War Department announced that additional American troops had landed in Northern Ireland.

Mar. 11—Moscow announced that from Feb. 3 to Mar. 3 Russian forces recaptured 161 inhabited places from Germans, and that 49,700 German officers and men were killed near Kalinin.

Mar. 17—German batteries shelled Leningrad. From Mar. 17 to 31, German and Soviet troops engaged in heavy fighting on almost all fronts, both sides claiming heavy enemy casualties.

APRIL

Apr. 1-Apr. 12—British planes bombed Boulogne, France; German artillery shelled industrial suburbs of Leningrad; Axis planes raided military installations on Malta; British attacked industrial cities in northern France.

Apr. 14—British and American planes attacked Normandy.

—Pierre Laval, deposed 16 months before, was restored as Vichy premier.

Apr. 19—German planes made massed raids on Russian cities.

Apr. 22—British commandos, with blackened faces, after weeks of training made night raid near Boulogne, France, to obtain enemy information. Previous commando raids had been carried out on radio station at Bruneval, at St. Nazaire where naval docks were wrecked, on Lofoten islands off Norway and on Spitzbergen.

Apr. 25—Germans announced that French General Henri Giraud, 63, had escaped from prison and offered a reward for his capture.

MAY

May 4—British warships made surprise entrance on north coast of French island of Madagascar, landed troops, and gave support to forces which began to fight their way toward French naval base at Diego Suarez.

May 6—Axis submarines made first reported appearance in Gulf of Mexico where they sank two American vessels. There was no loss of life.

May 7—Yugoslavia Government-in-Exile sent memorandum to United Nations saying that German and Axis occupation forces had put to death more than 465,000 persons in Yugoslavia.

—German and Rumanian forces opened spring offensive against Russians on Kerch peninsula.

May 11-24—Germans drove Soviet forces from Kerch peninsula, in eastern Crimea.

During same period, violent battles raged between Russian and German troops south of Kharkov.

May 26—Twenty-year Anglo-Russian alliance signed.

May 31—British Air Ministry announced that on night of May 30-31, 1,130 R.A.F. planes made mass attack on Germany's Rhineland city of Cologne. Planes were sent out to drop bombs one every six seconds on city's industrial targets. 44 British planes were lost. Aerial photographs showed eight square miles of Cologne razed by more than 3,000 tons of bombs. Private advices reported that of Cologne's population of 800,000, from 20,000 to 50,000 persons had been killed or wounded.

JUNE

June 1—Describing it as a reprisal raid the Germans attacked bishopric seat of Canterbury in southeast England.

June 2—British made another mass attack on Essen, Duisberg, Oberhausen, and "elsewhere." 35 planes were lost out of 1,036-plane armada. Germans retaliated with attack on harbor installations at Ipswich, on coast northeast of London. Next day, another fleet of more than one-thousand Allied planes hit Bremen, Dieppe, and airdromes in France and low countries.

June 4—Reinhardt Heydrich, German protector of Bohemia and Moravia, was assassinated by Czech patriots near Prague. Berlin claimed that pistol and anti-tank bomb used in assassination were of British make.

June 10—In retaliation for the murder of Heydrich, the Germans announced that village of Lidice, located near scene of assassination had been wiped out. According to a Berlin radio broadcast, "all male adults of the town were shot, while the women were placed in a concentration camp, and the children were entrusted to appropriate educational institutions. The township was leveled to the ground and the name of the community extinguished. The inhabitants numbered 483."

June 18—Prime Minister Churchill arrived in Washington for further Anglo-American conferences.

—London announced withdrawal of British troops from El Adem and Sidi Rezegh, south and southeast of Tobruk, in Libya.

June 21—German troops under command of Field Marshal Rommel captured Tobruk and pursued British troops eastward into Egypt until halted at El Alamein. Berlin reported that 25,000 British troops and several generals were taken prisoner. Fierce fighting was reported on eastern front, particularly near Kharkov on north and Sevastopol on Crimean front.

June 24—Russian marines made surprise landing on southern Crimean coast.

June 25—Major General Dwight D. Eisenhower arrived in London to assume command of U. S. forces in the European theater.

June 27—British forces, according to Berlin, were being steadily pushed eastward in North Africa. German High Command announced that German troops had reached points 115 miles inside Egypt within 150 miles of the Nile.

June 28—London announced that U.S. aircraft participated in raids against Matruh area where British planes attacked Germans pushing eastward across north Africa.

—Italian planes bombed Gibraltar.

June 30—Axis forces in Egypt advanced to coastal point of El Daba, 75 miles east of Matruh and 100 miles from Alexandria.

JULY

July 1—Sevastopol was captured by Germans after weeks of violent fighting. During the entire siege, the Germans said 50,000 tons of steel and iron had been hurled into the city in addition to 24,000 tons of bombs dropped by the Luftwaffe.

July 2—German and Italian troops captured El Alamein, last British fortification on road to the Nile.

July 4—American air units participated in their first bombing raid upon Axis Europe.

July 5—German and Italian planes raided Alexandria.

July 7—German High Command announced capture of Voronezh, east of the Don on Moscow-Rostov railway, 130 miles east of Kursk.

—Major General Carl A. Spaatz was appointed commander of U.S. Air Force in Europe.

July 20—German High Command reported that Russian troops, after fierce fighting, failed to recapture Voronezh. German planes bombed an armament plant northeast of London and British aircraft raided industrial cities of northern Germany.

—Russian planes raided East Prussian port of Koenigsberg, on Baltic.

July 21—London radio said larger air raid shelters would be closed after August 3 because German air raids had diminished. London had not been attacked in several months.

July 22—Berlin announced that Russian organized resistance had collapsed in Rostov. British planes raided Duisberg and cities in industrial Ruhr for fiftieth time.

July 27—Moscow admitted evacuation of Rostov and Novocherkassk on north side of Don river saying that Russian forces had retreated south. 600 R.A.F. planes made 91st air attack on Hamburg.

July 28—German troops, advancing across lower Don, reached town 15 miles from Don in drive to cut Stalingrad-North Caucasian Railroad.

—President Roosevelt announced that there were 4,000,000 men in U.S. armed services.

July 30—German planes made their first attack on Cairo, causing slight damage but no deaths. Another German air raid was made on August 1 killing five persons in Cairo area.

AUGUST

Aug. 2—British Air Ministry announced that during July, 424 Axis planes were destroyed over Britain and western Europe and in Middle East. Britain's losses were listed as 432.

Aug. 9—Germans took Maikop oil fields in Russian Caucasus.

Aug. 17—In first mass air raid by American B-17's (Flying Fortresses), bombs were dropped on Rouen, Dunkirk, and Cherbourg.

Aug. 19—Canadian, British, and U.S. forces made large-scale commando raid on Dieppe, France; half of attacking force was lost. United States Ranger battalion got baptism of fire in nine-hour assault.

Aug. 21—German troops pierced Russian line defending routes to Stalingrad. Berlin announced a week later that Stalingrad and rear communication lines of Russian forces were being pounded by German planes day and night.

SEPTEMBER

Sept. 2—Vichy reported German troops within 12 miles of Stalingrad. German troops were said to be drawing up fresh reserves.

Sept. 6—Berlin announced that "Novorossiisk, last harbor of importance for Soviet Black Sea Fleet," had fallen.

—Under command of General Sir Harold Alexander, British Eighth Army repulsed Field Marshal Rommel's efforts to break through the El Alamein defense line in Egypt. Germans were pushed back through mine fields which they overran on night of August 30-31.

Sept. 7—Germans began their frontal attack on Stalingrad.

Sept. 8—Germany announced incorporation of Luxembourg into Reich.

Sept. 14—British planes made their 100th air raid on Bremen.

Sept. 16—Germany reported sending fresh reserves to bolster troops fighting in hand-to-hand battles with Russians at Stalingrad.

Sept. 18—British Air Ministry revealed that from May 30 to September 16, 639 planes had been lost in 43 different raids against German targets.

Sept. 21—Inter-Allied Information Committee in London announced that 207,373 persons had been put to death in France on orders by German command. Vichy announced that 70 additional hostages at Bordeaux had been executed.

Sept. 29—U.S. Navy disclosed that more than 2,301 officers and men of Merchant Marine were dead or missing as result of enemy actions at sea.

OCTOBER

Oct. 4—Premier Stalin, in signed letter answering questions of Associated Press correspondent, H. C. Cassidy, said: "as compared to the aid the Soviet Union is giving to the Allies by drawing upon itself the main force of the German Fascist armies, the aid of the Allies to the Soviet Union has so far been little effective." In answer to another question, Stalin declared: "I think that the Soviet capacity of resisting the German brigands is in strength not less, if not greater, than the capacity of Fascist Germany or any other aggressive power to secure for itself world domination."

Oct. 11—Siege of Stalingrad went into its 48th day with both Germans and Russians fighting fiercely to make slight gains.

Oct. 13—Kiel was attacked for 70th time by British planes dropping 4,000 ton bombs.

Oct. 14—After 31,000 mile trip around world, Wendell Willkie arrived at Washington to confer with President Roosevelt.

Oct. 24—British planes made new attacks on cities in northern Italy.

Oct. 26—In a broadcast speech on his round-the-world trip, Wendell Willkie urged second fighting front in Europe. "Our Western World and our presumed supremacy are now on trial."

NOVEMBER

Nov. 4—Germans and Italians began retreating from Egypt after their defeat in trying to pierce El Alamein line.

Nov. 7—On Nov. 7-8, Anglo-American Expeditionary forces landed in Algeria and French Morocco at night. U.S. War Department communique announced action was necessary because of increased Axis menace to that territory. U.S. Army, Navy, and Air Forces were combined with units of Royal Navy and Air Force which covered landings. Commander-in-chief of U.S. Army was Lieutenant General Dwight D. Eisenhower. President Roosevelt sent messages to Marshal Petain and Spanish and Portuguese governments informing them of North African

landing and assured them that U.S. had no intention of retaining territory after war was over.

Nov. 7—British troops pursuing retreating Axis forces in Egypt and Libya captured a total of 20,000 enemy troops, 350 tanks, 400 guns, and "many thousands of vehicles." British advance continued.

Nov. 8—In reply to President Roosevelt's message informing him of North African invasion, Marshal Petain announced that diplomatic relations between United States and France had been severed.

Nov. 10—American troops captured Oran; French Admiral Francois Darlan ordered end of French resistance and cast his lot with the Allies.

Nov. 11—Germany occupied southern France.

Nov. 15—Admiral Darlan appointed General Henri Giraud as commander of French forces in North Africa. Marshal Petain denounced Giraud as traitor and called upon French troops to ignore his orders.

Nov. 22—Moscow announced that "a few days ago our troops at the approaches to Stalingrad went over to the offensive against German Fascist troops." London announced that Bengazi had been recaptured by British for third time, virtually ending Axis control in Libya.

Nov. 27—Greater part of French Fleet was scuttled or burned by crews at Toulon to prevent ships falling into German hands.

DECEMBER

Dec. 4-5—German counter-offensive in Tunisia drove Allies from Terbourba and Djedeida.

Dec. 21—Admiral Darlan was assassinated in Algiers.

Dec. 25—Red Army forces opened counter-offensive against Germans in Nalchik area of Caucasus.

Dec. 30—Moscow reported that 22 German and Rumanian divisions had been encircled near Stalingrad and that Kotelnikov had been recaptured.

1943

Jan. 2—Velikiye Lukki on central front was captured by Russians.

Jan. 14-21—President Roosevelt and Prime Minister Churchill met at Casablanca, French Morocco. At end of conference, four-point statement was issued calling for "unconditional surrender" of both Germany and Japan. Objectives, as pointed out by President Roosevelt were: 1) To maintain initiative obtained in closing days of 1942 and extend it; 2) To dispatch all aid to Russian front with purpose of whittling down German manpower and munitions; 3) To send assistance to Chinese armies; and 4) To unite French in war against Axis. Said President Roosevelt: "The only hope of peace lies in depriving Germany and Japan of all military power."

Jan. 16—British planes hurled 4-ton bombs on Berlin.

Jan. 18—German siege of Leningrad was broken and Russians captured Schluesselburg.

Jan. 23—British troops captured Tripoli.

Jan. 31—German generals surrendered at Stalingrad as Russians captured Maikop.

FEBRUARY

Feb. 6—Russian Forces drove to Black Sea and cut off Germans in Caucasus.

Feb. 8-16—Russians captured Kursk, Belgorod, Rostov, and Kharkov.

Feb. 14—Rommel opened an offensive in Tunisia.

Feb. 21-25—In furious fighting on north African front, Allied troops won battle of Kasserine Pass in Tunisia.

Feb. 24—Round-the-clock bombing of German industrial, transportation, and communication cities began with a heavy Allied attack on Wilhelmshaven.

MARCH

Mar. 3—Russians captured Rzhev.

Mar. 14—In powerful counter-offensive, Germans recaptured Kharkov as violent fighting raged on Kharkov-Dniper-Donets front.

Mar. 16—To offset German offensive in Tunisia, Allies launched pincer drive to trap Rommel's forces. By Mar. 28 British had broken Rommel's Mareth line and captured port of Gabes.

APRIL

Apr. 5—Allies launched wide-scale air offensive against Nazi bases in Mediterranean, while other Allied warplanes from Britain bombed Renault works in Paris.

Apr. 26—Russia severed diplomatic relations with Polish government-in-exile.

MAY

May 4—Air attack on Dortmund opened aerial blitz against German industries of Ruhr valley.

May 7—Using initiative to full advantage, Allies captured Tunis and Bizerte. By May 12, Allied communique announced that Axis organized resistance in Tunisia had ended.

May 16—R.A.F. planes breached dams of Ruhr valley to flood Germany's industrial districts.

JUNE

June 3—French Committee of National Liberation was set up in Algiers.

June 12—King George VI of Britain arrived in North Africa for tour.

JULY

July 10—Following successful conclusion of North African campaign, Allies launched surprise invasion of Sicily to open long-range campaign aimed at attacking Italy. Initial success was achieved, but Germans resisted fiercely as soon as landings were completed.

July 12—Russians launched their great summer offensive to regain territory lost to Germans in closing days of spring campaign.

July 19—Rome was bombed by Allied planes. Second attack was carried out on August 13.

July 23—After violent battles, Americans finally captured Palermo, in Sicily.

July 24-Aug. 2—Anglo-American planes devastated Hamburg with saturation bombing raids. R.A.F. made almost nightly attacks on Berlin.

July 25—Mussolini was ousted as il duce and premier of Italy. Marshal Pietro Badoglio succeeded him.

AUGUST

Aug. 1—U.S. planes from Mediterranean bases raided Ploesti oil fields in Rumania.

Aug. 5—Major victories reported from two fronts: Russian troops recaptured Orel and Belgorod, and Americans seized Catania in Sicily.

Aug. 9—German-Italian conference at Verona ended.

Aug. 11-24—British-American war conference was held at Quebec with both sides pledging allout support of war and "unconditional surrender" as only objective.

Aug. 15—American planes attacked Ger-

man messerschmitt plant at Vienna.

Aug. 17—Allies captured Messina, ending 38-day Sicilian campaign.

Aug. 23—Russians recaptured Kharkov which they had won on Feb. 16 and then lost again to Germans on March 14.

Aug. 28—King Boris of Bulgaria died in mysterious circumstances.

Aug. 29—Germany interned royal family in Denmark and proclaimed martial law.

SEPTEMBER

Sept. 3—British troops invaded Italy. Landing point was in region of Calabria at extreme southern tip of Italian mainland.

Sept. 8—According to secret armistice of September third, Italy announced that she had surrendered unconditionally. But German troops and Italian Fascists continued to fight.

—Russians freed Donets basin by capturing Stalino.

Sept. 9—Allies landed south of Naples, waging battle of Salerno from Sept. 9 to 16. The bulk of Italian fleet escaped to Allied ports, but battleship Roma was sunk.

Sept. 12—British troops established so-called Taranto-Brindisi line, cutting off "heel" of Italy.

Sept. 15—Mussolini was proclaimed head of German-sponsored government of Nazi-dominated Italy.

Sept. 16—Russians captured Novorossiisk, also within the next ten days, Bryansk, Poltava, Smolensk.

Sept. 19—A four-month lull in the Battle of the Atlantic ended with a submarine-convoys clash, costing the Allies ten vessels. —The Germans were driven from Sardinia.

Sept. 22—Allied two-man submarine immobilized the huge German battleship, Tirpitz.

Sept. 28—In continued drives up the heel of Italy, the Allies captured Foggia, Pompeii fell the next day. Foggia was set up as an air-base for the American Fifteenth Air Force which conducted widespread air offensives against northern Italy and the Balkans.

OCTOBER

Oct. 1—American Fifth Army troops occupied Naples.

Oct. 3—British made amphibious landing at Termoli, Italy.

Oct. 4—Allies drove Germans from island of Corsica.

Oct. 7—Russian troops crossed middle Dnieper river. In Naples, delayed action mine left by Germans exploded, killing 100 persons.

Oct. 8-9—American troops of Fifth Army seized Capua, next day Caserta.

Oct. 13—Italy declared war on Germany and was regarded as a "co-belligerent" not having full Allied status.

Oct. 14—In heavy U.S. raid on German ball-bearing plants at Schweinfurt, 60 Flying Fortresses were lost and 593 men were reported killed or missing.

Oct. 15-16—Allies crossed Volturno river in Italy to break German's Volturno-Calore defense line.

Oct. 19-30—Secretary of State, Hull, Foreign Secretary Eden, and Foreign Commissar Molotov attended three-power conference in Moscow.

NOVEMBER

Nov. 1—Russian troops captured Perekop, trapping large force of Germans in Crimea.

Nov. 3—Allies enveloped Mt. Croce, captured Isernia, Italy, next day.

Nov. 6—Russians captured Kiev.
Nov. 9—United National Relief and Rehabilitation Administration was established with 44 nations subscribing.

Nov. 13-19—Zhitomir changed hands twice in battle of Kiev bulge with Germans retaining control until Dec. 31.

Nov. 18—R.A.F. planes launched major air offensive against Berlin, staging eight large-scale attacks between November 18 and December 31.

Nov. 22-25—President Roosevelt met and conferred with Prime Minister Churchill and Generalissimo Chiang Kai-Shek in Cairo where they pledged all-out effort to defeat Japan, with intensified action after fall of Germany.

Nov. 26—Russians captured Gomel and launched new offensive to north.

Nov. 28-Dec. 1—Roosevelt, Churchill, and Stalin conferred at Tehran. In joint statement they expressed their determination that three nations represented "shall work together in the war and in the peace that will follow."

DECEMBER

Dec. 14—Russians captured Cherkassy on middle Dnieper and attacked below Nevel next day.

Dec. 24—General Eisenhower was appointed to lead Allied invasion of western Europe. Air offensive continued with the number of aircraft increasing to 3,000 in round-the-clock operations.

Dec. 26—British sank German battleship Scharnhorst off coast of Norway.

Dec. 28—British troops in Italy captured Ortona.

Dec. 31—Russian forces seized Zhitomir in a 168-mile breakthrough in Kiev bulge.

1944

Jan. 1—Russians swept through 300 inhabited places along 200-mile front west of Kiev. Advance carried them to within 27 miles of Polish border northwest of Zhitomir.

—Lt. Gen. Ira C. Eaker, retiring commander of U.S. Eighth Air Force, announced in London that American planes flew 64,000 combat sorties over Europe in 1943; destroyed 4,100 German fighters; cut German fighter plane production by "nearly 40 percent;" and dropped 55,000 tons of bombs. U.S. losses: 976 planes in 110 missions.

Jan. 2—Russians advanced to within 13 miles of Poland.

—In their 100th raid on Berlin, British planes dropped 1,120 tons of bombs and made diversionary raids on cities in western Germany and northern France.

—Allied headquarters in Algiers announced Northwest African Strategic Air Force shot down 3,146 enemy planes and destroyed 2,426 others on ground during 1943. In same period, NASAF destroyed 101 enemy ships and dropped 74,000 tons of bombs. Allied losses: 819 planes (See Jan. 1).

Jan. 3—Commander of Army Air Forces, General Henry H. Arnold, declared that to make Allied invasion of western Europe as cheap as possible, Allied air forces intended to knock out German Luftwaffe.

Jan. 4—Moscow reported that General Nikolai Vatutin's First Ukrainian Army crossed pre-war border of Poland.

Jan. 5—After five days of fierce fighting, Russians captured Berdichev, important rail center 100 miles southwest of Kiev.

—97 Nazi planes shot down by U.S. Flying Fortresses in attacks against Kiel, Elberfeld, airfields near Bordeaux and Tours, France. American losses: 25 bombers, 12 fighters.

—Polish-government-in-exile announced that Polish underground forces in Poland were not to hinder Russian advance.

—Lt. Gen. Sir Oliver Leese became commander of British Eighth Army in Italy to succeed General Montgomery.

Jan. 6—First Ukrainian Army captured town ten miles inside Polish prewar border. Union of Polish Patriots in Moscow called upon Polish underground to rise against Nazi forces.

Jan. 7—Moscow announced new Russian offensive in upper part of Dnieper bend. Second Ukrainian Army, commanded by Gen. Ivan S. Konev, began offensive on Jan. 5 and in three days encircled Kirovograd and liberated more than 120 communities on a break-through front 62 miles long and 25 miles deep. First Ukrainian Army on Polish frontiers advanced 14 miles westward.

—Gen. Henry H. Arnold, chief of U.S. Army Air Forces, said Berlin was "75 percent destroyed."

Jan. 8—Second Ukrainian Army captured Kirovograd in southern Ukraine.

—German strengthened defenses in France and Low Countries by bringing their estimated 45 divisions up to full strength. Nazis claimed to have 7,700 field guns and 3,000 anti-tank guns spread from "Narvik to Spain." Field Marshal Gen. Erwin Rommel reported as commander of invasion-defense armies.

Jan. 9—Maj. Gen. Walter Bedell Smith was appointed chief of staff to General Eisenhower.

Jan. 10—Moscow reported remnants of five Nazi divisions were wiped out when they refused to surrender north of Kirovograd, with German losses numbering 8,000 dead.

Jan. 11—Moscow declared Russia prepared to guarantee "strong and independent Poland" provided Polish government would agree to accept Curzon line as boundary between Poland and Russia and abandon its demands on eastern frontier. Treaty of Riga, signed in 1921, at end of Russo-Polish war, was described by Moscow as "unjust." It had created boundary line which existed between Poland and Russia from 1921 until 1939.

—Count Galeazzo Ciano, Marshal Emilio de Bono, and three other Italian fascists, convicted of treason, were executed by a firing squad.

—Further details on Kirovograd, according to Moscow, raised number of German dead from 8,000 to 15,000.

—More than 1,300 U.S. heavy bombers and fighters made daylight raids on German aircraft assembly plants in Oschersleben, Halberstadt, and Brunswick. At least 1,000 German planes rose in air battles that lasted for hours across hundreds of miles. Berlin said attacks "did not achieve any concentrated effect," and claimed destruction of 136 American planes, including 124 heavy bombers. London placed Allied losses at 60 bombers and 5 fighters and reported that Germany lost 152 planes.

Jan. 14—U.S. announced new improved Mustang Fighter, North American P-51B, which had longest range of any fighter and could operate 400 miles from base.

Jan. 15—U.S. and British planes, number 1,100, raided French invasion coast and aircraft plants in Brunswick. In Brunswick attack, 2,240 tons of bombs were dropped in 23 minutes.

Jan. 15—U.S. offered to act as mediator in Russo-Polish boundary dispute. But two

days later, Russia rejected Poland's counter-offer to settle border problem and refused to renew diplomatic relations with Polish government-in-exile.

Jan. 16—General Eisenhower arrived in London to take over as commander of Allied invasion armies.

—Moscow announced that in period from Dec. 24 to Jan. 13, First Ukrainian Army alone killed 100,000 Germans west and south of Kiev; and it was revealed that Russia had opened a new offensive 70 miles east of Latvian border.

—British Air Ministry announced that R.A.F. raid on Dec. 3 destroyed almost "one-third of Leipzig."

Jan. 17—Lt. Gen. Omar Bradley was named senior ground commander of American troops in Great Britain. Army Air Corps chief, Gen. Henry Arnold, defended U.S. bomber losses over Europe by saying yardstick of success was measured by amount of damage wrought on German industries.

—Soviet Communist party organ, Pravda, carried dispatch from a correspondent in Cairo saying that on basis of Greek and Yugoslav information, "a secret meeting of two leading British personalities with Ribbentrop took place not so long ago in one of the coastal towns of the Iberian peninsula. Purpose of meeting was to clarify conditions of separate peace with Germany." The British Foreign Office declared: "There is no truth whatever in the story," and next day report was officially denied by Soviet News Agency, Tass.

Jan. 18—Red Army troops, in new offensive west and southwest of Leningrad, cut off Germany's corridor to Gulf of Finland. Berlin announced evacuation of German forces from Novogorod, on Russian front 100 miles south.

Jan. 20—Russians captured Novogorod in drive toward Baltic states.

—British troops on Italian front drove to outskirts of Minturno, two miles inland from Gulf of Gaeta.

Jan. 21—2,200 tons of bombs were dropped by U.S. and British planes in raids on Pas-de-Calais area of northern France.

—During night, in largest raid to date on Berlin, 800 R.A.F. planes dropped 2,575 tons of bombs on German capital.

Jan. 22—American, British, and Greek forces stormed ashore on west coast of Italy 32 miles south of Rome in pre-dawn assault. Anzio was captured. French and Netherlands naval vessels supported landing and fought off German torpedo and fighter aircraft.

Jan. 23—Maj. Gen. John C. H. Lee was named deputy commander to General Eisenhower.

Jan. 26—Moscow declined to accept United States invitation to mediate in Russo-Polish border dispute.

Jan. 27—Fighting around Anzio beach-head in Italy increased in intensity as American and British troops pushed back crack Nazi panzer units southwest of Littoria.

—U.S. Secretary of War Stimson announced that between five and six million men of American Armed forces would be overseas by end of 1944.

Jan. 28—Lt. Gen. Mark Clark, commander of American Fifth Army in Italy issued an order forbidding attacks on Italian church property despite fact that it hindered Fifth's advance.

Jan. 29—Novosokolniki captured by Russians in drive 230 miles south of Leningrad.

Jan. 30—Huge fires reported in Berlin following third British air attack in four

nights. 1,680 tons of bombs were dropped on German capital during night of Jan. 30.

In attempt to bolster "anti-Bolshevik" movements, Hitler warned that Russian victory would mean destruction of Europe while German victory would mean its preservation.

Jan. 31—Fifteenth Army Air Force base in Italy announced that U.S. bombers and fighters during a 72-hour period, destroyed 268 German planes.

FEBRUARY

Feb. 1—Supreme Soviet unanimously approved Foreign Commissar Molotov's recommendation to alter Soviet constitution. Under new terms, each of 16 constituent republics would be allowed to have diplomatic representatives abroad and could create its own army formations.

—Air Ministry in London announced that R.A.F. had dropped 18,480 tons of bombs on Reich in January—of which 10,000 were hurled against Berlin.

Feb. 2—In Russian drive toward Baltic, Soviet troops crossed prewar border of Estonia and headed toward rail center of Narva.

Feb. 3—Falangist cabinet of Generalissimo Franco of Spain ratified policy of strict neutrality.

Feb. 4—U.S. bombers, in their sixth daylight attack in seven days, raided Frankfurt-on-the-Main.

Feb. 5—Moscow announced that First Ukrainian Army captured Rowne and Luck in smash deep into Poland on 65-mile front.

Feb. 8—Third Ukrainian Army, under command of Gen. Rodion Malinovsky, recaptured manganese center of Nikopol which Russians had lost to Germans in August of 1941. Moscow said Russians battled a force of 75,000 Nazis to retake city.

—Allied aircraft flew more than 1,500 sorties over Cassino, in Italy, to support ground troops trying to break through German lines.

Feb. 9—In joint communique issued in Washington and London, President Roosevelt and Prime Minister Churchill declared that German U-boat sinking of Allied merchant ships was lower in January, 1944, than in any month of entire war.

Feb. 12—Russo-Polish boundary dispute became more of crisis when Union of Polish Patriots, sponsored by Russia, announced that it had already organized a national council in Poland. It was reported in London that Russia was willing to have Poland annex a large portion of East Prussia as a compensation for accepting Curzon line as border.

Feb. 13—In rapid five-day advance, Moscow announced that Russian troops had captured 800 towns and villages in freeing virtually all of east shore of Lake Peipus.

Feb. 14—Dr. Juho Paasikivi, Finnish emissary, arrived in Stockholm to discuss, reportedly, peace terms with Russian representatives.

Feb. 15—In eight separate waves, 226 Allied planes bombed Cassino abbey in Italy. President Roosevelt said it was necessary to attack it because Germans were using it as artillery observation post and had entrenched artillery units inside it.

Feb. 17—One thousand American soldiers were lost when a troopship was sunk in north Atlantic. Another thousand were rescued.

—In a special order, Premier Stalin announced that 52,000 Germans had been killed and 11,000 were captured when Rus-

sians wiped out ten Axis divisions trapped in Cherkassy pocket.

Feb. 20—Armada of 2,000 American heavy bombers and fighters slashed and bombed their way through eight German cities: Leipzig, Oschersleben, Gotha, Bernburg, Brunswick, Halberstadt, and Tutov in Germany, Poznan in Poland. At same time, R.A.F. planes seared Stuttgart in a 2,240 ton bombing attack.

Feb. 21—Six Nazi divisions hammered Allied positions at Anzio without breaking through Allied lines.

Feb. 22—Third Ukrainian Army captured steel center and rail hub of Krivi Rog.

Feb. 26—Helsinki, capital of Finland, was attacked by 600 Russian planes which devastated large parts of city.

Feb. 29—Moscow revealed that Russia had offered peace to Finland on three conditions: that Finland break with Germany; that she help Red Army troops intern Nazi forces in Finland; and that Finnish troops be withdrawn to the 1940 border.

MARCH

Mar. 1—Russian troops, driving to the Baltic, crossed Narva river and severed railway line between Narva and Tallinn.

Mar. 2—Britain stopped all shipments of military supplies to Turkey.

Mar. 3—President Roosevelt said that Italian Fleet would be distributed equally among Russia, Britain, and United States.

Mar. 4—American heavy bombers raided Berlin for first time.

Mar. 5—Marshal Gregory Zhukov became commander of Soviet forces on First Ukrainian Front. He replaced Gen. Nikolai Vatutin who was reported in ill health.

—28 clergymen and others protested in American magazines against Anglo-American air raids on German cities.

Mar. 6—68 U. S. heavy bombers and 11 fighters were lost when 800 American planes pierced through heavy Nazi fighter opposition to bomb Berlin. 123 enemy planes were shot down.

—Allied headquarters announced that 24,000 Germans were killed, wounded or taken prisoner on Anzio beachhead in Italy.

Mar. 10—Prime Minister de Valera refused to comply with U. S. request that he oust German and Japanese diplomats accused of conducting espionage activities.

—Marshal Konev's forces opened a new offensive in the Ukraine, seized city of Uman, and killed, by Moscow account, 20,000 Nazi troops.

Mar. 12—In order to conceal invasion maneuvers, Britain suspended all travel between Britain and Ireland indefinitely.

—Pope Pius XII appealed again to belligerents not to turn Rome into battlefield.

Mar. 13—Kherson, on the Black sea, fell to Russian troops after fierce fighting.

—Secretary of State Hull said that Allied troops would try, as far as possible, to avoid destroying religious shrines in Rome, but if Germans used them to their advantage, they would be responsible for consequences.

Mar. 14—3,500 tons of bombs were dropped on Cassino and nearby points as Allies tried to blast Germans out of their mountainous defenses.

Mar. 17—Secretary of State Hull said that Moscow, in announcing that Russia intended to recognize Badoglio regime in Italy, did not consult American state department.

—American planes bombed Vienna for first time from bases in Italy.

Mar. 19—Russians surged into Bessarabia after clearing Nazis from 62 miles of Dniester river and capturing Mogilev-Podolsk.

Mar. 20—To stiffen Hungarian resistance to Russian threat into Balkans, Hitler's armies occupied Hungary.

Mar. 21—Finland rejected Russia's recent peace offer and Russia blamed Finnish government for breakdown in negotiations.

—German troops reoccupied Continental Hotel in Cassino after repulsing third Allied attack.

—Maj. Gen. Alexander Patch replaced Lt. Gen. George S. Patton, Jr., as commander of the American Seventh Army.

Mar. 23—In round-the-clock air offensive, 5,000 Allied planes hurled 6,720 tons of bombs on German cities.

Mar. 24—R.A.F. lost 73 bombers in dropping 2,800 tons of bombs on Berlin and Kiel.

Mar. 26—Russian troops crossed into Rumania after crossing Prut river.

Mar. 27—Polish Telegraph Agency said Polish government-in-exile had directed Polish underground forces to cooperate with Russians in military operations.

Mar. 28—Russian forces recaptured Black Sea naval base of Nikolayev.

Mar. 30—U. S. War Department tabulated Army Air Force losses as 2,885 lost during 1943 compared with 11,042 German planes destroyed.

APRIL

Apr. 1—50 persons were killed and 150 others were wounded when U. S. planes bombed Swiss town of Schaffhausen by mistake.

Apr. 2—Following arrival of Russian troops in Rumania proper, Soviet Foreign Commissar Molotov announced that Russia had no territorial claims on Rumania and that it would not try to change Rumania's social structure.

—Production of American airplanes reached record peak during March of 9,118.

Apr. 5—Wendell Willkie withdrew as Republican presidential nominee following his defeat in Wisconsin primaries.

Apr. 6—It was announced in London that Allied bombing raids on Balkan targets were made at request of Russia.

Apr. 7—In a special decree, Hitler appointed German Propaganda Minister, Joseph Goebbels, "president of Berlin."

Apr. 10—Russian troops recaptured Odessa.

—During a 48-hour period, more than 3,000 American and British planes pounded airfields, repair shops, railroads and other vital military targets across Germany.

Apr. 12—King Victor Emmanuel of Italy announced that he would retire in favor of his son, Crown Prince Umberto, as soon as Allies entered Rome.

Apr. 13—More than 3,000 American planes took off from bases in Britain and Italy and bombed military targets in Germany, Hungary, Belgium, France, and Yugoslavia. 134 German planes were shot down, 58 American planes were lost.

—United States and Britain asked Sweden to stop selling ball bearings to Germany.

—German resistance in Crimea crumbled under pressure from Soviet troops which recaptured three important coastal cities.

Apr. 14—French Committee of National Liberation removed Gen. Giraud as commander-in-chief of French armed forces and placed him on reserve list.

Apr. 16—Soviet Information Bureau announced that Marshal Konev's Second Ukrainian Army killed 118,400 Germans and captured 27,393 others in a 41-day drive ending April 16. Crimean port of Yalta was captured by Soviets.

Apr. 17—Travel by foreign diplomats in Britain was banned to prevent leakage of Allied invasion plans.

—Government of Marshal Badoglio resigned. King Emmanuel instructed it to reorganize on a broader basis.

Apr. 20—Allied planes from Britain methodically bombed and strafed so-called "invasion coast of northern France." Some 2,000 planes took part.

Apr. 21—It was announced that Lt. Gen. Patton—recently relieved of Seventh Army command—had been assigned to the European theater of operations. But his command was not specified.

—Marshal Badoglio announced establishment of new cabinet. He designated himself as premier and Foreign Minister and said representatives of all major Italian political parties were included.

Apr. 22—Sustained air offensive carried 1,000 heavy American bombers into their sixth straight day of attacking German rail yards at Hamm.

Apr. 27—More than 8,400 tons of bombs were dropped by 4,500 Allied planes which thundered over western Europe on a 24-hour basis.

MAY

May 1—Premier Stalin called upon people of Bulgaria, Rumania and Hungary to overthrow their governments and seek Allied assistance. And he urged United States and Britain to open a second front to crush Germany.

—498 U. S. men and officers were lost when an American troopship was sunk in Mediterranean.

May 2—During April British and American planes rained 81,400 tons of bombs on Germany and German occupied territories.

May 3—A British spokesman said that Allied bombers had disrupted Nazi rail communications in 100-mile zone from Bay of Biscay to Cologne. The British also revealed that low-level "pinpoint" attack by R.A.F. planes resulted in destruction of target house in Hague where thousands of documents vital to Nazis were stored.

May 7—In a three-way punch against Axis, 2,000 U.S. heavy bombers attacked Berlin; another 1,500 Allied planes raided military targets in Belgium and northern France; and 1,000 from bases in Italy hit Bucharest and other objectives in Balkans.

May 9—The Russians recaptured Sevastopol.

May 18—Cassino, Italy, fell to Allied troops after weeks of stalemated fighting. It was confirmed that the Nazis used the ancient shrine as an artillery post and that parts of the abbey had been used to house Nazi troops.

—American Army Air Force chief, General Arnold, revealed that from Dec. 7, 1941, to May 15, 1944, U.S. planes destroyed 20,174 enemy planes. American losses during same period were 6,154.

—German Field Marshal Karl von Rundstedt was announced by D-N-B news agency as supreme commander of German troops on western front.

May 19—Allied troops in Italy finally broke so-called "Gustav" line and captured Gaeta in their drive toward Rome.

May 20—Some 6,000 Allied planes dropped

8,000 tons of bombs on Hitler's westwall defenses stretched for 150 miles from Brittany to Belgium.

—In his first "operational" broadcast to underground forces in occupied Europe, General Eisenhower called upon resistance groups to help secure information on German military movements.

May 21—Metropolitan of Leningrad and Moscow, Alexei, was elected acting patriarch of all Russia by Holy Synod of Russian Orthodox Church.

May 25—American Fifth Army troops in Italy joined American troops striking eastward from Anzio beachhead to start concerted drive toward Rome.

—In a blazing 24-hour offensive, 2,500 heavy bombers and 1,200 medium bombers escorted by hundreds of fighters, ripped and blasted dozen cities in western Germany, northern France, and Belgium. Most targets, including Toulon, Aachen, Antwerp, and Lyon, were vital to Germans as supply centers and railroad hubs leading to westwall.

May 30—Reports from Stockholm said five U.S. airmen who parachuted to safety in Germany were lynched by crowd of angry Germans.

JUNE

June 1—U.S. Secretary of War Stimson revealed that 3,657,000 American army troops were on duty overseas.

June 2—American bombers carried out first shuttle bombing raid across central Balkan states to land in Russia. En route they raided targets in Rumania.

June 4—Rome fell to Allied troops.

June 5—As he had promised, King Victor Emmanuel III relinquished authority to his son, Crown Prince Umberto, but kept his title as head of House of Savoy.

June 6—Allies did what Napoleon and Hitler had never dared do—sent invasion armada across English channel. In early morning hours of June 6, while hundreds of planes flew protective cover, American, British, and Canadian troops landed on northern tip of Normandy peninsula.

—More than 31,000 Allied airmen flew 7,500 sorties in opening 32 hours of greatest offensive landing operation in history. Prime Minister Churchill revealed that 4,000 ships and 11,000 planes took part. As part of invasion, 900 gliders and tow-planes landed thousands of Allied troops on Cherbourg peninsula.

June 7—In quick follow-up of original landing, Allies carved out beachheads 5 to 10 miles deep in Normandy and captured town of Bayeux.

June 9—U.S. top military leaders, Army Chief of Staff General Marshall, Fleet Admiral Ernest King, and Air Force Commander, General Arnold, arrived in London for conferences on invasion. President Roosevelt announced that General De Gaulle had been invited to Washington to confer on military and civil matters pertaining to France.

—In Italy, Ivanoe Bonomi became premier, designating himself as Foreign Minister and Minister of the Interior.

June 10—Working on pre-arranged plans, French resistance forces became active, sabotage and revolts became widespread.

June 11—Moscow announced opening of new Russian front against German-Finnish troops on Karelian Isthmus.

—British troops in Italy captured Avezzano, 48 miles from Rome.

June 13—Premier Stalin said Allied landing in France was "brilliant success" and "masterly in execution." The Allies in Nor-

mandy captured Carentan.

June 14—Marshal Rommel directed furious Nazi counter-attacks against Allies south of Bayeux. General De Gaulle visited Normandy beachheads as nearly 800 Allied planes bombed and strafed Nazi positions around beachhead area and 1,500 heavy bombers flew beyond to hit airfields and rail yards in northwest Germany and in Low Lands.

June 15—England was attacked for first time by Nazi pilotless V-1 bombs apparently launched from platforms in Pas-de-Calais area. The Allies continued their 24-hour offensive by sending 7,000 warplanes to bomb strategic targets in France and Germany.

June 16—American infantry troops, in a drive across neck of Cherbourg peninsula, captured St. Sauveur-le-Vicomte. Allied troops in Italy, made a 25-mile advance in single day toward German defense line stretching from Pisa through Florence to Rimini. Island of Elba, where Napoleon was once held in exile, was invaded by French commandos and colonial forces under command of Gen. Jean de Latre de Tassigny.

June 17—French Forces of Interior, known as the "F.F.I." were praised by General Eisenhower for their part in disrupting German communication and transportation lines and for other acts of sabotage against enemy.

—American 9th infantry division reached Barneville-sur-Mer region and trapped a sizeable German garrison in Cherbourg area.

June 20—In eleventh day of offensive against Finland, Russian troops under Marshal Leonid Govorov captured Viipuri.

June 21—Moscow reported that 7,800,000 Germans had been killed or captured since war began, and that Russia had lost 5,300,000.

June 22—In dawn to dusk offensive, Allied planes (6,000 in number) hurled 8,000 tons of bombs on areas between Cherbourg and Paris.

June 23—Russians opened their summer offensive along a 300 mile front, attacking Germans heavily.

June 24—Violent fighting was reported from Cherbourg where General Bradley's men attacked Germans entrenched 2,000 yards from city of Cherbourg.

June 26—Anchor cities of Nazi's so-called "fatherland line in Russia", Vitebsk and Zhlobin, were captured by Soviets.

June 27—Special Allied communique announced capture of Cherbourg.

—Swedish reports said German troops had marched into Helsinki, capital of Finland.

June 28—At Republican convention in Chicago, Thomas Dewey was nominated candidate for president, John Bricker, vice-president.

—First casualty report from Allied headquarters revealed that Allied losses during first two weeks of Normandy fighting, including men killed, wounded, captured, and missing were: United States, 24,162; Britain, 13,572; Canada, 2,815. Total, 40,549.

June 29—Leipzig, Oschersleben, Magdeburg and other German cities were blasted by more than 2,000 Allied warplanes.

June 30—United States severed diplomatic relations with Finland saying that Finland was acting with Germany against Allies of United States.

JULY

July 1—German D-N-B news agency quoted Hitler as admitting situation in Ger-

many was "difficult" but that what he called "national fanaticism" would pull them through.

—United Nations Monetary conference opened at Bretton Woods, New Hampshire.

July 3—Russian troops, after an 11-day drive toward Warsaw, captured Minsk.

July 4—Soviet troops seized Polotsk, gateway city to Baltic.

July 5—200 U.S. Flying Fortresses returned to British bases arrived back in England after completing shuttle-bombing cycle from Britain to Russia then Italy and back.

July 6—Prime Minister Churchill declared that Germans were using London as their principal target for robot bomb attacks. Churchill said that during the first three weeks of the robot blitz, 2,752 persons were killed and 8,000 were injured.

—French General De Gaulle arrived in Washington for conferences with President Roosevelt.

—A Berlin broadcast said that Field Marshal von Rundstedt had been relieved of his command in western Europe because of "ill health" and that Field Marshal von Kluge had succeeded him.

July 9—U.S. troops in France captured La Haye du Puits while British and Canadian forces seized Caen.

—Prime Minister Churchill and President Roosevelt released joint statement saying that merchant ship losses due to German U-Boats during June were lowest of any war month.

July 11—President Roosevelt announced that he would run for fourth term if he was nominated at Democratic convention. He also revealed that French Committee of National Liberation had been recognized as *de facto* political authority in liberated areas of France.

July 13—Russian troops captured Vilna, capital of Lithuania.

July 15—Delegates to United Nations Monetary conference at Bretton Woods, N. H., proposed international fund of \$8,800,000,000 for stabilizing world currency.

July 16—Russian armies captured fortress city of Grodno, 45 miles from border of East Prussia.

July 17—In surprise maneuver, British Eighth Army troops in Italy crossed Arno river and caught Nazis offguard in drive toward Florence.

—Russians, in two-pronged drive, crossed border of Latvia in drive toward Baltic and reached Curzon line in offensive aimed at Warsaw.

July 18—In four-hour aerial bombardment, Allied planes hurled 7,000 tons of bombs on Germans to introduce new offensive by British Second Army. It was reported that Nazi defense lines below Caen were ripped open.

July 20—President Roosevelt was nominated for fourth term at the Democratic convention in Chicago. Harry S. Truman was named as running mate.

—Unsuccessful attempt was made on Hitler's life. Following disclosure of plot, Hitler overhauled general staff, placing Col. Gen. Heinz Guderian as chief of staff and authorizing Heinrich Himmler with special powers to deal with emergency as director of the home-front army. Next day, Radio Berlin announced that plot was hatched by army officers trying to overthrow Nazi regime.

July 22—American Fifth Army troops in Italy reached ancient city of Pisa.

July 23—Moscow announced establish-

ment of Polish Committee of National liberation created to administer areas of Poland freed by Russians. Soviet-sponsored group was denounced next day by Polish government-in-exile, headquartered in London. Exiled regime branded Moscow committee as "body of usurpers, nobodies, turncoats, and communists."

July 25—Hitler announced that Germany and German-occupied territories were being mobilized to full war. Joseph Goebbels was appointed "Reich Plenipotentiary for Total War Effort" and Marshal Hermann Goering was given task of adjusting public life to meet requirements of all-out war.

July 26—American troops scored a major breakthrough in German lines in Normandy in drive southward toward Coutances.

—Russian troops reached east bank of the Vistula river. By July 28, Soviets were driving swiftly into central and southern Poland after capturing Brest-Litovsk, Jaroslavl and Przemysl.

July 29—Under sledge hammer assaults by U.S. armored columns, Germans were forced to withdraw entire west wing of their armies in Normandy. Avranches fell to American tank units two days later.

July 31—First White Russian Army, under Marshal Rokossovsky, drove to within ten miles of Warsaw while General Chernyakhovsky's Third White Russian Army to north drove toward East Prussia.

AUGUST

Aug. 1—American troops broke through Nazi lines in Normandy and sent spearheads into Brittany.

—Moscow announced capture of Kanas, prewar capital of Lithuania.

—Turkey severed economic and diplomatic relations with Germany.

Aug. 2—Prime Minister Churchill predicted that interval between defeat of Germany and defeat of Japan would be shorter than had been expected.

—Radio Berlin announced that Rommel had been seriously, but not critically, injured on Normandy front.

Aug. 3—5,500 Allied planes dropped 9,000 tons of bombs on western Europe while Russian land forces on east broke through German line on Vistula river and advanced 15 miles.

Aug. 4—American First Army tank columns fanned out through Brittany and reached transportation city of Rennes.

—In Italy, Allied troops entered Florence after retreating Germans destroyed five of six bridges spanning Arno river.

—In battle with strong German forces, estimated 25,000 Polish underground fighters stormed into Stare Miasto district of Warsaw.

Aug. 5—Allied casualties from landing at Normandy until July 20 were reported as totalling 115,665 troops.

Aug. 6—In spectacular burst of power, American First Army captured Mayenne, Laval, Chateau Gontier, and Vannes.

Aug. 8—Marshal von Witzleben, and seven other German army officers were hanged in Berlin after they were convicted of high treason by so-called "people's court."

Aug. 9—American motorized units smashing through Brittany reached cities of Nantes, Angers and Le Mans.

—It was announced in joint Anglo-American release that more than 500 Nazi submarines had been sunk since war began.

Aug. 10—General Eisenhower disclosed that Allied airborne units had been com-

bined into single command under Lt. Gen. Lewis H. Brereton.

Aug. 13—Units of German Fifth and Seventh Armies began to withdraw toward Seine river to escape entrapment by Anglo-American forces pushing against Germans in Falaise-Argentan gap.

—Allied headquarters revealed command setup: Lt. Gen. Omar Bradley, commander of all U.S. forces in France; Lt. Gen. Courtney Hodges, commander of U.S. First Army. Also, French Second Armored division went into action on French soil under command of Brig. Gen. Jacques Philippe Leclerc.

—Field Marshal von Paulus made appeal to German people to overthrow Adolf Hitler and end war in article published in Soviet newspaper, *Pravda*.

Aug. 15—French and American forces invaded southern coast of France securing wide beachheads between Marseille and Nice.

—Allied Headquarters revealed that U.S. Third Army in France was commanded by Lt. Gen. George S. Patton, Jr. Two days later, Third Army captured Chartres, Orleans, and Dreux as Canadian troops heading eastward captured Tourn on way to Le Havre. German garrison at St. Malo surrendered.

Aug. 17—Soviet troops reached border of East Prussia along Seseupe river. Force was commanded by Gen. Ivan Chernyakhovsky.

Aug. 20—Reports out of Switzerland said Nazis "abducted" Marshal Petain and sent him to Belfort under custody. People of Paris broke out in armed revolt against Nazis resulting in heavy street fighting.

Aug. 21—U.S. Third Army outflanked Paris by sending armored columns to Seine river south of French capital. After bitter fighting French troops fought way into Toulon.

Aug. 23—King Michael of Rumania ordered his forces to cease firing and accepted Allied unconditional surrender terms. British and Canadian forces captured Houlgate, Deauville, and Cabourg while far to the south, French infantry and armor occupied all of Marseille except for few scattered pockets of resistance.

Aug. 25—Allied headquarters announced that U.S. Seventh Army had occupied Cannes and Grasse.

—Paris fell to Allies. German General Dietrich von Choltitz surrendered to Gen. Leclerc in baggage-master's office of Montparnasse station.

—In fulfilling pledge to Russia, new Rumanian government declared war on Germany.

Aug. 26—At Vernon and Louviers, British established bridgeheads across Seine river and sent Germans falling back toward Somme in hasty retreat. 10,000 Germans surrendered south of Bordeaux after they had been encircled in Berlin area.

—Soviet troops freed Danube from Prut river to Black Sea and liberated Bessarabia. Radio broadcasts from Moscow said Bulgaria had approached Washington and London on peace terms and that she had promised to quit, become neutral and disarm German troops in her territory.

Aug. 27—American correspondents were allowed to visit Maidanek concentration camp where Nazis murdered an estimated 1,500,000 victims.

Aug. 28—Paris was officially delivered to Lt. Gen. Joseph-Pierre Koenig named as military commander of city as U.S. tanks rumbled triumphantly down Champs-Elysees. General Patton's tanks of U.S. Third

Army reached Chateau Thierry in drive toward German border.

Aug. 29—Russian armies driving down coast of Black Sea captured Constanta, in Rumania. Gen. Kurt Dittmar, semi-official Berlin radio commentator, admitted Germany was nearing defeat and implied that she desired "soft" peace.

Representatives of the big three powers agreed on the "general" outline of structure and aims to preserve peace at the Dumbarton Oaks conferences in the United States.

Aug. 30—Soviet troops captured Ploesti, Rumania, center of rich oil fields.

Aug. 31—Soviet troops under command of Marshal Malinovsky entered Bucharest.

—Allied gains in northern France were revealed as: British Second Army captured Amiens and crossed the Somme river; U.S. First Army, driving toward Sedan, crossed the Meuse river; and U.S. Third Army in drive toward Verdun and Metz stormed into Argonne forest.

—In southwestern France, French troops occupied cities of Montpellier, Beziers, and Narbonne while U.S. Seventh Army under command of General Patch sent out two armored spearheads. One captured Valence in drive up Rhone valley, other took Nice in drive along Riviera.

SEPTEMBER

Sept. 1—Bulgarian peace talks with Allies were suspended when Premier Ivan Bagrianoff announced that his cabinet had resigned. Russian troops reached frontier of Bulgaria after capturing Giurgiu on Danube.

—U.S. Third Army captured St. Mihiel and Verdun as British and Canadian troops overran Dieppe and Arras. German forces evacuated Lyons as U.S. Seventh Army continued advance up Rhone valley.

Sept. 2—Pisa was captured by U.S. Fifth Army in Italy as British troops breached so-called "Gothic line."

—U.S. First Army crossed border of Belgium and captured Tournai.

—Premier of Finland, Antti V. Hackzell, announced that Finland would negotiate armistice with Russia and revealed that German troops had been asked to leave Finland by September 15.

Sept. 3—General Eisenhower called upon underground forces in Lowlands to revolt against Nazis. Prince Bernhard was named commander of Netherlands.

—Moscow said Russia was ready to help Finns get rid of Nazis in that country.

Sept. 4—British troops, in spectacular 225 mile-drive in four days, captured Brussels, Belgium, Antwerp, and Breda. U.S. Seventh Army, pursuing Germans back toward Belfort gap, seized Bourg-en-Bresse.

—British officials declared that Britain's battle against German robot bombs had been won.

—Firing stopped on Finnish front as armistice negotiations between Russia and Finland went into effect.

Sept. 5—Russia declared war on Bulgaria, presumably because of Sofia's delay in signing an armistice.

Sept. 6—Detachments of U.S. Third army crossed Moselle river.

—Hungary announced that it had opened hostilities against Rumania in defense of Transylvania.

Sept. 7—British captured Ghent and Armentieres as U.S. First Army seized Liege. —Belgian government-in-exile returned to Brussels.

—Bulgaria declared war on Germany,

and Russian troops seized Black Sea port of Varna in driving into Bulgaria.

Sept. 9—Four days war between Bulgaria and Russia came to end as Kimon Georgieff became new premier and agreed to armistice with Soviets.

Sept. 10—Lt. Gen. Hodges' First Army crossed border into Luxembourg.

Sept. 11—Germany was invaded. U.S. First Army, first to cross border of Reich, pushed five miles into Germany north of Trier. American Third and Seventh Armies joined forces west of Dijon for concerted push against Reich.

Sept. 12—British forces received surrender of German troops in LeHavre.

—Russian Marshal Malinovsky signed armistice documents with Rumania on behalf of United States, Russia, and Great Britain.

Sept. 13—Allied headquarters announced that U.S. Ninth Army, under command of Lt. Gen. William H. Simpson, was on duty in France.

—Russian armies reached border of Czechoslovakia in drive from southern Poland. On north, Soviet troops seized German fortress of Lomza on approaches to East Prussia.

Sept. 14—Russian troops occupied suburb of Praga, on outskirts of Warsaw.

Sept. 15—General Eisenhower assumed direction of all Allied armies operating against Germany in western Europe. Lt. Gen. Jacob L. Devers was revealed to have been put in command of Allied 6th army group, consisting of French and American units.

Sept. 16—Following parley at Quebec between President Roosevelt and Prime Minister Churchill, joint Anglo-American statement declared that Allies would shift entire armed might to Pacific as soon as Germany was defeated.

—Germany announced that to "protect its security" she could not evacuate all German troops from Finland by September 15th, as demanded by Finland.

Sept. 17—A large Allied airborne army landed in Holland in attempt to flank Germans on north bank of Rhine.

—20,000 Germans surrendered to U. S. forces in Beaugency, France.

Sept. 19—Finland signed armistice with Russia.

Sept. 20—U. S. Airborne troops captured Nijmegen bridge in Holland intact.

Sept. 21—Brussels report said Prince Charles of Belgium had been sworn in as regent of Belgium to serve during King Leopold's absence.

—Tiny republic of San Marino declared war against Germany and sent 900-man army to aid Allies.

Sept. 22—Russian troops captured Tallinn, capital of Estonia, and opened Gulf of Finland to Soviet Fleet in Baltic.

—British Eighth Army troops in Italy captured Rimini.

Sept. 23—Russian armies split German forces on Baltic in two by driving wedge into Estonia at Riga Gulf.

Sept. 24—U. S. Fifth Army troops in Italy smashed through Gothic line and reached points 15 miles from Bologna. British forces landed on mainland of Greece aided by Greek patriot forces.

Sept. 27—After fierce fighting, 2,000 survivors of original 8,000 men of British First Airborne Division, Red Devil, managed to escape German trap at Arnheim and withdrew to safety of Allied lines.

—Allied troops invaded Albania.

Sept. 28—Prime Minister Churchill warned against over-optimism in turn of war events and predicted that war might run well into 1945.

—In broadcast speech, General Eisenhower told people of Germany that Allies would enter Reich as "conquerors" but not as "oppressors."

—Moscow announced that Marshal Tito of Yugoslavia had given his permission to have Russia send troops through Yugoslav territory to attack Hungary.

Sept. 29—Polish government-in-exile named Lt. Gen. Tadeusz Komorowski (Bor) as commander-in-chief of Polish armed forces after relieving Gen. Kazimierz Sosnkowski.

—Berlin said Marshal Petain had fled to Germany leaving his tattered authority in hands of Fernand de Brinon.

—Russian armies invaded Yugoslavia and launched drive toward Belgrade.

OCTOBER

Oct. 1—British troops captured 5,000 German troops in seizure of Calais.

Oct. 2—After 63 days of bitter fighting, Lt. Gen. Komorowski (Bor) surrendered his patriot armies in Warsaw to Germans. Earlier Bor had been accused of starting premature uprising against Nazis by Soviet-sponsored Polish committee of National Liberation headquartered in Moscow.

—U. S. Army Air Force Chief, General Arnold, revealed that American airmen had dropped 1,000,000 tons of bombs on enemy targets from start of the war until Sept. 28. He also reported that more U. S. planes had been lost in United States than in combat missions on all fronts.

Oct. 3—U. S. First Army drove through a section of Siegfried line near Ubach.

Oct. 4—Goebbels, and Himmler called upon people of Germany to convert home front into battle front, using every home as fortress.

Oct. 6—Second Ukrainian Army invaded Hungary on 73-mile front.

—Prime Minister Pieter S. Gerbrandy said that if Nazis continued flooding Netherlands with broken dykes, and destroying pumping system, Netherlands would face postwar ruin and famine.

Oct. 7—5,500 Allied warplanes hammered Germany from south and west.

Oct. 8—Premier Stalin announced that force of 500,000 Russian troops advanced 62 miles to forge trap on German armies in Lithuania.

Oct. 9—In declaration from Dumbarton Oaks, the Big Four—U.S., Britain, Russia, and China—announced that conference would recommend creation of international security organization known as "United Nations" which would have authority to use armed force to stamp out aggression.

Oct. 13—The Russians captured Riga, capital of Latvia.

Oct. 14—British and Greek troops liberated Athens and nearby port of Piraeus.

Oct. 15—Regent, Nicholas Horthy of Hungary tried to seek peace with Allies but his efforts were thwarted when Hungarian Fascist clique overthrew his government and established pro-German regime headed by Ferenc Szalasy.

—Allied censors allowed it to be revealed that two gigantic artificial ports had been constructed in England and then towed across the channel in sections on D-day to be assembled for invasion armies on Nor-

mandy beachheads.

Oct. 16—Russian troops launching offensive in Arctic regions, captured German occupied port of Petsamo, in northern Finland.

Oct. 18—After ten-day meeting in Moscow, Prime Minister Churchill and Premier Stalin issued joint statement saying they had agreed to pursue joint policy in Yugoslavia, had agreed on main points of Bulgarian armistice terms, and had made some progress toward solution in Russo-Polish boundary problem.

—The Volksturm was created by Hitler. It was a home army to defend Reich and every German man between ages of 16 and 60 not already in regular army was ordered to mobilize.

Oct. 20—Red Army troops aided by Yugoslav partisans captured Yugoslav capital of Belgrade.

Oct. 21—Aachen finally fell to U. S. troops after it was bombarded by hundreds of tons of bombs.

Oct. 23—In a special order, Premier Stalin announced that Soviet troops under command of Gen. Iva. Cherniakhovsky had driven 19 miles into East Prussia on a 87-mile front.

Oct. 25—Stalin announced that Soviet forces in Arctic had invaded Norway and captured an important port on Barents Sea, Kirkenes.

Oct. 26—Berlin announced that Col. General Heinz Guderian, German Chief of Staff, had assumed command of all German forces on eastern front.

Oct. 28—Bulgaria signed armistice with United Nations.

Oct. 29—Polish troops, fighting under Canadian command, captured Breda, strategic city in Netherlands.

Oct. 31—Prime Minister Churchill told British Parliament that war against Germany would probably not be over before Easter, 1945.

NOVEMBER

Nov. 1—In effort to clear Schelde estuary and open northern sea lanes, British commandos invaded Netherlands island of Walcheren.

Nov. 2—In blazing sky battles, Germans lost 208 out of 500 fighters sent up to ward off 1,100 Allied heavy bombers and fighters. U. S. losses: 41 heavy bombers; 28 fighters.

Nov. 4—An Allied communique announced that Greek and British troops had driven all Germans out of Greece.

Nov. 5—Hungarian capital of Budapest was shelled by big Russian guns which had captured Andrassy, 4 miles from capitol.

—British admiralty announced that British losses in Walcheren raid were greater than Dieppe raid in August of 1942.

Nov. 7—President Roosevelt was elected for fourth term with electoral vote of 432, defeating Thomas Dewey who polled 99 votes.

—Premier Stalin announced that total German losses during Russian summer offensive had reached 700,000 making total Axis casualties on eastern front 8,590,000.

Nov. 8—Berlin announced that Germany had been bombarding Britain for weeks with new type robot bomb, called V-2. Several days later censors permitted descriptions of bomb, saying it was 13 and one-half ton wingless projectile with speed of 3,500 miles an hour—but it was described as less destructive than V-1 robot bomb.

Nov. 12—R.A.F., using huge "earthquake" bomb, sank Germany's giant 45,000

ton battleship, the Tirpitz, her last large battlegewagon.

—Gestapo Chief Himmler, reportedly reading message written by Hitler, observed anniversary of Munich putsch by calling upon German people to fight for survival of Reich. Himmler said press of war duties on Hitler prevented fuhrer from reading it himself.

Nov. 16—Six Allied armies on western front opened heavy offensives to break German defenses west of Rhine.

Nov. 20—General Patton's Third Army captured Metz as French First Army raced through Belfort gap and captured city of Belfort.

Nov. 24—Premier Stanislaw Mikolajczyk resigned as premier of Polish government-in-exile when his colleagues failed to yield on Russo-Polish border dispute.

Nov. 27—Cordell Hull resigned as U.S. Secretary of State because of poor health. President Roosevelt appointed Edward R. Stettinius, Jr. to succeed him and appointed Major Gen. Patrick Hurley as ambassador to China.

Nov. 30—New cabinet was formed for Polish government in exile with Tomasz Arciszewski in charge.

DECEMBER

Dec. 1—U.S. Third Army penetrated into Saar valley and drove to within 8 miles of Saarbrücken.

Dec. 2—Strasbourg was freed of German troops by Allies.

Dec. 3—Disorder broke out in Greece where ten persons were killed when Greek E.A.M. resistance members defied government orders and staged demonstration in Athens square. Bloody rioting followed with strikes paralyzing Athens and cutting off all electricity, gas, and communication facilities. On Dec. 5, British tanks fired on armed branch of E.A.M. known as the E.L.A.S. as civil war flared between leftist-liberal factions and British supported rightists. Churchill assured House of Commons that Greece would be allowed free elections, but declared that until that time, he would use British army to maintain "law and order."

Dec. 8—British House of Commons gave Churchill a 281-32 vote of confidence in his policy of intervention in liberated Europe.

Dec. 11—1,600 U.S. heavy bombers attacked Frankfurt-on-Main and other German cities.

Dec. 17—Allied armies on western front were hammered by powerful new German offensive aimed at pushing back U.S. First Army sector. For next four days, Germans gained, and Berlin broadcasts claimed that Marshal von Rundstedt's armies had torn a 60-mile hole in center of Allied front by Dec. 21.

Dec. 23—With return of good flying weather, Allies hurled 5,000 planes against German assault lines to aid Allied ground troops in attempt to halt Nazi offensive.

Dec. 27—U.S. garrison at Bastogne, which answered German surrender ultimatum with word "Nuts," was finally relieved when American armored column cut through Nazi defenses.

Dec. 28—German broadcasts admitted that von Rundstedt's supreme bid to gain offensive had failed in the so-called "Battle of the Bulge."

Dec. 30—Russian forces, after surrounding Budapest, broke into industrial section of Pest, on east bank of Danube.

Dec. 31—Polish provisional government was established at Lublin, Poland, with

Boleslaw Berut as president and Edward B. Osobka-Morawski as premier and Foreign Minister.

1945

Jan. 1—In greatest counter-air offensive since 1941, Luftwaffe tried to attack Allied air fields in France, Belgium, and Lowlands but lost 241 planes.

Jan. 2—In continuing air blitz, 1,000 R.A.F. bombers struck at Berlin, Nuremberg, and Ludwigshafen. 1,000 U.S. heavy bombers took off short time later to hit German communication lines and troops concentrations behind battlefronts.

—British Air Ministry announced that R.A.F. dropped 54,420 tons of bombs on German targets in month of December, most of them falling on Germany.

Jan. 3—Russians made further progress in battle of Budapest and wrested control of 1,062 city blocks.

Jan. 4—Only eleven miles separated American First and Third Armies striving to cut off German salient resulting from Belgian break-through in December.

—Lt. Gen. Carl A. Spaatz, commanding U.S. air units in Europe, revealed that his planes made 1,045,728 sorties in 1944 dropping 958,000 tons of bombs. During that year, U.S. losses totalled 9,274 planes.

Jan. 5—Supreme Allied Headquarters announced command shakeup. British Field Marshal Sir Bernard Montgomery took control of all U.S. First and Ninth Armies and all other Allied forces north of Belgian bulge on Dec. 20. U.S. Lt. Gen. Omar Bradley, whose Twelfth Army group had included American First and Ninth Armies, was revealed to be in charge of forces below German salient, including American Third Army and divisions from American Seventh.

Jan. 5—Command change was described as military maneuver necessary by German breakthrough into Ardennes and War Department said it carried no implications of infringement on command of Gen. Bradley.

Jan. 7—German troops opened a counter-offensive against U. S. Seventh Army sector attacking both north and south of Strasbourg on French-German border.

—Moscow admitted German gains of 22 miles in sixth day of Nazi counter-offensive north of Budapest.

Jan. 8—London announced that V-bomb menace was increasing with the Germans using new V-2 bomb against points in northern England as well as in south. Allied 24-hour air offensive continued.

Jan. 9—Russian drives carried Soviets to within 85 miles of Vienna on east and to within 53 miles of Austrian border.

Jan. 10—Norwegian government-in-exile announced that Norwegian paratroopers invaded Norway and in operation between Trondheim and Oslo, cut Germans' main railway for transporting Nazi troops to Germany.

Jan. 12—Dispatches from front lines said Germans were in rapid retreat from Belgian salient after abandoning 100 square miles under pressure of three Allied armies moving in on all sides. It was estimated that Germans lost 200,000 men in abortive attempt to break through Allied lines in Ardennes.

Jan. 13—Moscow reported 25-mile gain by Russians in opening new offensive into south-central Poland. German reports admitted major fighting along a 600 mile front from the Baltic to the Balkans.

Jan. 13—2,300 American medium and heavy bombers and fighters blasted Germans

retreating from Ardennes and hit key transportation cities behind German lines.

Jan. 14—In continuing new offensive into Poland, Russian troops drove to within 65 miles of southeastern Germany.

—In dog-fights over Germany, U. S. fighter pilots of Eighth Air Force bagged record 149 enemy planes. Altogether Germans lost 232 aircraft while Allies lost 31.

—Rome reported that German troops in northern Italy were reinforced by units from Norway and several Italian divisions trained in Germany.

Jan. 17—Five years, three months, and 20 days after Germans marched into Warsaw, it was liberated by Russian troops. Russian troops, in final siege, drove into city from south and southwest while Polish units drove in from east. Southwest of Warsaw, Russians seized a town within 15 miles of Silesian border of Germany.

Jan. 18—U. S. casualties in western Europe from D-day through Jan. 1 totalled 332,912, with 54,562 killed.

—Prime Minister Churchill repeated Allied pledge for "unconditional surrender" only.

Jan. 19—Russians gained on all fronts: Captured Lodz and Cracow, in Poland, made small gains on frontier of East Prussia; and reached border of German Silesia.

Jan. 20—Moscow reported fall of Tilsit, stronghold of East Prussia. City was taken after a 17-mile advance that placed Red Army troops 46 miles inside East Prussia and 45 miles east of Koenigsberg.

Jan. 21—Moscow reported Soviet invasion of German Silesia on 56-mile front. Preliminary reports said gains up to 19 miles in direction of Reinersdorf and Guttentag. Other Soviet forces captured Tannenberg, famous German military shrine in East Prussia.

—American troops made gains in Belgian-Luxembourg area to tighten hold on German Ardennes bulge.

Jan. 22—Russians reported driving into East Prussia from south and east, capturing Insterburg and three other cities.

—American planes bombed and strafed German columns retreating from Belgian bulge. Front dispatches said German vehicles stretching from central Luxembourg fifty miles into Germany were destroyed or burned.

Jan. 23—Russians reached Oder river along 37-mile front in German Silesia, in vicinity of Breslau.

—American troops seized St. Vith to cut German bulge down to five-mile strip along Belgian-German border.

—While Soviet-sponsored Lublin Provisional government assumed rapid control of liberated Poland, including Warsaw, Polish government-in-exile asked Allies to set up inter-Allied commission to govern liberated Poland and guarantee free elections after Polish war prisoners returned home.

Jan. 27—Moscow reported that Russian armies pushed to within four miles of Koenigsburg, East Prussia; surrounded Posen and Torun in Poland; and reached points within 100 miles of Stettin, on the Baltic.

Jan. 28—The U. S. Eighth Air Force observed its third birthday by attacking industrial cities and key points in Cologne-Duisburg-Dortmund area. Record for three years: 250,000 bomber and 210,000 fighter sorties flown; 518,000 tons of bombs dropped on enemy targets; 13,000 German planes destroyed. Losses during three-year period: 3,337 bombers, 1,748 fighters.

Jan. 29—Russians drove to within 93 miles of Berlin on northeast after invading northeastern province of Pomerania.

—Americans crossed border of Germany for first time. Third Army forces crossed the Our River at two places near Oberhausen and Peterskirche in northern Luxembourg.

Jan. 30—Adolph Hitler, on twelfth anniversary of his ascension to power, broadcast to Reich: "However grave the crisis may be at the moment, it will, despite everything, be mastered by our unalterable will, by our readiness for sacrifice and by our abilities . . . We shall overcome this calamity, too; and this fight, too, will not be won by central Asia but by Europe; and at its head will be the nation that has represented Europe against the East for 1,500 years and shall represent it at all times: Our Greater German Reich, the German nation."

FEBRUARY

Feb. 3—U. S. First Army captured Krenwinkel, 12 miles northeast of St. Vith to clear last Germans from soil of Belgium.

—Moscow said Russian forces were 11 miles from Frankfurt-on-the-Oder. Officially Berlin was 44 miles away from Soviet lines.

—In most concentrated bombing of German capital so far, American bombers dropped 3,000 tons of bombs on Berlin.

—British night attacks against cities in Germany and along Ruhr continued.

Feb. 5—Moscow said First White Russian army was lined along Oder river on 75-mile front sending spearheads within 33 miles of Berlin. Kuestrin was outflanked.

—American Lt. Gen. Omar Bradley resumed command of American First Army which German push into Belgium had separated from Twelfth Army group. U. S. Ninth Army still remained under Field Marshal Montgomery.

Feb. 6—Russians crossed Oder river 180 miles southeast of Berlin at two points between Breslau and Oppelin.

—Round-the-clock aerial blitz continued with U. S. heavies raiding Magdeburg, Leipzig, and Chemnitz following an R.A.F. night attack on Berlin.

—Sir Walter Citrine, British trade union leader, declared at opening session of World Trade Union in London that President Roosevelt, Prime Minister Churchill, and Premier Joseph Stalin were meeting "at this very moment."

Feb. 7—First concerted attack by American Fifth Army troops in Italy in more than three months scored gains against German defenses 10 miles south of Bologna.

—Simultaneous announcements in Washington, London, and Moscow announced Big Three meeting "in the Black Sea area" and said big three leaders had already reached an agreement "for joint military operations in the final phase of the war against Nazi Germany."

—War Department announced Berlin was most heavily bombed target in Europe. In preceding 11 months, U. S. planes dropped 15,116 tons of explosives on it, and British bombers added 10,000 tons during 1944.

Feb. 10—Russians captured East Prussian port of Elbing.

Feb. 12—Canadian First Army captured Cleve, Germany, at northern end of western front. American Third Army seized Pruem, in center of line.

—Big Three statement issued following conference of President Roosevelt, Prime Minister Churchill and Premier Stalin at summer palace of former Czar Nicholas II

near Yalta, Crimea. Statement said Allied military chiefs of staff had agreed upon final blows necessary to defeat Germany.

Feb. 13—Budapest fell to Russian troops after 50-day siege. Moscow said Budapest battle cost German and Hungarian troops more than 159,000 killed or captured, described as largest enemy loss in one operation since fall of Stalingrad in 1943.

Feb. 14—Allied air offensive continued with 8,000 war planes, 3,000 of them American heavy bombers, blasting Germany on round-the-clock attacks. Allied headquarters announced that Germany was producing only 103,000 tons of gasoline a month compared with 500,000 tons early last year. Allied bombers were reported to have knocked out all but four of Germany's synthetic oil plants.

Feb. 20—Russian forces, driving on Berlin from southeast, reached points 58 miles from capital. On north, Soviets pushed to within 40 miles of Danzig.

Feb. 21—American Thunderbolts from Italy bombed Berchtesgaden, Germany, for first time. Railway facilities were main targets. Hitler's mountain retreat was not hit.

Feb. 22—Premier Stalin announced that Red Army's 40-day offensive had cost Germany 1,150,000 men and predicted that "full victory" was near.

—U. S. Third Army Infantry crossed Saar river south of Saarburg. Other American Third Army units completed capture of 80 square miles of Germany in triangle between Moselle and Saar rivers. 40 localities were seized in 40 day assaults.

—More than 3,000 Allied planes resumed 24-hour attacks on Germany.

Feb. 23—Russians captured by-passed Posen, in Poland, after month-long siege.

—Turkey declared war on Germany and Japan.

Feb. 24—American First and Ninth Armies, in drive toward Rhine, covered four miles beyond Roer river, captured 21 towns, and seized 4,000 prisoners. Said General Eisenhower at a news conference: "The present offensive is expected to destroy every German" west of Rhine and that if necessary, forces would drive on to meet Russians in Germany.

—Following assassination of Premier Ahmed Maher Pasha by alleged pro-Axis sympathizer, Egypt declared war on Germany and Japan.

—American First Army took Dueren and 15 other towns as First and Ninth Armies consolidated bridgehead across Roer river into 25-mile front 15 miles from Cologne and 20 miles from Duesseldorf.

Feb. 25—6,000 Allied planes from seven different commands pounded Germany following British bombers which dropped blockbusters on Berlin for sixth straight night.

Feb. 26—American troops shelled Cologne from positions ten miles away. U. S. Eighth Air Force, in strongest blow against Berlin to date, poured 3,000 tons of bombs on that capital after another night attack by British Mosquito bombers.

Feb. 28—U. S. First Army crossed Erft river, last natural barrier before Rhine.

MARCH

Mar. 1—U. S. Ninth Army cleared Germans from twin cities of Muenchen-Gladbach and Rheydt, 15 miles west of Duesseldorf.

—During month of February, U. S. heavy

bombers dropped record of 51,000 tons of bombs on Germany. Losses for month were all-time low of 94 bombers and 108 fighters. German losses 300 aircraft shot down and caught on ground. In month's aerial offensive, American planes flew 2500 sorties against tactical targets at and behind enemy lines in Ruhr.

Mar. 2—U. S. Ninth Army spearheads captured Neuss, on Rhine opposite Duesseldorf, in one of greatest days of war for American arms in Europe. Behind the front, other Ninth Army forces captured Dutch cities of Venlo and Roermond, Krefeld and Struemp near Rhine also fell as Ninth pushed to within ten miles of juncture with Canadians moving down from north. On front east of Luxembourg, U. S. Third Army captured Trier, Germany. American planes destroyed at least 109 Nazi planes in raids against Dresden, Chemnitz, and synthetic oil plants and Krupp works at Magdeburg.

Mar. 3—U. S. Ninth Army joined Canadian First Army between towns of Kevelaer and Geldern and launched concerted drive toward Wesel on the Rhine. German forces in full flight along Rhine front blew up three bridges in Duesseldorf. U. S. First Army pushed to within four miles of Cologne. Allied air offensive went into 19th straight day.

Mar. 4—Russians reached Baltic coast of Pomerania to climax a 62-mile four-day drive which cut eastern Pomerania in three sections, trapping an estimated 200,000 German troops.

Mar. 5—Three columns of U. S. First Army troops entered Cologne.

Mar. 6—U. S. First Army captured Cologne, fourth largest city in Germany. Allies extended holdings to include west bank of Rhine from Cologne north to Neuss. Prime Minister Churchill, after visiting front at Juelich, Germany, told Commons: "One good strong heave all together will finish Germany."

Mar. 7—Berlin said Russian troops launched seven armies in all-out offensive toward Berlin from Oder river. Moscow made no mention of German report.

Mar. 8—Elements of U. S. First Army made surprise spurt across Rhine bridge at Remagen to reach east side of river 25 miles southeast of Cologne. It was first time Rhine had been crossed by an invader since 1805.

Mar. 9—Revelation of new American Army on west front, the U. S. Fifteenth under command of Lieutenant General Gerow. Fifteenth was part of Lt. Gen. Bradley's Twelfth Army group.

—Russians drove toward suburbs of Danzig from three directions approaching positions nine miles from port.

Mar. 10—Last Nazi bridgehead west of Rhine collapsed with German evacuation of Wesel, north of Coblenz. American bridgehead on east bank of Rhine near Remagen expanded as much as a mile in some places.

Mar. 12—Russians captured Kuestrin, Oder river stronghold 38 miles east of Berlin.

—Allied air offensive sustained with renewed attacks on cities of northern Germany. British Mosquito bombers attacked Berlin for twentieth straight night.

Mar. 13—American bridgehead on east bank of Rhine was extended to depth of five miles.

Mar. 14—British Air Ministry announced R-A-F dropped world's largest bombs on German main line rail viaduct at Bielefeld, north of Ruhr. Bombs were described as 11-ton missiles 25 feet long.

Mar. 15—American Seventh Army opened

new operation against Saar basin around Saarbruecken.

—1,350 U.S. heavy bombers hit Zossen, site of German General Staff Headquarters 20 miles south of Berlin. Rome revealed for first time that Italian-based American bombers operated with Red Army in Austria, Hungary, and Yugoslavia.

—War Department revealed U.S. ground force casualties in Europe from D-Day through Mar. 1 totalled 425,007, with 70,414 killed.

Mar. 16—U.S. Third Army in north and west began pincers drive on Saar basin with U.S. Seventh Army driving up from south.

—Prime Minister Churchill predicted end of war by summer's end.

—Britain revealed for first time that giant German V-2 rocket bombs had been hitting London and southern England.

Mar. 17—U.S. Third Army captured Coblenz. General Eisenhower warned German civilians in Mannerheim-Ludwigshafen areas to evacuate to escape merciless Allied bombing.

Mar. 18—Berlin pounded in heaviest daylight attack when more than 1,300 U.S. heavies dropped 12,400 high explosive bombs and 650,000 fire bombs.

Mar. 20—German defenses in Saar reported collapsing with Nazi troops fleeing to escape trap by U.S. Third and Seventh armies. Seventh Army took Saarbruecken and Zweibruecken and Third Army seized Worms on Rhine and entered Mainz, 18 miles north.

—R-A-F bombers attacked Berlin for 29th straight night.

Mar. 21—U.S. Third Army entered Ludwigshafen on Rhine as escape corridor for German troops was narrowed to 20 miles between U.S. Third and Seventh armies.

—Field Marshal Gen. Albert Kesselring was reported replacing Field Marshal Gen. Karl Rudolf Gerd von Rundstedt as commander of German forces on west.

—More than 8,000 sorties were flown by Allied bombers from bases in England, Italy, and behind western front.

Mar. 22—Paris announced 11,225 prisoners of war had been freed by Allied advance on west and that nearly 15,000 had been liberated by Russians on east.

Mar. 23—U.S. Third Army crossed Rhine at unidentified spot, placed by Berlin as four miles north of Ludwigshafen. Lt. Gen. Bradley, commander of Twelfth Army Group, said Allies were in position to cross Rhine virtually "anywhere at any time."

Mar. 24—U.S. Ninth and British Second Armies crossed Rhine to establish four bridgeheads on east bank between Duisberg and Rees.

—Moscow reported new Russian offensive in western Hungary had gained 43 miles along a 62-mile front placing Red Armies within 40 miles of Austria and 80 miles southeast of Vienna.

Mar. 25—U.S. Third Army's Fourth Armored Division swept 27 miles beyond Rhine to cross Main river. British, Canadian and American units to north expanded Rhine bridgehead to a width of 30 miles and a depth of 8.

Mar. 26—Seven Allied armies were reported east of Rhine. Seventh to cross was U.S. Seventh Army which made surprise crossing at undisclosed point near Karlsruhe. U.S. Third Army entered Frankfurt-on-the-Main.

—Russians pushed to within 31 miles of

Austrian border and 70 miles southeast of Vienna.

Mar. 27—As Allied armies gained on all sectors of western front, General Eisenhower told correspondents in Paris that Germans' main defense line "had been broken" and that Germans as a military force on Western Front were "whipped army." He added: "There will be no negotiated unconditional surrender, but an imposed unconditional surrender."

Mar. 28—Russians captured Gdynia, on Baltic and swept to within ten miles of the Austrian border on the south.

Mar. 30—Russian troops invaded Austria just north of captured Koeszeg. And north, other Soviet forces captured Danzig. Russians hoisted Polish flag over city indicating recognition of Poland's claim to former internationalized port.

Mar. 31—Strict news blackouts were imposed on most advanced units of seven Allied armies plunging into Germany. But official estimates showed that 1,142,224 Germans had been captured since December 16. General Eisenhower broadcast to German troops to "avoid useless bloodshed" and gave instructions on how to surrender.

APRIL

Apr. 1—30,000 Germans were trapped with spearheads of the U.S. Ninth and First armies encircled the Ruhr and met at Lippstadt.

—Allied air box score for March: U.S. Eighth Air Force dropped a record of 73,500 tons of bombs on Germany in flying 44,900 sorties, 28,500 by heavy bombers. Losses: 138 bombers, 99 fighters. German losses: 390 aircraft shot down and destroyed on ground. R-A-F dropped 75,600 tons of bombs on Germany during month, also establishing a record.

Apr. 4—Spearheads of U.S. Third Army reached points 137 miles southwest of Berlin.

—Russian troops shelled Vienna from lines two miles away. Moscow said 50-mile siege arc had been thrown around the Austrian capital.

Apr. 5—General Eisenhower predicted that V-E day would come about only by proclamation by Allies. An influential Nazi publication, *Die Schwarze Korps*, was quoted in a Stockholm dispatch as saying: Germany is only days or perhaps weeks from absolute collapse.

—Russia denounced its five-year neutrality pact with Japan, accusing Japan of aiding Germany in fighting Russian allies.

Apr. 7—Russians swept around to west of Vienna to encircle three-fourths of Austrian capital.

—U.S. Third Army uncovered huge German gold and currency hoard hidden in salt mine near Merkers, Germany. Nazi official in charge listed treasure as 100 tons of gold bullion, entire German reserve; \$2,000,000 in U.S. currency; 1,000,000 francs; 110,000 pounds sterling; 4,000,000 Norwegian crowns and lesser amounts of other currencies. Also buried were two-thirds of Germany's art treasures.

Apr. 8—British troops striking northward advanced to within seven miles of Bremen and cut off thousands of Germans to southwest between Ems and Weser rivers. U.S. Third Army over-ran Nazi prison camp near Ohrdruf, nine miles south of Gotha, where survivors said Germans had beat, tortured and starved to death 4,000 victims in preceding 8 months.

—London announced end of German V-2

rocket bomb attacks saying German setbacks had pushed range back so far bombs were ineffective. No rockets had fallen since Mar. 29. But between June, 1944 and March 29, 1945, 8,436 persons had been killed in V-2 attacks and about 25,000 were injured.

—86 German planes were destroyed in Allied raids on 18 German targets.

Apr. 9—Russians captured Koeningberg, East Prussia, and seized 42,000 prisoners. Moscow said heart of Vienna had been taken by Soviets.

Apr. 10—Hanover fell to U.S. Ninth Army as British troops entered outskirts of Bremen. U.S. First Army 114 miles southwest of Berlin at Auleben.

Apr. 11—U.S. Ninth Army, in 50-mile sweep, reached Elbe river at Magdeburg, 63 miles from Berlin. Allies captured Coburg, Essen, entered Schweinfurt and Brunswick, and tightened encirclement of German forces in Ruhr and Netherlands pockets. More than 100,000 Germans were taken prisoner in first ten days of April.

Apr. 12—President Roosevelt died of a cerebral hemorrhage. He was 63 and had held office as chief-executive for 12 years, one month and eight days. He died at his "little White House" at Warm Springs, Georgia. Vice President Harry S. Truman, 60, took the oath of office as President of the United States becoming the thirty-second chief executive.

—U.S. Ninth Army (Second Armored Division) crossed Elbe river. U.S. Ninth Air Force, based on continent, destroyed 117 German planes on ground, bringing German aircraft losses in preceding six days to 1,032.

Apr. 13—U.S. Third Army spearheads crossed Mulde river to reach points 89 miles west of Russians and 38 miles west of Dresden.

—Moscow reported fall of Vienna. Moscow said Austrian capital was freed seven years, one month and a day after forced "anschluss" of 1938 which made Austria a German satellite.

—U.S. fighters destroyed 321 German planes, most of them on the ground.

Apr. 15—Stiffened German resistance wiped out one U.S. Ninth army bridgehead on east bank of Rhine near Magdeburg.

—Germans reported Soviet troops driving on Berlin from lines 24 miles from the capital. Moscow had not confirmed Soviet offensive.

—Allied headquarters revealed U.S. Ninth Army troops captured Franz von Papen, once Vice Chancellor under Hitler and former Chancellor of German Republic, in Ruhr pocket on April 10. Other German prisoners taken included: Dr. Manfred Zapp, Nazi propaganda chief expelled from U.S. in 1941; Prince August Wilhelm, fourth son of the late Kaiser, and Field Marshal August von Mackensen, retired German commander.

Apr. 16—U.S. Seventh Army entered Nuremberg, shrine city of German Nazi party.

—Berlin said Russians launched all-out offensive toward Berlin but Moscow gave no confirmation.

—905 German planes were destroyed, most on ground. Gen. Carl A. Spaatz, commander of U.S. Strategic Air Forces in Europe, said air war against Germany had ended victoriously and that U.S. heavy bombers would be used in future for tactical work.

Apr. 17—British troops drove within 25 miles of Hamburg. U.S. First Army captured half of Halle, northwest of Leipzig and entered outskirts of Leipzig.

—440 more German planes were destroyed by Allied planes bringing total of German aircraft losses to 4,139 in April.

Apr. 18—U.S. Third Army bisected pre-Munich Germany by driving into Czechoslovakia near Asch. U.S. First Army was in Leipzig and U.S. Ninth Army captured Magdeburg.

—German broadcasts placed Russians within 14 miles of Berlin and said Soviet troops advanced 13 miles to southwest to outflank capital. Moscow—ignoring German reports—said Russians had opened offensive in Silesian basin in three countries—Germany, Czechoslovakia, and Poland.

Apr. 19—U.S. First Army captured Leipzig, fifth most important city in Germany, and captured Halle, northwest of Leipzig. 316,930 German prisoners were taken in wiping out Ruhr pocket.

—Moscow confirmed for first time Russian offensive toward Berlin.

—Front dispatches reported horrors uncovered in German prison and concentration camps. Evidence found at Buchenwald and Belsen concentration camps in particular presented evidence that thousands of victims had been murdered by torture, and inhuman treatment and that thousands of others had died from disease, starvation, and lack of medical treatment. Prime Minister Churchill warned that worse things could be expected and said that General Eisenhower had told him of new discoveries at Weimar which "far surpass anything previously disclosed." Churchill announced that he and President Truman and Premier Stalin had signed a "solemn warning" that men responsible for such atrocities would be brought to trial.

Apr. 20—U.S. Seventh Army captured Nuremberg, symbolically enough, on Hitler's birthday.

—U.S. Fifth Army in Italy, pushing northward in new offensive, broke through last mountain barriers southwest of Bologna and advanced into Po valley.

Apr. 21—German broadcasts said Russians were from three to four miles inside city limits of Berlin.

—U.S. Fifth and British Eighth Army troops captured Bologna, Italy.

—British night-flying Mosquito bombers hit Berlin six times, flying a record of 1,000 sorties.

Apr. 22—Swedish reports said Russian troops seized one-sixth of Berlin after penetrating seven miles into capital. Moscow reported seizure of 16 suburbs and five towns on approaches to Berlin. Other Soviet forces continued drive westward toward joining Americans pushing eastward in vicinity of Dessau.

—French troops captured Stuttgart, crossed Danube and pushed through Ludwigshafen, reaching Swiss border 20 miles west of Lake Constance.

Apr. 23—Allied bombers dropped leaflets on Germany warning of the Big-Three pledge to punish all persons mistreating deported internees or war prisoners.

Apr. 24—Two Russian armies met inside Berlin to seize almost one-fourth of greater Berlin. German Propaganda Chief Goebbels appealed to Germans to hold out until reinforcements arrived from other fronts.

—U.S. Third Army in continuing advances reached points within three miles of Danube at Regensburg, were 35 miles from Austrian border, and cut two of main highways out of Czechoslovakia to south.

—U.S. Fifth Army troops in Italy crossed Po river at several undisclosed points.

Apr. 25—First White Russian Army and First Ukrainian Army met west of Berlin to encircle capital. Heavy fighting continued inside city.

—U.S. Third Army crossed Czech frontier near Eger.

—German troops in Italy were reported fleeing northward to escape Allied advances.

—R-A-F planes dumped six-ton block-busters on Hitler's chalet at Berchtesgaden.

—Paris said V-E day would be proclaimed by Allied Chiefs of Staff in a joint statement.

—46 nations were represented at first meeting of United Nations Conference on International Organization in San Francisco. President Truman delivered address calling upon nations to "rise above personal interests . . . to achieve a just and lasting peace."

Apr. 26—Bremen fell to British Second Army. U.S. Third Army maintained steady advance into Bavarian redoubt with advance elements reported within 40 miles of Munich.

—Russians captured Baltic port of Stettin.

—Allied troops in Italy captured Verona and Swiss reports said Benito Mussolini had been seized by Italian partisans while attempting to flee to northern Italy.

—Hamburg radio declared Reich Marshal Hermann Goering, commander of Luftwaffe, had retired because of heart disease. Col. Gen. Robert Ritter von Greim was named as his successor.

Apr. 27—Units of U.S. First Army and First Ukrainian Army had made contact at 4:40 p.m. April 25 on demolished bridge over Elbe river at Torgau, 75 miles south of Berlin and 50 miles northwest of Dresden.

—U.S. Third Army armored column drove into Austria and captured Gegenbach and Schwarzenberg.

—Lt. Gen. Kurt Dittmar, German army analyst and commentator, surrendered to U.S. Ninth Army at Magdeburg saying "the war is over."

—U.S. Fifth Army in Italy entered Genoa which had already been partially seized by Italian partisans.

Apr. 28—Surrender reports circulated through United States prompted by news dispatch from San Francisco. Rumor was denied by President Truman and Secretary of State Stettinius. Source of information had been Sen. Tom Connally, D., Tex., chairman of Senate Foreign Relations Committee. This capped other reports which said Nazi Gestapo Chief Heinrich Himmler had transmitted surrender offer through so-called private sources to United States and Britain. Go-between was identified as Count Folke Bernadotte, vice chairman of Swedish Red Cross and nephew of King Gustav of Sweden. Hitler was said to be dying. Allies reiterated demand for "unconditional surrender" only which would include Russia as well as United States and Britain.

—Evidence of Nazi atrocities mounted as Buchenwald concentration camp was revealed to be "extermination factory" with crematorium capable of disposing of 400 bodies a day.

Apr. 29—Italy's ruler for 20 years, Benito Mussolini, was executed after brief trial. He and his mistress, Clara Petacci and several other officials were captured on April 26 trying to escape from Como after they were refused permission to enter Switzerland. Bodies of Mussolini, Clara Petacci and four other officials were taken to Milan where angry Italians reviled and abused them.

Italians strung them up by their heels for several hours in public.

—U.S. Seventh Army entered Munich, birthplace of Nazism.

—Allies in Italy entered Milan, took Venice and occupied four other cities.

Apr. 30—Russians seized Reichschancellery in Berlin and hoisted Soviet flag.

—U.S. Seventh Army, supported by partisan groups within city, captured Munich. 33,000 prisoners were freed at Nazi concentration camp of Dachau. Capture of Mooseburg liberated 110,000 Allied war prisoners, including 11,000 Americans. American and Russian troops effected two more junctions in vicinity of Wittenberg.

—General Clark announced in Rome that German armies in Italy had been "virtually eliminated as a military force."

MAY

May 1—Hamburg radio said Adolph Hitler, 56, died while at his command post in Berlin chancellery. Grand Admiral Karl Doenitz, proclaimed himself fuhrer by Hitler's appointment. Doenitz, 53, directed Germany's U-Boat campaign and became commander-in-chief of German Navy in 1943. His ascension to power came as surprise. Said Doenitz in Hamburg broadcast: "The Fuehrer has fallen. Faithful to his great ideal to save the nations of Europe from Bolshevism, he has given his life and has met a hero's death . . . The Fuehrer has designated me to be the head of the state and supreme commander of the armed forces. I take over the supreme command . . . to continue the struggle against the Bolsheviks . . . Against the British and Americans I am bound to continue to fight as long as they impede me in the struggle against the Bolsheviks . . ." Allied authorities, fearing Nazi trick, said they would not accept report of Hitler's death until his body was produced.

May 2—War in Italy ended. At noon, unconditional surrender was signed by Germans at Caserta on April 29, covering Italy and part of Austria. One million men in land, sea and air forces were included in terms which applied to all northern Italy to Isonzo River in northeast and to Austrian provinces of Vorarlberg, Tyrol and Salzburg and portions of Carinthia and Styria. Signing for Col. Gen. Heinrich von Vietinghoff-Scheel, German commander in southwest, and Obergruppenfuhrer Karl Wolff, supreme commander of Elite Guard and police and general plenipotentiary of German Army in Italy were German lieutenant colonel and a major, U.S. Lt. Gen. W. D. Morgan signed for Allies. Istrian peninsula, where Yugoslavs were gaining control was not included in surrender terms.

—After twelve days of street fighting—Berlin fell to armies of Russian Marshals Gregory K. Zhukov and Ivan S. Konev.

—U.S. Seventh Army captured German Field Marshal Gen. Karl von Rundstedt, twice commander of German forces on western front. Rundstedt was seized 20 miles south of Munich where he had retired.

May 3—Collapse of Germany reported imminent. Hamburg surrendered without battle to British troops. German pocket wiped out between Rostock and Hamburg where Russian units joined British troops on a 65-mile front South of Baltic. Soviets also linked up with American 9th Army on a 33-mile front west of Berlin. Russians said prisoner toll in Berlin had mounted to 134,000. 64 German ships, fleeing from Germany to Denmark or Norway, were sunk

by Allied fighters off Baltic coast of Schleswig-Holstein.

—No trace of Hitler's body was found. Rumors circulated that he had committed suicide in Reichschancellery according to a pre-arranged plan.

May 4—British Field Marshal Sir Bernard L. Montgomery accepted unconditional surrender of all German forces in Netherlands, northwest Germany, Denmark, Helgoland, and Frisian Islands. More than 500,000 Germans were involved, bringing prisoner score for preceding two days to 1,000,000. The surrender, effective 8 a.m. May 5, was signed in Montgomery's Twenty-first Army group headquarters just south of Hamburg at 6:25 p.m. Montgomery signed for Allies. Adm. Hans G. von Friedeburg, commander of German Navy, signed for Germany.

—R-A-F fliers destroyed another 74 German vessels attempting to escape to Norway.

—Captured Field Marshal Gen. von Rundstedt told Allied correspondents that Germany did not attempt invasion of England in 1940 after fall of France because she feared her naval strength would not match Britain's sea power.

May 5—Organized resistance ended in western Austria and Bavaria when German Army Group G surrendered to U. S. Gen. Jacob Dever and his Sixth Army Group.

—Prisoners liberated from Nazi concentration camps included: French premiers Edouard Daladier, Leon Blum and Paul Reynaud; French generals Maurice-Gustave Gamelin and Maxime Weygand; former Austrian Chancellor Kurt Schuschnigg; Andre Francois-Poncet, former French ambassador to Berlin and Rome; and Albert Sarraut, former president of French council.

May 6—German resistance continued to crumble. U. S. Third Army striking into Austrian and Czechoslovakia on 150-mile front captured Karlsbad and great Czech armament center of Pilsen. German troops continued to battle patriots in Prague. U. S. Fifth Army entered Austria from Italy. Soviet troops completed occupation of Germany's shore on Baltic and seized seaplane island base of Ruegen, 45 miles south of Sweden.

May 7—V-E celebrations were touched off round the world by premature Associated Press dispatch by Edward Kennedy from Reims, France. Kennedy reported Germany surrendered unconditionally in General Eisenhower's headquarters in a Reimsschoolhouse 2:41 a.m. French time (8:40 p.m. EWT, May 6). Details disclosed AP tele-

phoned surrender ceremony story from Paris to London and then sent it by cable to New York, releasing story one day ahead of time. Supreme Allied Headquarters suspended AP's filing privileges for six hours, later restored them but banned Kennedy. Flensburg radio had announced that Grand Adm. Doenitz had ordered unconditional surrender.

—Russians captured Breslau after an 84-day siege—seizing 40,000 prisoners.

May 8—V-E Day. Victory in Europe was confirmed. Unconditional surrender was formally ratified and confirmed in Berlin, ending war in Europe at 11:01 p.m. central European time, (6:01 p.m. EWT).

Berlin ceremony implemented military surrender signed at Reims. Signers at Reims were: Lt. Gen. Walter Bedell Smith, Eisenhower's Chief of Staff for Supreme Allied Command; Col. Gen. Gustav Jodl, Chief of Staff of German Army; Gen. Ivan Susloparov for Russia; and Gen. Francois Sevez for France.

In Berlin signers were: For Allies, British Air Chief Marshal Sir Arthur Tedder, deputy supreme commander to General Eisenhower and Marshal Gregory K. Zhukov, commander of First White Russian Army. For Germany: Field Marshal Gen. Wilhelm Keitel, chief of High Command; Adm. Hans G. Friedeburg, Navy chief, and Col. Gen. Paul Stumpf, chief of Luftwaffe.

V-E day was officially proclaimed by President Truman and Prime Minister Churchill. Both men emphasized need for concentrating efforts to defeat Japan. In Moscow, President Mikhail Kalinin proclaimed Russia's victory day as May 9.

President Truman, in his V-E day address declared: "We must work to finish the war. Our victory is but half won . . . When the last Japanese division has surrendered unconditionally, then only will our fighting job be done."

Prime Minister Churchill said: "We may allow ourselves a brief period of rejoicing, but let us not forget for a moment the tolls and efforts that lie ahead. Japan, with all her treachery and greed, remains unsubdued. The injuries she has inflicted . . . and her detestable cruelties call for justice and retribution. . . ."

General Eisenhower urged that the common effort of war be directed toward the common effort of peace. " . . . Let us have no part in the profitless quarrels in which other men will inevitably engage as to what country and what service won the European war. . . ."

1946 FISCAL YEAR FEDERAL BUDGET ESTIMATE

War expenditures of \$70,000,000,000 for the 1946 fiscal year starting July 1, 1945 compared with approximately \$89,000,000,000 in the 1945 fiscal year were "tentatively" estimated by President Franklin D. Roosevelt in his fourth wartime budget message on Jan. 9, 1945.

The President estimated non-war expenditures at \$13,000,000,000 and thus the total 1946 budget called for \$83,000,000,000 or nearly \$17,000,000,000 below the 1945 budget of approximately \$100,000,000,000.

The over all cost of the war to the United States from 1941 through the 1946 fiscal year was estimated at \$450,000,000,000.

A two-fold program for peace was recommended by the President in presenting the budget:

1. early participation by the United States in an international effort toward a stable world economy.

2. government and business cooperation at home to provide full employment.

Key figures in the 1946 fiscal budget were:

Cost of war, 1941-46.	\$450,000,000,000
Total estimated expenditures.	83,000,000,000
Total war expenditures.	70,000,000,000
Total receipts.	41,000,000,000
Public debt increase during year.	40,000,000,000
Public debt, end of fiscal 1946.	292,300,000,000

CHRONOLOGY OF THE PACIFIC WAR 1941

Dec. 7—Japanese forces launched sneak attack, bombing U. S. air and naval bases in Hawaiian islands, Philippines, Guam and Wake island and British possessions of Singapore and Hong Kong. Simultaneously, Japanese troops invaded Thailand (Siam) and Malaya by air and sea. Attack on Pearl Harbor in Hawaii was launched about 7:55 a.m., Honolulu time (1:25 p.m. EST). At 4 p.m. EST Japan declared war against United States and Great Britain. Unexpected offensive began while Japanese ambassador, Admiral Kichisaburo Nomura was conferring with President Roosevelt in Washington and continued while Nomura and Saburo Kurosu, so-called special peace envoy, called on Secretary of State Cordell Hull to hand him Japan's rejection of his note of Nov. 26, regarding peace in Pacific.

Between 150 and 300 Japanese planes, striking from aircraft carriers or Japanese mandated islands, concentrated on the Hawaiian island of Oahu, bombed great naval base at Pearl Harbor, Ford island, Wheeler Field, Hickham field, Honolulu municipal airport and Honolulu itself. Streets of Wahiawa were machine-gunned and Japanese returned for second raid in afternoon.

President Roosevelt, broadcasting on Feb. 23, 1942, announced that total casualties during Pearl Harbor attack were 2,340 killed and 946 wounded. Secretary of Navy Knox revealed that battleship Arizona and target ship Utah were sunk, battleship Oklahoma capsized, mine layer Oglala and destroyers Cassin, Downes and Shaw sunk. Several other vessels were damaged and Japanese claimed 450 planes were destroyed on ground and 14 in air.

Roberts commission investigating Pearl Harbor disaster made this report: "About 7:55 a.m. Honolulu time, on Sunday Dec. 7, 1941, Japanese forces attacked army and navy installations and ships of the Pacific fleet in Oahu, Territory of Hawaii. Although the United States and Japan were at peace in the morning, Japan planned to announce to the Secretary of State of the United States at 1 p.m., EST, the severance of diplomatic relations and simultaneously to attack the island of Oahu and Pearl Harbor. The military preparations for this breach of international faith and honor were put in train and the forces for its consummation had been dispatched weeks prior to any initiation of the planned severance of relations."

Attacks in Far East, although within 12 hours of raid at Pearl Harbor, actually occurred Dec. 8 (Tokyo time is 14 hours ahead of Eastern Standard Time.) Japanese bombers raided Iba, Aparri, Davao, Fort Stotsenburg, Clark field, Baguio, Camp John Hay and Tarlac in Philippines, causing an estimated 500 casualties. At same time, Japanese troops invaded Thailand (Siam) and Malaya by air and sea. Thailand ceased hostilities after token resistance.

More than 1,000 Japanese men, women and children were rounded up in Manila.

Japanese sneak attack was an apparent answer to President Roosevelt's message to Emperor Hirohito one day earlier, Dec. 6, 1941, in which Roosevelt appealed to Japanese leader to help preserve peace.

"Both of us," Mr. Roosevelt wired, "... have a sacred duty to restore traditional amity and prevent further death and destruction in the world."

Dec. 8—Congress declared war against Japan with only one dissenting vote after President Roosevelt denounced Japan's "unprovoked and dastardly attack" upon possessions of the United States. Senate passed war resolution 82 to 0; House adopted it ten minutes later by vote of 388 to 1. Four hours later at 4:10 p.m., EST, President Roosevelt signed resolution officially placing United States at war with Japan. Dissenting vote in House was cast by Miss Jeannette Rankin, R., Mont., who also voted against war in 1917.

Japan's declaration of war against United States actually came on Dec. 8, Tokyo time, but it was still Dec. 7 in America. Premier General Hideki Tojo in a broadcast said that Hirohito declared war. "Japan has done her utmost to prevent this war," he declared, adding "final victory will be that of Japan."

British government declared war against Japan at 7:30 a.m. EST, after which Prime Minister Churchill told House of Commons that Britain acted without waiting for U. S. declaration because Japan already had attacked Malaya.

Dec. 9—Thousands of Japanese troops, supported by warships and planes, land on north and western coasts of Luzon island in Philippines, on which Manila is located. Landings came after widespread air attacks during which Nichols Field, U.S. army air base near Manila was bombed heavily. Plans were made for partial evacuation of Manila, with more than 200,000 civilians being removed from Manila area. Twenty-five thousand Japanese nationals were rounded up and interned.

In Malaya, Japanese forces poured ashore from 25 transports while protected by hundreds of aircraft, landed in Kota Bharu area in northeastern Malaya, and also in Singora-Patani area in Thailand despite strong British resistance.

An official Japanese spokesman in Tokyo claimed Japs captured more than 200 Allied merchant ships, including American liner President Harrison along China coast.

China, Australia, New Zealand and South Africa declared war on Japan, and China also declared war on Germany and Italy.

Dec. 10—Great Britain suffered its worst naval disaster of World War II. The 35,000 ton British battleship Prince of Wales and the 32,000-ton battle cruiser Repulse were sunk in South China sea off Malayan coast by Japanese torpedo planes and dive bombers. British admiralty announced that 130 officers and 2,200 men were saved. 595 were missing.

Japanese troops gained footholds at Aparri and other points along northern coast of Luzon, but U.S. army and navy planes repelled attack between Vigan and San Fernando. War department announced in its first communique that six loaded Japanese transports were bombed at Vigan. One was sunk.

Japanese continued severe bombing attacks on U.S. naval base at Cavite, Nichols Field, Nielson airport, Fort William McKinley and Pasay. Thirty-seven persons were killed and 47 injured at Pasay, a suburb of Manila.

Japanese captured important British air base of Kota Bharu on east coast of North Malaya, 350 miles north of Singapore.

Britain opened naval bases at Singapore and elsewhere to American and Allied ships.

Batavia underwent its first Japanese air raid.

Dec. 11—War Department announced sinking of battleship Haruna, or one of Haruna class, off Northern Luzon. Army bombers sank it. Navy planes badly damaged another Japanese battleship, Kongo class, off Luzon coast with direct bomb hits.

Navy planes based on Wake island sank one light Japanese cruiser and one destroyer, and marine garrison on Wake repulsed four separate air attacks and one naval attack.

More Japanese troops landed in northern Luzon and Japanese parachutists seized airport six miles from Lagan in Northeastern Luzon. Fifth columnists were arrested in Manila for spreading rumors that water supply had been poisoned.

Japanese claimed 45 American planes were shot down and 36 destroyed on ground in raids in and around Manila. One American destroyer and one submarine were claimed to have been sunk in Manila Bay. Japanese army announced occupation of Guam and capture of 350 Americans, including Captain George G. McMillan, governor of Guam.

Secretary Frank Knox arrived in Honolulu, as navy announced that 20 Japanese planes were shot down during Pearl Harbor attack. Also announced that Japanese made six bombing raids during sneak attack, coming over in waves at 7:35 a.m., 11:29 a.m., 12:22 p.m., 7:15 p.m. and 9:10 p.m.

Dec. 12—Japanese increased landing operations on Luzon, being repulsed at several points but gaining footholds at others. More Japanese landed at Aparri. Japanese bombers raided Clark field and airport at Batangas.

Japanese fifth columnists were shot in Manila white setting off red flares to guide Japanese airmen.

War department announced that Captain Colin P. Kelly, jr. of Madison, Fla., was killed in successfully bombing Japanese battleship Haruna.

Japanese Imperial headquarters claimed that 202 American planes were shot down in Philippines in first five days of war, as against nine Japanese naval planes lost.

Dec. 13—Japanese bombers made devastating attack on Nichols field near Manila, coming in three waves, killing at least 75 persons and wounding 300. They attacked a three-mile residential area of Manila, causing considerable destruction.

Navy said that Guam apparently had been captured by Japanese, but that Wake and Midway continued to resist. Guam was garrisoned by less than 400 sailors and 155 marines.

General MacArthur's headquarters announced that Japanese landing party in Lingayen area of Western Luzon was wiped out by Philippine troops.

Dec. 14—Dwindling American air power in Philippines continued to strike back at Japanese forces pouring into Northern Luzon. General MacArthur announced that four Japanese transports had been sunk and three others seriously damaged by army pilots north of the Philippines. He said that at least 40 Japanese planes were shot down in 14 major air raids.

Navy department announced that Japanese submarines were operating in Hawaiian area, and that "vigorous attacks were being made against them."

Marines on Wake and Midway continued to resist.

Dec. 17—Admiral Husband E. Kimmel,

commander in chief of Pacific fleet, and General Walter C. Short, commander of Hawaiian department, were relieved of their commands by navy and war departments respectively.

Dec. 18—Tokyo radio declared that Japanese land forces had landed on island of Hong Kong, adding that British put up fierce resistance after having twice rejected surrender ultimatums. Announcement is made that Philippine army was being merged with United States army in Far East.

Dec. 20—Admiral Ernest J. King, in command of Atlantic fleet since February, 1941, was promoted to commander in chief of United States fleet. He thus was put in supreme command of all naval forces in Atlantic, Pacific and Asiatic waters. Rear Admiral Royal E. Ingersoll was named commander of Atlantic fleet.

Dec. 22—Japanese made largest landing to date in Philippines, moving 80,000 troops into Lingayen Gulf under cover of planes, cruisers and destroyers. Successful landings were effected. War department said invasion met with fierce resistance. First American troops arrived in Australia.

Dec. 23—Japanese Imperial headquarters announced that Japanese forces succeeded in landing on Wake island at night December 22. Landing was described as successful, with complete occupation effected at 10:30 next morning. Japanese admitted losing two destroyers.

War department announced that fighting on eastern shore of Lingayen Gulf was increasing in intensity, with Japanese pressing on Manila from both northwest and southwest. New enemy force landed on southeast coast of Luzon, 75 miles from Manila.

Dec. 24—More landings were made on Luzon with 100 enemy transports estimated in waters around Philippine islands.

Dec. 25—Hong Kong, British Crown Colony, surrendered to Japanese. American plane blew up Japanese submarine off California coast.

Dec. 26—War department announced that Manila had been declared an "open city."

Dec. 27—Manila was bombed despite declaration as "open city." Bombing lasted three hours, with Santo Domingo church and Treasury building being heavily damaged. Fires kindled by Japanese bombs razed quarters of Dominican fathers, Santo Rosa Girls College, and adjoining homes and commercial establishments.

Dec. 28—Japanese planes again bombed Manila, concentrating attack on water front, old walled city and business district. American planes dropped pamphlets over city urging population to leave for two refugee centers.

President Roosevelt—in a proclamation—declared:

"I give to the people of the Philippines my solemn pledge that their freedom will be redeemed and their independence established and protected."

Dec. 29—General MacArthur reported that Corregidor fortress in Manila Bay was raided for three hours by Japanese planes. In Luzon ground fighting, he said American forces had withdrawn to new lines and that both sides were suffering heavy losses.

Dec. 30—General MacArthur said Philippine situation was growing more serious for Americans; that Japanese practically controlled all roads from the air.

Dec. 31—Enemy reports placed Japanese only six to eight miles from Manila.

1942

Jan. 2—General MacArthur's headquarters announced that Japanese land forces had occupied Manila, and also Cavite Naval base in Manila Bay. An official navy communique said that all ships and naval personnel were removed from Cavite area before Japanese took over. Naval base was left in ruins. General MacArthur had withdrawn his troops to hills northwest of Manila, thus making possible Japanese entrance. As Manila had previously been declared an "open city" defense of the capital from within the city limits was not possible.

MacArthur's forces continued to hold the island fortress of Corregidor in Manila Bay.

Jan. 11—Japanese invaded Netherlands Indies, landing in large force on Tarakan island, oil center off northeast coast of Borneo. They also landed in sections of Minahassa, narrow northern arm of island of Celebes. Invasions were partly sea-borne and partly by parachutists.

Jan. 12—General Sir Archibald P. Wavell, new supreme commander of American, British and other Allied land, sea and air forces in Pacific, took over his command at general headquarters somewhere in Netherlands Indies.

Jan. 15—Japanese forces advanced into Burma.

Jan. 23—Japanese invaded New Britain, and also landed on Bougainville at north end of Solomon islands chain and on New Guinea.

Jan. 24—President's special board investigating Japanese attack on Pearl Harbor made official report, declaring raid apparently was an astonishment to United States Army and Navy commanders, who had relaxed vigilance and had not heeded repeated warnings from Washington. Decision of board headed by Supreme Court Justice Owen J. Roberts, laid blame on General Short and Admiral Kimmel.

Jan. 25—United States cruisers and destroyers of Asiatic fleet sank five Japanese transports and probably one other in Makassar strait, between Celebes and Borneo.

In Malaya, British continued to hold off invaders only 60 miles north of Singapore.

Jan. 29—American forces landed on Fiji islands.

FEBRUARY

Feb. 1—U.S. Pacific fleet—using carriers and cruisers—attacked Japanese naval and air bases in Marshall and Gilbert islands. Five Japanese warships were destroyed, including converted aircraft carrier and eleven auxiliary vessels. Numerous shore installations were wrecked.

Feb. 15—Singapore, great British naval base and fortress, surrendered unconditionally to Japanese forces. Island and city had been in British possession since 1824. Lieutenant General A. E. Percival, commander of British army, and Lieutenant General Tomoyuki Yamashita, Japanese commander in chief, signed surrender terms. Prior to surrender, Japanese forces had destroyed 32 warships and transports in Singapore harbor.

Feb. 24—U.S. cruisers, destroyers and bombing planes attacked Japanese installations on Wake and near-by Peale and Wilkes islands. Attack lasted 82 minutes and did widespread damage.

Feb. 26—On Bataan in Philippines, General MacArthur's forces, fighting against great odds, launched surprise attack, pushing Japanese back along whole front.

MARCH

Feb. 27-March 1—Allied naval forces, in three-day engagement with Japanese fleet, in Java sea north of Java, suffered serious defeat, losing majority of their ships. United States, British, Australian and Dutch naval units were engaged in battle against Japanese force of at least nine cruisers and two flotillas of destroyers. Allied fleet was under command of Rear Admiral Decorman of Dutch Navy. United States losses included heavy cruiser Houston, destroyer Pope, aircraft carrier Langley, and tanker Pecos. British lost one cruiser and four destroyers. Altogether, Allies lost thirteen vessels.

March 5—Batavia, capital city of Java and also capital of Netherlands Indies, was occupied by Japanese army.

March 10—Rangoon, capital of Burma, fell to Japanese after Allied forces had been routed in neighborhood of capital. A British communique said all dock installations, oil refineries and machinery which could not be moved was destroyed in Rangoon.

Japanese completed occupation of Java, with 93,000 Netherlands troops and 5,000 British and Americans surrendering.

March 12—American forces landed in New Caledonia.

March 13—Japanese forces effected landings on Buka, westernmost of Solomon islands northeast of Australia.

March 17—General Douglas MacArthur arrived in Australia after being ordered to move his headquarters by War department. Left in command of Philippines was Lieutenant General Jonathan Wainwright. President Roosevelt stated that General MacArthur would command everything, including sea and air forces, east of Singapore in southwestern Pacific, and would be more useful in Australia than on Bataan peninsula. Accompanied by Mrs. MacArthur, his son and some officers, General MacArthur went from Bataan to Mindora in patrol boats, thence to Australia by airplane.

APRIL

April 9—American forces, outnumbered and weary from days of costly fighting, surrendered to Japanese army on Bataan peninsula. Major General E. B. King and aide, Colonel E. P. Williams, drove in small open car displaying white flag to Japanese lines and handed written surrender document to Japanese at 11 a.m.

Bitter fighting on Bataan was ended but island fortress of Corregidor in Manila Bay continued to fight on, not being included in surrender. Several thousand American soldiers from Bataan swam and used small boats to reach Corregidor in closing hours of battle before surrender.

Japanese increased devastating day and night attacks on Corregidor.

April 10—General Wainwright sent message to President Roosevelt explaining that overwhelming air and artillery superiority of Japanese finally overcame resistance of hungry and exhausted defenders of Bataan.

April 18—American bombers, under command of Brig. General James H. Doolittle, raided Japanese mainland, including Tokyo for first time. Yokohama, Kobe and Nagoya were other cities hit during attack which was made in fair weather, in daylight and at low level. No official United States confirmation of raid until May 19 when General Doolittle was decorated by President Roosevelt at White House and full story of attack was released. "It appears to us," said Gen-

eral Doolittle, "that practically every bomb reached its target."

Instructions were issued to 79 American flyers taking part in Tokyo raid that Imperial Palace in Tokyo was not to be bombed. American bombers took off from aircraft carrier.

At first there was no mention that any American flyers had fallen into hands of Japanese, but six months later, War department announced that several Doolittle flyers had never returned.

Tokyo radio still later said several of American flyers shot down were executed.

April 27—Fortress of Corregidor, still holding out 18 days after surrender of Bataan, underwent 250th air raid.

April 30—Chinese high command in Chungking announced that Japanese forces captured Lashio, Burma, sealing one end of Burma road. Key city fell to Japs after large scale battle in which both sides lost heavily.

MAY

May 6—Following six days of terrific shelling, which paved way for landing parties, Island fortress of Corregidor fell to Japanese invaders, thus ending organized American military campaign in Philippines. At 11 p.m., Lieutenant General Jonathan M. Wainwright surrendered Corregidor (Fort Mills) and Forts Drum, Hughes and Frank in Manila Bay, 27 days after fall of Bataan.

Organized resistance to Japanese invaders thus was ended, 150 days after war with Japan began.

War department on May 7 said that more than 11,000 Americans and Filipinos were on Corregidor and presumably were taken prisoner. Nearly 37,000 Americans and Filipinos had surrendered on Bataan.

May 4-10—Fierce naval battle between Allied and Japanese fleets raged south of Bismarck Archipelago in Coral Sea. Japanese naval and transport strength was massed in area for several weeks for drive southward or southeastward, but before Japanese fleet could get very far, Allied warships and planes took offensive. General MacArthur announced from headquarters in Australia that Japanese were repulsed. Total number of Japanese vessels sunk or damaged in battle was nineteen. More than 500 planes on both sides were said to have taken part in running battle.

U.S. aircraft carrier Lexington was lost.

JUNE

June 3—Navy department announced that Japanese bombers and fighters attacked U.S. naval aviation base at Dutch Harbor, Alaska, planes evidently coming from one or more carriers. It was first raid of war on North America. There were a few casualties among ground personnel.

June 4-6—Japanese sea and land forces attacked Midway island, United States possession about one-third of way between Pearl Harbor and Tokyo. Air and sea battles raged for three days with American forces scoring "momentous victory," although not without considerable loss. The 19,900-ton U.S. aircraft carrier Yorktown was hit by bombs and put out of action. Yorktown was sunk June 7 when struck by two Japanese torpedoes while being towed away. Other American losses in battle of Midway included 1,570-ton destroyer Hammann which also was hit by torpedoes. Total loss of life in running battle was 92 officers and 215 enlisted men.

June 12—Navy department announced

that Japanese had made landings in Aleutian islands, invading Attu, Agattu and Kiska.

JULY

July 4—Flying Tigers, volunteer United States airmen in China, joined United States army air forces, becoming American 23rd Pursuit group.

July 22—United Nations headquarters communique in Australia announced that Japanese troops had landed from convoy at Gona Mission, Buna, on north coast of New Guinea, about 120 miles across southeastern arm of island from Port Moresby, an Allied base. During operations, Allied planes sank one large transport and inflicted heavy casualties on debarking troops.

AUGUST

Aug. 7—United States marines landed on Guadalcanal and Tulagi in Solomon islands, launching first major Allied offensive of Pacific war. Heavy fighting was reported, but marines dug in and made considerable progress.

Aug. 17—Marines raided Makin island, in Gilbert island chain, destroyed Japanese seaplane base, radio installations and stores, small Japanese transport and killed 350 Japanese.

Aug. 18—On Guadalcanal, Tulagi and Florida islands in Solomons, shore installations taken by the invading United States forces were announced as well established.

Aug. 23-26—U. S. naval and air forces engaged Japanese in large-scale battle at sea. Japanese approached southeastern group of Solomon islands from northeastward. After three days of heavy fighting, Japanese fleet withdrew. Japanese lost one transport and 13 other ships, including two aircraft carriers, battleships, and several cruisers.

Aug. 26—General MacArthur's headquarters in Australia reported that Japanese troops landed from small convoy at Milne Bay, at southeastern tip of New Guinea.

Aug. 30—Adak was occupied by United States forces.

SEPTEMBER

Sept. 15—U. S. aircraft carrier Wasp, 14,700-ton vessel was sunk in Solomon Islands, third U. S. carrier sunk in war. Wasp sank five hours after three Japanese torpedoes set her afire. An American destroyer finished. Navy department announced sinking Oct. 26, stating that 90 per cent of 1,800-man crew was saved.

Sept. 25—Japanese, after reaching point 32 miles from Allied base at Port Moresby, are forced to withdraw. Australian troops turned them back in heavy fighting in Owen Stanley mountain range.

OCTOBER

Oct. 7—Navy department announced that reconnaissance by American aircraft failed to detect signs of continued enemy occupation on Attu and Agattu in western Aleutians for several weeks. Small islands 150 miles west of main Japanese base at Kiska were occupied by Japanese in June.

Oct. 12—Washington announced that in two-day sea fight with Japanese to prevent their landing on Guadalcanal, United States "task force" of cruisers and destroyers in Sako island waters lost destroyer but sank heavy Japanese cruiser, put another out of action, sank four destroyers and transport. American losses, described as light, included one destroyer.

Oct. 25—Large-scale Japanese offensives began in Guadalcanal area, Washington announced, with land, sea and air forces taking part.

Oct. 26—United States aircraft carrier Hornet was sunk in battle of Santa Cruz islands. Nine Japanese ships were damaged. American personnel were removed before Hornet sank.

—Large-scale battles on Guadalcanal continued.

Nov. 13-15—United States navy scored decisive victory in battle of Guadalcanal. Fighting raged for two days with Japanese losing: battleship of Kongo class, three heavy cruisers, two light cruisers, five destroyers, and eight transports with estimated 30,000 Japanese soldiers aboard. In addition, Japanese battleship and six destroyers were damaged. Navy department stated American losses were two light cruisers and six destroyers. Rear Admiral Daniel J. Callaghan, 52, former naval aide to President Roosevelt, was killed early in battle.

Dec. 14—General MacArthur's headquarters in Australia announced that Allied troops occupied Buna village in New Guinea.

Dec. 20—United States bombers attacked shore installations at Kiska in Aleutians.

1943

Jan. 4—Australian-American troops wiped out Jap garrison at Buna, New Guinea.

Jan. 6—Nine Japanese ships were sunk during first U. S. daylight raid on Rabaul, New Britain. U. S. warships successfully bombarded Jap airfield at Munda, New Georgia, 150 miles northwest of Guadalcanal.

Jan. 12—Amchitka island in Aleutians was occupied by U. S. forces.

Jan. 13—Tokyo broadcasts said U. S. aircraft carrier, Hornet, sunk in Battle of Santa Cruz on Oct. 26, carried planes that bombed Tokyo April 18, 1942.

Jan. 20—U. S. Navy announced 1,032 Japanese killed on Guadalcanal from Jan. 13 to 17.

Jan. 21—Maj. Gen. Alexander Patch, U. S. Army, took over command of ground forces stationed on Guadalcanal, relieving Maj. Gen. Alexander Vandegrift, Marine commander. Most of Marines who made original landing were announced replaced by Army troops.

Jan. 30—U. S. Navy announced its submarines had sunk six Japanese ships, including a destroyer, and damaged one ship in Pacific. Total: submarines sunk 123 Japanese ships, "probably" sank 22 and damaged 32 others to date.

—Japanese sank U.S.S. Chicago.

FEBRUARY

Feb. 9—Japs announced their defeat on Guadalcanal. Berlin and Tokyo announced withdrawal of Jap troops from Guadalcanal "after missions had been completed." Admitted loss of 16,734 troops killed or wounded, and 139 planes. But claimed that 25,000 Allied troops had been wiped out, 250 Allied planes had been destroyed. U. S. figures placed Japanese losses in Solomons since Marine landing on previous Aug. 7 at about 50,000 men with 57 ships sunk, 7 probably sunk, and 102 damaged. U. S. losses: 28 ships.

MARCH

Mar. 2-6—Battle of Bismarck Sea. U. S. Liberators and Flying Fortresses "annihilated" 22-ship Jap convoy in Bismarck Sea between Lae, New Guinea, and New Britain. General MacArthur's headquarters an-

nounced that all ships, totalling 90,000 tons, were "sunk or left sinking." An estimated force of 15,000 Jap reinforcements for Lae were lost or "killed almost to the man." Japanese losses included: three cruisers, seven destroyers, 12 transports, and 55 planes. Allied losses: one bomber and three fighters.

Mar. 26—Light U. S. Navy surface force patrolling west of Attu island in Aleutians, drove off Japanese convoy of four cruisers, four destroyers and two cargo ships.

APRIL

Apr. 8—50 Japanese planes, attempting to attack U. S. shipping in Guadalcanal area, were intercepted by U. S. planes. 39 Jap planes were downed and three Allied vessels were sunk, including one destroyer, one corvette, and one tanker.

MAY

May 4—U. S. Navy reported occupation of Russell (Pavuvu) Islands, 18 to 37 miles northwest of Guadalcanal in Solomons during February. U. S. forces seized island without opposition.

May 11—U. S. Army troops landed on Attu island, westernmost of Aleutians which had been occupied by Japs since previous June. Attu, 172 miles west of Kiska, was first shelled by U. S. warships and attacked from air.

May 29—Organized resistance ended on Attu as Tokyo admitted final suicidal attacks by Jap troops failed. 2,000 Japanese troops were said to have died or killed themselves in last stages of battle. Tokyo claimed U. S. losses amounted to 6,000 killed or wounded.

JUNE

June 22—Americans moved into Woodlark, Trobriand Islands, off eastern tip of New Guinea.

June 30—Australian-American forces landed at dawn on Rendova island in Central Solomons, 195 miles northwest of Guadalcanal. Munda, Japanese base on New Georgia lay five miles from north tip of Rendova. Secretary of Navy Knox identified Munda as the U. S. objective. Other forces landed at Nassau bay, New Guinea.

JULY

July 5-6—U. S. warships tangled with Japanese task force in Kula Gulf, northwest of New Georgia Island, after U. S. ships shelled points on New Georgia coast. Six Jap warships were listed as "probably sunk" and one U. S. cruiser was lost.

July 12-13—In additional action in Kula Gulf, Navy sunk one Jap cruiser and three destroyers.

July 16—Mubo, Japanese base southwest of Salamaua, New Guinea, fell to Allies.

AUGUST

Aug. 6—38 days after Americans invaded central Solomons, General MacArthur announced capture of Munda, on New Georgia Island. 1,671 dead Japs were counted.

Aug. 6-7—In Vella Gulf action, Navy sunk Jap cruiser and two Jap destroyers.

Aug. 15—U. S. and Canadian forces invaded Kiska, in Aleutians, to find Japs had fled.

Aug. 17—350 Japanese were captured when Allied forces seized Vella Lavella Island in the Central Solomons.

Aug. 18—In biggest air raids of South Pacific, Allied bombers attacked airdrome at Wewak, New Guinea destroying 12 Jap planes on ground and damaging 5

others. 10,000 bombs were dropped on Jap targets with loss of 3 Allied aircraft.

Aug. 27—Organized Japanese resistance ended on New Georgia Island after a 64-day campaign.

Aug. 30—Americans seized Arundel Island in Central Solomons to tighten trap on Jap garrison at Vila, Kolombangara Island, one mile north.

Aug. 31—Navy attacked Marcus Island.

SEPTEMBER

Sept. 12—Australian-American troops captured air-naval base of Salamaua on September 11-12, sending Japs fleeing northward toward Lae. Salamaua airdrome, captured earlier, was already in Allied use.

Sept. 16—General MacArthur's headquarters announced capture of Lae where practically every building had been levelled by extensive Allied air raids. Said MacArthur in message to his troops: "With God's help, we are on our way back to the Philippines."

Sept. 29—American Marines land at Nanumea in Ellice group.

OCTOBER

Oct. 2—Allied troops captured Finschhafen, New Guinea, after besieging base for ten days.

Oct. 6-9—American troops landed on Kolombangara island in Central Solomon Islands early in October. On October 6, they occupied former Jap base of Vila and by Oct. 9 had taken entire island. Except for Jap units on Choiseul Island, Japs were believed cleared from Central Solomons.

Oct. 27—Navy announced that U.S. and New Zealand troops of Admiral Halsey's South Pacific Command landed on Mono and Stirling Islands of Treasury group (in north Solomons) meeting only light resistance.

NOVEMBER

Nov. 1—American Marines invaded Bougainville, largest island in Solomons, in Empress Augusta bay area which lay about 250 miles southeast of Rabaul, New Britain, Japan's largest base in southwest Pacific.

Nov. 21—American Army troops and Marines invaded Makin and Tarawa atolls in Gilbert Islands, 2,400 miles southwest of Hawaii. Invasion was supported by greatest fleet ever assembled in Pacific, and followed week of sustained aerial bombardments by Allied planes which struck Jap bases in Gilberts and in Marshall islands. Fighting was heavy after landing troops met "moderate resistance." By Nov. 22, U.S. had landed on third atoll in Gilberts, Abemama.

Nov. 23—Admiral Nimitz reported capture of Makin Island and said situation on Abemama was "well in hand," and that Marines on Tarawa were making good progress. Conquest of Gilberts considered ended except for mopping up operations by November 24.

DECEMBER

Dec. 9—Chungking announced that Chinese forces, who lost Changteh in China's "rich bowl area," recaptured it after a 15-day siege. U.S. bombers helped pave way by attacking enemy forces on Dec. 7.

Dec. 15—U.S. Sixth Army invaded Arawe peninsula of southwestern New Britain island and established beachhead against moderate resistance. During pre-invasion bombardment, more than 315 tons of naval shells were hurled against landing area.

Dec. 26—Second New Britain invasion

was announced by Allied Southwest Pacific Headquarters. American Marines made two landings at points west and east of Cape Gloucester at northwestern end of New Britain, opposite Arawe. 300 tons of explosives were poured into Jap targets as softening up operations preceded landings. One American vessel was lost and 7 American planes were downed. Japanese losses totalled 36 bombers and 25 fighters.

1944

Jan. 2—U.S. Sixth Army troops invaded Sidor on northern coast of New Guinea, 55 miles below Japanese base of Madang. New landing, preceded by air bombardment, represented 110-mile jump from Finschhafen and trapped many Japs caught on narrow coastal plain between Sidor and Blucher Point where Australians were operating.

FEBRUARY

Feb. 1—Following heavy sea and air bombardment, which Tokyo said had been continuing for three days, American Marines landed on Kwajalein atoll in Marshall islands. Next day, Marines captured Roi, primary objective in northern portion of Kwajalein and first prewar Japanese territory to fall to American forces. Beachheads were also established on nearby Naumer island. U.S. planes bombed Jap base of Paramushiro in Kurile islands north of Japan proper.

Feb. 3—Raymond Clapper, 51, Scripps-Howard newspaper columnist and radio commentator, was killed in airplane crash during Marshall invasion.

Feb. 5—Paramushiro was bombarded by American cruisers and warships.

Feb. 7—Enemy resistance ended on Kwajalein. U.S. casualties up to night of Feb. 6: 1,516 (286 dead, 1,148 wounded, 82 missing.) Japanese losses: 8,122 dead, 264 prisoners.

Feb. 10—Allied troops, after 18 weeks, won control of Huon peninsula in north New Guinea. Enemy casualties estimated at 14,000.

Feb. 15—General MacArthur issued following communique: "We have seized the northern end of the Solomons archipelago. New Zealand and American ground troops, covered by naval and air forces, landed and occupied the Green (Nissen) islands. This culminates a successful series of flank movements commencing in the New Georgia group which has gradually enveloped all enemy forces in the Solomons. These forces, estimated at 22,000 strong, dispersed through Choiseul, Shortland, Bougainville and Buka Island, are now isolated from their sources of supply at Rabaul."

Feb. 20—United States Fleet, according to Washington communique, "returned at Truk the visit made by the Japanese Fleet at Pearl Harbor on Dec. 7, 1941, and effected a partial settlement of the debt." On Feb. 18-19 U.S. task force hammered great Jap base at Truk. U.S. carrier planes destroyed 201 enemy aircraft. Enemy surface ships sunk included: two light cruisers, three destroyers, one ammunition ship, one seaplane tender, two oilers, two gunboats and eight cargo ships. Probable losses: one cruiser or large destroyer, two oilers and four cargo ships. Japanese coastal installations including airplane runways were thoroughly bombed and strafed. U.S. losses: 17 planes, moderate damage to one surface vessel.

—Eniwetok island in Marshalls was captured by U.S. troops.

Feb. 21-22—Carrier task force struck Marianas. Communique issued on Feb. 25 said task force had to fight after it was spotted by Japs. But 135 Japanese planes were destroyed on ground and in air, two Jap cargo ships were sunk and nine other vessels were damaged. U.S. lost six planes but suffered no damage to surface ships.

Feb. 29—U.S. forces landed on Los Negros in Admiralty Islands. Invasion point stood at northern entrance to Bismarck Sea, south of Guam and 1,300 miles from the Philippines. Momote airfield was seized as Americans gained tactical surprise over Japs.

—Allied communique: "This marks a final stage in the great swing move pivoting on New Guinea which has been the basic purpose of operations initiated June 26, 1943, when the Southwest Pacific and South Pacific were united under Gen. MacArthur's command. The axis of advance has thereby been changed from the north to the west."

Mar. 10-14—American Marines captured Wotho atoll, between Eniwetok and Kwajalein in Marshalls, and occupied nearby Lae and Ujae atolls.

Mar. 14—U.S. troops invaded Linga Linga, New Britain.

Mar. 15—Americans landed on Manus, largest of Admiralty Islands, with minor losses. Ground forces were covered by air and naval bombardments and by artillery protection from two small islands captured day before.

Mar. 16—Japanese opened new campaign toward Manipur plain of northeastern India.

Mar. 18—American and British troops landed from planes behind enemy lines in Burma to open first engagement with enemy in that sector.

Mar. 20—American Marines landed on Emrau in St. Matthias group, as U.S. and Chinese troops on continent advanced in Hukawng valley of northern Burma.

Mar. 21—Admiral Lord Louis Mountbatten's headquarters in New Delhi announced that Jap troops had driven to within 15 miles of Indian border. A Japanese communique said Japanese troops, cooperating with "Indian National Army" in Chin Hills sector had developed an "annihilative campaign."

Mar. 23—Japanese invaded India via Burma. Allied communique said one Jap column moving up Manipur river valley from south pushed to within 25 miles of Imphal, big Jap base and supply center. Another Jap thrust carried to within 30 miles of Imphal on east after crossing upper Chindwin river.

APRIL

Mar. 30-Apr. 1—U.S. task force of Pacific fleet hit Palau and western Carolines. All Japanese ships at anchorage in Palau, Woleai and Yap islands were sunk or damaged. And three others were sunk as they attempted to escape. U.S. Liberator bombers and Navy Catalinas flew 2,000 mile round-trip from bases in south Pacific to hit Woleai, 600 miles west of Truk.

Apr. 19—In China, two Jap armies opened spring offensive designed to clear central China. Attacked Honan railroad city of Changchow from east and north.

—U.S. Army and Navy heavy bombers attack Tinian and Saipan for first time. And Rabaul, New Britain, was raided for 16th consecutive day.

Apr. 22—Under protection of air and sea bombardments, U.S. forces landed at dawn in Humboldt Bay area on northern coast of

Dutch New Guinea. Invasion points were Aitape, Hollandia, and Tanahamara. Some 60,000 Japs were encircled by new landing which Gen. MacArthur said "reversed Bataan." Navy announced 101 Jap planes had been destroyed in operations supporting invasion.

—Allied airborne reinforcements landed 200 miles inside Burma to join other Chindit bands (British trained jungle commandos).

Apr. 21—Marshalls operation was completed with occupation of Ujelang atoll.

Apr. 25—Jap base of Madang on north-east coast of New Guinea fell to combined American-Australian forces.

Apr. 28—Conquest of Hollandia completed.

—U.S. Secretary of Navy Frank Knox died in Washington following heart attack. He was 70 years old.

—Chinese rail city of Changchow fell to Japs who also won several strategic points west.

Apr. 30—Japanese troops opened second spring drive in China in Anhwei province about 200 miles southeast of Chenckchow fighting zone.

MAY

May 11—Several thousand Chinese troops were trapped by Jap forces which captured Peiping-Hankow railroad. Jap troops striking northward along railway from base at Sinyang joined forces at Chumatiien with column striking southward from Chengchow.

May 12—U.S. fighters and bombers used rocket guns in raid on Rabaul.

May 17—After tedious jungle fighting, U.S. and Chinese troops seized main Jap airdrome at Myitkyina, Burma.

May 20—U.S. troops seized Wakde island off Dutch New Guinea coast 110 miles west of Hollandia. Island was invaded on May 17.

May 27—Biak island, in Schouten group off Dutch New Guinea less than 900 miles from Philippines was invaded by American troops.

JUNE

June 11-14—U.S. task force hit Saipan, Tinian, Guam, Pagan and Rota islands in the Marianas. At same time, U.S. warships bombarded Kuriles and U.S. planes bombed Carolines. Next day, American bombers raided points in southern Japan proper, including Yawata steel works on Kyushu.

June 15—U.S. carrier task force hit Bonin and Volcano islands for first time as American troops landed at Saipan, in Marianas.

June 16—U.S. Superfortresses, B-29's, based in China, raided Yawata, Kyushu, in first land-based air attack launched against Japanese home islands.

June 18-19—First Battle of Philippine Seas. Japanese and American war fleets clashed in waters between Marianas and Philippines. Admiral Nimitz announced Japs lost 18 warships sunk or damaged and 353 planes. 49 U.S. planes were lost.

June 24—U.S. carrier planes struck Iwo Jima south of Japan proper.

JULY

July 1—American trained Chinese troops entered 45th day of campaign to win Myitkyina on upper Irrawaddy river in Burma.

—In China, Japanese forces launched a general offensive northward from Canton area in effort to join forces driven down Canton-Hankow railroad.

July 2—Yanks landed on Noemfoor, west of Biak. Other American forces seized airfield on Saipan as U.S. planes hit Palau, Yap, Woleai, Ngulu and Sorol islands in Carolines

and struck at airdromes in Netherland New Guinea and Netherlands Indies.

July 4—Carrier planes struck new blows at Bonin and Volcano islands.

July 7—Japanese counter-attacked on Saipan but were thrown back with heavy losses on both sides.

—Superforts made night attack on Japanese naval installations at Sasebo, and Yawata on Jap home island of Kyushu.

July 9—Organized resistance ended on Saipan. Secretary of Navy James Forrestal, who succeeded late Secretary Knox, announced on July 11 that U.S. casualties up to July 1 on Saipan were 15,053—2,359 killed, 11,481 wounded, 1,213 missing.

July 13—U.S. warships and carrier aircraft attacked Jap-held Guam following almost daily air bombardments. Enemy gun positions along coast and airfield at Orote were principal targets.

July 20—Premier Gen. Hideki Tojo of Japan and his entire cabinet resigned. Admiral Mitsumasa Yonai, Premier early in 1940, and his former Overseas Minister and later Governor General of Korea, General Kuniaki Koiso, were commissioned to form "critical decisive wartime" cabinet.

July 21—After intensive air and sea bombardment which opened June 19, American ground troops invaded Guam. Yanks established beachheads on either side of Port Apra, blew up Japanese defenses and drove toward range of hills in interior.

July 23—American Marines landed on islands of Cabras and Tinian in Marianas.

July 26—In two-day carrier strike against seven islands in western Carolines, U.S. planes sank 10 Japanese ships including a destroyer. 25 enemy planes were destroyed on first day.

July 28—Tokyo officially denied that American fliers bailing out from B-29 raids were executed. Tokyo broadcasts said an "erroneous interpretation" had been placed on a broadcast by their Singapore propaganda station on July 15.

July 31—In amphibious advance of nearly 200 miles from Noemfoor island, U.S. troops seized Sansapor coastal area of Netherland New Guinea and islands of Amsterdam and Middleburg, giving Allies control of virtually entire New Guinea coastline.

AUGUST

Aug. 1—Admiral Nimitz reported end of organized resistance on Tinian.

Aug. 3—Important Jap base of Myitkyin in north Burma fell to Chinese and American troops after three-month siege. Across border in Yunnan province. Chinese troops broke into Tengyueh.

—U.S. warships shelled Bonin and Volcano Islands, sinking or damaging 49 Japanese vessels. Enemy convoy and shore installations are described as "virtually wiped out."

Aug. 10—U.S. planes based in China made third raid on Japanese homeland, bombing industrial targets in Nagasaki area. Three planes were lost.

—Another force of U.S. planes bombed oil refineries in vicinity of Palembang on Jap-occupied island of Sumatra. Attack was carried out from bases of Southeast Asia Command.

—Americans win Guam except for mop-up operations.

Aug. 15—British and Indian troops drove Japanese out of India.

Aug. 23—Striking into southern Philippines for tenth time in two weeks, U.S.

Navy planes started fires at Davao and sank small Japanese freighter northeast of Mindanao. Other enemy vessels were hit in other air raids ranging from Celebes, south of Mindanao, to Palau in Caroline islands north of New Guinea.

Aug. 24—U.S. heavy bombers made heaviest raid to date on Halmahera in campaign to neutralize it. Other planes hit two in Volcano island 689 miles south of Tokyo.

SEPTEMBER

Sept. 4-5—U.S. Liberators hit Marcus island for first time.

Sept. 8—American air base at Lingling central China fell to Japanese force advancing down Hunan-Kwangsi railway in drive to establish over-land military route from Manchuria to Singapore.

—U.S. warships in attack on Mindanao island in Philippines destroyed or damaged 89 enemy surface craft, and 68 Jap planes.

Sept. 15—Admiral Nimitz announced invasion of Peleliu in Palau group, 300 miles south and 560 miles east of Philippines. At same time, Gen. MacArthur's men land at Morotai in Halmaheras.

Sept. 17—U.S. 14th Air Force destroyed and virtually abandoned its air bases near Kweilin, China, to escape threat of Jap forces closing in.

Sept. 20—Enemy resistance ended on Angaur in Palaus following Allied invasion on Sept. 17.

Sept. 21-22—Pacific war bulletin announced: "... carrier aircraft swept the island of Luzon in the heart of the Philippines striking in great force at shipping in Manila Bay and in Subic Bay, and enemy installations at Clark Field, Nicholas Field near Manila and at the Cavite naval base. 110 enemy aircraft were shot down, 95 were destroyed on the ground. 12 Jap vessels were sunk or damaged with the loss of 15 U.S. planes." Continuing raids brought Jap losses to 357 aircraft and 40 vessels sunk or damaged.

Sept. 29—Tokyo said Japanese troops occupied Paoking in Hunan province, China, and American air base at Tanchuk.

OCTOBER

Oct. 8—Japanese forces landed on coast of Fukien province in China.

Oct. 9—In closest penetration so far to Japanese home islands, carrier planes of Admiral Halsey's Fleet attacked the Ryukyu islands which lie south of Japan proper. Jap losses: 127 ships, including several warships, sunk or damaged, 89 planes destroyed. No damage to American ships. American warships also shelled Marcus island as Yank troops invaded Garakayo island in Palaus. This was eleventh island invaded by Americans in Palau chain.

Oct. 12-15—Allied planes and warships attacked east coast of Formosa. 416 Jap planes were destroyed and 32 enemy ships were sunk or damaged.

Oct. 13—Organized Jap resistance ended on Peleliu which was invaded by Americans on September 15.

Oct. 19-20—General MacArthur "returns" to Philippines. His special communique declared: "In a major amphibious operation we seized the eastern coast of Leyte Island in the Philippines, 600 miles north of Morotai. This point of entry ... is midway between Luzon and Mindanao. The enemy's anticipation of attacks in Mindanao caused him to be caught unawares in Leyte and beachheads in the Tacloban area were

secured with small casualties. The landing was preceded by heavy naval and air bombardment which was devastating in effect. Our ground troops are rapidly extending their positions and supplies and heavy equipment are already flowing ashore in great volume." In order to his troops, General MacArthur said: "I have returned. . . Rally to me. Let the indomitable spirit of Bataan and Corregidor lead on. As the lines of battle roll forward to bring you within the zone of operations, rise and strike."

Oct. 23—Tacloban, capital of Leyte, fell to American invaders.

Oct. 23-26—Second Battle of Philippines Sea. United States Third and Seventh Fleets and submarines sank 24 Japanese ships, including two battleships, four carriers, and 12 cruisers. American losses, six ships. Action was described in Navy communique as "one of the decisive victories of the war." Gen. MacArthur announced widespread attacks by southwest Pacific air forces extending from Mindanao, south of invasion zone to Borneo, Celebes islands, Macassar, Moluccas, Timor, New Guinea and Bismarck and Solomons islands.

Oct. 26—American troops moved to Samar from Leyte.

Oct. 28—White House announced Gen. Joseph Stillwell had been relieved as Chief of Staff to Generalissimo Chiang Kai-Shek, as Deputy to Admiral Lord Louis Mountbatten commander of Southeast Asia Command, and as United States commander of China-Burma-India theater. Stilwell was recalled to Washington. C-B-I theater was divided into two zones with Major General A. C. Wedemeyer, appointed as commander of American forces and Chief of Staff to Generalissimo Chiang Kai-Shek, and Lt. Gen. Daniel I. Sultan commanding where he was former deputy commander in the C-B-I.

NOVEMBER

Nov. 10—Japanese troops landed between 5,000 and 10,000 men as reinforcements on Leyte but lost 7 destroyers, 3 cargo ships and 15 planes. Heavy fighting raged in Philippines with casualties mounting on both sides.

Nov. 11-12—U.S. warships shelled island of Iwo, in volcano group following heavy air attack.

Nov. 13—U.S. 14th Air Force in Chungking announced abandonment of its base at Liuchow, last important group of Allied airfields in eastern China. Jap forces continued to advance from northeast and southeast. Loss of Liuchow left 14th with its base at Kunming, 400 miles to the west, and two other small fields.

Nov. 16—Small force of American troops seized enemy lookout post of Mapia islands, off northwest coast of New Guinea. Mapia is 919 miles southeast of Leyte.

Nov. 24—U.S. Superfortresses bombed Tokyo for first time from bases on Saipan.

Nov. 26—U.S. 14th Air Force destroyed and abandoned Nanning base in Kwangsi province. Nanning field was seventh American airbase abandoned since Japanese invaded Hunan province.

Nov. 29—In two-day battle between U.S. planes and Jap ships, 13 Jap ships were sunk and 4,000 intended Jap reinforcement troops were drowned. Land fighting continued heavy.

DECEMBER

Dec. 7—U.S. Superfortresses, on anni-

versary of "Pearl Harbor" attacked Jap aircraft plants in Mukden, Manchuria. 23 Jap planes were shot down and three B-29's were lost.

Ground troops of MacArthur's command landed at Ormoc bay, on Leyte.

Dec. 9—U. S. troops occupied Ormoc after five-week siege.

American cruisers and destroyers, firing salvos every 20 seconds, poured 300 tons of explosives into Japanese base at Iwo island.

Dec. 11—B-29's flying from bases on Saipan hit Tokyo in two raids seven hours apart. Fires were kindled in capital which crewmen reported could be seen for 35 miles.

Dec. 12—B-29's returned for new strikes against industrial targets on Jap home island of Honshu.

Dec. 15—American troops landed on Mindoro island, 155 miles south of Manila. Gen. MacArthur said landing put United States in position to dominate sea and air routes along China coast, imperiling Japan's so-called "imperial life line" to south Pacific.

On Leyte, U. S. troops advanced north of Ormoc to attack large group of "pocketed" Jap forces.

Dec. 21—General MacArthur announced that all "organized" resistance ended on Leyte although large pockets of isolated Jap garrisons were yet to be mopped up.

1945

Jan. 3-4—U. S. carrier planes struck at Formosa and Okinawa while B-29's from Saipan bombed aircraft center of Nagoya on Japan's home island of Honshu.

Jan. 5—British and Indian troops occupied west coast island of Akyab, off Burma, after Jap forces had fled. Calcutta reported occupation made Jap positions in western Burma untenable and sealed fate of Mandalay, 240 miles northeast.

American troops landed unopposed on southwest coast of Marinduque island, after naval units and air power pounded coastal installations. Marinduque lay 100 miles east-southeast of Manila.

Jan. 10—American troops invaded Luzon. They went ashore on southern and southeastern coasts of Lingayen Gulf about halfway up western side of Luzon. More than 800 vessels of all types took part in landing after sailing from Leyte through Sulu Sea. Mindoro strait and up coast of Luzon to Lingayen gulf. Heavy aerial bombardments covered landing. MacArthur said 79 enemy planes, and many small Jap surface vessels were sunk, in addition to two destroyers.

U. S. Army announced completion of Lido road to Myitkyina.

Jan. 12—U. S. carrier planes attacked enemy coast of French Indo-China between Saigon and Cam Rann Bay in farthest penetration so far of U. S. Navy units in China Sea. 25 Japanese ships, including a *Katori* class light cruiser and several destroyers were sunk.

Jan. 21—Gen. MacArthur reported capture of Tarlac, capital of province by same name, 65 miles north of Manila.

Jan. 23—Lido-Burma road was opened and first convoy of trucks traveled from Myitkyina, Burma, to Tengyueh, China. Road was later named in honor of Gen. Stilwell.

Jan. 29—U. S. troops made new landing in Philippines, invading Subic bay area of Luzon. This placed Yank forces 35 miles west of southernmost point of American drive down center of Luzon and was designed to

cut off Subic bay area to bar Bataan to re-treating Japs.

FEBRUARY

Feb. 3—American troops entered Manila from east and captured notorious Jap concentration camp of Santo Tomas. Japs remained in possession of "old city" on south bank of Pasig river. President Roosevelt, in letter to President Sergio Osmena of Philippine commonwealth, pledged full American cooperation to drive Japs out of Philippines entirely.

Feb. 7—U. S. air attacks in period from Jan. 18 to Feb. 7 revealed 63 attacks on Iwo island, and widely spaced raids on Kuriles, Caroline, Marshall, Marianas and Bonin groups and on Wake and Marcus islands.

—Maj. Gen. Claire Chennault, announced U. S. 14th Air Force had abandoned all secret air bases in China and would concentrate on interior targets, leaving coastal regions to attacking planes from Philippines. During January, 14th established record of destroying 334 Jap planes and 343 locomotives.

Feb. 16—American troops seized Bataan after landing at Mariveles Harbor. U. S. planes covered paratroopers who landed on Corregidor after the "Rock" had been pounded for several days.

Feb. 19—After three days of heavy air and naval bombardment, American Marines landed on Iwo Jima, 750 miles south of Tokyo, and met fanatical Japanese resistance. More than 800 American naval vessels took part. Two light units were damaged during pre-landing assaults. U. S. Fleet also pounded Kuriles, north of Japan proper.

Feb. 22—Third Marine division landed to reinforce the 4th and 5th on Iwo. American casualties up to evening of Feb. 21, after two days of fighting, totalled 644 killed, 560 missing, 4,168 wounded.

Feb. 23—Marines reached summit of Mount Suribachi at southern tip of Iwo Jima and planted Stars and Stripes.

Feb. 25—Nearly all Japanese resistance in Manila reported at an end.

—B-29's attacked Tokyo. Reconnaissance photos showed that 240 city blocks were burned out.

Feb. 28—Gen. MacArthur announced landing on Palawan, fifth largest and westernmost of the Philippine islands. Resistance was described as "feeble." MacArthur also returned to Corregidor island as the American flag was raised. "Hoist the colors," declared MacArthur, "and let no enemy ever haul them down."

MARCH

Mar. 9—British Indian troops entered Mandalay.

Mar. 10—Americans landed on Mindanao in the Philippines, giving Americans control of entire length of the western shores of the Philippines from the northwestern tip of Luzon to the southwestern tip of Mindanao, a distance of 800 miles.

Mar. 17—Conquest of Iwo Jima completed. Pacific Headquarters at Guam announced battle officially ended when Marines finally pushed through Jap defenses to reach northern tip of eight-mile long island. Marine casualties for campaign were placed at 4,189 killed, 15,308 wounded, 441 missing—a total of 19,938. Pacific communique stressed that Marines "fought under conditions that have had no parallel in this war."

—Continuing reports were made public of Japanese atrocities revealed in seizure of prison and internment camps.

Mar. 19-20—15 Japanese warships were sunk or damaged by U. S. carrier planes attacking Kyushu, the southernmost island of Japan. 475 Jap planes were destroyed. Later reports placed Jap losses at 281 aircraft shot down, 275 destroyed on ground, and another 175 "probably" destroyed on ground.

—British captured Mandalay.

Mar. 26—Americans invaded Kerama islands in Ryukyu chain 400 miles south of Japan.

—Jap advances in China forced abandonment of U. S. 14th Air Force base at Lao-chokow.

APRIL

Apr. 1—Kerama operation forerunner for American landing on Okinawa which took place after Okinawa had been subjected to ten days of naval bombardment. Landings were made along eight-mile stretch of southwest coast at point about 360 miles south of Japan proper. More than 1,400 ships were involved in invasion, largest amphibious operation in Pacific.

Apr. 5—General MacArthur and Admiral Nimitz were given over-all command of land and naval operations in Pacific.

—Russia denounced its five-year neutrality pact with Japan, accusing Japs of aiding Germany in fight against Soviet allies. Announcement came as Premier Kuniaki Koiso's cabinet resigned to "open the way for a far more powerful administration" in Japan. Emperor Hirohito named Admiral Kantaro Suzuki to set up new government.

Apr. 8—American carrier planes operating off Kyushu sank Japanese battleship, two cruisers, and three destroyers.

Apr. 17—American troops on Okinawa reached Cape Hedo at northern tip of island.

Apr. 18—Ernie Pyle, 44, one of most famous war correspondents of World War II was killed by Jap machinegun fire on small island of Ie, off northwest coast of Okinawa.

—Americans made two new landings on west coast of Mindanao, in Philippines. One at Parang, other thirty miles beyond at Malabang.

Apr. 20—Yanks invaded Balabac island, 45 miles north of Borneo.

Apr. 29—Baguio, summer capital of Philippines, fell to American troops.

MAY

May 1—Allied troops invaded Tarakan island, just off northeastern corner of Netherlands Borneo. Australian veterans went ashore from American ships.

May 4—British and Indian forces complete occupation of Rangoon.

May 6—Gen. MacArthur announced complete liberation of Davao, on Mindanao.

—Strongest Jap counter-attack on Okinawa so far was pushed back with at least 3,000 enemy troops killed.

May 24-26—Tokyo was devastated by two fire-bomb attacks by from 500 to 550 B-29's covered with fighter protection. 19 B-29's were lost on May 26th raid—12 lost in May 24th attack.

May 27—Chinese troops recaptured Yungning to cut Japan's lifeline from north China to Indo-China and Malaya.

May 29—Marines surged into Shuri castle, most stubbornly defended stronghold of the Jap garrison, on Okinawa.

May 31—Undersecretary of War Patterson revealed that Japanese bomb-carrying balloons killed six persons near Lakeview Oregon on May 5.

JUNE

June 10—Brunei Bay, Borneo, invaded by Australians.

June 18—Lt. Gen. Simon Bolivar Buckner, Jr., 58, commander of American Tenth Army and of all land forces on Okinawa, was killed at forward observation post when it was hit by Japanese shell. Maj. Gen. Roy S. Geirger, commander of Third Marine Amphibious Corps replaced him.

June 21—Okinawa campaign ended. After 82 days of fiercest fighting in Pacific, organized Jap resistance came to official end. American casualties through June 19 were 11,260 killed, 33,769 wounded. Japanese losses through May 20, were 90,401 killed.

—General MacArthur named Gen. Stilwell as commander of Tenth Army on Okinawa to replace temporary Marine commander, who took over after death of Lt. Gen. Buckner.

June 24—Australians completed recapture of Miri oil field in West Borneo.

June 25—Americans seized Kume island west of Okinawa.

—B-29 raids continued against Japanese home island almost on round-the-clock schedule. Principal targets were rail and communication lines stretching south from Tokyo to southern tip of Kyushu island.

June 28—General MacArthur announced that all Luzon, largest island of Philippines, had been occupied by American troops.

June 29—Four Japanese cities were bombed by B-29's from Marianas. Principle target was big Jap naval base of Sasebo.

June 30—Chinese recaptured burning city of Liuchow, in Kwangsi province. Other Chinese forces crossed the border of French Indo-China and reoccupied town of Chungching which they held briefly a few weeks before.

JULY

July 1—Following air bombardments for six straight days, Australian troops landed at Balikpapan on east coast of Borneo.

July 5—General MacArthur announced that "the entire Philippine islands are now liberated and the Philippine campaign can be regarded as virtually closed."

July 10—Planes from U.S. Third Fleet made record raid on Tokyo as part of greatest aerial blow against Japan conducted so far. 2,000,000th ton of bombs since December 7, 1941 was dropped on Jap home island while between 500 and 600 B-29's struck Honshu island, and 1,000 carrier planes burned and blasted Tokyo. 342 enemy planes were destroyed. 32 ships were sunk or damaged.

July 11—General MacArthur announced that Balikpapan bay, in Borneo, had been completely won by Allies.

July 13—Navy communique revealed that typhoon hit U.S. Third Fleet as it was withdrawing from attacks against Kyushu on June fifth. Five aircraft carriers, three battleships, four cruisers and nine destroyers were damaged.

July 14-15—U.S. fleet began first heavy surface ship bombardment of Japan. Battleships and cruisers shelled Kamaisha, on Honshu island 275 miles northeast of Tokyo, and hit coastal installations on Hokkaido. Carrier planes participated with devastating attacks at cities along bombardment front. Carrier planes netted 140 Japanese ships and small craft totalling 71,000 tons sunk, 234 enemy ships damaged, and 82 Jap planes destroyed or damaged. 24 U.S. planes were lost.

July 17—Navy revealed that British battleship King George V, and U.S. battleship Iowa, most powerful in respective navies, led assaults against Japan from points only ten miles off coast. British also joined in carrier plane strikes against Jap home islands.

July 18—U.S. and British ships bombarded Hitachi port and Nojima Cape in Tokyo bay. Anglo-American air units also blasted hiding Japanese fleet at Yokosuka base, Tokyo bay. Japan's old battleship, Nagato, was heavily damaged and believed sinking. Eleven smaller vessels were sunk, and three destroyers were sunk or badly damaged.

July 20—Chinese troops seized "rice bowl" city of Yiyang in Hunan province.

July 22—First Yanks from European theater arrived in Philippines.

July 25—Navy revealed that U.S. and British carrier planes raided Kure, Japan's greatest naval base on July 24 and resumed attacks, hitting Kobe in addition, at dawn on July 25. Admiral Halsey said offensive was beginning "final plunge into the heart of the Japanese empire," and that enemy fleet had been "routed, beaten, and broken." Toll of two-day strikes reached 20 Japanese warships, and 85 merchant ships sunk or damaged. 209 Jap planes destroyed.

July 26—Ultimatum from United States, Britain, and China demanded that Japan surrender unconditionally, or face "utter destruction." Allied declaration said Japanese would be limited to home islands and, stripped of power to make war, but would not be "enslaved as a race nor destroyed as a nation."

July 28—Tokyo broadcasts quoted Gen. Jiro Minami, president of Political Association of Great Japan as saying Japanese government would be "ready to talk peace only when the whole of East Asia is freed from Anglo-American colonial exploitation and when Japan and other nations in the world are assured of a peaceful life based on justice and equality."

July 29—Japanese Premier Suzuki declared: "As far as the Imperial government of Japan is concerned, it will take no notice of Allied ultimatum."

—Carrier plane and B-29 attacks continued against Japanese cities.

AUGUST

Aug. 3—Twentieth Air Force at Guam reported that complete blockade of shipping to and from Japanese home islands had been imposed by mines laid by B-29's in waters of Japan's Inland Sea.

Aug. 6—Greatest secret of the war was revealed by President Truman and Secretary of War Stimson. An atomic bomb, it was disclosed, fell on Japanese city of Hiroshima revealing for first time that United States, in conjunction with Canada and Britain, had been working on problem of releasing atomic energy in bomb form. Only one bomb was dropped but it entirely obliterated 60 percent of Hiroshima, or 4.1 square miles. Tokyo said dead were "too numerous to count." Bomb, which worked on principle of harnessing atomic energy, had more power than 20,000 tons of TNT, and created 2,000 times blast power of largest British 6-ton blockbuster bomb. Research into idea of atomic fission, or splitting atom to harness energy released, was begun in 1939 when late President Roosevelt named commission to investigate use of atomic power for military purposes. Three communities were set up in United States for conducting this tremendous

project. Oak Ridge, Tennessee, small town near Santa Fe, New Mexico, and Richland Village, Washington. Work on the atomic bomb was so secret that hundreds of employees did not know nature of their employment. Bomb's first test was made July 16 when it was touched off at Alamogordo Air Base in New Mexico. Steel tower from which bomb was hung was "vaporized" by explosion which sent billowing clouds 40,000 feet into air. Two men five miles away were knocked down by pressure wave and shock was felt in area within 250-mile radius. Project cost \$2,000,000,000. Tokyo broadcasts complained that persons were dying in vicinity of Hiroshima from what apparently was radio-activity produced by bomb's explosion. But claims were not officially confirmed.

Aug. 8—Russia declared war on Japan, effective Aug. 9.

Aug. 9—Second atomic bomb was dropped on Japan, on city of Nagasaki, on western Kyushu.

—Russian troops crossed Manchurian border.

Aug. 10—Japan offered to surrender on condition that Emperor Hirohito's prerogatives were not infringed upon.

Aug. 11—President Truman replied to Japan's offer that Allies will permit Hirohito to remain on throne provided he was subject to Supreme Allied commander of occupation forces. Note, in behalf of United States, Britain, Russia, and China, was turned over to Swiss Legation in Washington for transmission to Tokyo.

Aug. 12—Russian troops continued ad-

vance and invaded Korea under guns of Red Fleet while surrender negotiations were pending. And fighting continued on all other fronts still in operation.

Aug. 14—President Truman, at 7 p.m., announced that Japan had surrendered unconditionally and ordered field commanders to issue "cease fire" orders. Proclamation of V-J day was to wait until formal signing of surrender document. At noon Aug. 15, Emperor Hirohito made an empire-wide broadcast informing his subjects of surrender. "The war situation has developed not necessarily to Japan's advantage," The atom bomb, he declared "would not only result in an ultimate collapse and obliteration of the Japanese nation, but also it would lead to the total extinction of human civilization." He added that Japan declared war "only to insure Japan's preservation and the stabilization of East Asia, it being far from our thought either to infringe upon the sovereignty of other nations or to embark upon territorial aggrandizement."

—Final surrender of Japan did not become official until document was signed aboard U.S. battleship "Missouri" anchored in Tokyo Bay. Signing ceremony took place on September 2, 1945, after typhoon had held up preparations and delayed original signing date. In 20-minute ceremony, war was officially declared over. General MacArthur signed as Supreme Commander for Allies, Admiral Nimitz for United States, Gen. Hsu Yung-chang for China, Admiral Sir Bruce Fraser for United Kingdom, Gen. Kuzma N. Dervyanko for Russia.

337 OF 14 MILLION GET MEDAL OF HONOR

Out of 14,000,000 U. S. servicemen, only 337 had been awarded the Medal of Honor, to Jan. 1, 1946.

Of the 244 Army medal winners, 109 were killed. The Navy lost 52 of 93.

Every state in the Union but Nevada contributed to the roll.

Texas led with 22 in the Army and six in the Navy, a total of 28.

Next with 27 was New York State. Pennsylvania was third with 26, trailed by California, Ohio, Washington, New Jersey and Illinois in that order.

Twenty-seven states had five or more winners.

Among the individual cities, New York led with 13 winners. San Antonio was second with five. New York's total included 10 Army men, three sailors. San Antonio counted four Army men and a lone mar.

Here is the rank by number of medals.

State	Army	Navy	Total
State	Army	Navy	Total
Texas	22	6	28
New York	23	4	27
Pennsylvania	24	2	26
California	12	11	23
Ohio	13	4	17
Washington	10	6	16
New Jersey	10	3	13

World War II

THE SURRENDER OF GERMANY

Germany surrendered unconditionally to the Western Allies and the Soviet Union at 2:41 a.m. French time, or 8:41 a.m. Eastern Wartime, Sunday, May 6, 1945.

The surrender ceremonies were held in a little red schoolhouse in Reims, France that was the headquarters of General Dwight D. Eisenhower, Supreme Commander of the Allied Expeditionary Force.

The surrender brought the European war to a close after five years, eight months, and six days of hostilities, and was signed for Germany by Col. Gen. Gustav Jodl, then Chief of Staff of the German Army. He signed simply "Jodl" on the document.

Lieut. Gen. Walter Bedell Smith, Chief of Staff, signed on behalf of General Eisenhower. Also signing were Gen. Ivan Susloparoff for Russia and Gen. Francois Sevez for France.

After signing, Jodl asked leave to say a few words for Germany. He spoke briefly, saying:

"With this signature, the German people and armed forces are for better or worse delivered into the victor's hands. In this war, which has lasted more than five years, both have achieved and suffered more than perhaps any other people in the world."

Immediately afterward, Jodl and his aide, Gen. Adm. Hans Georg Friedeburg, were received by General Eisenhower. Eisenhower sternly asked them if they understood the surrender terms imposed upon Germany and if they would be carried out. They answered yes.

The first announcement that Germany had surrendered unconditionally came from Germany itself, in a message from German Foreign Minister Count Lutz Schwerin von Krosigk, who stated in a broadcast that Grand Adm. Karl Doenitz, then new Chancellor of Germany, had ordered the unconditional surrender of all German armed forces.

Before the signing, discussion went on all afternoon and late into the night at the Reims schoolhouse. After hours of discussions among the Allies themselves and with the Germans, the "Act of Military Surrender" was signed.

The Allies were seated behind a small school table. Lieut. Gen. Smith had Lieut. Gen. Sir Frederick E. Morgan and Gen. Fran ois Sevez at his right, while General Susloparoff was at his left. When the Germans entered, the Allies were already seated. All three Germans stiffly bowed before them without a word.

Text of the Act
Following is the text of "An Act of Military Surrender":

"1. We, the undersigned, acting by authority of the German High Command, hereby surrender unconditionally to the Supreme Commander, Allied Expeditionary Force, and simultaneously to the Soviet High Command, all forces on land, sea, and in the air who are at this date under German control.

"2. The German High Command will at once issue orders to all German military, naval and air authorities and to all forces under German control to cease active operations at 2301 hours (11:01) Central European Time on Eight May and to remain in the positions occupied at the time. No ship, vessel or aircraft is to be scuttled, or any damage done to their hull, machinery, or equipment.

"3. The German High Command will at once issue to the appropriate commanders, and ensure the carrying out of any further orders issued by the Supreme Commander, Allied Expeditionary Force, and by the Soviet High Command.

"4. This Act of Military Surrender is without prejudice to, and will be superseded by, any general instrument of surrender imposed, or on behalf of the United Nations and applicable to Germany and the German Armed Forces as a whole.

"In the event of the German High Command or any of the forces under their control failing to act in accordance with this Act of Surrender, the Supreme Commander, Allied Expeditionary Force, and the Soviet High Command will take such punitive or other action as they deem appropriate.

"Signed at Reims, France, at 0241 hours (2:41 a.m.) on the seventh day of May, 1945.

"On behalf of the German High Command—Jodl.

"In the presence of:
"On behalf of the Supreme Commander, Allied Expeditionary Force—W. B. Smith.

"On behalf of the Soviet High Command—Ivan Susloparoff.

"On behalf of the French—F. Sevez."
Formal ratification of the Reims document was held in Berlin on May 8, and peace came technically to Europe at 12:01 a.m., May 9, 1945.

Resistance to Russian, Czech and Yugoslav forces kept up until the last moment and beyond. Final deadline for unconditional surrender was set at 12:01 May 9, and for this reason, the Germans kept fighting. This was also the probable reason why Moscow was reluctant to publish earlier statements, regarding the Reims surrender, especially.

Signing the formal document in Berlin were Field Marshal Wilhelm Keitel, Gen. Adm. Hans Georg Friedeburg and Gen. Hans Juerger Stumpff, respectively commanders of the German army, navy and air force, and by Air Chief Marshal Sir Arthur Tedder, Gen. Dwight D. Eisenhower's deputy commander, for the Allies. Witnessing the signing were Marshal Ivan Zhukoff, commander of the First Ukrainian Army; Gen. Carl A. Spaatz, commander of the United States Strategic Air Forces, and Lieut. Gen. Jean de Latre, commander of the French First Army.

Truman's Announcement

On May 8, 1945, President Truman broadcast to the United States the following message:

"This is a solemn but glorious hour. I only wish that Franklin D. Roosevelt had lived to witness this day. General Eisenhower informs me that the forces of Germany have surrendered to the United Nations. The flags of freedom fly all over Europe.

"For this victory we join in offering our thanks to the Providence which has guided and sustained us through the dark days of adversity.

"Our rejoicing is sobered and subdued by a supreme consciousness of the terrible price we have paid to rid the world of Hitler and his evil band. Let us not forget, my fellow-Americans, the sorrow and the heartache which today abide in the homes of so many of our neighbors—neighbors whose most priceless possession has been rendered as a

sacrifice to redeem our liberty.

"We can repay the debt which we owe to our God, to our dead, and to our children only by work—by ceaseless devotion to the responsibilities which lie ahead of us. If I could give you one single watchword for the coming months that word is—work, work and more work.

"We must work to finish the war. Our victory is but half won. The West is free, but the East is still in bondage to the treacherous tyranny of the Japanese. When the last Japanese division has surrendered unconditionally, then only will our fighting job be done.

"We must work to bind up the wounds of a suffering world—to build an abiding peace, a peace rooted in justice and in law. We can build such a peace only by hard toilsome painstaking work—by understanding and working with our allies in peace as we have in war.

"The job ahead is no less important, no less urgent, no less difficult than the task which now happily is done.

"I call upon every American to stick to his post until the last battle is won. Until that day, let no man abandon his post or slacken his effort."

Churchill's Speech

Prime Minister Winston Churchill also spoke on May 8, 1945, in part as follows:

"Yesterday at 2:40 a.m. at General Eisenhower's headquarters, General Jodl, the representative of the German High Command and of Grand Admiral Doenitz, the designated head of the German state, signed the act of unconditional surrender of all German land, sea, and air forces to the Allied Expeditionary Force and simultaneously to the Soviet High Command.

"It is not surprising that on such long fronts and in the existing disorder of the enemy, the commands of the German High Command could not in every case have been obeyed immediately. This does not, in our opinion with the military advice at our disposal, constitute any reason for withholding from the nation the facts communicated to us by General Eisenhower of the unconditional surrender already signed at Reims nor could it prevent us from celebrating today and tomorrow, Wednesday, as Victory in Europe Day. Today, perhaps we shall think mostly of ourselves. Tomorrow we shall pay a particular tribute to our heroic Russian comrades whose prowess in the field has been one of the grand contributions to the general victory.

"The German war is therefore at an end.

"After years of intense preparations, Germany hurled herself on Poland at the beginning of September, 1939, and in pursuance of our guarantee to Poland in common with the French Republic, the British Empire and Commonwealth of Nations declared war upon this foul aggression.

"After gallant France had been struck down, we from this island and from our united empire maintained the struggle single-handed for a whole year until we were joined by the military might of Soviet Russia and later by the overwhelming power and resources of the United States of America.

"Finally almost the whole world was combined against the evil doers who are now prostrate before us. Our gratitude to our splendid allies goes forth from all our hearts in the island and throughout the British Empire.

"We may allow ourselves a brief period of rejoicing, but let us not forget for a moment

the toils and efforts that lie ahead.

"Japan, with all her treachery and greed, remains unsubdued. The injuries which she has inflicted against Great Britain, the United States and other countries and her detestable cruelties call for justice and retribution.

"We must now devote all our strength and resources to the completion of our task both at home and abroad.

"Advance Britain! Long live the cause of freedom! God save the King."

The Associated Press Report

There was one important "sidelight" to the surrender negotiations at Reims, France.

Suspension of filing facilities of the Associated Press in the European theater was invoked by Supreme Headquarters, Allied Expeditionary Force (SHAEF) on May 7, because SHAEF charged that Edward Kennedy of the AP had released the surrender story prematurely. The ban on AP was lifted six hours and twenty minutes later, but was continued on all copy submitted by Kennedy, chief of the press association's Western Front staff.

Kennedy's story on the Reims surrender was the first out of France and England, and reached New York AP offices at 9:35 a.m., May 7, Eastern Wartime.

British censors had had no special instructions on handling any surrender story, and since Kennedy's dispatch originated abroad and was only relayed through London, standard British censorship was applied and there was no question about passing the story.

For four hours after Kennedy's dispatch hit the streets, officials in Washington and London remained silent. Finally, announcements were made that Churchill would on that day proclaim V-E Day, and that King George would also speak.

The British Press Association reported that the delay in announcing V-E Day in spite of the complete capitulation of Germany was because of the importance attached to synchronizing the news announcement in London, Washington, and Moscow. Officials disagreed as to what hour the announcement should be made public.

The public relations division of SHAEF charged Kennedy with stating that SHAEF had officially announced the surrender. The Associated Press countered with a statement that nowhere in Kennedy's dispatch was the word "official" used.

Kennedy was charged with breaking a pledge, made at Reims, before correspondents were admitted to the surrender room. From Gen. Frank A. Allen, Jr., director of the public relations divisions of SHAEF, came the following:

"To assure that all invited representatives of the press would understand the conditions, I personally briefed the correspondents (17 of them) of the impending ceremonies incident to the signing of the unconditional surrender pact and stated to them:

"This story is off the record until the respective heads of the Allied Governments announce the fact to the world.

"I therefore pledge each and every one of you, on your honor, not to communicate the result of this conference or the fact of its existence until it is released by SHAEF."

Kennedy did not assume that the statement constituted a pledge, because neither he personally, nor any other correspondent present vowed to keep it secret; therefore, he sent his message on to AP headquarters in London, by telephone from Paris.

THE SURRENDER OF JAPAN

The formal and unconditional surrender of the Japanese government to the Allies was executed aboard the U.S.S. Missouri anchored off Yokohama in Tokyo Bay. Foreign Minister Mamoru Shigemitsu and Gen. Yoshijiro Umezu, of the imperial staff, signed the surrender documents for the Japanese government and all Japanese armed forces. Gen. Douglas MacArthur, supreme allied commander, signed for the allies, followed by representatives of the United States, China, the United Kingdom, the U.S.S.R., Australia, Canada, France, the Netherlands, and New Zealand also signed.

The official text of the surrender terms is as follows:

"1. We, acting by command of and in behalf of the emperor of Japan, the Japanese government and the Japanese imperial general headquarters, hereby accept provisions in the declaration issued by the heads of the governments of the United States, China, and Great Britain July 26, 1945, at Potsdam, and subsequently adhered to by the Union of Soviet Socialist Republics, which four powers are hereafter referred to as the allied powers.

"2. We hereby proclaim the unconditional surrender to the allied powers of the Japanese imperial general headquarters and of all Japanese armed forces and all armed forces under Japanese control wherever situated.

"3. We hereby command all Japanese forces, wherever situated, and the Japanese people to cease hostilities forthwith, to preserve and save from damage all ships, aircraft, and military and civil property and to comply with all requirements which may be imposed by the supreme commander for the allied powers or by agencies of the Japanese government at his direction.

Command All Japs to Surrender

"4. We hereby command the Japanese imperial headquarters to issue at once orders to the commanders of all Japanese forces and all forces under Japanese control, wherever situated, to surrender unconditionally themselves and all forces under their control.

"5. We hereby command all civil, military, and naval officials to obey and enforce all proclamations, orders and directives, deemed by the supreme commander for the allied powers to be proper to effectuate this surrender and issued by him or under his authority and we direct all such officials to remain at their posts and to continue to perform their non-combatant duties unless specifically relieved by him or under his authority.

"6. We hereby undertake for the emperor, the Japanese government, and their successors to carry out the provisions of the Potsdam declaration in good faith, and to issue whatever orders and take whatever action may be required by the supreme commander for the allied powers or by any other designated representative of the allied powers for the purpose of giving effect to that declaration.

Free Allied Prisoners

"7. We hereby command the Japanese imperial government and the Japanese imperial general headquarters at once to liberate all allied prisoners of war and civilian internees now under Japanese control and to provide for their protection, care, maintenance, and immediate transportation to places as directed.

"8. The authority of the emperor and the Japanese government to rule the state shall be subject to the supreme commander for

the allied powers who will take such steps as he deems proper to effectuate these terms of surrender."

HIROHITO'S PROCLAMATION

The proclamation of Emperor Hirohito, issued by order of the supreme allied commander in connection with the unconditional surrender, is as follows:

"Accepting the terms set forth in the declaration issued by the heads of the governments of the United States, Great Britain, and China on July 26, 1945, at Potsdam and subsequently adhered to by the union of soviet socialist republics, I have commanded the Japanese imperial government and the Japanese imperial general headquarters to sign on my behalf the instrument of surrender presented by the supreme commander for the allied powers and to issue general orders to the military and naval forces in accordance with the direction of the supreme commander of the allied powers.

"I command all my people forthwith to cease hostilities, to lay down their arms and faithfully to carry out all the provisions of the instruments of surrender and the general orders issued by the Japanese imperial general headquarters hereunder."

GEN. MACARTHUR'S SPEECH

As the surrender proceedings opened, Gen. MacArthur said:

"We are gathered here, representative of the major warring powers, to conclude a solemn agreement whereby peace may be restored. The issues, involving divergent ideals and ideologies, have been determined on the battle fields of the world and hence are not for our discussion or debate. Nor is it for us here to meet, representing as we do a majority of the peoples of the earth, in a spirit of distrust, malice or hatred. But rather it is for us, both victors and vanquished, to rise to that higher dignity which alone befits the sacred purposes we are about to serve, committing all of our peoples unreservedly to faithful compliance with the undertakings they are here formally to assume.

"It is my earnest hope and indeed the hope of all mankind that from this solemn occasion a better world shall emerge out of the blood and carnage of the past—a world founded upon faith and understanding—a world dedicated to the dignity of man and the fulfillment of his most cherished wish—for freedom, tolerance, and justice.

"The terms and conditions upon which surrender of the Japanese imperial forces is here to be given and accepted are contained in the instrument of surrender now before you.

"As supreme commander for the allied powers, I announce it my firm purpose, in the tradition of the countries I represent, to proceed in the discharge of my responsibilities with justice and tolerance, while taking all necessary dispositions to insure that the terms of surrender are fully, promptly and faithfully complied with.

"I now invite the representatives of the emperor of Japan and the Japanese government and the Japanese imperial headquarters to sign the instrument of surrender at the places indicated.

"The supreme commander for the allied powers will now sign on behalf of the nations at war with Japan.

"The representatives of the United States of America will now sign.

"The representative of the republic of China will now sign.

"The representative of the United Kingdom will now sign.

"The representative of the Union of Soviet Socialist Republics will now sign.

"The representative of Australia will now sign.

"The representative of Canada will now sign.

"The representative of France will now sign.

"The representative of Netherlands will now sign.

"The representative of New Zealand will now sign.

"Let us pray that peace be now restored to the world, and that God will preserve it always. These proceedings are closed."

PRESIDENT TRUMAN'S SPEECH ON JAP SURRENDER

Speaking from the White House, in a broadcast linked to the U.S.S. Missouri, President Truman proclaimed Sunday, Sept. 2, as official V-J Day for the American people. Excerpts from Mr. Truman's speech follow:

"The thoughts and hopes of all America—indeed of all the civilized world—are centered tonight on the battleship Missouri. There on that small piece of American soil anchored in Tokyo harbor the Japanese have just officially laid down their arms. They have signed terms of unconditional surrender.

* * * * *

"We shall not forget Pearl Harbor.

"The Japanese militarists will not forget the U.S.S. Missouri.

"The evil done by the Japanese war lords can never be repaired or forgotten. But their power to destroy and kill has been taken from them. Their armies and what is left of their navy are now impotent.

"To all of us there comes first a sense of gratitude to Almighty God who sustained us and our allies in the dark days of grave danger, who made us to grow from weakness into the strongest fighting force in history, and who now has seen us overcome the forces of tyranny that sought to destroy His civilization.

* * * * *

"This is a victory of more than arms alone. This is a victory of liberty over tyranny.

"From our war plants rolled the tanks and planes which blasted their way to the heart of our enemy; from our ship yards sprang the ships which bridged all the oceans of the world for our weapons and supplies; from our farms came the food and fiber for our armies and navies and for all our allies in all the corners of the earth; from our mines and factories came the raw materials and the finished products which gave us the equipment to overcome our enemies.

"But back of it all were the will and spirit and determination of a free people—who know what freedom is, and who know that it is worth whatever price they had to pay to preserve it.

"Most Enduring Forces"

"It was the spirit of liberty which gave us our armed strength and which made our men invincible in battle. We know now that that spirit of liberty, the freedom of the individual, and the personal dignity of man, are the strongest and toughest and most enduring forces in all the world.

* * * * *

"Victory always has its burdens and its responsibilities as well as its rejoicing.

"But we face the future and all its dangers with great confidence and great hope. America can build for itself a future of employment and security. Together with the united nations, it can build a world of peace founded on justice and fair dealing and tolerance.

Proclaims V-J Day

"As President of the United States, I proclaim Sunday, Sept. 2, 1945, to be V-J day—the day of formal surrender by Japan. It is

not yet the day for formal proclamation of the end of the war or of the cessation of hostilities. But it is a day which we Americans shall always remember as a day of retribution—as we remember that other day, the day of infamy.

"From this day we move forward. We move toward a new era of security at home. With the other united nations we move toward a new and better world of peace and international good will and cooperation.

"God's help has brought us to this day of victory. With His help we will attain that peace and prosperity for ourselves and all the world in the years ahead."

Sidelights on the Japanese surrender

Gen. MacArthur signed deliberately, using five pens. The first two—silverplated especially for the occasion—he handed in turn to Lt. Gen. Jonathan M. Wainwright and to British Gen. Arthur Ernest Percival, who were forced to surrender Corregidor and Singapore, respectively, in the war's darkest hours.

Adm. Nimitz signed on behalf of the United States.

These were the signers in addition to the Japanese and Americans: Gen. Hsu Yung-Chang for China, Adm. Bruce Fraser for the United Kingdom, Lt. Gen. Derevyanko for Russia, Gen. Thomas Blamey for Australia, Col. Lawrence Moore-Cosgrave for Canada, Gen. Jacques le Clerc for France, Adm. C. E. L. Helfrich for the Netherlands, and Air Vice Marshal Isitt for New Zealand.

Among United States naval officers present were Adm. Nimitz, his chief of staff, Vice Adm. Forrest C. Sherman; Adm. Halsey; Vice Adm. John A. Towers, commander of naval air in the Pacific; Vice Adm. Theodore C. Wilkinson, Rear Adm. Oscar C. Badger, Comdr. Maher.

Lt. Gen. Robert E. Geiger, commander of marine forces in the Pacific, represented the marine corps. United States army officers present included Generals Spaatz, Kenney, and Eichelberger and Lt. Gen. Robert C. Richardson Jr., commander of United States army forces in the central Pacific.

The Japanese delegation came aboard the U.S.S. Missouri at 8:55 a.m. (6:55 p.m. Saturday Chicago time) as scheduled. They reached the Missouri in personnel speed boats flying the American flag.

Clouds and fog limited visibility to about 1,500 feet. Nearby mountains were hidden.

Japs Look Up at B-29's

Super Forts scheduled to fly overhead during the ceremonies were obscured by the overcast. Only one B-29 appeared, ducking low under the clouds. But when the clouds parted as MacArthur concluded the formalities, many planes roared thru the sunlight overhead. The departing delegation looked up at them.

The ceremony was conducted on the Missouri's gallery deck, on her starboard side, only a few feet from her big No. 2 16-inch-gun turret. A long table was set up for the signing.

Distinguished Flying Crosses	103,762
Soldiers Medals	8,592
Bronze Stars	189,309
Air Medals	1,034,676

* 40% fatalities.

SIDELIGHTS ON THE JAPANESE SURRENDER

There were 11 Japanese representatives. Tokyo bay today was a scene of feverish activity, with boats plying back and forth in preparation for the history-making event. The navy combat squadrons lay at anchor in impressive array.

Overhead allied planes flew in vigilant patrol. Gen. Spaatz, commander of the strategic air forces said his planes were ready to loose 8,000 tons of bombs at any sign of treachery.

On both sides of the bay and up to the Tama river at the southern edge of Tokyo, American troops and British and American marines and bluejackets were in firm control. All strategic points had been seized.

Lt. Gen. Robert L. Eichelberger's 8th army was landing and spreading over the Tokyo area. The occupation of the northernmost island of Hokkaido is expected to begin soon. This also applies to such islands as Wake, where the marines made their heroic stand early in the war.

U. S. NAVY ASKS TO HOLD 9 BASES

The U. S. Navy, on Sept. 5, 1945, recommended to Congress that the U. S. maintain nine major naval bases in the Pacific.

The bases named were:

1. Kodiak in the Aleutians.
2. Adak, in the Aleutians.
3. Hawaii.
4. Balboa, Canal Zone.
5. Guam, Saipan and Tinian.
6. Iwo Jima in the Bonins and Volcano Group.
7. Okinawa, in the Ryukyus.

8. Manus, in the Admiralties.

9. The Philippines.

In addition, the Navy spokesman said that other Pacific islands should be kept solely to prevent their use by any other power, for example, Wake and Midway, Eniwetok, Kwajalein and Truk.

In the Atlantic the Navy recommended establishment of major bases at Argentina and Bermuda, Roosevelt Roads, San Juan, Puerto Rico; Guantanamo Bay, Cuba; and Coco Solo, Canal Zone.

ESTIMATED COST OF WORLD WAR II

On the day of Japan's unconditional surrender, Sept. 2, 1945, it was estimated that 252,885 American fighting men had been killed in World War II. Wounded were 651,218; 43,969 were still missing, and 122,747 had been prisoners of war. The wounded included more than 17,300 who had had surgical amputations, and more than 7,000 who have lost part of their hearing. About 1,200 were blinded in one or both eyes.

Cost in Money

The United States of America was by far the largest spender in World War II, with a total cost of 287 billion, 181 million dollars, computed from the beginning of the defense program in 1940. Germany spent an estimated 280 billion, and the largest spender of the other allies was Soviet Russia with 135 billion, 856 million dollars. Great Britain, it is estimated, spent about 64 billion dollars, or less than 23 per cent of the cost of the war to the United States.

Estimates on the war's cost to other nations were: Japan, 49 billion 154 million; Italy, 95 billion; France, 13 billion; Canada, 7 billion; Australia, New Zealand, and South Africa, 4½ billion; Belgium, 3½ billion; Poland, 2 billion; Czechoslovakia, 1½ billion, and the Netherlands, 1 billion.

Total allied expenditures were estimated at 560 billions and total axis expenditures at 445 billion.

Americans paid \$119,346,288,000 in taxes during war time, and the war developed treasury indebtedness hit \$208,226,445,700 with war bond subscriptions and other securities. Since Pearl Harbor, spending has been at the rate of 154 million dollars a day, or more than \$100,000 a minute.

These figures necessarily exclude all of the costs of the war that will be incurred in years to come, such as the cost of maintaining armies of occupation, relief and rehabilitation, care of veterans, etc., etc.

JAP WAR CASUALTIES 5 MILLION

Tokyo radio said on Sept. 5, 1945, that Japan's army and navy casualties in the war totaled about 5,085,000, but that the nation's armed strength at the end was nearly three times as great as at the start of the war.

Japan began the war with an army of 1,900,000 and ended it with 5,500,000.

* * *

Tokyo, quoting a government spokesman making a report to the Japanese Diet, listed the casualty figures as follows:

Army—Killed 310,000; wounded 146,000; sick 4,470,000 (of which 40,000 died)—total 4,926,000.

Navy—(As of Aug. 28, including civilians in Navy service) killed 157,365; wounded, no

figures; died from sickness, 1,430; missing, 1,483—total 160,278.

* * *

Navy dead included 2,065 members of the "special attack (suicide) corps."

* * *

Domei also said that Allied air raids on Japan killed 241,309 and wounded 313,041. Domei reported that the 554,350 casualty total was announced at a session of the Japanese diet.

Metropolitan Tokyo, free-bombed repeatedly by B-29's, headed the casualty list with 88,250 killed, 61,306 wounded, and 2,578,000 homeless, the broadcast said.

SIDELIGHTS ON WORLD WAR II

The U. S. navy two-ocean armada of 1,500 fighting ships and 100,000 vessels of all sizes, a fleet greater than the combined navies of the rest of the world was built up during World War II. American shipyards produced about 60 million deadweight tons of merchant ships.

From December, 1942, to V-J day, American airplane production totaled 223,444 aircraft of all types, including 184,433 tactical craft.

In the munitions industry, a peak employment of 10,300,000 persons was reached. The United States was producing 45 per cent of

the world's munitions as the war ended.

Army orders included procurement of 119,400 tanks and armored cars, 1,116,000 artillery pieces, 18,900,000 small arms, 180,000 tractors, bulldozers, and other construction equipment, 2,400,000 trucks, including 660,000 jeeps; 1,700,000 radio sets, 2,660,000 telephones, 29,000,000 tents, 117,000,000 pairs of shoes, and 7,000 locomotives.

American railroads handled 287 million tons of army freight and transported 32 million troops. Blood donor centers took in 13,300,000 pints of American blood.

IMPORTANT DOCUMENTS OF WORLD WAR II THE CAIRO DECLARATION

Statement on Conference of Roosevelt, Chiang Kai-shek and Churchill held in North Africa, November 22-26, 1943. Released, December 1, 1943.

The several military missions have agreed upon future military operations against Japan. The Three Great Allies expressed their resolve to bring unrelenting pressure against their brutal enemies by sea, land, and air. This pressure is already rising.

The Three Great Allies are fighting this war to restrain and punish the aggression of Japan. They covet no gain for themselves and have no thought of territorial expansion. It is their purpose that Japan shall be stripped of all the islands in the Pacific which she has seized or occupied since the beginning of the first World War in 1914, and that all the territories Japan has stolen from the Chinese such as Manchuria, Formosa and the Pescadores, shall be restored to the Republic of China. Japan will also be expelled from all other territories, which she has taken by violence and greed. The aforesaid three great powers, mindful of the enslavement of the people of Korea, are determined that in due course Korea shall become free and independent.

With these objects in view the three Allies, in harmony with those of the United Nations at war with Japan, will continue to persevere in the serious and prolonged operations necessary to procure the unconditional surrender of Japan.

THE TEHRAN DECLARATION

We, the President of the United States of America, the Prime Minister of Great Britain, and the Premier of the Soviet Union, have met in these four days past in this the capital of our ally, Teheran, and have shaped and confirmed our common policy.

We express our determination that our nations shall work together in the war and in the peace that will follow.

As to the war, our military staffs have joined in our roundtable discussions and we have concerted our plans for the destruction of the German forces. We have reached complete agreement as to the scope and timing of operations which will be undertaken from the east, west and south. The common understanding which we have here reached guarantees that victory will be ours.

And as to the peace, we are sure that our concord will make it an enduring peace. We recognize fully the supreme responsibility resting upon us and all the nations to make a peace which will command good will from the overwhelming masses of the peoples of the world and banish the scourge and terror of war for many generations.

With our diplomatic advisers we have surveyed the problems of the future. We shall seek the cooperation and active participation of all nations, large and small, whose peoples in heart and in mind are dedicated, as are our own peoples, to the elimination of tyranny and slavery, oppression and intolerance. We will welcome them as they may choose to

come into the world family of democratic nations.

No power on earth can prevent our destroying the German armies by land, their U-boats by sea, and their war plants from the air. Our attacks will be relentless and increasing.

Emerging from these friendly conferences we look with confidence to the day when all the peoples of the world may live free lives untouched by tyranny and according to their varying desires and their own consciences.

We came here with hope and determination. We leave here friends in fact, in spirit, and in purpose.

Signed at Teheran, December 1, 1943.

Roosevelt, Stalin, Churchill.

THE CRIMEA CONFERENCE

(Excerpts)

The following statement is made by the Prime Minister of Great Britain, the President of the United States of America and the Chairman of the Council of People's Commissars of the Union of Soviet Socialist Republics on the results of the Crimean conference.

Nazi Germany is doomed. The German people will only make the cost of their defeat heavier to themselves by attempting to continue a hopeless resistance.

We have agreed on common policies and plans for enforcing the unconditional surrender terms which we shall impose together on Nazi Germany after German armed resistance has been finally crushed.

Under the agreed plan, the forces of the three powers will each occupy a separate zone of Germany. Coordinated administration and control have been provided for under the plan through a central commission.

It is not our purpose to destroy the people of Germany, but only when nazism and militarism have been extirpated will there be hope for a decent life for Germans, and a place for them in the comity of nations.

We have considered the question of the damage caused by Germany to the Allied Nations in this war and a commission for the compensation of damage will be established.

We have agreed that a conference of the United Nations should be called to meet at San Francisco, in the United States, on April 25, 1945 to prepare the charter of an international organization, along the lines proposed in the informal conversations at Dumbarton Oaks.

A new Polish government should be called the Polish Provisional Government of National unity. This Polish Provisional Government of National Unity shall be pledged to the holding of free and unfettered elections as soon as possible on the basis of universal suffrage and secret ballot.

The three heads of Government consider that the eastern frontier of Poland should follow the Curzon Line, with digressions from it in some regions of five to eight kilometers in favor of Poland.

world.

1. Their countries seek no aggrandizement, territorial or other.

2. They desire to see no territorial changes that do not accord with the freely expressed wishes of the peoples concerned.

3. They respect the right of all peoples to choose the form of government under which they will live; and they wish to see sovereign

THE ATLANTIC CHARTER

The President of the United States of America and the Prime Minister, Mr. Churchill, representing his Majesty's Government in the United Kingdom, being met together, deem it right to make known certain common principles in the national policies of their respective countries on which they base their hopes for a better future for the

rights and self-government restored to those who have been forcibly deprived of them.

4. They will endeavor, with due respect for their existing obligations, to further the enjoyment by all States, great or small, victor or vanquished, of access, on equal terms, to the trade and to the raw materials of the world which are needed for their economic prosperity.

5. They desire to bring about the fullest collaboration between all nations in the economic field with the object of securing, for all, improved labor standards, economic advancement and social security.

6. After the final destruction of the Nazi tyranny, they hope to see established a peace which will afford to all nations the means of dwelling in safety within their own boundaries, and which will afford assurance that all the men in all the lands may live out their lives in freedom from fear and want.

7. Such a peace should enable all men to traverse the high seas and oceans without hindrance.

8. They believe that all of the nations of the world, for realistic as well as spiritual reasons must come to the abandonment of the use of force. Since no future peace can be maintained if land, sea or air armaments continued to be employed by nations which threaten, or may threaten, aggression outside of their frontiers, they believe, pending the establishment of a wider and permanent system of general security, that the disarmament of such nations is essential. They will likewise aid and encourage all other practicable measures which will lighten for peace-loving peoples the crushing burden of armaments.

FRANKLIN D. ROOSEVELT.

WINSTON S. CHURCHILL.

August 14, 1941.

THE CASABLANCA CONFERENCE STATEMENT

The President of the United States and the Prime Minister of Great Britain have been in conference near Casablanca since January 14.

For ten days the combined staffs have been in constant session, meeting two or three times a day and recording progress at intervals to the President and the Prime Minister.

The entire field of the war was surveyed theatre by theatre throughout the world, and all resources were marshaled for a more intense prosecution of the war by sea, land and air.

Nothing like this prolonged discussion between two allies has ever taken place before. Complete agreement was reached between the leaders of the two countries and their respective staffs upon war plans and enterprises to be undertaken during the campaigns of 1943 against Germany, Italy and Japan with a view to drawing the utmost advantage from the markedly favorable turn of events at the close of 1942.

Premier Stalin was cordially invited to meet the President and Prime Minister, in which case the meeting would have been held very much farther to the East. He was unable to leave Russia at this time on account of the great offensive which he himself, as Commander in Chief, is directing.

The President and Prime Minister realized up to the full the enormous weight of the war which Russia is successfully bearing along her whole land front, and their prime object has been to draw as much weight as possible off the Russian armies by engaging the enemy as heavily as possible at the best selected points.

Premier Stalin has been fully informed of the military proposals.

The President and Prime Minister have been in communication with Generalissimo Chiang Kai-shek. They have apprised him of the measure which they are undertaking to assist him in China's magnificent and unrelaxing struggle for the common cause.

The occasion of the meeting between the President and Prime Minister made it opportune to invite General Giraud (General Henri Honore Giraud, High Commissioner of French Africa) to confer with the Combined Chiefs of Staff and to arrange for a meeting between him and General De Gaulle (General Charles de Gaulle, Fighting French Commander). The two generals have been in close consultation.

The President and Prime Minister and their combined staffs, having completed their plans for the offensive campaigns of 1943, have now separated in order to put them into active and concerted execution.

Released: Feb. 2, 1943.

THE QUEBEC CONFERENCE STATEMENT

The Anglo-American war conference which opened at Quebec on August 11 under the hospitable auspices of the Canadian government has now concluded its work.

The whole field of world operations has been surveyed in the light of the many gratifying events which have taken place since the meeting of the President and Prime Minister in Washington at the end of May and the necessary decisions have been taken to provide for the forward actions of the Fleet, Army and Air Forces of the two nations.

Considering that these forces are intermingled in continuous action against the enemy in several quarters of the globe, it is indispensable that entire unity of aim and method should be maintained at the summit of war direction.

Further conferences will be needed, probably at shorter intervals than before, as the war effort of the United States and the British Commonwealth and Empire against the enemy spreads and deepens.

It would not be helpful to the fighting troops to make any announcements of the decisions which have been reached. These can only emerge in action.

It may, however, be stated that the military discussions of the Chiefs of staff turned very largely upon the war against Japan and the bringing of effective aid to China. Mr. T. V. Soong, representing the Generalissimo Chiang Kai-shek was a party to the discussions. In this field, as in the European, the president and the Prime Minister were able to receive and approve the unanimous recommendations of the combined Chiefs of Staff. Agreement was also reached upon the political issues underlying or arising out of the military operations.

It was resolved to hold another conference before the end of the year between the British and American authorities, in addition to any tripartite meeting which it may be possible to arrange with Soviet Russia. Full reports of the decisions so far as they affect the war against Germany will be furnished to the Soviet government.

Consideration has been given during the conference to the question of relations with the French Committee of Liberation, and it is understood that an announcement by a number of governments will be made in the latter part of the week.

April, 1943.

POTSDAM TRIPARTITE CONFERENCE AT BERLIN

Meeting near Berlin during the period from July 17 to Aug. 2, 1945, representatives of the Big Three governments, the United States, Great Britain and Russia, agreed upon the following matters pertaining to the disposition and treatment of defeated Germany.

Throughout the conference the U. S. delegation was headed by President Truman assisted by Secretary of State James F. Byrnes. Russian delegates were Generalissimo J. V. Stalin and V. M. Molotov.

At the beginning of the conference Britain's delegation was composed of Winston Churchill and Anthony Eden. On July 28, they were replaced by Clement Attlee and Ernest Bevin following the announcement of election returns in Britain which brought the Laborite government of Mr. Attlee into power.

Highlights of conference agreements were substantially as follows:

1. A council of foreign ministers representing the five principal world powers was established to continue necessary preparatory work for peace settlements. Britain, Russia, China, France and the U. S. were to send representatives to the council.

2. Each nation was to settle its reparations claims by expropriating materials and equipment from its zone of occupation.

3. Ten per cent of all removable industrial capital was to be given to Russia. An additional fifteen per cent was to be paid for in goods.

4. Nazism and Germany's capacity to arm were to be suppressed forever. Her economy and government to be decentralized.

5. Poland was given permission to annex a designated portion of north and east Germany including a part of East Prussia not previously given Russia. Königsburg and adjacent Germany territory were to become part of Russia.

6. War criminals were to be tried beginning Sept. 1, 1945.

7. The Spanish government headed by Franco was denied admission to the United Nations.

8. Peace treaties with Italy and other Axis satellites were to be prepared by the Council of Foreign Ministers. Peace with Germany was to be discussed at a later date.

9. Transportation of displaced persons in occupied areas back to Germany was to be arranged by occupation authorities.

Britain's Casualties

Total casualties to British commonwealth and empire forces in the five and three-quarters years of war up to May 31 were 1,427,634.

Of these 532,233 were killed or died of wounds or injuries or are missing and believed dead. In the first world war deaths totaled 1,089,919, while 2,400,988 were wounded.

(The population of the British empire is estimated at 539,870,000.)

The breakdown of those killed follows:

United Kingdom and Great Britain, including men from overseas serving in its forces, especially from Newfoundland and southern Rhodesia, 233,042; Canada, 36,018; Australia, 21,415; New Zealand, 9,844;

South Africa, 6,417; India, 23,295; British colonies 6,741; total, 336,772.

Missing and Wounded

The figures for those missing are:

United Kingdom, 57,472; Canada, 2,866; Australia, 6,519; New Zealand, 2,201; South Africa, 1,980; India, 12,264; colonies, 14,811. Total, 98,113.

Wounded: United Kingdom, 275,975; Canada, 53,073; Australia, 37,477; New Zealand, 19,253; South Africa, 13,773; India, 62,064; colonies, 6,773; total, 468,388.

Prisoners of war, including service internees: United Kingdom, 183,849; Canada, 9,051; Australia, 26,800; New Zealand, 8,485; South Africa, 14,595; India, 79,692 (including 20,540 missing, presumed prisoners of war); colonies 8,051; total, 330,523.

REVISED "G. I. BILL OF RIGHTS"

Congress passed a broad revision of the G.I. Bill of Rights Dec. 19, liberalizing rules on loans and education for veterans.

New features include:

1. Removal of a requirement that tuition fees, unemployment compensation and defaults on loans be deducted from any future federal bonus;

2. Increase in subsistence allowance for G.I. students from \$50 to \$65 monthly to those unmarried and \$75 to \$90 for those married;

3. Expense-paid correspondence courses and short technical courses;

4. Removal of a requirement that men over 25 must show that their education was interfered with to be eligible for educational benefits;

5. Increase in maximum government loan

guarantee from \$2,000 to \$4,000 on real estate, the government guaranteeing half.

6. Real estate loans to be arranged by recognized lending agencies, the veteran and the local appraiser of the Veterans Administration, an agreement of the three to be binding on the administration. Business loans still would require administration approval;

7. Easing up on loans by substituting "reasonable value" of property as the basic consideration instead of "normal reasonable value";

8. Additional purposes for which a loan may be obtained and more time to pay back a real estate loan;

9. Americans who fought for Allied governments would come under the bill.

G. I. BILL OF RIGHTS

Source: Public Law 346, Title II, Chapter IV

"1. Any person who served in the active military or naval service **on or after September 16, 1940**, and prior to the termination of the present war, and who shall have **been discharged** or released therefrom **under conditions other than dishonorable**, and whose education or training was impeded, delayed, interrupted, or interfered with by reason of his entrance into the service, **or who desires a refresher or re-training course**, and who either shall have served ninety days or more, exclusive of any period he was assigned for a course or education or training under the Army specialized training program or the Navy college training program, which course was a continuation of his civilian course and was pursued to completion, or as a cadet or midshipman at one of the service academies, or shall have been discharged or released from active service by reason of an actual service-incurred injury or disability, shall be eligible for an entitled to receive education or training under this part: **PROVIDED**, That **such course shall be initiated not later than two years after either the date of his discharge or the termination of the present war**, whichever is the later: **PROVIDED FURTHER**, That no such education or training shall be afforded beyond seven years after the termination of the present war: **AND PROVIDED FURTHER**, That **any such person who was not over 25 years of age at the time he entered the service shall be deemed to have had his education or training impeded**, delayed, interrupted, or interfered with. **Men over 25 see note.**

"2. Any such eligible person shall be entitled to education or training, or a refresher or retraining course, at an approved educational or training institution, for a period of one year or the equivalent thereof in continuous part-time study, or for such lesser time as may be required for the course of instruction chosen by him. Upon satisfactory completion of such course of education or training, according to the regularly prescribed standards and practices of the institutions, except a refresher or retraining course, such person shall be entitled to an additional period or periods of education or training, not to exceed the time such person was in the active service on or after September 16, 1940, and before the termination of the war, exclusive of any period he was assigned for a course of education or training

under the Army specialized training program or the Navy college training program, which course was a continuation of his civilian course and was pursued to completion, or as a cadet or midshipman at one of the service academies, but in no event shall the total period of education or training exceed four years: **PROVIDED**, That his work continues to be satisfactory throughout the period, according to the regularly prescribed standards and practices of the institution: **PROVIDED, HOWEVER**, That wherever the additional period of instruction ends during a quarter or semester and after a major part of such quarter or semester has expired, such period of instruction shall be extended to the termination of such unexpired quarter or semester.

"3. Such person shall be eligible for and entitled to such course of education or training as he may elect, and at any approved educational or training institution at which he chooses to enroll, whether or not located in the State in which he resides, which will accept or retain him as a student or trainee in any field or branch of knowledge which such institution finds him qualified to undertake or pursue: **PROVIDED**, That, for reasons satisfactory to the Administrator, he may change a course of instruction: **AND PROVIDED FURTHER**, That any such course of education or training may be discontinued at any time, if it is found by the Administrator that, according to the regularly prescribed standards and practices of the institution, the conduct or progress of such person is unsatisfactory.

"5. The Administrator shall pay to the educational or training institution, for each person enrolled in full time or part time course of education or training, the customary cost of tuition, and such laboratory, library, health, infirmary, and other similar fees as are customarily charged, and may pay for books, supplies, equipment, and other necessary expenses, exclusive of board, lodging, other living expenses, and travel, as are generally required for the successful pursuit and completion of the course by other students in the institution: **PROVIDED**, That in no event shall such payments, with respect to any person, exceed \$500 for any ordinary school year: **PROVIDED FURTHER**, That no payments shall be made to institutions, business or other establishments furnishing apprentice training on the job. **AND PROVIDED FURTHER**, That if any such institution has no established tuition fee, or if

its established tuition fee shall be found by the Administrator to be inadequate compensation to such institution for furnishing such education or training, he is authorized to provide for the payment, with respect to any such person, of such fair and reasonable compensation as will not exceed \$500 for any ordinary school year.

"6. While enrolled in and pursuing a course under this part, such person, upon application to the Administrator, shall be paid a subsistence allowance of \$50 per month, if without a dependent or dependents, or \$75 per month, if he has a dependent or dependents, including regular holidays and leave not exceeding thirty days in a calendar year. Such person attending a course on a part-time basis, and such person receiving compensation for productive labor performed as part of their apprentice or other training on the job at institutions, business or other establishments, shall be entitled to receive such lesser sums, if any, as subsistence or dependency allowances, as may be determined by the Administrator: PROVIDED, That any such person eligible under this part, and within the limitations thereof, may pursue such full time or part-time course or courses as he may elect, without subsistence allowance.

"11. As used in this part, the term 'educational or training institutions' shall include all public or private elementary, secondary, and other schools furnishing education for adults, business schools and colleges, scientific and technical institutions, colleges, vocational schools, junior colleges, teachers colleges, normal schools, professional schools, universities, and other educational institu-

tions, and shall also include business or other establishments providing apprentice or other training on the job, including those under the supervision of an approved college or university or any State department of education, or any State apprenticeship agency or State board of vocational education, or any State apprenticeship council or the Federal Apprentice Training Service established in accordance with Public, Numbered 308, Seventy-fifth Congress, or any agency in the executive branch of the Federal Government authorized under other laws to supervise such training."

SEC. 402. Public Law Numbered 16, Seventy-eighth Congress, is hereby amended by adding thereto a new section 4 to read as follows:

"SEC. 4. Any books, supplies, or equipment furnished a trainee or student under part VII or part VIII of Veterans Regulation Numbered 1 (a) shall be deemed released to him: PROVIDED, That if he fail, because of fault on his part to complete the course of training or education afforded thereunder, he may be required, in the discretion of the Administrator, to return any or all of such books, supplies, or equipment not actually expended or to repay the reasonable value thereof."

NOTE: A person over 25 years of age at the time he entered the service must submit satisfactory evidence to show that his education or training was impeded, delayed, interrupted, or interfered with and shall be eligible for and entitled to a refresher or retraining course not in excess of one calendar year.

LAWS GOVERNING ENLISTED PAY, U. S. ARMY

Source: Army Pay Tables, 1942

1. **Base Pay.** The monthly base pay of enlisted men shall be: First grade, \$138; second grade, \$114; third grade, \$96; fourth grade, \$78; fifth grade, \$66; sixth grade, \$54; and seventh grade, \$50. (See Sec. 9, Act June 16, 1942)

2. **Longevity.** Every enlisted man shall receive an increase of 5 per centum of the base pay of his grade for each three years of service up to thirty years. (See Sec. 9, Act June 16, 1942)

3. **Flying Pay.** Enlisted men shall receive an increase of 50 per centum of their pay when by orders of competent authority they are required to participate regularly and frequently in aerial flights, and when in consequence of such orders they do participate in regular and frequent flights. (See sec. 2, act June 16, 1942)

4. **Parachutists' Pay.** Any enlisted man not in flying-pay status, who is assigned or attached as a member of a parachute unit, including parachute-jumping schools, and for whom parachute jumping is an essential part of his military duty and who has received a rating as a parachutist or is undergoing training for such a rating shall receive, while engaged upon parachute duty, additional pay at the rate of \$50 per month. (See sec. 18, act June 16, 1942)

5. **Pay for Foreign Service or Sea Duty.** The base pay of any enlisted man shall be increased by 20 per centum for any period of service while on sea duty or duty in any place beyond the continental limits of the

United States or in Alaska. The per centum increase herein authorized shall be included in computing increases in pay for aviation and submarine duty. This section shall be effective from December 7, 1941, and shall cease to be effective twelve months after the termination of the present war is proclaimed by the President. (See sec. 2, act June 16, 1942)

6. **Pay for Special Qualification.** Enlisted men may receive additional compensation, not less than \$1 nor more than \$5 per month, for special qualification in the use of the arm or arms which they may be required to use. (See sec. 16, act June 16, 1942)

7. **Pay for Distinguished Service Awards.** Enlisted men shall be entitled to additional pay at the rate of \$2 per month from the date of the distinguished act or service for which a medal of honor, a distinguished service cross, a distinguished-service medal, a bar, or other suitable device, is awarded, or from the date of the act of heroism or extraordinary achievement for which the distinguished-flying cross or the soldier's medal, bar, or other suitable device, is awarded, and said additional pay shall continue throughout his active service, whether such service shall or shall not be continuous. [See Act July 9, 1918 (40 Stat. 871); and act July 2, 1926 (44 Stat. 789).]

8. **Aviation Cadets.** The base pay of any aviation cadet shall be \$75 per month, which pay shall include extra pay for flying risk, as provided by law. Aviation cadets, shall be paid, in addition, a money allowance for

subsistence of \$1 per day. No aviation cadet shall be entitled to receive longevity pay. [Sec. 4, act June 3, 1941 (55 Stat. 240) as amended by Sec. 6, act July 8, 1942 (Public Law 658, 77th Congress)]

9. Regular Army Reserve. Members of the Regular Army Reserve while on active duty shall have the same status and receive only the same pay and allowances provided by law for enlisted men of the active Regular Army of like grade and length of service. In computing length of service for pay purposes, time spent on active duty and also on inactive duty in the Regular Army Reserve and in the Enlisted Reserve Corps will be counted. In addition, if found qualified and accepted for active duty, they shall receive a sum at the rate of \$3 per month for each month they have been enlisted in the Regular Army Reserves [sec. 30, act June 3, 1913 (39 stat. 187); sec. 30, svy. June 4, 1920 (41 stat. 775); act April 25, 1938 (52 stat. 221)]

10. Enlisted Reserve Corps. If found qualified and accepted for active duty, they shall receive a sum at the rate of \$3 per month for each month they have been enlisted in the Regular Army Reserve, but not to exceed \$150. [sec. 55b, added to act June 3, 1916, by sec. 35, act June 4, 1920 (41 Stat. 780); and sec. 9, act June 16, 1942 (56 stat. 359)].

11. Reserve Forces. Enlisted men of the Reserve forces of any of the services mentioned in the title of this Act, when on active duty in the service of the United States, shall be entitled to receive the same pay and allowances as are authorized for persons of corresponding grade and length of service in the Regular Army. [sec. 14, act June 16, 1942 (56 stat. 359)].

12. Soldiers' Home Deductions. Deductions for the maintenance of the United States Soldiers' Home will be made from the pay of enlisted men of the Regular Army, but not from the pay of the National Guard, Army of the United States, or selective trainees inducted into Federal Service.

13. Reserve Officers' Training Corps. Members of the Reserve Officers' Training Corps shall be paid for attendance at advanced course camps at the rate prescribed for soldiers of the seventh grade of the regular army. [sec. 47c added to act June 3, 1916, by sec. 34, act June 4, 1920 (41 Stat. 779)].

14. Selectees. To men inducted for training and service, there shall be paid, allowed, and extended the same pay, allowances, pen-

sions, disability and death compensation, and other benefits as are provided by law in the case of other enlisted men of like grades and length of service. [sec. 3 (d), act September 16, 1940 (54 Stat. 886)].

15. Allowances for Quarters and Subsistence. Enlisted men not furnished quarters or rations in kind are entitled to an allowance for quarters and subsistence not exceeding \$5 per day.

Each enlisted man of the first, second, or third grade having a dependent shall be entitled to receive, for any period during which public quarters are not provided and available for his dependent, the monthly allowance for quarters authorized by law to be granted to each enlisted man not furnished quarters in kind. Such enlisted man shall continue to be entitled to this allowance although receiving the allowance provided in the first paragraph of this section if, by reasons of orders of competent authority, his dependent is prevented from dwelling with him.

Enlisted men entitled to receive allowances for quarters or subsistence shall continue while their permanent stations remain unchanged, to receive such allowances while sick in hospital or absent from their permanent duty stations in a pay status. Allowances for subsistence shall not accrue to such an enlisted man while he is in fact being subsisted at Government expense. [Sec. 10, act June 16, 1942 (52 Stat. 359)].

16. Pay of Retired Enlisted Men on Active Duty. Retired enlisted men shall, when on active duty, receive full pay and allowances. [Sec. 15, act June 16, 1942 (56 Stat. 359)].

17. Enlistment Allowance. An enlistment allowance equal to \$50, multiplied by the number of years served in the enlistment period from which he has been discharged, shall be paid to every honorably discharged enlisted man of the first three grades who reenlists within a period of 3 months from the date of his discharge, and an enlistment allowance of \$25, multiplied by the number of years served, to every honorably discharged enlisted man of the other grades who reenlists within a period of 3 months. [Sec. 10, act June 16, 1942 (56 Stat. 359)].

18. Saving clause. No person active or retired, shall suffer any reduction in any pay, allowance, or compensation to which he was entitled upon the effective date of this Act. [sec. 19, act June 16, 1942 (56 stat. 359)].

1. Allowances in this column are on the basis of a month of 30 days. For a month of greater or less number of days the amounts should be correspondingly increased or decreased.

2. Allowances fixed by the president: Suitable quarters in kind or in lieu thereof commutation of quarters at rate of \$6,500 per annum; necessary fuel and light for quarters in kind, or in lieu thereof commutation of fuel and light at rate of \$1,500 per annum. Order of the Secretary of War by direction of the President November 16, 1920.

3. Officers serving in the grade of lieutenant general shall be entitled while so serving to pay and allowances of a major general and to a personal money allowance of \$500 per year.

ARMY SERVICE COMMANDS

1. First service command includes the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island and Connecticut. Headquarters 808th Commonwealth Avenue, Boston, Mass.

2. Second Service Command—New Jersey, Delaware and New York. Headquarters, Governors Island, N. Y.

3. Third Service Command—Pennsylvania, Maryland, Virginia and District of Columbia. Headquarters, U. S. Post Office

and Court House, Baltimore, Md.

4. Fourth Service Command—North Carolina, South Carolina, Georgia, Florida, Alabama, Tennessee, Mississippi. Headquarters, Post Office Bldg., Atlanta, Georgia.

5. Fifth Service Command—Ohio, West Virginia, Indiana and Kentucky. Headquarters, Fort Hayes, Columbus, O.

6. Sixth Service Command—Illinois, Michigan, Wisconsin. Headquarters, Civic Opera Bldg., Chicago, Illinois.

7. Seventh Service Command—Missouri, Colorado, Kansas, Iowa, Nebraska, Minne-

sota, North Dakota, South Dakota, and Wyoming. Headquarters, New Federal Bldg., 15th and Dodge Sts., Omaha, Nebraska.

8. Eighth Service Command—Texas, Oklahoma, New Mexico, Louisiana and Arkansas. Headquarters, Santa Fe Bldg., Dallas, Texas.

9. Ninth Service Command—Washington, Oregon, Idaho, Montana, Utah, Nevada, California, and Arizona. The territory of Alaska is attached to the Ninth Service Command. Headquarters, Fort Douglas, Utah.

TOTAL	3,702

PAY AND REGULATIONS

Each midshipman receives \$780 annual pay, beginning at the date of his admission, and this amount is sufficient to meet all his expenses at the Academy. Each new midshipman is credited with \$250 and this, together with the \$100 cash deposit he pays on admission, is sufficient for uniforms, clothing and textbooks required before he enters upon his studies. This amount (\$250) is deducted from the midshipman's pay in monthly installments. Any midshipman may, however, immediately after entering, repay this amount in full from his own funds.

Every candidate for admission must sign articles (with consent of parent or guardian) by which he binds himself to service in the United States Navy during the pleasure of the President, or unless sooner discharged.

Approximately one month's leave of ab-

sence is granted annually in September to all midshipmen except those of the fourth class and those who are deficient academically or physically, or subject to disciplinary action.

The student body is organized into one regiment, subdivided into battalions, companies and platoons. This regiment is officered by midshipmen of the graduating class and is governed by comprehensive rules and regulations prescribed by the superintendent which the midshipmen officers carry out. In this way, midshipmen acquire qualities of leadership, including a sense of duty, subordination, judgment, tact, justice and loyalty. Each battalion and company is supervised by an experienced officer of the navy, selected as being especially fitted for this important duty. These officers live with the midshipmen, one or more being invariably present at every meal, formation, drill or extracurricular activity.

*These figures include appropriations for procurement of aircraft, gasoline and oil, and all other requirements for the technical operation of the Army Air Forces, including the pay of all civilians. Pay of military personnel, subsistence, and other administrative expenses common to the entire war department are contained in appropriations made to other services.

THE UNITED STATES MILITARY ACADEMY AT WEST POINT

Source: Information Pamphlet, 1945, The United States Military Academy, West Point, N. Y.

The United States Military Academy is an institution established by the government for the practical and theoretical training of young men for the country's military service. Cadets are given a comprehensive and general education of collegiate grade and sufficient basic military education and training to enable them to pursue careers as officers of the United States Army. Direction and supervision of the Military Academy are vested by law in the War Department.

Candidates for cadetship must be of sound moral character, must never have married, must be between the ages of 17 and 22, must be not less than five feet, six inches in height, and must be citizens of the United States. They must obtain appointment to an existing or prospective vacancy, and must pass physical and mental examinations.

Under an act of Congress approved June 3, 1942, the Corps of Cadets consists of 2,496 men, appointed as follows: eight from each state at large, a total of 384; four from each Congressional district, a total of 1740; four from each territory, (Hawaii and Alaska), a total of eight; six from the District of Columbia; four from the natives of Puerto Rico; two from the Panama Canal Zone; 172 from the United States at large; 180 from among the enlisted men of the Regular Army and of the National Guard, in number as nearly equal as practicable. Of the 172 selected from the United States at large, three are appointed upon the recommendation of the Vice President, 40 are selected from among the honor graduates of those educational institutions designated as "honor military schools," and 40 are chosen from among the sons of veterans who were killed in action or have died, or may hereafter die, of wounds received or disease

contracted in line of duty in World War 1.

In addition to the 2,496 mentioned above, the Secretary of War is authorized to permit not exceeding four Filipinos, to be designated by the President of the Commonwealth of the Philippine Islands, to receive instruction at the United States Military Academy.

All appointments are made by the President of the United States.

The selection of candidates, by competitive examination or otherwise, for appointment from any state at large or congressional district, is entirely in the hands of the Senator or Representative in Congress who has the vacancy at his disposal, and all applications for appointment from those sources should be addressed to the proper Senator or Representative.

For each vacancy from a state at large or congressional or territorial district, four candidates are nominated, one to be named as principal, one as first alternate, one as second alternate, and one as third alternate. The first alternate, if qualified, will be admitted in the event of failure of the principal, and so on.

During the time he remains at West Point, the cadet is paid \$780 per year and allowed the cost of one ration per day, which varies with the cost of food. Upon graduation he may be commissioned as a second lieutenant in one of the Army services. The academic year extends from September to May, inclusive, and the three summer months are devoted exclusively to military training. The normal course at the Academy is four years. During the war, however, the course was temporarily shortened to three years in accordance with an act of Congress approved October 1, 1942.

UNITED STATES NAVAL ACADEMY, ANNAPOLIS, MARYLAND

Source: United States Navy Department.

The United States Naval Academy at Annapolis, Md., was opened Oct. 10, 1845, and was called the Naval school. Before that time, midshipmen had received training in active service at sea and by occasional instruction at schools in the naval yards. George Bancroft, secretary of the Navy under President Polk, undertook to establish a naval training school without help from Congress. Fort Severn at Annapolis, Md., was transferred to the Navy from the War Department and became the seat of the new school, whose name was changed in 1850 to the United States Naval Academy. During the Civil War, midshipmen in training were moved to Newport and in 1865 were brought back to Annapolis.

The Academy now represents an investment to the government of about twenty-eight million dollars and its grounds contain 184 acres of land on which are located 140 buildings. There are, in addition, 22 acres in the hospital grounds, 151 acres on the rifle range across the Severn river, and 855 acres on dairy farms.

HOW CADETS ARE APPOINTED

According to statutory law passed Dec. 20, 1917, 3,702 Midshipmen are authorized to attend the Academy. Of this number, 480 are appointed by members of the United States Senate, who may each appoint five; 2,175 are appointed by members of the

United States House of Representatives—each of whom may appoint five; 10 are appointed by delegates in Congress, each of whom appoints five; in addition, the Governor of Puerto Rico may appoint one, the resident commissioner of Puerto Rico five, five more are appointed from the District of Columbia, and the President may appoint 25 annually. The Vice-President appoints five. One hundred are selected annually from enlisted servicemen, and one hundred from the Naval Reserve.

Forty more are selected from sons of veterans of World War 1, and 20 are selected annually from honor graduates of military schools and from the Naval R.O.T.C. One midshipman is also allowed from the Canal Zone.

Four Filipinos, one for each class, to be designated by the President of the Commonwealth of the Philippine Islands, are allowed to receive instruction at the Naval Academy but these midshipmen are not entitled to any commissioned office in the United States Navy by reason of their graduation from the Naval Academy.

Each candidate is required to be a citizen of the United States, and must be not less than 17 nor more than 21 years of age on April 1 of the calendar year in which he enters the Naval Academy. He must be unmarried, of good moral character, physically sound, well formed and of robust constitution. He must pass physical and mental examinations for entrance.

UNITED NATIONS RELIEF AND REHABILITATION

Source: UNRRA publications

Set up in 1943 as an organization of the United Nations to provide for aid and relief from suffering; food, clothing and shelter; and aid in the recovery of the health of the people in any area liberated by the armed forces of the United Nations. UNRRA (United Nations Relief and Rehabilitation Administration) is headed by Director General Herbert H. Lehman.

Administration headquarters are in Washington, D. C., and regional offices are located in London for the European area; in Sydney, Australia, for the southwest Pacific area; in Chungking for the China area, and in Cairo for the Middle East.

Each member nation whose territory has not been invaded is to contribute to the administration an amount equal to approximately one per cent of its national income for the year ending June 30, 1943. All nations contribute, in varying degrees, to the administrative expenses of the organization.

Not less than 10 per cent of the amount contributed is requested in the form of currency to be used in areas outside of the contributing country; the remaining portion is to be in the form of a credit in local currency, available for purchase of the contributing nation's supplies and services. Contributions are also accepted from neutral countries, private organizations and private citizens.

Nations included in the membership as of July 20, 1945, are:

Australia, Belgium, Bolivia, Brazil, Canada, Chile, China, Colombia, Costa Rica, Cuba, Czechoslovakia, Denmark, Dominican Republic, Ecuador, Egypt, El Salvador, Ethiopia, France, Greece, Guatemala, Haiti, Honduras, Iceland, India, Iran, Iraq, Liberia, Luxembourg, Mexico, Netherlands, New Zealand, Nicaragua, Norway, Panama, Paraguay, Peru, Philippine Commonwealth, Poland, San Marino, Union of South Africa, Union of Soviet Socialist Republics, United Kingdom, United States of America, Uruguay, Venezuela, Yugoslavia.

Supplies Distributed through June, 1945

Country	Estimated Value (Landed Cost)	Estimated Tonnage (Long Tons)
Czechoslovakia	\$ 28,600,000	76,743
Greece	132,400,000	786,138
Italy	13,400,000	76,630
Yugoslavia	47,900,000	199,001
Poland	33,400,000	88,938
UNRRA Camps—Middle East*	600,000	1,563
Total**	\$256,300,000	1,229,113

*) Does not include approximately \$10,000,000 worth of supplies procured directly from the military in the location of the camps.

**) Excludes small shipments of supplies under the Emergency Relief Program for Western Europe and initial shipments of medical supplies and seeds to China.

TENTATIVE DISTRIBUTION OF SUPPLIES July through December, 1945

Country	Estimated Value (Landed Cost)	Estimated Tonnage (Metric Tons)
Albania	\$ 19,000,000	91,000
Czechoslovakia	196,000,000	884,000
Greece	171,000,000	1,034,000
Italy	29,000,000	99,000
Yugoslavia	242,000,000	858,000
Poland	256,000,000	929,000
Total	\$913,000,000	3,895,000

Preliminary estimates of supply and shipping requirements for the second half of 1945 to six liberated European countries receiving UNRRA assistance totaled 3,895,000 gross metric tons valued at \$913,000,000. This figure is three times as large as the program through June of 1945, when supplies delivered or on their way had a total value of \$256,300,000.

¹The figures cover the cargo of the vessels that actually sailed (cleared) from their ports of loading. They do not include cargoes on ships which presented for loading (berthed) during the period but had not yet cleared.

²Includes shipments to UNRRA camps, shipments under the Emergency Relief Program for Western Europe, and shipments for Displaced Persons operations. Does not include supplies estimated to amount to \$10,000,000 taken over from the Military for UNRRA camps.

³Final figures are not yet available.

⁴Includes estimated shipments of coal, petroleum, oil and lubricants to Albania, Greece and Yugoslavia made by the Military since July 1945 and financed by UNRRA. Does not include shipments prior to 1 October of commodities from Cairo and Caserta.

⁵As of 8 November an additional 23,143 tons had been turned over to the following for shipment: Belgium, Luxembourg, Burma, Borneo, Malaya, Hongkong, Denmark, France, French Indo-China, the Netherlands, the Netherlands East Indies, Norway, and the Philippine Commonwealth; the Inter-Governmental Committee on Refugees; and various private relief agencies.

Total Administrative Contributions Allocated by Council 1943-45	\$9,500,000	\$7,143,750	\$16,643,750

DOMESTIC AFFAIRS OF THE UNITED STATES

CHRONOLOGY FOR 1945

JANUARY

Jan. 1—Forty-eight persons, most of them servicemen, were killed and 79 were seriously injured when the second section of the Southern Pacific railroad's Pacific Limited rammed into the rear of the first section 18 miles west of Ogden, U.

—Col. J. Monroe Johnson, ODT director, stated that unnecessary travel should be cut down. Travel rationing was not expected because of difficulties of administration.

Jan. 2—James F. Byrnes, director of war mobilization and reconversion, in his first report to President Roosevelt and Congress suggested legislation to increase the authority of the War Manpower commission. He also said Congress might have to consider new controls over the 4,000,000 men in 4-F; recommended widening War Labor board power so that it might enforce its decisions without resort to seizure of property.

His report advised increased unemployment benefits for workers temporarily out of work when the war ended and provision for adequate financial assistance in re-establishing small businesses closed down by the war.

—American civilians were expected to have less meat, butter, sugar and certain processed foods during the first three months of 1945 than at any time since the start of the war, but they would eat at least seven per cent more per person of food of all kinds than they averaged in the years 1935 to 1939, according to Paul S. Willis, president of the Grocery Manufacturers of America.

—The War Production board announced that restrictions on the use of metal for cans and closures for glass containers had been eased to permit use of steel. Virtually all restrictions on tin for packaging were retained.

—Rationing of children's knit underwear was forseen by executives of the underwear industry. Although production in 1944 showed a 47 per cent increase over 1943, shortages could not be explained by underwear executives or the war production board.

—James F. Byrnes, director of war mobilization and reconversion, stated that U. S. armed forces had increased 11,900,000 since 1940. Of these, 8,100,000 were in the army and the rest in the navy, marines and coast guard. The figure was a net estimate after deducting 1,500,000 discharged or killed.

—Two German agents, landed by a U-boat on the coast of Maine Nov. 29, 1944, were seized by the Federal Bureau of Investigation. William C. Colepaugh, alias William C. Caldwell, who attended Massachusetts Institute of Technology and served briefly in the U. S. Navy, was one. Erich Gimpel, alias Edward G. Green, 35, was the other.

Jan. 3—A federal official said that absenteeism—sometimes up to 30 per cent—from war plants was the chief reason for the Federal government's December, 1944, ban on racing effective Jan. 3. James F. Byrnes, war mobilization director, had said the order was to reduce the drain on manpower, transportation and communication facilities.

—By a 5-4 decision the Supreme court held that the conspiracy provisions of the Selective Service act included plots to evade military service. Seven offenses had been listed against the conspiracy clause of the act.

—The Supreme court held in the first test case of the issue that the federal Wage-Hour law included workers paid on a piece basis.

The case reached Supreme court on a government appeal from a ruling by the Federal court for Southern California in favor of the Perfect Garment company of Los Angeles.

—A roll call vote in the 79th Congress, registering 207 yeas and 186 nays, gave permanent tenure as a standing committee in the lower house to the Dies committee on Un-American activities.

—Chester Bowles, price administrator, assured the nation there was "not a chance in a million" that outstanding shoe stamps would be cancelled. A UP survey of retail shoe trade showed that scare buying of shoes began on the West coast Dec. 26, 1944, after the OPA voided food stamps valid prior to Dec. 1.

—Maj.-Gen. Lewis B. Hershey, selective service director, wired state directors to re-examine all deferred farm workers of 18 to 25 years for possible induction.

—The order of Dec. 23 closing race tracks went into effect Jan. 3.

Jan. 4—The Maritime commission's 1945 program called for construction of 13,000,000 deadweight tons of shipping with 9,000,000 tons of the total scheduled for completion in the first six months of 1945. Vice Admiral Emery S. Land (retired), war shipping administrator, said. In 1944, 16,343,436 tons of shipping were built.

—The Pepper subcommittee on health and education in an interim report proposed that health centers be set up in every community as part of an integrated system of local, district and metropolitan base hospitals. Supported by the U. S. Public Health service, the program would need federal grants in aid.

—The State department issued rules governing priorities for civilian passengers and non-military cargo going abroad. Priorities would be issued if the traffic were of "sufficient importance" to justify the travel and if air traffic could not reasonably be handled by a U. S. civil air carrier.

—In a letter to President Roosevelt, Henry A. Wallace, vice-president, said he desired to become Secretary of Commerce if that post should be open.

—The WPB and OPA promised a joint action program within 30 days designed "to put an end to price increases in the clothing field."

Jan. 5—J. A. Krug, WPB chairman, said the tire industry estimated it could produce 36,000 military type tires a day, although the WPB asked for an increase of 20,000 a day to make a yearly increase of 6,000,000.

—A government directive placing a 1945 ban on conventions or meetings involving unnecessary civilian railroad travel was expected. Travel companies, the army and navy offered cooperation in such a move to War Mobilization Director James F. Byrnes.

—Secretary of the Treasury Henry Morgenthau jr. announced that the Sixth War Loan drive exceeded the \$14,000,000,000 national quota by approximately 54 per cent, for a total of \$21,621,000,000. This represented the greatest surplus subscriptions of any U. S. war loan.

—A bill calling for construction of 5,000 municipal air ports and improvement of existing fields at a cost of \$650,000,000 was introduced in the House by Clarence F. Lea, chairman of the Interstate and Foreign Commerce committee.

—The Pepper subcommittee of the Senate urged a medical, surgical and educational program to remedy defects of men in 4-F and fit them for military duty or essential war work.

—Charging that the army had threatened its employees with the draft unless they obeyed commands, Montgomery Ward and Company in Chicago and six other cities filed answer to a government suit in the U. S. district court. The answer charged that both President Roosevelt's order and the seizure were unconstitutional, and that the government was seeking to force Ward executives into involuntary servitude.

Jan. 6—The War Production Board indicated that supplies of civilian goods in the market for the first three months of 1945 would be slim. Steel mills faced possible shortages of iron ore.

—The United States joined Britain, France and Poland in agreement that the functions of the International Office of Public Health in Paris would be performed by the UNRRA for a limited period under two sanitary conventions concerning maritime and aerial travel. The U. S. signature was "subject to ratification."

Jan. 7—Sen. Josiah W. Bailey, N. C., introduced a new Rivers and Harbors bill in Congress which called for post war construction of navigation, hydroelectric power and irrigation works at an approximate cost of \$500,000,000.

The U. S. refused to meet Russia's request to the U. S., Britain and Canada for certain heavy machine tools, presses and other equipment under the fourth lend-lease protocol. It was said these items would be more useful to Russia's post war plans.

—Post war development of a network of hydroelectric power lines throughout Texas, Oklahoma and Arkansas was discussed by officials of the Southwestern Power administration and the Department of the Interior.

The Electoral college ballot for the 1944 Presidential election showed that by a total of 432 to 99, Franklin D. Roosevelt and Harry S. Truman won against Republicans Thomas E. Dewey and John W. Bricker.

—In an affidavit for use in Federal district court, James F. Byrnes, war mobilization director, asserted that the conduct of Montgomery Ward and company "if allowed to continue will seriously interfere with the successful prosecution of the war."

—President Franklin D. Roosevelt in his message on the State of the Union to the 79th Congress called for enactment of a national service act and for compulsory military training of youth after the war.

He asked Congress to amend the Selective Service act immediately in advance of the national service action to make possible the drafting of nurses and to require the country's 4,000,000 4-F's to work or fight.

He called for a people's peace and warned against a third World War unless the United States lived up to its responsibilities abroad.

Other points made by the President were:

1. an attack on American perfectionists who refused to accept the world as it was and thus "obstruct the paths to international peace."

2. admission of "concern" over the Greek and Polish situations.

3. an assertion, in line with tentative legislative recommendations of the Murray subcommittee of the Senate, that it was the duty of the Federal government to see that employment at "close to 60,000,000 jobs" was maintained after

the war, while relying "as much as possible on private enterprise to provide jobs."

4. post war federal guarantees of opportunities and presumably credit to small business organizations.

5. a declaration that the TVA was a "bargain" and that there would have to be more similar regional developments; also that "thousands of airports" and an overhauling of "our entire national highway system" were needed.

6. a statement that federal, state and local housing cooperation would be needed to provide "a decent home for every family."

7. the need to lower taxes after the war to encourage enterprise while at the same time retire public debt in an "orderly" fashion.

8. a defense of American war leadership and equipment.

Jan. 8—Philip B. Fleming, federal works administrator, announced that the first \$500,000 of the \$1,500,000 authorized by Congress for road construction was apportioned among the states, the District of Columbia, Hawaii and Puerto Rico.

—The power of the President of the United States to seize private property faced a test in federal courts as the Montgomery Ward and company case opened in Chicago.

Jan. 9—The sixth regional War Labor board, Chicago, referred the American Federation of Musicians strike at radio station KSTP, Minneapolis, to the national board.

—The Supreme court upheld the Federal government's charge that seven glass container companies and 61 individuals conspired to restrain and monopolize trade in glassware.

—In a 5-4 decision the Supreme court upset a lower court order restraining the Western Union telegraph company from interstate commerce until for 30 days it had stopped using messengers under the age of 16 years and others between 16 and 18.

—Rep. Andrew J. May, House Foreign Affairs committee chairman, introduced a bill to draft nurses into the armed forces.

—The Department of Commerce reported that 1944 sales by chain stores and mail order houses of \$15,500,000,000 exceeded the 1943 total by about seven per cent. The volume represented about one quarter of the total U. S. retail business.

Jan. 10—Rep. Robert Ramspeck, D., Ga., proposed a program of federal aid for state school systems by which Congress would provide \$300,000,000 yearly outright grants to the states.

—Fred M. Vinson, director of economic stabilization, put a ceiling of \$18 a hundredweight on live cattle and increased subsidies to packers for paying the higher price. The program was to be enforced from Jan. 9 to July 12.

—The official flying time of the Army Air force's new Boeing C-97, which broke all records Jan. 9 from Seattle to Washington, was announced as six hours, three minutes and 50 seconds.

Jan. 11—President Roosevelt's "One Thousand Club" brought \$252,055 into Democratic party funds during the fourth term campaign, according to a report filed with the clerk of the House of Representatives.

—Increased numbers of new type warplanes were expected to be ordered Feb. 1 by the joint Army-Navy Aircraft committee.

—Sen. Arthur H. Vandenberg, R., Mich.,

proposed that the United States, Britain, Russia, France and China sign a treaty to keep Germany and Japan permanently demilitarized.

—Permission for Navy Nurse corps members to marry without resigning was announced by Vice Admiral Ross T. McIntire, surgeon general. The ban on accepting married nurses remained.

—Nisei owners recovering their West coast farm properties would have a hard time finding labor because of the reluctance of non-Japanese to work for them, delegates to an agriculture conference at San Francisco predicted.

Rear Admiral Richard E. Byrd, polar explorer, received the Legion of Merit award from President Roosevelt for "exceptionally meritorious conduct" in surveying Southwest Pacific islands Aug. 27 to Dec. 5, 1943 for naval aviation.

—A poll of 1,300 school superintendents by the National Education association showed that 85 per cent thought peacetime training of youth for future wars should be more extensive than in pre-war years. Forty-eight per cent favored a combination of military, camping and national service training.

—The Bureau of Labor Statistics' index of commodity prices on the primary market dropped 0.1 per cent during the first week of January, 1945 as a result of seasonally lower prices for eggs and citrus fruits and a drop in the price of steers.

—A nationwide blackout of ornamental and outdoor advertising lighting was ordered by James F. Byrnes, war mobilization director, who also called for a 68 degree maximum temperature for homes and public buildings. The move was to avert "an impending coal shortage."

Jan. 12—Rep. Edward J. Hart, New Jersey, was selected by the Committee on Committees to head the new permanent Committee on Un-American activities of the House.

—President Roosevelt issued an order outlining procedure for the military trial of Nazi saboteurs William C. Colepaugh and Erich Gimpel arrested Jan. 2 in Maine. The procedure resembled that established July, 1942, for the trial of eight Germans, six of whom were executed for crimes against the United States.

—War production schedules for 1945 established in October, 1944, were increased by about \$7,500,000,000 since that time, J. A. Krug, WPB chairman revealed.

—Secretary Stimson stated that Selective Service would increase its March, 1945, quota from 80,000 to 100,000, and that there would be "no escape" for virtually all qualified men under 30.

—The Reconstruction Finance corporation through its Metals Reserve company bought \$5,174,000,000 worth of strategic metals and minerals between 1940 and 1944, Jesse Jones, Secretary of Commerce and RFC head announced.

Jan. 13—Basil O'Connor, president of the National Foundation for Infantile Paralysis opened the 12th consecutive March of Dimes campaign in New York against the disease that attacked 19,000 in 1944. Goal was \$11,000,000.

—The State department announced that Secretary of State Edward R. Stettinius jr. would be the U. S. delegate to the Conference of American Republics on war and post war problems in Mexico City Feb. 15.

—Frederick B. Northrup, chief of the materials and facilities branch of the War

Food administration stated that production of farm machinery fell 20 to 25 per cent behind schedule in November, 1944 and that the December estimate would show a more serious lag.

—Secretary of Labor Francis Perkins in her annual report recommended a consolidation of federal labor functions after the war.

—A War Production board official stated that night baseball would not be affected by the order curtailing non-essential uses of electricity to save coal.

—The War Labor board closed about 362 voluntary and dispute cases affecting 24,000,000 employees and "hundreds of thousands" of employers from its establishment Jan. 12, 1942 until January, 1945, according to Theodore W. Kheel, executive director.

—Revision of the diet for the Women's Army corps, adjusting the menu to women's nutrition standards, was considered by the War department. It would save \$2,700,000 a year.

—An air crew lunch, designed to help army fliers go 5,000 feet higher was described at the Quartermaster depot, Chicago. The lunch consisted of a 4-ounce package of fudge, gum, chocolate drops, fondant creams, licorice drops and peanuts.

Jan. 14—A nationwide public health campaign designed to aid discharged service men was inaugurated the week of Jan. 14 by the American Legion Medical Advisory board.

—Sen. Tom Connally, Foreign Relations committee chairman, proposed that the United Nations speed the handling of world political questions by creating a provisional council for such matters.

—Sen. Burton K. Wheeler, Dem., Mont., clashed with Sen. Claude Pepper, Dem., Fla., in a Senate debate on the future relations among the United States, Russia and Britain.

Mr. Wheeler condemned the policy of unconditional surrender as "asinine," charged Russia with bad faith and described Dumbarton Oaks proposals as "a plan to underwrite tyranny."

Mr. Pepper said Mr. Wheeler was using tactics which would weaken President Roosevelt's position in the coming Big Three meeting.

Jan. 15—James F. Byrnes, war mobilization director, conferred with Maj-Gen. Lewis B. Hershey, selective service director, regarding application of a priority system for inductees from war industry into the armed services. More than 200,000 men of the 26-29 age group were scheduled to be drafted in the first six months of 1945.

—The Federal Communications commission announced proposed wave length allocations for every phase of high frequency broadcasting.

—Maj. Lawrence F. Daley, army general manager, said in an affidavit filed in Federal court, Chicago, that Montgomery Ward and company was unable to keep up with its work under army operations.

—The War Production board expected new construction throughout the U. S. in 1945 to hit a 10-year low of \$3,250,000,000, or 82 per cent of the 1944 level, the lowest since 1935. Almost half the estimated total would be privately financed.

—J. A. Krug, WPB chairman, ordered lights out for the country's show windows and theater marquees Feb. 1.

Jan. 16—President Roosevelt said baseball would continue if it would not hurt employment of people in the war effort or the building of the army and navy.

—Ninety thousand miners would work two 7-day weeks during January and February in several Southern Appalachian districts to alleviate the coal shortage, United Mine Workers officials said. The additional output for the two days would be 1,250,000 tons.

—A Montgomery Ward and company brief filed in Federal district court, Chicago, charged that if the seizure of property by the Army on Presidential orders were upheld, the only supreme law in the U. S. was the will of the president.

—America spent more than \$7,000,000,000 for alcoholic beverages, or about \$54 per person during 1944, according to estimates by the Department of Commerce. This was an 18 per cent increase over the 1943 expenditures.

—The OPA in a broad cost of living order imposed a highest price line limitation and a cost-plus markup provision over manufacturers' sales of several types of women's and children's underwear, night wear and lounging garments. The order aimed to press maximum prices back to the 1942 level.

—Except for a little borrowing in November and December, U. S. municipalities generally continued in 1944 to reduce debts and avoid bond issues, the Municipal Finance Officers' association reported in Chicago.

Jan. 17—J. A. Krug, WPB chairman, revealed that the 1945 aircraft program had been expanded from a goal of 76,000 set up in October to 82,250 planes.

—President Roosevelt called on Congress for prompt action on a work-or-fight bill for men between 18 and 45. His appeal was to Chairman Andrew J. May of the House Military Affairs committee and was accompanied by a joint letter from Gen. George C. Marshall and Admiral Ernest J. King.

—Leon Le Roy, 18, Seaman First Class, stated in Antioch, Calif., that an army sergeant, a Seabee and he were bumped off an army plane in Memphis to make room for "Blaze," Col. Elliott Roosevelt's English bull mastiff consigned to Mrs. Elliott Roosevelt, known as screen actress Faye Emerson, in Los Angeles. The dog had an "A" priority rating.

—Sewell L. Avery, chairman of Montgomery Ward and company, wired President Roosevelt to order the Army to withhold imposing maintenance of membership provisions of Ward employees until the court decided the legality of the property seizure.

—Nearly 400 residents of Placer county, Calif., petitioned to boycott returning Nisei and "persons who do business with the Japanese," according to Charles DeCosta, commander of the Marine corps league of Placer county.

—The War Food administration announced lend-lease shipments of food and other agricultural products to the Allies in 1944 totaled 7,272,000,000 pounds, a reduction of 4,216,000,000 pounds delivered in 1943.

Jan. 18—The White House said that the shipment of Col. Elliott Roosevelt's dog, which caused three servicemen to be put off at Memphis, was "a most regrettable combination of errors."

—Final official tabulation of the November, 1944, national election returns showed that 48,025,684 voted for President, 45,103,023 voted for Representatives and 34,973,613 voted for Senators.

—War expenditures in 1944 totaled \$91,174,000,000, an increase of 7.1 per cent over 1943, the WPB reported.

—U. S. Army casualties in Western Europe in December, 1944, totaled 74,788,

including 10,419 killed, 43,554 wounded and 20,815 missing.

—J. Edgar Hoover, FBI director, said that bank robberies increased during 1944 for the first time in 12 years.

Jan. 19—Officials of the Air Transport command said that in future no pets would be carried on government airplanes.

—A government official said the army and navy had lent 16,000 men capable of combat duty to fill labor gaps in war production.

—The War Production board increased the amount of lead for use in specified types of industrial batteries. Civilian types would undergo further cuts in the use of the metal.

—U. S. Army hospitals received 30-32,000 patients monthly from overseas in the last half of 1944 as compared to 8,500 a month during the first half, Maj.-Gen. Norman Kirk, army surgeon general stated.

—An increase in beef subsidy payments to \$1.95 and \$2.00 hundredweight on live cattle was announced by Jesse Jones, Secretary of Commerce.

Jan. 20—Franklin D. Roosevelt took the oath of President of the United States from Chief Justice Harlan F. Stone at Washington. He became the first fourth-term president. He pledged victory for the Allies and "a durable peace" in his inaugural address. Harry S. Truman was inducted as Vice-President by Henry A. Wallace, retiring vice-president.

—The War Labor board upheld its Philadelphia regional board's directive ordering Montgomery Ward and company to grant maintenance of membership in stores at Trenton, N. J., and Washington, Pa.

—The estate of William Hale "Big Bill" Thompson was estimated in an inheritance tax return filed at Cook county court, Chicago, at \$2,103,024. Two hundred fifty thousand of this went to Ethabelle Green, who claimed half of the estate as his "foster daughter."

—Limited supplies of small caliber ammunition for ranchers, farmers and law enforcement agencies were made available by the War Production board. All stocks of other civilian ammunition were frozen.

—The War department announced construction of new type refrigeration barges capable of making 10 gallons of ice cream every seven minutes for forces in the Southwest Pacific.

—It was indicated in a New York Times survey that the cigarette shortage in the U. S. would continue. The 1,250,000 retail tobacco outlets had difficulty keeping 38,000,000 civilian smokers supplied. Of the estimated 330,000,000 cigarettes expected in 1945, about 39 per cent would go to the armed forces, two per cent to export trade, and 59 per cent to the domestic market. It was said this would allow 15 cigarettes a day to each civilian smoker.

—Vigilantes tried to burn and dynamite the Placer county, Calif., fruit ranch of a relocated Nisei.

Jan. 21—President Roosevelt cleared the way to make Henry A. Wallace his fourth-term Secretary of Commerce, replacing Jesse Jones.

—The CIO called on the 44 state legislatures that would meet in 1945 to enact laws for more liberal employment insurance, stricter child labor regulation, fair employment practices committees and stronger employment services.

—Farmers were selling cash corn freely despite the fact that the government was in the market for 50,000,000 bushels for stock

ple purposes, it was reported in Chicago.

—A draft of essentials for state adoption laws and procedures, which would curb the baby-broker business, was issued by the U. S. Children's bureau.

—The navy announced development of a search plane, called the Privateer or PB4Y-2, capable of staying aloft over 20 hours.

—A world free press, world wide communications and facilities for correspondents to do their work anywhere were necessary to an enduring peace, Kent Cooper, AP executive director, said in an address at Temple Emanuel, New York.

Jan. 22—The Social Security board urged Congress to adopt a broad post war security program embodying these measures:

1. extension of unemployment insurance to 20,000,000 not included.
2. medical and disability insurance.
3. expansion of the Old Age and Survivors' insurance program to include 25,000,000 additional employees and self-employed persons.

—Maj.-Gen. Joseph W. Byron, army control head at Montgomery Ward and company properties, Chicago, submitted conditions of employment to Local 20 of the CIO United Retail Wholesale and Department Store Employees Union.

—Disabled veterans under current law had to pay for hospitalization through decreased disability allowances, while those without disabilities received free hospitalization, the House Committee on World War Veterans Legislation disclosed.

—James B. Conant, Harvard university president, urged revision of the GI Bill of Rights to assure government-paid professional training for veterans of exceptional ability.

—Rep. Edith N. Rogers, R., Mass., introduced a bill in the House to draft nurses into the armed services. It would assure them the rank of second lieutenant in the army or of ensign in the Navy Nurse corps.

—A 5-point percentage reduction in anthracite coal quotas for dealers in February and March was ordered in an effort to redistribute the available supply equitably, the Solid Fuels administration disclosed.

Jan. 23—The Senate Military Affairs committee voted to assign a subcommittee to inquire into practices which have grown from air travel priority rating systems.

—J. A. Krug, WPB chairman, and Chester Bowles, price administrator, jointly issued a clothing program designed to cut prices 6 to 7 per cent and to forestall an expected price rise of 15 per cent. It would save consumers about \$500,000,000 a year.

Jan. 24—Columbus, O., went on short water rations as drouth conditions forced closing of the \$30,000,000 Curtiss-Wright warplane plant and schools and threatened operation of industries and business establishments. Cause was attributed to the shortage of rainfall in the last half of 1944.

—The House Military Affairs committee by a vote of 20-5 approved the May-Bailey "Limited National Service" bill for men 18 to 45 after eliminating an anti-closed shop amendment. The bill provided that registrants refusing to obtain or remain in essential war jobs would be subject to fines up to \$10,000 or five years in prison.

—Seven men, including two stewards on a troop transport, were arrested in San Francisco as the FBI took steps to curb black market operations in meat destined for the armed forces overseas.

—Jesse Jones, retiring Secretary of Com-

merce, told the Senate Commerce committee he did not regard Henry A. Wallace qualified to handle the financial duties of the federal lending agencies which were part of the Commerce department.

—Secretary of the Navy James Forrestal and Undersecretary Ralph Bard indicated that a Senate investigating committee's accusations of loafing on the job, absenteeism and waste of manpower at Norfolk and other navy yards were partly true. However, they stated that Sen. James W. Mead, D., N. Y., who made the accusations, based his claims on such portions of the report by the Industrial Survey board of the navy as "naturally best suited to his purposes."

Jan. 25—Gen. Joseph W. Stillwell was assigned Commander of Army Ground forces by Secretary of War Henry L. Stimson.

—Maj.-Gen. George F. Lull, USA deputy surgeon general, said the Army Nurse corps needed 8,000 additional members.

—The Senate Military Affairs committee decided to separate studies on possible promotion of Col. Elliot Roosevelt to brigadier general from the air travels of his dog, "Blaze."

—The American Federation of Labor's three organizations in the Western Union system won collective bargaining elections in virtually all of the United States, leaving the CIO in control only in the New York metropolitan area.

—The WPB said it would restrict army and navy munitions procurements on Feb. 1 to prevent piling up new war contracts in areas already suffering from a manpower shortage.

—John S. Clark, Cook county assessor, declared Harold L. Ickes, Secretary of the Interior, obtained tax reductions of \$8,548 for 1943 and 1944 on a Loop building in Chicago which he owned. He filed an affidavit on building rentals which Mr. Clark called "erroneous."

—Russia asked the U. S. for \$6,000,000,000 in long-term credits to help reconstruct that country after the war.

Jan. 26—Three U. S. scientists, Dr. Vannevar Bush, director of the Office of Scientific Research and Development, Dr. J. O. Hunsaker, chairman of the National Advisory committee for Aeronautics, and Dr. Karl I. Compton, president of Massachusetts Institute of Technology, said that if war struck again the United States must be prepared or perish.

They urged the establishment of a Research Board for National Security before the House Committee on Post-War Military Policy.

Dr. Bush commented that "the speed and surprise with which great damage could be done at Pearl Harbor is only a mild warning of what might happen in the future."

—The New York Yankees, the most wealthy baseball organization, was sold for \$2,800,000 to a syndicate comprised of Col. Larry S. MacPhail, former president of the Dodgers; Capt. Daniel R. Topping, tin plate magnate; and Del E. Webb, millionaire head of an oil construction company in Phoenix, Ariz.

Jan. 27—Henry J. Kaiser, shipbuilder, was appointed by President Roosevelt to head a nation wide campaign in April by the UNRRA and 60 volunteer relief agencies to collect 150,000,000 pounds of clothing for persons in war devastated regions.

—The OWI said war dogs would no longer be used to detect wooden and plastic mines because better detection methods had been perfected.

—The WPB ordered a halt in the making or delivering of machinery for use in the return by industry to production of civilian goods.

—Gloria Vanderbilt di Cicco, heiress to \$4,500,000 when she would become 21 on Feb. 20, broke up her marriage of three years to Pasquale di Cicco, actor's agent, and made plans for a legal separation.

—President Roosevelt's seizure of Montgomery Ward and company properties in Chicago and six other cities because of a CIO labor dispute was held unconstitutional by Judge Philip L. Sullivan, Federal district court, Chicago.

Jan. 28—The OPA formally established price ceilings of \$17.25 to \$18.60 hundred-weight on live cattle, effective Jan. 29, in a twin drive to eliminate black markets and to end the price squeeze on wholesale and retail dealers.

—The government speeded an appeal from Judge Philip L. Sullivan's Federal district court ruling that President Roosevelt's seizure of Montgomery Ward property was unconstitutional.

—The army's jet-propulsion planes underwent arctic tests in Alaska.

—Mayor LaGuardia's program for meatless Tuesdays and Fridays went into effect in New York.

—A Selective Service survey stated that 40.3 per cent of men called at the age of 28 were rejected as physically unfit.

Jan. 29—The Supreme court upheld the authority of the Securities and Exchange commission to approve liquidation programs of holding companies where holders of common stock were allowed to participate in assets before total obligations of preferred stockholders were satisfied.

—The WPB increased its production quota for domestic ice refrigerators for the first quarter of 1945 to 75,000.

—A complete reshuffling or nurse availability lists seemed likely following the order of the Surgeon General of the Army to Surgeons of the Service Commands taking civilian priorities off registered nurses.

—Edward Corsi, New York State Industrial commissioner said the average woman worker living as a member of a family group required \$1,643.53 a year, 2.7 per cent more than in 1944, to maintain an adequate standard of living. The figure was based on an annual cost of living survey completed by the Division of Women, Child Labor and Minimum Wage, of the Department of Labor.

—Shipment of potatoes except by permit to other than government agencies would be banned as of Jan. 31 in Arrostook county, Maine, which produces 90 percent of that state's crop, the War Food administration announced. The action was taken to facilitate an "uninterrupted procurement" of good quality potatoes for the armed forces.

Jan. 30—Americans honored the 63rd birthday of Franklin D. Roosevelt at benefit parties for the National Foundation for Infantile Paralysis.

—A shortage of farm machinery, in addition to labor scarcity, would hamper farmers' efforts to repeat the 1944 food production according to OWI.

—The OPA provided in a special ruling that manufacturers of special garments purchased by the government for distribution in liberated European countries would not be confined to the "highest price line limitation" applying to other sales.

—Secretary of War Henry L. Stimson told

Congress that meager use of the Federal ballot by servicemen overseas in the November, 1944, election raised the question of whether it was "of sufficient utility to justify its continuance as a voting procedure in time of war." Twenty states authorized use of the Federal ballot in the election.

—Col. Elliott Roosevelt was approved with 27 others by the Senate Military Affairs committee for promotion to brigadier general.

—Dr. Isaiah Bowman, president of Johns Hopkins university, said that post war courses in citizenship should offset military training.

—The WPB reported expansion of three additional tire plants as part of the government's \$70,000,000 program to boost military tire output 25 per cent.

—Twelve university presidents asked President Roosevelt to delay consideration of the "highly controversial question of universal post war military training at least until complete victory over Germany is achieved."

Those who signed were: Oliver C. Carmichael, Vanderbilt; James B. Conant, Harvard; Edmund E. Day, Cornell; Harold W. Dodds, Princeton; Rufus C. Harris, Tulane; Robert M. Hutchins, Chicago; Frederick A. Middlebush, Missouri; Dean W. Malott, chancellor, University of Kansas; Robert G. Sproul, California; Donald B. Tressider, Stanford; Herman B. Wells, Indiana; Henry M. Wriston, Brown.

—Gov. Thomas E. Dewey of New York proclaimed a state-wide emergency affecting transportation and delivery of fuel and feed for livestock and appointed Charles H. Sells, superintendent of public works, as Emergency Director of Transportation. The emergency was caused by unusual snowfall and cold weather.

Jan. 31—William C. Smith, assistant executive secretary of the National Council of Catholic Men, said pictures of some pin-up girls for servicemen overseas provided "an indecent picture before their dying gaze."

—The Georgia House of Representatives voted to repeal the states' \$1 poll tax as a prerequisite for voting.

—The War department announced establishment of an agreement with Canada for the disposition of movable and immovable defense facilities established in the Dominion by the U. S.

—Recommendations that the WLB require 12 large corporations to set up procedures whereby foremen and other supervisory employees could be represented by a committee in the presentation of grievances was made to the War Labor Board.

—Five Brooklyn college basketball players admitted they had accepted an initial \$1,000 of a promised \$3,000 bribe from two professional gamblers to lose a game with a University of Akron team in Boston Jan. 31.

FEBRUARY

Feb. 1—By a roll call vote of 246-165, the House passed and sent to the Senate the May-Bailey bill for "limited national service."

—A second embargo on civilian freight shipments, effective Feb. 1 to Feb. 4, was ordered by the Association of American railroads because of blizzards in the Northeastern states.

—Ten recommendations for the improvement of Congressional organization, based on a 4-year study by ten wellknown political scientists were announced by the American Political Science association.

Criticisms of Congress were: too great a load of local and private matters; insufficient technical advice and secretarial service; too many committees; inadequate liaison with the executive branch; lack of facilities to revise administrative action; pressure from interest groups; need for redistribution of power in the House, and inadequate compensation.

Feb. 2—The Solid Fuels administration asked all Pennsylvania anthracite miners to work a full day Feb. 3 to help relieve the coal shortage.

—More than 4,500 anthracite miners of the Lehigh Navigation coal company turned down a Solid Fuels administration request to work a full day Feb. 3 because they did not want to set a precedent of working at regular pay on Saturday.

—The six New England governors told John L. Lewis, United Mine Workers head, that retail coal supplies in that region were "almost nonexistent" and appealed to miners to maintain maximum production.

—Republicans introduced broad amendments to the George bill designed to make sure than Henry A. Wallace, as head of the Department of Commerce, should not receive the direction of additional agencies or new functions from President Roosevelt.

—The War Production board ordered the use of gas cut off completely for three days in amusement places in New York, Pennsylvania, Ohio, West Virginia, Kentucky, Maryland and the District of Columbia.

President Harry D. Gideonse ordered five youths who admitted accepting \$1,000 in bribes to throw a basketball game with the University of Akron expelled from Brooklyn college.

—Paul V. McNutt, War Manpower commission chairman, said that for the first time since November, 1943, war plant employment turned upward, with a net increase of 50,000 workers, in contrast with the steady drop of 100,000 a month in the preceding year.

Feb. 3—The coal situation in New York "could hardly be worse," Mayor La Guardia said. The city was expected to order closing of all amusement places heated by coal and to cut off steam service to others.

—The American Red Cross reported that Americans gave more than 11,000,000 pints of blood for overseas forces from 1941 to 1945.

The Commerce department stated that the national birth rate, which rose 30 per cent above the pre-war levels in 1942 was declining. The department's Census bureau reported 9,000,000 births from 1942 to the end of 1944.

—A dozen padlocked cases of archives documents, including Lincoln's Gettysburg address, were returned to Washington, D. C. They had been hidden at Fort Knox since Dec. 26, 1941.

—The Agriculture department listed scores of critical farm labor shortage areas as food officials warned that an early end of the European war would not ease a tightening food situation. Farmers would need at least 4,000,000 part time workers in 1945.

Feb. 5—Sixteen men died, 20 were missing and 120 were injured in a tanker explosion in Upper New York bay.

—The Supreme court in a 6-2 decision denied the right of the Treasury to instruct that only an official rate should be used in converting British pounds sterling into dollars for customs duty purposes, instead of the free or lower exchange rate, prescribed

by the New York Federal Reserve bank.

—Republican Senators delayed promotion of 78 colonels to the rank of brigadier general for a week's inquiry into the case of Col. Elliott Roosevelt.

—The liberation of Manila was hailed in official Washington circles with rejoicing over the prospect of full freedom for the people of the Philippines.

—The output of 4-engine superbombers rose 13 per cent in January and set a new monthly record, according to J. A. Krug, War Production board chairman.

—A \$3,218,808,000 independent offices supply bill was sent to the House by the Appropriations committee to finance more than a score of agencies and their subsidiaries for the 12 months starting July 1.

Feb. 6—Dr. Thomas Parran, surgeon general of the Public Health service, told the House Military affairs committee that all the professional nurses in America should be included in a Selective Service system.

—Lt.-Col. Anna Walker Wilson, War staff director for Supreme Allied headquarters, urged sending of 6,000 more Wac's to Europe.

—The House Banking and Currency committee unanimously reported the George bill to the House. Divorcing the federal lending agencies from the Commerce department, the measure had been passed by the Senate.

—The Treasury department said it wanted to put the public debt limit up from \$260,000,000,000 to \$300,000,000,000 before the start of the Seventh War loan.

Feb. 7—The War Food administration announced that all chicken and poultry canned on and after Feb. 14 would have to be turned over to the government to meet the military demand for 70,000,000 pounds.

—James C. Petrillo, president of the American Federation of Musicians, was charged with putting the National Music camp at Interlochen on the union's "unfair" list, by Dr. Joseph E. Maddy, director of the camp.

Feb. 8—Faced with shorter supplies of raw materials, the War Food administration ordered manufacturers to reduce production of soap for civilian use.

—Petroleum Administrator Harold L. Ickes declared the outlook for civilian supplies of gasoline and fuel oil was "one of extreme gravity," with supply and demand about balanced "on paper."

—The War Production board ordered four companies to increase their combined production of aluminum ingots to a total of 10,000,000 pounds a year.

—Dean Luther A. Weigle of Yale university Divinity school announced completion of a revised standard version of the Bible, the first authorized revision in half a century.

—The War Labor board agreed to set up stabilizing limits for disposing of "fringe" issues and to establish a policy to govern regional boards and itself on new or unusual issues which affected costs.

—About 80 per cent of the veterans now attending school under the G. I. Bill of Rights were at college, with 20 per cent enrolled in trade schools or junior classes, the Veterans' administration stated.

Feb. 9—A snow blizzard in New England killed 16 persons, crippled Boston, closed stores and schools and did several million dollars' worth of damage.

—The War Production board broadened its order for greater production of essential civilian clothing with a direction assuring a larger volume of textiles for specified garments and lengthening the list of fabric con-

structions that were to be set aside for completion of the program.

Feb. 10—Sen. Tom Connally, D., Tex.; Sen. Warren R. Austin, R., Vt., Rep. Sol Bloom, D., N. Y., and Rep. Edith N. Rogers, R., Mass., were named by the State department among a delegation to accompany Secretary of State Edward R. Stettinius jr. for the Interamerican Conference on Problems of War and Peace which was to open in Mexico City Feb. 21.

—Virtual abandonment of the big league baseball setup and replacement by an East-West alignment in order to save 2,000,000-000 passenger miles of transportation was discussed by baseball officials following a request from ODT Director Col. J. Monroe Johnson.

—The Senate Military Affairs committee made public a full account of the trip of "Blaze," Col. Elliott Roosevelt's bull mastiff, based on a report by Maj.-Gen. H. L. George, chief of the Air Transport command, who said, "A serious mistake was made and it cannot be justified."

—Government food officials predicted meats might virtually disappear from civilian markets by midsummer but supplies could be expected to reappear when fall marketings of livestock increased.

—Four American soldiers, Pvt. Carl H. Taylor, Ashland, O., Pvt. Bernard W. Tennessee, Richmond, Va., Pvt. Francis A. Walker, Elmira, N. Y., and Pvt. Ralph H. Keller, Chesterton, Md., issued themselves fake orders to get back to America from Europe, and then obtained blank discharge forms from the Pentagon building, Washington, to separate themselves from the army. They were being held by army officials.

—Fourteen colleges and universities addressed President Roosevelt in a letter urging prompt decision on the subject of post war military training "while we are still conscious of the realities of war."

Those who signed were: John G. Bowman, chancellor, University of Pittsburgh; Edwin Burdell, director, Cooper union; Robert C. Clothier, Rutgers; Karl T. Compton, Massachusetts Institute of Technology; Thomas E. Gates, board chairman, University of Pennsylvania; Ernest M. Hopkins, Dartmouth; Robert L. Johnson, Temple University; Stanley King, Amherst; William M. Lewis, Lafayette; Charles Seymour, Yale; Franklyn B. Snyder, Northwestern; John J. Tiger, University of Florida; Levering Tyson, Muhlenberg; Blake R. Van Leer, Georgia School of Technology.

Feb. 11—The Treasury department announced the original Series A government savings bonds, issued 1935, would start maturing March 1.

—The American Legion and OPA announced programs to help veterans get back to civilian occupations. The legion program, which would be carried out by its 20,000 local posts, aimed to stimulate post war planning in the sales, service and distribution fields for post war employment. The OPA, according to director Chester Bowles, would set up a veterans' relations advisor service in its 100 national and regional offices.

—The OPA revealed 4,400 violation of used car ceiling prices, following interviews with 21,000 used car buyers. The interview represented a sampling of one percent of the transactions in used cars during the first six months of the used car regulation.

—Establishment of a new board of civilian and military scientists to develop weapons for any future conflict was announced, to be

known as the Research Board for National Security.

Feb. 12—Federal taxes took \$42,125,986, 550 of the nation's wartime incomes or an increase of \$10,201,456,234 more than the total tax bill in recent years, the Internal Revenue bureau reported.

—The Department of Commerce stated that an unprecedented total of \$156,777,000,000 was reached during 1944 on income payments to individuals.

—The Department of Commerce announced a mark of \$7,450,000,000, the highest registered to date, was achieved in retail stores for Christmas, 1944, purchases.

—A House concurrent resolution to set up a joint bipartisan committee directed to recommend changes to simplify and streamline Congress was passed unanimously by the Senate.

—The Senate voted 53 to 11 to confirm the promotion of Col. Elliott Roosevelt and 77 other colonels to the rank of brigadier general.

—Rep. A. S. Mike Monroney, D., Okla., introduced a bill aimed at "make work" rules of labor or artificial restraints on production which were not related to wages, hours or health. The bill would amend the anti-trust laws under which the Justice department had attempted unsuccessfully to outlaw "make work" practices.

Feb. 13—Forty-three dead were counted from two tornadoes that hit western and central Alabama and Mississippi Feb. 12. More than 500 persons were injured.

—A land-based twin-engine Navy Air Transport service plane crashed into San Francisco bay killing all persons on board, 21 passengers and three members of the crew. The plane was bound for New York.

—The OPA approved an increase of \$1 per ton in ceiling prices for producers of pig iron in the only adjustment for this item since issuance of the first price schedule for pig iron on June 24, 1941.

—The shortage of cigarettes in the civilian market was "directly traceable" to the volume moving to the armed services and to the Allies, and increased military demands in 1945 were likely to reduce the domestic supply further, the Federal Trade commission reported.

—James F. Byrnes, director of war mobilization, renewed his call for enactment of a limited national service law to assure a full measure of ammunition and supplies on the front line.

—Secretary of State Edward R. Stettinius jr. was named head of the U. S. delegation to the San Francisco conference. The delegation was to include Cordell Hull, former secretary of state, who would act as senior advisor, four members of Congress and two civilians.

The latter would be Sen. Tom Connally, D., Tex., chairman of the Foreign Relations committee; Sen. Arthur H. Vandenberg, R., Mich., author of the resolution proposing an immediate agreement by the Allies for keeping Germany and Japan permanently demilitarized; Rep. Sol Bloom, D., N. Y., chairman of the House Foreign Affairs committee; Rep. Charles A. Eaton, R., N. J., ranking minority member of the House committee; Commander Harold Stassen, former governor of Minnesota and strong advocate of international collaboration for peace, and Dean Virginia Gildersleeve of Barnard college.

Feb. 14—The War Production board approved two additional special textile and ap-

parel programs calling for the production of 17,460,000 men's, boys' and infants' cold-weather garments by the end of the year.

—The American Association of University professors supported Dr. Homer P. Rainey, who had been dismissed from the presidency of the University of Texas and demanded the Regents to reinstate him.

—The federal government petitioned to the Supreme court to assume jurisdiction in the Montgomery Ward case.

—Secretary of War Henry L. Stimson appealed to Congress for a one year extension of lend-lease.

—Because of the increased intensity of the war in Europe and the Far East in January, the War department put 1945 procurement schedules up \$1,600,000,000 from the total set in January. Revised schedules called for an expenditure of \$36,800,000,000, representing an increase of 18.9 per cent of \$6,100,000,000 over 1944 deliveries to the army.

—William C. Colepaugh, 26, and Erich Gimpel, 35, Nazi spies, were condemned to death by hanging by a secret military trial commission on Governors island. They were landed in the U. S. by a U-boat Nov. 29, 1944, off the coast of Maine and captured in December.

—Donald M. Nelson, 56, former War Production board chairman, and Marguerite S. Coulbourne, 26, former George Washington university campus queen, were married in Washington, D. C.

Feb. 15—Splitting into two flaming sections, a B-29 Superfortress on an undisclosed mission crashed into Flushing Bay half a mile east of La Guardia field, New York. Five of the crew were lost.

—Secretary of War Henry L. Stimson disclosed that the Adrenes campaign and western front action in January cost American ground forces 61,962 men. In January there were 8,848 killed, 41,325 wounded and 11,789 missing.

—A bill introduced in both Houses asked Congressional approval of the Bretton Woods agreements reached by representatives of 44 nations in July, 1944. Provisions especially affecting the United States were:

1. The U. S. Stabilization fund and I. O. U.'s from the Treasury would be used instead of Congressional appropriations for the International Monetary bank and the proposed bank for Reconstruction and Development.
2. The Johnson act prohibiting private commercial loans to countries in default of World War I debts would be repealed in part.
3. Congress would have reserved powers, such as changing the gold value of the dollar, making loans to the fund or bank, or changing the United States quota in the fund.
4. The agreement would continue indefinitely the U. S. Treasury stabilization fund which would ordinarily expire under law on June 30, 1945.

—J. A. Krug, chairman of the War Production board, reported that the government's clothing regulation, M-388, designed to provide more clothing at lower prices, would be distributed by Feb. 17.

—Three employees of the Pennsylvania Department of Health were dismissed by the Civil Service commission on the ground that they violated the Hatch act. Dr. Alexander Stewart, secretary of health, Tom E. Williams, head of the Vital Statistics bureau, and Mrs. Sarah V. Robertson, employee, were charged with coercing em-

ployees into making contributions to the state Republican party funds.

Feb. 16—Stanley E. Hubbard, president of radio station KSTP, Minneapolis, gave in to demands of James C. Petrillo's American Federation of Musicians by agreeing to employ eight additional musicians at \$52 a week each.

—By a vote of 399-2, the House passed the George bill separating lending agencies from the Commerce department.

Feb. 17—The National Labor Relations board was increasingly being called upon to act as judge rather than prosecutor, Chairman Henry A. Mills said. He reported that the proportion of unfair labor practice cases in relation to election cases continued to fall.

—In his annual report to President Roosevelt, Secretary of the Interior Harold I. Ickes hailed public ownership of utilities on a regional basis.

—The numbers of units of the Naval Reserve Officers' Training corps in colleges and universities would be increased as a result of a bill signed by President Roosevelt to aid the navy in obtaining an adequate number of reserve officers for the fleet.

Feb. 18—Rep. Earl Wilson, R., Ind., declared that tardiness, coffee hours and over-long lunch periods were causing a 40 per cent loss of manpower among government workers.

—President Roosevelt directed the War department to seize the strike bound American Enka corporation at Enka, N. C., to insure production of textile materials for heavy duty tires.

—Secretary of War Henry L. Stimson denounced Senate delay in acting on the National Service bill and called absence of legislation to keep men at their wartime jobs "a failure of American democracy."

Feb. 19—Organized black markets in meat and sugar were appearing in dangerous proportions, the OWI said after a survey by the Secret Service, OPA and the Alcohol Tax unit of the Treasury.

—The Army relinquished control of two important departments of Montgomery Ward and company properties in Chicago.

—Director of War Mobilization and Reconversion James F. Byrnes announced a nationwide midnight curfew on places of entertainment effective Feb. 12. "Places of entertainment" were defined as night clubs, sport arenas, theatres, dance halls, road houses, saloons, bars or other similar enterprises, whether public or private, excluding restaurants exclusively engaged in serving food.

Purpose of the request was primarily to save coal and electricity. It would also help the transportation and manpower situations in other ways, Mr. Byrnes said.

—The WPB and OPA directed that about 80 percent of all woolen fabrics and 75 per cent of rayon and other synthetic goods be used in manufacture of low and medium priced garments.

Feb. 20—The House Military Affairs committee approved 21-4 a bill to draft unmarried nurses in the age group 20 to 45.

—The War Labor board ordered a 55 cents an hour minimum wage for 50,000 Northern and Southern textile workers under its authority to correct substandard wage rates. The order provided for an increase of at least five cents an hour for all workers affected.

—The House Military Affairs committee shunted aside the May-Bailey bill for "limited national service" and voted 12-6 to consider a substitute which would continue

the War Manpower commission programs, supplemented by statutory controls, and keep all "labor draft" aspects out of worker mobilization and placement.

—The OPA authorized a premium allowance of half a cent a bushel for all No. 1 corn, effective Feb. 26. It would raise the ceiling price to \$1.16½ per bushel, Chicago basis.

—Mayor Roger D. Lapham of San Francisco appealed to the city's "friends" to stay out of town during the United Nations security conference opening April 25 in order to lessen overcrowding.

Feb. 21—The Senate Military Affairs committee adopted "compulsory" amendments to the "voluntary" manpower control measure for which it sidetracked the May-Bailey bill on limited national service.

—Although the Bill of Rights belongs to the people, the responsibility of maintaining it as a vital living document rests chiefly on the shoulders of the press, Byron Price, director of censorship, declared in a speech in Washington.

—The ODT requested a 25 per cent cut in baseball travel in 1945.

—The Swedish American liner "Grips-holm" brought 1,029 repatriates, including 463 disabled American soldiers to Jersey City from overseas.

Feb. 22—Rep. John Rankin, D., Miss., and Rep. Frank E. Hook, D., Mich., had a fist fight on the floor of the House of Representatives. Mr. Rankin said Mr. Hook had called him a "dirty liar" in the middle of one of the former's speeches.

—Increases in the mileage of routes for air transportation in the United States during 1944 were 8,435, according to a report by the Air Transport association of America.

—Mayor La Guardia of New York presented the Senate Appropriations committee a plea by the United States Council of Mayors for \$78,000,000 for local postwar planning of public works in the Independent Offices Appropriations bill.

—Public members of the War Labor board said in a report to President Roosevelt that wages on the average had outrun prices and that no change in the Little Steel formula was warranted.

—Secretary of War Henry L. Stimson told Congress that the Army's policy of accepting and commissioning communists was based on the loyalty of the individual involved.

Feb. 23—An American Airlines plane, flying from New York to Los Angeles, crashed into a mountainside near Cedar Springs, Va., killing 17 of the 22 persons in it.

—Rep. Howard W. Smith presented a resolution to Congress demanding that Rep. Frank E. Hook, D., Mich., be "severely censured" for his fistfight with Rep. John Rankin, D., Miss., Feb. 22.

—Joseph Medley, 43, alias J. H. Gardner, escaped Michigan convict, was linked with the almost identical deaths of two women whose bodies were found in hotel room bathtubs in Chicago and New Orleans eight weeks apart.

Feb. 24—Secretary of the Interior Harold L. Ickes announced that the government had returned to their owners 72 bituminous coal mines in West Virginia, Pennsylvania and Kentucky. The mines were seized in September to end labor disturbances.

—Officials of the War Relocation authority were greatly concerned over the situation in some communities which were exerting "an economic squeeze" to force Nisei to abandon their properties and not return to their former homes.

Feb. 25—Plans for creation of trade co-operating committees of growers and distributors of fresh fruits and vegetables in many areas of the country, for better price control, were announced by the OPA.

—Robert E. Hannegan, chairman of the Democratic national committee, announced that Jefferson dinners throughout the country on April 13 would supersede the party's traditional Jackson day dinners.

—Sen. Claude Pepper's Senate subcommittee on Wartime Health and Education reported that postwar national health facilities would be far from adequate to meet the needs of returning veterans.

—A contract for a post war fleet of 6-engined land based clippers, with a range of 4,200 miles and a capacity of 204 passengers and 15,300 pounds of baggage, mail and express was placed with the Consolidated Vultee corporation by Pan-American airways.

Feb. 26—The War Manpower commission appealed to physicians and hospitals to limit use of private duty nurses to patients acutely ill.

—Three days before the opening of negotiations for a new contract the United Mine Workers leadership filed formal notice under the War Labor Disputes act of a possible coal strike.

—The regional WLB ordered an immediate end to the Dodge strike in Detroit which made 15,800 workers idle and threatened to throw more than 100,000 out of work within a few days. The strike started Feb. 23 when the company discharged seven workers in the B-29 department for alleged failure to maintain production schedules and alleged loafing.

—The Senate Judiciary committee adopted a policy under which resolutions proposing an amendment to the Constitution should be laid aside for the duration of the war.

—The Supreme court held unanimously that a former stockholder of a national bank was liable for debts of the bank claimed long after the institution voluntarily liquidated.

—The power of the Wage-Hour administration to prohibit home work in embroidery so that a 40-cent minimum hourly wage could be maintained throughout the country was upheld by the Supreme court in a 7-2 decision.

—The Supreme court ruled that transportation of a woman within the limits of the District of Columbia for immoral purposes was illegal within the Mann act.

Feb. 27—The War Labor board authorized regional boards to permit the payment of a 55 cent hourly wage to eliminate sub-standards-of-living rates. The move would affect 4,006,000 workers.

—Secretary of the Interior Harold L. Ickes warned the country that it faced a possible soft coal deficit of 50,000,000 tons in 1945.

Feb. 28—President Roosevelt returned from the Yalta conference in "great" health, according to Jonathan Daniels, Presidential assistant.

—The Army's first jet-propelled combat plane, the P-80 Shooting Star, believed to be "the fastest fighter in existence," was announced by Gen. H. H. Arnold, Army Air forces chief.

—The Reconstruction Finance corporation stated the reported cost of saleable property declared surplus amounted to \$444,096,000.

—A lend-lease agreement was signed with France furnishing civilian goods for the war

and post war periods. Maximum amount stipulated in the civilian goods program was \$2,575,000,000.

—Telegraph and cable companies in San Francisco were preparing to handle a daily press file of up to 300,000 words during the United Nations security conference.

—John L. Lewis, president of the United Mine Workers of America, was prepared to lay before the soft coal industry demands for a new contract which some operators estimated would total \$1.15 to \$1.50 per day and cost 20 to 28 cents per ton.

—President Roosevelt signed the George bill divorcing federal lending agencies from the Department of Commerce and thus paved the way for confirmation by the Senate March 1 or 2 of Henry A. Wallace as Secretary of Commerce.

—Wage increases of \$2 to \$4 a week were awarded 21,250 employees in New York city, Washington, Louisville and Memphis by the War Labor board.

MARCH

March 1—John L. Lewis, president of United Mine Workers, asked soft coal operators to pay a royalty of seven cents a ton to the coal miners. He laid down 17 other demands for a new contract with leading operators calculated would cost "well over \$2" a day for each man, or more than 36 cents a ton.

—James F. Byrnes, director of war mobilization, turned down repeated requests by Mayor La Guardia for an extension of the midnight curfew for bars, night clubs and other places of amusement to 1 a.m. in New York City.

—Edward N. Scheiberling, national commander, said reports of communist infiltration into "positions of responsibility" in the armed forces of the United States had caused the American Legion to be "gravely concerned."

—The American Red Cross opened its annual drive for funds with a goal of \$200,000,000.

March 2—A general shutdown of 24 Chrysler corporation and Briggs manufacturing plants in Detroit, Chicago and Evansville, Ind., employing 126,000 persons, was forecast by corporation spokesmen. Strikes involved 34,125 and had already closed 10 factories.

—President Roosevelt's nomination of Aubrey W. Williams, former National Youth administrator, as head of the Rural Electrification administration was defeated 12-18 in the Senate Agriculture committee.

—Henry A. Wallace was sworn in as Secretary of Commerce by Supreme court Justice Hugo Black.

—Marriner Eccles, chairman of the Federal Reserve board, said that the entire stabilization program would be undermined if rising prices of homes, farms, business properties and stocks were not checked.

—Soft coal operators put the cost of United Mine Workers' contract demands at a minimum of \$400,000,000 a year, 65 cents a ton or about \$3.30 a day for each worker.

—The Senate voted into its proposed substitute for the May-Bailey limited national service bill instructions to local draft boards not to weigh a registrant's essentiality on the farm against a need for men in the armed services.

March 3—The Chrysler corporation and the president of a Detroit union, United Auto workers, CIO, agreed at a War Labor Board hearing on a basis to end the strike at the company's Detroit Dodge plant.

—Hiland G. Batcheller, WPB chief of operations, reported an increase of 46 per cent in the production of heavy duty truck tires from 1,217,000 turned out in October 1944, to 1,770,000 produced in February, 1945.

—The War Labor board refused to grant a blanket wage increase at 100 General Motors plants having 300,000 employees but granted an increase in the differential for third shift workers.

March 4—Fifteen persons, seven of them women, were arrested March 3 in a speak-easy in New York after curfew hours and arraigned on charges of disorderly conduct.

—The Division of Medical Sciences, National Research council, revealed it had been testing drugs against malaria on several hundred prison inmates who had volunteered as human guinea pigs.

March 5—The New York state Senate by a vote of 49-6 passed the Ives-Quinn bill setting up a 5-member commission to eliminate discrimination in employment on the grounds of race, creed, color or national origin.

—Fred M. Vinson, director of economic stabilization, was nominated by President Roosevelt as Federal Loan administrator to succeed Jesse H. Jones, former Secretary of Commerce.

—Leo T. Crowley, foreign economic administrator, pledged positively to the House Foreign Affairs committee that lend-lease would not be used "for the purposes of post war rehabilitation and reconstruction."

—Sen. Harry F. Byrd, D., Va., called on the Senate for a "real work or fight bill" for mobilizing and deploying manpower to meet shifting war production demands.

—The death sentence imposed on Henry Robinson, Jr., under the Lindbergh law, for the kidnapping of Mrs. Alice Speed Stoll, Louisville, Ky., in 1934, and holding her for \$50,000 ransom was upheld 7-2 in Supreme court.

—A 20-man committee of miners and soft coal operators began its discussions for a new wage contract by hearing John L. Lewis, UMW head, present his case for 10-cent per ton royalty contracts to his union members.

—Anti-trust convictions against seven major whisky distillers and 700 wholesalers and retailers in Colorado on the ground of price fixing were upheld unanimously in Supreme court.

March 6—The Senate confirmed President Roosevelt's nomination of Fred M. Vinson to be Federal Loan administrator.

—The Senate voted 44-35 to eliminate the fine-or-jail penalties from the impending Military Affairs committee's substitute for the May-Bailey limited national service bill.

—The War Production board gave highest coal priorities to war plants, railroads, utilities and hospitals in a new program.

—The War Production board made public a uniform procedure designated as the Production Adjustment program, for curtailment and termination of war contracts.

—Production of all types of planes fell 2.6 per cent below schedule in February, and the War Production board stressed the "magnified seriousness" of the failure of the aircraft program to meet actual military requirements during four consecutive months.

—The Interstate Commerce commission

found the Alleghany corporation's control of the Chesapeake and Ohio railroad, the New York, Chicago and St. Louis (Nickel Plate) railroad and the Pere Marquette railroad to be in violation of the 1940 Transportation act.

—The Navy department announced that Fleet Adm. Ernest J. King ordered construction of 84 extra fighting ships, in addition to the 288 on the construction program.

March 7—The Senate defeated 60-23 an attempt by Sen. Josiah W. Bailey, D., N. C., to convert the Revercomb-Robertson "voluntary" manpower bill into a "labor draft," and then voted 54-27 to kill the measure itself.

—President Roosevelt appointed William H. Davis, chairman of the War Labor board, to be Director of economic Stabilization succeeding Fred M. Vinson, new Federal Loan administrator and named Dr. George W. Taylor, WLB vice chairman to be Mr. Davis' successor.

—Secretary of the Treasury, Henry Morgenthau, Jr., called the monetary proposals of the Bretton Woods conference "the first practical test of our willingness to cooperate in the work of world reconstruction and stabilization" at opening hearings on the subject before the House Banking and Currency committee.

—The government checked production of tires in an effort to help output of carbon black and tire cord to "catch up with the outstanding performance" of the tire program.

March 8—The Senate passed 63-16 the "voluntary" O'Mahoney-Kilgore substitute for the May-Bailey limited national service bill, but attached to it fine-or-jail penalties for employers who wilfully violated War Manpower commission employment ceilings.

—President Roosevelt declared the voluntary system of mobilizing and deploying manpower was inadequate and repeated his January call for legislative authorization.

March 9—Three employees of the Commodity Credit corporation were separated from their jobs after a House investigation into speculation on the Chicago grain market based on allegedly inside information.

—The War Labor board announced award of night-shift premium pay, more liberal vacations and denial of general wage increases in the flat glass industry.

—Bureau of Census estimates indicated a shift of population away from the Atlantic seaboard and Northern states toward the South and far West. Population of the latter two areas rose nearly 4,000,000 between 1940 and 1944. Population of the North fell almost 3,000,000 in the same period.

—The regional office of the War Manpower commission, Chicago, ruled that the midnight curfew order did not apply to regularly scheduled league bowling competition that started prior to 10 p. m.

March 10—The OPA announced two actions to bring industrial use of meats, sugar, butter and canned goods in line with smaller civilian supplies:

1. Starting April 1, allotments of all rationed foods for most industrial users would be reduced.
2. Between March 16 and June 15, physical inventories of rationed foods and ration buying power in excess of adequate working inventories would be taken up.

—Members of the War Labor board who represented industry, and the Congress of Industrial Organizations issued clashing opinions concerning the recommendation by public members to President Roosevelt against a change in the Little Steel formula.

March 11—Mayor LaGuardia relaxed his meatless Tuesdays and Fridays program in New York, effective since Jan. 31. Eating places could serve liver, oxtails, tripe and sweetbread on Tuesdays and Fridays.

—James F. Brynes, director of war mobilization, announced establishment of an inter-agency committee to coordinate foreign shipments to "protect our domestic economy and help the war effort."

—Surplus transport planes, disposed of since December, 1944, would increase the country's airline capacity by about 1,750,000 plane trips a year, the Surplus Property board reported.

—The National War Labor board announced it had refused to accept jurisdiction of a dispute, involving 44,000 employees, at the Wright Aeronautical corporation, Paterson, N. J.

—War Manpower Commissioner Paul V. McNutt, disclosed that 44,000 disabled men and women were returned to employment in 1944, the first full year under the Federal-State joint rehabilitation program.

—The Rubber Reserve company estimated that the output of synthetic rubber would have to be increased 31 per cent in 1945 and 58 per cent in 1946 to meet essential military and civilian requirements.

March 12—The Army decreed that if civilians had to eat substitutes for meat, then prisoners of war both inside and outside the nation could do the same.

—Restaurant and hotel owners in New York charged that the midnight curfew, like the Volstead act, was promoting speakeasies.

March 13—Restaurant and hotel owners in New York charged that the midnight curfew, like the Volstead act, was promoting speakeasies.

—The appeal of the government for an early Supreme court review of the army seizure Dec. 28 of Montgomery Ward and company properties in seven cities was rejected because it was "made prior to the judgment of the Circuit Court of Appeals."

—The House Foreign Affairs committee agreed to a Republican-sponsored amendment to the Lend-Lease act specifying that it should not be used for "post war relief, rehabilitation or reconstruction."

—The worst meat shortage since the start of the war was cleaning out butchers' counters all in the nation, a United Press survey revealed.

—Federal aid for a post war civilian aviation program, which would provide for the employment of 400,000 persons eight or ten years after the war with Japan, was advocated by Henry A. Wallace, secretary of commerce.

—President Roosevelt asked Congress to appropriate \$23,719,153,000 for the Navy for the fiscal year 1946, a figure nearly \$5,000,000,000 short of the 1945 budget of \$28,500,000.

—President Roosevelt made it plain in a press conference that baseball play be continued in 1945.

—Chester Bowles, price administrator, proposed ceilings on admittance prices to movie houses which he said had risen 38½ per cent from June, 1941, prices. He also desired ceiling prices on stage shows, ath-

letic events and other amusements.

—The House voted 354 to 28 to extend the Lend-Lease act another year, with the restriction that the program should not be used for "post-war relief, rehabilitation or reconstruction."

—Legislation reducing to 25 per cent the minimum required gold reserve against Federal Reserve notes and deposits was approved by the Senate Banking committee.

—Fred M. Vinson, Federal Loan administrator, pledged his agencies to assist American post war business in providing full employment and attaining the goal of 60,000,000 jobs.

March 15—A Senate committee reported 1944 elections were the costliest in history with about \$25,000,000 contributed to political campaigns of which \$23,000,000 was spent.

—The Senate voted to free small business companies from the necessity of obtaining the Securities and Exchange commission's approval for stock issues up to \$300,000.

—It was learned in Washington the soft coal industry would offer the United Mine Workers a new two-year contract which would add \$1.69 to the basic weekly wage, plus night shift premium pay and a liberalized vacation plan. The industry rejected the 10 cents a ton royalty plan and 10 other UMW demands.

—Army Ground force casualties on the Western front from June 6, 1944 to March 1, 1945 totaled 425,007. Secretary of War Henry L. Stimson reported. Of the number, 34,468 were casualties during February, 1945.

Army losses from December 7, 1941, were listed at 748,457, including 145,733 killed, 450,766 wounded, 89,656 missing and 62,302 prisoners. Navy total from Pearl Harbor was 839,589, including 34,938 killed, 41,443 wounded, 10,483 missing, and 4,263 prisoners.

—Big league officials completed baseball's 1945 travel reduction plans by proposing cancellation of all pre-season exhibitions involving extra transportation.

March 16—Official announcement was made that the Marine corps had suffered 19,938 casualties in taking Iwo Island.

—Answering queries on the subject, the War department stated that U. S. citizens of Japanese ancestry were required in a Selective Service statement to forswear allegiance to the Japanese Emperor before they were taken into the U. S. Army.

March 17—Heavier drafting of men 30 and older from essential jobs was expected by Selective Service as it authorized deferment of 145,000 younger men in five vital war industries.

—The OWI announced the supply of meat for civilians from April to June would be 12 per cent less than the amount allocated for the first quarter of the year. It would represent the lowest point in 10 years.

—The War Labor board, in an order granting wage increases to 50,000 textile workers, lifted the stay which it imposed Feb. 20. The new order remained subject to action by the OPA and the Director of Economic Stabilization.

—The OPA reported the number of passenger tires available for rationing in March fell below 1,500,000 for the first time since May, 1944. As a result the April ration quota would be 37½ per cent below March with a tighter control over issuance of tire certificates beginning April 1.

—Dr. Martha M. Eliot, associated chief

of the Children's bureau, Department of Labor, said three quarters of a million wives and infants of service men had received care under the emergency maternity program authorized by Congress in 1942.

—The midnight curfew was eased by the War Manpower commission to let restaurateurs serve food past 12 o'clock to "essential" workers as well as war workers covered by a previous order.

—The San Francisco regional office of the War Relocation authority summarized 24 incidents, including cases of arson and physical attacks, since the Army and Supreme court had permitted Japanese evacuees to return to the West coast early in 1945.

March 18—Joseph D. Medley, escaped convict, sought for the slaying of two women in Washington and New Orleans, was seized in St. Louis, Mo.

—Mayor La Guardia extended the curfew in New York to 1 a. m.

—One hundred service men staged an impromptu 2 a. m. march in Times square, New York.

—The Pacific coast was being rapidly converted into a vast "hospital" area for the repair of ships, Rear Adm. E. L. Cochrane said in Washington, D. C.

—Severe and growing shortages of meat for civilians, bordering on a meat famine in many areas, were reflected in a nationwide survey of 713 meat packing companies by the American Meat Institute at the request of the OPA.

—Henry A. Wallace and 90 Congressmen signed up to take flying lessons. They had formed a Congressional Flying club.

March 19—The Committee for Economic Development, backed by 2,000 business firms, announced support of Bretton Woods legislation.

—Mayor La Guardia's 1 a. m. order, brought a disavowal from War Mobilization Director James F. Byrnes, who made it plain that his request for a midnight closing still stood, but that he lacked a police force to enforce it. Mayors of other cities condemned Mr. La Guardia and Councilman Hugh Quinn, New York, suggested he should be impeached for ordering the police to "violate the law."

—Attorney General Francis Biddle asked the Supreme court to reconsider its refusal to take immediate action in the Montgomery Ward case.

—Congress was asked by President Roosevelt to appropriate \$4,480,000 for preparation by the Interior department for development of the Missouri River authority.

March 20—President Roosevelt said that the question of penalizing workers who refused to take or remain on essential war jobs, as well as employers who violated employment ceilings established by the War Manpower commission, depended on the individual case.

—The American Legion condemned the OPA for framing regulations governing veterans, which it said would "let our veterans become potato-chip fryers or popcorn stand concessionaires" but put them in a position where "the doors to major economic opportunity" still were closed.

—The "U. S. S. Midway," heaviest, strongest and fastest carrier ever built, was launched at Newport News, Va.

March 21—The War Labor board ordered Hollywood film studio workers to end a strike which had curtailed motion picture

production for a week and a half.

—The War Manpower commission decided that baseball players might return to the game from off-season employment, such as war plant jobs.

—The Regional War Labor board, New York, denied the request of radio station WOV for an order reducing the quota of musicians to be hired according to its contract with Local 802, American Federation of Musicians.

March 22—More than \$3,000,000,000 had been saved for the United States in three years through recommendations of the Joint Congressional Economy committee headed by Sen. Harry F. Byrd, D., Va., according to a progress report to the President and Congress.

—President Roosevelt asked Congress for appropriations totaling \$1,120,453,300 to keep 19 civilian war agencies operating at their current levels through the year beginning July 1.

—Under-Secretary of War Robert P. Patterson gave 767,680 as the overall total of army casualties since Pearl Harbor. Navy casualties were listed at 91,907.

—The House Military Affairs committee approved unanimously and reported out a bill extending the Selective Service act of 1940 for another year from May 15 or to an earlier date if the war should end.

—Mayor La Guardia, in a nationwide broadcast, asserted that restaurants, hotels and licensed bars could remain open until 4 a. m.

—Cecil B. DeMille, who gave up a \$90,000-a-year radio salary rather than pay a \$1 union assessment, asked the California Supreme court to reinstate him.

March 23—The Senate rejected 52-36 President Roosevelt's nomination of Aubrey Williams as Rural Electrification administrator.

—The House passed unanimously and sent to the Senate a bill to extend the Selective Service act for one year beyond May 15.

—Output of all types of munitions in February appeared stalled at the \$4,800,000,000 level, where it was "bumping against a production ceiling," the War Production board said.

—J. A. Krug, WPB chairman and James F. Byrnes, war mobilization director, agreed on the following procedure to enforce the curfew:

1. War Manpower commission area directors would find a violation of the curfew.
2. The WMO would then impose manpower ceilings, depriving the violator of virtually all his employees.
3. If the violation continued, the WMO would certify non-compliance to the War Production board, which would decree sanctions.

March 24—Senate and House conferees on the manpower "draft" legislation agreed on a compromise which would give War Mobilization Director James F. Byrnes power to "freeze" labor "selectively" in any plan or area of the country.

—Price Administrator Chester Bowles appeared before the Senate Appropriations committee and won approval of a special \$565,000 fund to investigate the meat shortage.

—The State department's policy toward Germany and Japan was set forth in an NBC broadcast as unconditional surrender, punishment of war criminals and total disarmament of the enemy.

March 25—The OPA prepared a preferential list of occupations for use in rationing passenger tires. Tires were limited to four groups:

1. Persons whose occupations were of emergency nature.
2. Persons employed in essential war work.
3. Buyers and travelers for essential establishments.
4. Other persons eligible for Grade I passenger tires under former ratings, including holders of B and C cards.

—The Treasury opened the way for American creditors to collect debts from funds belonging to firms and individuals in France, Belgium, Greece, Finland, Poland, Estonia, Latvia and Lithuania.

—The Natural Resources department, U. S. Chamber of Commerce, proposed to the board of directors a lengthening of the work day as a means of meeting the threatened bituminous coal shortage.

March 26—The Senate agriculture committee opened an investigation into the food shortage in the United States.

—Authority for reductions of 50 per cent below the current tariff rates in reciprocal trade agreements were proposed to Congress by President Roosevelt, who requested renewal of the Trade Agreements act.

—President Roosevelt recommended to Congress that it approve the constitution of the United Nations Food and Agricultural organization and authorize active American participation.

—The War Production board authorized 17 manufacturers to produce a total of 74,000 domestic ice boxes in the second quarter of 1945. The output would be directed to meet both military and essential civilian needs.

—The War Production board ordered newspaper publishers to reduce by six per cent their April orders on all paper mills in Canada, the United States and Newfoundland.

March 27—The OPA tightened qualifications which car owners had to meet to be eligible for C cards and reduced the list of essential drivers to whom unlimited mileage was permitted.

—Low nutrition was a large factor in the rejection by Selective Service of 4,500,000 draftees, Maj.-Gen. Lewis B. Hershey, Selective Service director, told the House Agriculture committee on a bill for permanent school luncheons.

—An assertion that only Congressional approval of a single American flag air transport line overseas to meet foreign monopoly efforts could preserve America's dominant position in the air, was made by Juan T. Tripps, Pan American lines president, before the aviation subcommittee of the Senate Commerce committee. He approved in principle the bill of Sen. Patrick McCarran, D., Nev., authorizing the Civil Aeronautics board to establish such a line.

—The Senate confirmed nominations of nine army lieutenant generals to full generals, raising to 11 the number of 4-star generals on active duty, the largest number in U. S. history.

Those promoted to rank of major general were: Brehon B. Somervell, Joseph T. McNarney, Omar N. Bradley, Walter Krueger, Carl Spaatz. Those to hold permanent rank as brigadiers general were: George C. Kenny, Mark W. Clark, Jacob L. Devers and Thomas D. Handy.

March 28—Members of the United Mine Workers showed a trend of more than 5-1 in favor of authorizing a strike in the soft coal fields. When 64,882 votes had been tabulated of the expected 400,000, the count was 54,629 for and 10,253 against.

—Eric Johnson, president, U. S. Chamber of Commerce, William Green, AFL president, and Philip Murray, CIO president, signed a charter of labor principles for the post war period. Objectives laid out for management and labor were:

1. Encouragement of productive efficiency and technological advancement with a view to improving living standards.
2. Respect for the rights of private property and free choice of action.
3. Recognition of management's right to manage, free of unnecessary government interference or burdensome restrictions.
4. Recognition of the right to bargain collectively without hindrances.
5. Cooperation in protection of the individual against involuntary employment and the hazards of old age and physical impairments.
6. Increased foreign trade and assistance to other countries.
7. Establishment of an international security organization and a national business-labor committee for better understanding.

March 29—Despite a federal court ruling to the contrary, the Internal Revenue bureau declared oil companies might continue to deduct certain "intangible drilling expenses" for income tax purposes.

—John L. Lewis, president of the United Mine Workers, agreed to a compromise soft coal wage scale, suggested by Secretary of Labor Frances Perkins and calculated by some operators to mean an increase of \$1.61 a day in basic earnings or more than 30 cents a ton.

—The Army stated that 153,791 American soldiers had died in World War II up to March 1, and the Navy reported its dead at 35,750.

—The Senate Banking committee turned down the OPA proposal for price ceilings on movies, barber and beauty shops. It also refused to extend rent controls to business buildings.

—A miniature "FBI" was established within the War Food administration to help prevent speculation, profiteering and fraud in connection with WFA transactions and regulations affecting food and farm commodities.

March 30—The Treasury announced the only forms of American money to play a direct role in the war, the yellow seal and the Hawaiian dollar, were being retired as quickly as possible.

—Ten persons, including six former officials and employees of the OPA, were indicted by a federal grand jury in St. Paul, Minn., on charges of conspiracy to violate federal statutes by trying to engineer a monopoly in scrap tires.

—Output of electric irons for essential civilian needs might reach 500,000 in the second quarter of 1945 in spite of reduction of materials, the War Production board predicted.

March 31—The OPA asked the Emergency Court of Appeals at Washington to rescind its order invalidating the wholesale beef price ceilings on fresh-beef-only packers.

—The government's appeal from Federal

District Court Judge Philip L. Sullivan's decision Jan. 27 that President Roosevelt's order to seize Montgomery Ward and company properties was filed in the U. S. Circuit Court of Appeals.

APRIL

April 1—President John L. Lewis of United Mine Workers agreed to urge miners to keep the mines open for a 30-day extension of the current contract.

—Robert Merrill, 27, baritone, Brooklyn, and Thomas T. Hayward, tenor, Kansas City, won first awards in "The Metropolitan Opera Presents" auditions. Each received \$1,000 and a contract with the Metropolitan Opera association.

April 2—The Supreme court upheld Federal Power commission orders reducing gas rates by corporations supplying Colorado, Michigan and Wyoming. Reductions amounted to more than \$7,800,000.

—Eighteen meat and poultry leaders were jailed by the War Emergency court in New York for black market operations.

—The Securities and Exchange commission suspended for 10 days the firm of Kidder, Peabody and company, Philadelphia, from the National Association of Securities dealers, and Henry C. Clifford, partner in the New York firm, from the New York Stock exchange. Both were accused of manipulating the market in violation of the 1934 Securities and Exchange act.

—Secretary of the Treasury Henry Morgenthau jr., announced terms of Seventh War Loan securities.

—Declaring that V-E day was not far distant, James F. Byrnes resigned as War Mobilization director. President Roosevelt named Federal Loan Administrator Fred M. Vinson to fill the post.

—The Joe F. Carr trophy for the National Football league's most valuable player in 1944 went to Frank Sinkovich of the Detroit Lions.

April 3—By a vote of 46-29, the Senate rejected the compromise manpower control bill which has been urged by President Roosevelt.

—One thousand farmers and property owners of Virginia, West Virginia and the District of Columbia went to the Interior department to attack Army Board of Engineers proposals to build power and flood control projects on the Potomac river.

—Soft coal mining was shut down in many sections of the United States despite a 30-day UMW contract extension.

—Federal spending in March, not including government corporations, reached a new high of \$8,246,000,000, the Treasury reported.

—The Mississippi river spilled over its banks in Louisiana, forcing 10,000 persons to evacuate their homes.

—The State department went on record opposing unification of the overseas services of American communication companies. It favored continuation of regulated competition.

April 4—The Senate confirmed Fred M. Vinson unanimously to be Director of War Mobilization and Reconversion.

—The Navy call for draftees in May was scheduled to be about 16,000, half the number drafted in March or April, the Navy reported.

—Army service forces at Camp Shanks, N. Y., forbade further sale of six popular brands of cigarettes to captured Italians.

—Production of aircraft in March totaled 7,053 planes of all types, an increase of 12 per cent over February output, and three per cent above the assigned schedule.

—Charging "wholesale copyright infringement" on three of its motion pictures, the Harold Lloyd corporation filed three actions in federal court asking \$1,815,000 damages against Universal Pictures incorporated.

April 5—George Santayana, 82, author of "The Realm of Being," was awarded the Nicholas Murray Butler Gold Medal of Columbia university for the most distinguished contribution to philosophy or education from 1940-45.

—The Senate Food Investigating committee revealed that requirement estimates for liberated peoples were being made separately from three quarters and probably involved duplication.

—The Bureau of Labor Statistics said average commodity prices in March stood at an index of 105.1 per cent of the 1926 average.

—Navy all-star athletic teams in the United States were ordered broken up for morale purposes with more emphasis on games in battle areas.

—The War Production board prepared for an acute shortage of leather for civilian shoes by a program to assure greater output of shoe gabardine for the remainder of 1945.

—The War department announced production of a new model Thunderbolt plane, capable of flying more than 2,000 air miles, and said by air forces spokesmen to be the longest range fighter plane in the AAF.

April 6—Rear Adm. Emory S. Land, chairman of the U. S. Maritime commission, opposed the McCarran bill pending before the Senate to grant a single American flag airline, a monopoly of post war overseas air traffic.

—President Roosevelt named James J. Caffrey, New York SEC administrator, to Securities and Exchange headquarters in Philadelphia, to succeed Robert H. O'Brien, who resigned.

—Local 1227 of the CIO United Electrical Radio and Machine Workers of America, expelled six members guilty of slowing down production of 40-mm. navy shells at Matam corporation plant, Long Island city.

—Maj.-Gen. Lewis B. Hershey, selective service director, upheld the bureau's ruling that a veteran might return to his job if he applied 90 days after discharge.

—Federal District Attorney Don C. Miller asked the army to intervene in a jurisdictional dispute between the CIO workers and AFL teamsters in Cleveland, O. The strike had stopped gasoline deliveries from Standard Oil company for two days.

April 7—An additional 20,000 deferments for essential workers under 30 were authorized by the Inter-Agency committee of Selective Service, the War and Navy departments, the War Production board and the War Manpower commission.

—President Roosevelt called for continuance of price and wage controls in the transition period after the war to provide economic stabilization.

—Sixteen U. S. air lines had flown more than 2,500,000 passenger miles overseas for the army and navy from Dec. 7, 1941 to April, 1945, the Air Transport association revealed in Washington.

—The House Military Affairs committee

blamed "laxity, inefficiency and lack of safeguards" for the escape of 25 German war prisoners Dec. 24, 1944 from Papago Park prison camp, Arizona.

April 8—Col. Alfred E. House, Wichita, Kans., was appointed administrator of the Surplus Property board by Guy M. Gilette, chairman of the board.

—Secretary of War Henry L. Stimson approved of the move by Sen. Lister Hill, D., Ala., for a post war merger of the Army and Navy.

—Speaking for a committee of 25 experts in the fields, Mrs. Eugene Meyer, wife of the publisher of the Washington Post, urged a cabinet position to coordinate all education, health and welfare services into one agency.

—Byron Nelson, Toledo golfer, won the \$10,000 Iron Lung tournament in Atlanta, Ga., with a score of 263 for 72 holes. It was his eighth victory of the winter season.

April 9—Republicans led by Sen. Arthur H. Vandenberg, Mich., demanded that the Roosevelt administration give Congress a full statement of probable total financial post war commitments. The demand was made in debate to extend the Lend-Lease act another year.

The Supreme court ruled that Ohio may not place an ad valorem tax on hemp and other fibres imported from the Philippines and other countries and stored in original packages pending fabrication.

—Leaders of the automotive industry said they would "do everything in their power" to oppose the unionization of foremen and other supervisory employees, a move which had been approved by the NLRB.

April 10—The War department cancelled completion of 12 new tank plants.

—The Senate and the House unanimously passed and sent to the White house a bill to extend the Lend-Lease act for another year.

—The Senate Small Business committee denied that war agents favored formation of a Canadian War aluminum supply source while American sources were cut off.

—Just apportionment of State taxation of airlines under a formula based on property employed and business done in each state was recommended to Congress by the Civil Aeronautics board.

—Brig.-Gen. Frank T. Hines, administrator of veterans' affairs, appointed a committee of organized labor representatives to work with him on the problem of seniority for veterans returning to civilian positions.

—Secretary of War Henry L. Stimson said that every able-bodied U. S. soldier who had not seen overseas service was earmarked to go abroad as soon as he could be replaced by a returning veteran.

—Secretary of the Interior Harold L. Ickes seized 235 strike-crippled coal mines on orders from President Roosevelt.

—The OPA insisted before the Senate Food Investigating committee that there was a nationwide black market in meat. There had been no general breakdown of price and ration regulations, it said.

April 11—Soft coal operators and the United Mine Workers, after six weeks of negotiations, signed an agreement providing increases in basic earnings estimated by the operators at an average of \$1.25 to \$1.30 per day for a six-week period. Operators believed it would increase coal costs about 25 cents a ton.

—Veterans entering wholesale and retail enterprises were given opportunity in a WPB order to buy surplus, idle or excess materials for that purpose.

—Dr. Isador Isaac Rabi, 46, professor of physics at Columbia university, received the 1944 Nobel prize in physics for his discovery of a new method of measuring and studying the magnetic properties of the atomic nucleus.

April 12—Franklin Delano Roosevelt, 63, president of the United States for four consecutive terms starting in 1933 died suddenly from a cerebral hemorrhage at Warm Springs, Ga.

—Harry S. Truman, D., Mo., vice president, took the oath of president from Chief Justice Harlan F. Stone in Washington. He announced that Mr. Roosevelt's cabinet would remain in office and that the United Nations Security conference, April 25 in San Francisco, would proceed on schedule.

—Secretary of the Interior Harold L. Ickes reported miners of 127 of the 236 mines he had seized had failed to report for work.

The government filed a civil anti-trust suit in federal court against the Westinghouse Electric and Manufacturing company and its subsidiary, Westinghouse International company, aimed at dissolving cartel agreements with two German electrical equipment enterprises.

—At least 15 men perished, seven were missing and 38 injured in a collision of an American freighter and an Allied tanker in a fog off Massachusetts.

—A tornado hit parts of Oklahoma, Arkansas, Missouri and Illinois, killing more than 100 persons.

—Gov. Dwight H. Green of Illinois signed transit bills in Springfield to establish a publicly owned Metropolitan authority to operate a unified traction system in Chicago.

—The CIO United Steel Workers and the Bethlehem Steel company signed a wage pact in New York covering 17,000 workers in 17 plants. It included 4- and 6-cent night shift premiums and would end Oct. 15, 1946.

April 13—The body of the late Franklin D. Roosevelt was taken from the Warm Springs Foundation by train to Washington. President Truman proclaimed April 14 as a national day of mourning. Flags on all public buildings were to remain at half mast for a month.

The late President's last speech, written for radio delivery April 14 to 350 Jefferson day dinners, called on Americans to move forward "with strong and active faith" for an enduring peace.

Sen. Kenneth McKellar, D., Tenn., president pro tempore of the Senate, became regular presiding officer of the Senate.

—The National War Labor board refused to order an employer to institute group insurance plan for employees, but agreed to approve such plans when agreed upon by employers and unions.

—The New York Selective Service Appeals board reclassified Thomas V. De Lorenzo, United Automobile Workers local president, 1-A and set April 26 for his induction.

April 14—Funeral services for Franklin D. Roosevelt were held at 4 p. m. E. W. T. in the East room of the White house, with Rt. Rev. Angus Dun, bishop of the Episcopal diocese of Washington, D. C., officiating.

The funeral train left for Hyde Park, N. Y., for burial services. Businesses throughout the country suspended work the entire day until 6 p. m., or between 4 and 6 p. m. in tribute. War work continued. Members of the armed services not in combat observed five minutes of silence at 4 p. m., E. W. T.

—A conference of army food supervisors at Governors Island, N. Y., decided to limit fresh meat in war prisoners' diets to heart, liver and kidney.

—President Truman authorized the Civil Service commission to give priority to veterans who were on the eligible list between May 1, 1940 and March 16, 1942.

April 15—Franklin D. Roosevelt was buried with full military honors in the garden of his Hyde Park estate. Rev. George W. Anthony, rector of St. James' Episcopal church at Hyde Park officiated.

April 16—The late President Roosevelt's will was filed in Poughkeepsie, N. Y. It provided for upkeep of the Roosevelt burial lots; a \$5,000 bequest to St. James' church in Hyde Park to be added to the cemetery fund; \$100 to each employee in his service at his death; and donation to the Georgia Warm Springs Foundation of all his property in Meriwether county, Ga.

—The federal government started an anti-trust suit in federal court, Danville, Ill., against the New York Great Atlantic and Pacific Tea company and 28 officers and subsidiaries, charging conspiracy to gain a monopoly.

—President Truman named John W. Snyder, vice president of the First National bank of St. Louis, Mo., to be Federal Loan administrator.

—President Truman appointed Matthew J. Connelly, Congressional committee investigator, as his confidential secretary and James L. Reinsch, radio executive, as secretary in charge of press and radio relations.

—Lieutenants-Gen. George S. Patton jr., and Courtney H. Hodges were recommended by President Truman for promotion to the rank of full general.

—President Truman signed the bill extending the Lend-Lease act for another year from June 30.

—President Truman ordered Interior Secretary Harold L. Ickes to seize the Cities Service Refining corporation gasoline plant at Lake Charles, La., strike bound by nearby residents dissatisfied with their rents.

—The Solid Fuels administration said mine work stoppages in the first week of April cost the country more than 4,000,000 tons of bituminous coal.

—President Truman reinstated Avra M. Warren, American Public Affairs chief, for the State department, as a class one officer in foreign service.

—President Truman, addressing a joint session of Congress, paid tribute to his predecessor and pledged America to support the United Nations conference and to fight for an enduring peace.

April 17—A Superior court jury in Los Angeles found that actor Charles Spencer Chaplin was the father of Carol Ann, the 18-months-old daughter of Joan Berry, 24, his erstwhile protegee.

—The baseball season opened with a full schedule being played.

—In a press conference, President Truman said the curfew and racing ban would continue at least until V-E day.

April 18—The NLRB approved a pay cut asked by 200 employees of the Wood Brothers thresher company, Des Moines, Ia., to avert a shutdown.

—The United States and Belgium signed two further Lend-Lease agreements, one providing for \$325,000,000 in U. S. supplies to Belgium for the prosecution of the war; the other for reverse Lend-Lease from Belgium.

—The Senate ratified 76-10 the Mexican water pact, signed by Mexico and U. S. representatives Feb. 3, 1944, guaranteeing Mexico 1,500,000 acre feet of water annually from the Colorado river and giving the U. S. about 350,000 acre feet from the Rio Grande.

April 19—President Truman told his Congressional leaders he supported pending Roosevelt legislation to continue reciprocal trade agreements, the OPA and the Stabilization act; to extend the Selective Service system without amendments restricting the use of 18-year olds, and to carry out the Bretton Woods monetary pact.

—The Republican Congressional Food Study committee said the nation faced "the worst sugar shortage of the entire emergency period."

—The National War Labor board ruled that open pit copper miners in New Mexico were entitled to travel time pay and directed the Kennecott Copper corporation and the unions involved to fix the amount.

—The U. S. Census bureau said 30 per cent of the service men and women of voting age away from home cast absentee military ballots.

—Mrs. Eleanor Roosevelt told newswomen she would be their competitor as columnist and news writer in New York.

—Eighteen railroads filed petitions in Supreme court asking for a rehearing on the question whether the court should consider Georgia's charges of coercion and discrimination by the railroads.

April 20—The regional Office of Price Administration sued in Brooklyn federal court for suspension from business for one year of R. & M. Sunnyside Farms incorporated, accused of repeated price violations.

—The National War Labor board voted an increase of five cents an hour to 30,000 maintenance employees of five automobile firms to restore a rate relationship between them and the tool and die workers. The companies involved were General Motors, Hudson, Packard, Murray Corporation of America and Chrysler.

—The War Production board started drives to draw back 100,000 textile workers and 125,000 lumbermen into the two industries to increase in six months the output of textiles and lumber products 20 per cent over 1942 levels.

—**The New York Herald Tribune** won the F. Wayland Ayer cup in the 1945 newspaper typography contest.

—Dr. Arthur H. Compton, winner of the Nobel Prize for physics, was chosen chancellor of Washington university, St. Louis, Mo.

April 21—President Truman invited Kenneth D. McKellar, Senate president pro tempore, to attend cabinet meetings, using the seat reserved for the vice president of the nation. It was an unprecedented move.

—Stephen T. Early, former White house press secretary, was sworn in as special assistant to President Truman until June 1 and Matthew J. Connelly as senior secretary to the President.

—The executive board of the CIO United Automobile Workers ordered removal of 34 officers of UAW Local 669 at the Wright Aeronautical corporation plant, Patterson, N. J., for "misappropriation of funds."

—The U. S. Patent Office's annual report showed the number of patents issued in 1944 was 32,192, the lowest in history.

—Gloria Vanderbilt di Cicco married orchestra conductor Leopold Stokowski in Mexico following her divorce in Reno April 20 from Pasquale di Cicco.

April 22—The Civil Aeronautics administration said it had been granting 2,000 civilian pilot certificates a week to fliers still in military service.

—The War department said 70 per cent of the 690,282 negroes in the army were overseas.

—The American Legion and the Veterans of Foreign Wars attacked administrative "red tape" as retarding veteran aid.

—Stabilization Director William H. Davis announced a 10-point plan to give civilians more meat without raising retail ceiling prices.

—Russian Foreign Commissar Vyacheslav M. Molotov arrived in Washington to confer with President Truman, and later with Secretary of State Edward R. Stettinius Jr. and British Foreign Secretary Anthony Eden.

—Rep. Richard F. Harless, D., Ariz., said he found "pampered, well fed German prisoners as fat as hogs" at Papago Park, Ariz., and demanded a special Congressional committee to investigate U. S. prison camps.

—The American airlines opened its New York-Los Angeles service via Tulsa and Oklahoma City with ceremonies at the latter two airports.

—The Toronto Maple Leafs won the National Hockey League Stanley cup in Detroit, defeating the Red Wings 2-1 in the final playoff game.

—The 10,000-ton light cruiser Galveston was launched at Philadelphia.

April 23—The Supreme court reversed 5-4 the 1942 conviction of Anthony Cramer, German-born U. S. citizen and New York mechanic, for giving aid and comfort to two Nazi saboteurs. The court said it was not proved that Cramer actually gave them aid or comfort.

—The Supreme court upheld two NLRB decisions supporting employees' rights to solicit union membership and distribute literature on company property.

—The National War Labor board unanimously approved the soft coal wage contract.

—William Phillips, former ambassador to Italy, was appointed special assistant to Secretary of State Edward R. Stettinius Jr.

—Dr. Nicholas Murray Butler, president of Columbia university for 44 years, sent in his resignation effective Oct. 1.

April 24—The Senate Banking committee approved the nomination of James J. McCaffrey to be a member of the Securities and Exchange commission.

—The War department announced that all army enlisted men 42 or over, except those under punishment or medical care, were eligible for discharge.

—The War department said provost marshals general throughout the country had been instructed to revise prisoner of war menus. It had been charged that PW's were getting too much meat, butter and other scarce foods.

—The Senate Military Affairs committee approved nominations of Lieutenants Gen. George S. Patton and Courtney H. Hodges to full generals.

—The Senate voted 50-25 in favor of an amendment to the Draft Extension Bill prohibiting the army's use of 18-year-old soldiers in combat until they had had six months' training.

April 25—On President Truman's order, the navy seized the United Engineering company plant in San Francisco, strike-bound for two months by a jurisdictional dispute between the International Brotherhood of Boilermakers and the International Associ-

ation of Machinists, both AFL unions.

—The United Nations security conference opened in San Francisco with 46 countries represented.

—Labor delegates from the U. S., Great Britain, Russia and France met at the opening of the World Trade Union conference in Oakland, Calif.

—The House Food Shortage Investigating committee heard witnesses in New York charge that the chief source of the city's black market was the number of newly established slaughterers who obtained permits and started production when packers cut beef production because it was unprofitable.

—War Production Chairman Julius A. Krug told a House committee that the WPB was ready to end controls as soon as possible, and that probably one third of them would end by August.

April 26—Price Administrator Chester Bowles announced a "very drastic" OPA program to wipe out black market meat and asked for help from industry and consumers. Slaughtering licenses would be withheld or withdrawn to curb operators outside federal scrutiny.

—Stabilization Director William H. Davis granted the National War Labor board discretionary authority for rigid standards on "fringe" wage adjustments. His directive listed several non-basic wage standards, such as night shift premiums and vacation allowances.

—The OPA said retail prices for synthetic passenger tires would be cut by 45 cents to \$2.20 May 1.

—The War department told the House Military Affairs committee the army policy on treatment of war prisoners adhered to international law set down at the Geneva conference. It numbered prisoners in the U. S. at 356,000.

—William G. Chandler, Scripps-Howard executive, was elected president by the American Newspaper Publishers' association in New York.

—Hard coal miners in Pennsylvania voted 6-1 in favor of a strike. Their contract was to expire April 30.

—Secretary of State Edward R. Stettinius Jr. opened the first plenary session of the United Nations conference at San Francisco.

April 27—Five persons were killed and seven injured in the crash of a chartered transport plane at Washington, D. C., National Airport. The plane was en route from Miami, Fla., to Rochester, N. Y.

—President Truman named Edwin W. Pauley, treasurer of the Democratic National committee, as American member of the Allied Reparation commission with the rank of ambassador.

Gov. Thomas E. Dewey, claimed New York had led all other states in providing for returning veterans.

—The Senate amendment to the Draft Extension bill, barring 18-year-olds from combat without six months' training, was adopted unanimously by the House and sent to President Truman.

—The War Food administration announced that the government was increasing dairy production subsidy rates to \$541,000,000 for the 12 months ending April 1, 1946, compared with \$384,000,000 in the previous 12 months.

—Interior Secretary Harold L. Ickes asked operators and miners for a 30-day extension of the anthracite coal contract, suggesting that the new contract be made retroactive to May 1.

April 28—Anthracite operators agreed in New York to Interior Secretary Harold L. Ickes' request for a 30-day extension, but John L. Lewis withheld his approval.

—The War Production board revoked 40 lesser controls over industry covering a variety of consumer goods.

—The National War Labor board granted a further 15-day "escape period" to steel workers at the Timken Roller Bearing plant, Canton, O., because of the CIO United Steel Workers union's "coercive tactics" in threatening resigning members with a nationwide union black list of their names.

—Army Air Forces officials told union leaders in Washington there would be no further production at Ford's Willow Run bomber plant after the B-24's were discontinued. The Ford motor company said in Detroit a 40-hour week instead of 45 would begin April 29, with one eight-hour instead of two nine-hour shifts.

—The Senate Agriculture committee voted 13-6 to remove the Rural Electrical administration from the Agriculture department.

—The tenth annual report of the Securities and Exchange commission to Congress said a higher standard of ethics in handling other people's money had resulted from Federal supervision of traffic in investment securities in interstate commerce.

—The American Irish Historical society presented its 1945 yearly gold medal to Archbishop Francis J. Spellman "in recognition of his service to the republic."

—The American Council on Education for Journalism adopted a plan for accrediting journalism schools to improve their standards. An accrediting committee of four educators and three newspaper men was established to set standards.

April 29—Mrs. Franklin D. Roosevelt christened the navy's new 45,000-ton aircraft carrier "Franklin D. Roosevelt" in Brooklyn. The heavy cruiser "Helena," third ship to bear the name, was launched in Boston and another heavy cruiser, the "Bremerton" was commissioned in Philadelphia.

—Secretary of the Navy James V. Forrestal revealed that the U. S. Fleet consisted of 23 battleships, 26 combat aircraft carriers, 65 escort carriers, 67 cruisers, 386 destroyer escorts and 240 submarines.

—It was revealed that the General Electric company in Schenectady, N. Y., was producing jet engines for craft that would be used by the U. S. Navy as fighter planes.

April 30—The OWI announced a 25 per cent cut in sugar rations because U. S. reserves were at "rock bottom."

—President Truman appointed Edward D. McKim, Omaha insurance executive, his chief administrative assistant.

—The U. S. and the Netherlands signed Lend-Lease agreements in Washington with a total value of \$242,000,000.

—Stabilization Director William H. Davis approved the soft coal wage pact.

—The AFL executive council asked immediate revision of the Little Steel wage formula because reconversion production cutbacks would end overtime pay.

MAY

May 1—About 72,000 anthracite miners walked out after expiration of their contract, causing a slump in production and adding to the nation's solid fuels shortage.

—The U. S. Employment Service said it placed 775,495 veterans in civilian jobs from

February, 1944, through March, 1945, of whom 88,853 were disabled discharges.

May 2—Because of changing war conditions, President Truman recommended to Congress reductions in the 1946 federal budget amounting to over \$80,000,000. Proposed reductions would affect the OWI, WPB, Office of Censorship, ODT, Petroleum Administration for War, War Manpower Commission, Office of Scientific Research and Development and Federal Security agency.

—President Truman announced the resignation of Frank C. Walker as postmaster general and appointment of Robert E. Hannegan, chairman of the Democratic national committee, to fill the post.

—The OPA filed suit in New York federal court against the Dairymen's League Cooperative association to restrain it from violating ceiling price regulations.

—President Truman named Associate Justice Robert H. Jackson of the Supreme court as chief U. S. counsel on the international military tribunal which was to be set up by the Allies to try war criminals.

—Hard coal miners in Pennsylvania remained away from work as wage negotiations continued and the National War Labor board referred the strike to Stabilization Director William H. Davis.

May 3—Solid Fuels Administrator Harold L. Ickes seized 363 Pennsylvania anthracite mines on order from President Truman and told miners to resume work May 7. John L. Lewis, UMW head, had "no comment."

—President Truman vetoed an amendment to the Labor Draft law which would have continued deferment of large numbers of agricultural workers. The House of Representatives sustained the veto 177-135.

—Stabilization Director William H. Davis said he foresaw a high level economy after the war amounting to an increase in real income of 30 to 40 per cent.

May 4—Persons in eastern Pennsylvania, Maryland, New Jersey and Delaware were awakened shortly after 3:30 a.m. by a series of explosions and shocks following a blue-white flash in the skies. Scientists said the cause probably was an exploding bolide, the largest type of meteor.

—Thirty-three additional soft coal mines, employing 10,500 men, were seized by Solid Fuels Administrator Harold L. Ickes. A total of 272 bituminous mines had been taken over since April 10.

—The National War Labor board approved new concessions by the New York Telephone company and the American Telephone and Telegraph company in settlement of a New York telephone wage dispute.

—The War department notified the Army Air Corps reserve in Albuquerque, N. M., that flight training of 17- and 18-year-olds would be discontinued.

—The Board of War Communications announced relaxation of bans on domestic telegrams of congratulation to permit sending such messages to or by members of the armed forces in the U. S.

—The Board of Education in New York said 18 war industries training schools had been discontinued because they were no longer essential.

—Gen. George C. Marshall, army chief of staff, warned a House committee that it was urgently necessary to increase army replacements to the Pacific area "over and above those required to replace battle losses."

May 5—The Petroleum Administration for War said gasoline pumps, storage tanks and other equipment items no longer needed

to meet military requirements would be released to retail filling stations and bulk petroleum plants.

—Eighteen American editors and publishers who had recently toured German prison camps condemned Nazi brutality.

—The 27,000-ton aircraft carrier "Kearsarge" was launched in New York.

—War Food Administrator Marvin Jones asked the House Food Investigating committee for aid in obtaining sufficient manpower, farm machinery and facilities for food processing and distribution.

May 6—Mrs. Victoria Torrance, aerialist for the Ringling Brothers and Barnum and Bailey circus, fell 60 feet to her death during her act in Madison Square garden, New York.

—Nine Pennsylvania locals of the United Mine Workers, representing 10,000 anthracite miners, voted to defy the government's order to return to work May 7.

—The 13,000-ton heavy cruiser "Toledo" was launched in Camden, N. J.

May 7—In a 5-4 decision the Supreme court upheld portal to portal pay for bituminous coal miners as the result of an appeal by the Jewell Ridge Coal corporation of Virginia opposing a lower court decision for travel time pay.

—The National War Labor board approved a reclassification plan, put forward by several airplane plants, to lower paying jobs because of cutbacks.

—The Supreme court voted 5-4 for new trials for three Georgia police officers who had been convicted of beating to death Robert Hall, handcuffed negro prisoner.

—The OPA banned retail sale of loose cigarettes. It said the practice had resulted in "unnecessarily high prices."

—The Senate confirmed Robert E. Hannegan as Postmaster General by a 60-2 vote.

—Gov. Maurice J. Tobin of Massachusetts signed a bill aimed at ending the unofficial book censorship in that state.

May 8—Secretary of the Treasury Henry Morgenthau jr. said U. S. costs in World War II had reached \$275,703,000,000, as follows: 1941—\$6,700,000,000; 1942—\$28,300,000,000; 1943—\$75,100,000,000; 1944—\$89,700,000,000; 1945 through May 5—\$75,903,000,000.

—The national brownout of non-essential lighting was lifted by the War Production board.

—The air raid system in New York was abandoned.

—J. A. Krug, WPB chairman announced that where military requirements permitted, aircraft producers might manufacture transport planes for commercial airlines.

—The Navy revealed that 49 men were lost in the explosion of the 430-ton patrol ship PE-59, April 23 off Maine. Thirteen survived.

—Navy Secretary James V. Forrestal named Adm. Henry K. Hewitt, former commander of the Eighth U. S. Fleet and Forces in northwest African waters, to conduct further Pearl Harbor investigations.

—A House committee disclosed that the War department aimed for a peacetime standing army of 500,000 regulars and 4,000,000 active reservists, compared to the prewar force of 302,968 enlisted men and 23,192 officers.

—William Green, AFL president, denounced the World Trade Union conference held at Oakland, Calif.

May 9—War Mobilization Director Fred M. Vinson announced immediate lifting of the midnight curfew and horse racing ban.

—President Truman signed the bill extending the Selective Service act "reluctantly" because of restrictions on 18- and 19-year-olds.

—Kent Cooper, executive director of Associated Press, announced in New York that the news agency's cardinal principle would continue to be "observance of all obligations voluntarily assumed." He refused to pre-judge correspondent Edward Kennedy for his alleged unethical release of the Reims surrender dispatch, May 7.

—The House of Representatives 288-88 favored participation with the Senate on approval or rejection of treaties and decisions to be made by a majority membership in each branch.

—Pennsylvania said strike coal miners were ineligible for unemployment compensation because they were "voluntarily leaving without good cause."

—The Associated General Contractors of America and the AFL made public in Washington their pact for post war working relations providing for a joint labor-management committee to handle problems without recourse to government intervention.

—Harry Rosen and Harvey Stemmer, who bribed five Brooklyn college basketball players to "throw" a game, were convicted by a New York city jury of conspiracy to cheat and defraud.

May 10—Price Administrator Chester Bowles said in a New York speech that the OPA would have to be continued for an indefinite period.

—Robert McLean, AP President, stated that the Associated Press regretted the distribution May 7 of the total surrender dispatch from Europe, which investigation clearly disclosed was distributed in advance of authorization by Supreme Allied headquarters.

—The Internal Revenue department said about 20,000,000 American taxpayers used their withholding receipts as income tax returns in 1945 out of 50,000,000 returns filed.

—Federal Loan Administrator John W. Snyder announced a plan for the Reconstruction Finance corporation to absorb its subsidiaries in the interest of simplification and operating economy.

—The House of Representatives voted 179-83 to allow each member \$2,500 tax free money annually for an expense account.

—The War department announced this system for determining releases of soldiers with 85 points, totaled as follows:

1. service credit—one point for each month of service since Sept. 16, 1940.
2. overseas credit—one point for each month served overseas since Sept. 16, 1940.
3. combat credit—five points for each award of certain decorations for service since Sept. 16, 1940.
4. parenthood credit—12 points for each child under 18 up to a limit of three children.

May 11—President Truman gave tentative approval to a program of tax concessions agreed upon by Treasury and Congressional revenue experts, which was designed to make available an estimated \$5,700,000,000 in cash to business for post war expansion and reconversion through tax refunds and exemptions.

—Price Administrator Chester Bowles said most new civilian goods in the reconversion period would be sold at 1942 retail prices.

—Production of engines for B-17 Flying Fortresses would end in Studebaker plants by the end of July, it was announced.

—The Political Action committee announced that Elmer A. Benson, former governor of Minnesota, would be acting chairman of the National Citizens' PAC, succeeding Sidney Hillman, who would continue as chairman of the CIO Political Action committee.

—The War department said no more professional athletes "unable to meet general service requirements" would be inducted and such men already inducted would be released.

May 12—President Truman praised the work of Donald M. Nelson, whose resignation as personal Presidential representative to foreign governments was effective May 15.

—The Army discharged 2,500 men under the point system from separation centers at Fort Dix, N. J., Fort Devens, Mass., and Fort Meade, Md.

—Foreign Economic Administrator Leo T. Crowley announced suspension of Lend-Lease shipments to Russia.

—An Office of Education survey revealed that about 1,000,000 service men and women planned to go back to school when they were discharged.

—A hoard of 200,000,000 counterfeit ration points and counterfeit coupons for 2,500,000 gallons of gasoline and 6,250,000 pounds of sugar were found in a Brooklyn apartment rented by Savatore Guglielmini. He and five members of his family faced charges.

May 13—Secretary of the Interior Harold L. Ickes assailed the "lawless minority" who in 24 instances had used violence or open intimidation in the previous four months against "loyal Japanese-Americans and law abiding Japanese aliens."

—Philip Murray, CIO president, urged an immediate increase of 17 cents an hour for steel workers and similar industrial workers.

—Mayor Fiorello La Guardia made public the names of 11 men he would support for New York city's next mayor. He excluded the name of Controller Joseph D. McGodrich, who had broken with him over the city budget.

May 14—The Senate Appropriations committee revealed that the Navy was planning on a post war force of about 50,000 officers and 500,000 men, and desired universal military training to maintain it.

—Irving S. Olds, Chairman of U. S. Steel corporation, said in a Detroit address that a guaranteed wage, which government compelled an employer to pay, would tend to create unemployment and might result in reduced wage rates.

—Interior Secretary Harold L. Ickes asked Congressional authorization of federal funds to preserve the Roosevelt home at Hyde park as a national historic site.

—Interior Secretary Ickes ruled that deliveries of hard coal in 12 eastern states might not be made to persons having more than a five-day supply on hand.

May 15—General Motors and Ford Motor company pledged themselves to production of lighter cars to cost less than pre-war models.

—Laurent Hendrikus Johannes Brackx, former U.S.N.R. lieutenant, was convicted in federal court, New York, of wartime espionage and violation of the censorship code.

Brackx gave information to Axis agents on U. S. radar, plane production and shipping.

—President Truman said there could be no tax reduction until the war with Japan was over, because taxes were needed to meet obligations of the United States. He favored repeal of the Johnson act, which prohibited private loans to defaulting nations. He announced that the Veterans' administration would be expanded.

May 16—The government filed an anti-trust suit in federal court against the Electric Storage Battery company, Philadelphia, and its subsidiary, Willard Storage Battery company, Cleveland, accusing them of having cartel pacts with foreign countries.

—The War Production board revoked controls on 1,200 common civilian items, permitting their manufacture, but not supplying the materials.

—The National Association of Tobacco Distributors said the cigarette shortage would ease during the remainder of 1945.

—John L. Collyer, special director of the War Production board rubber program, asked civilians to observe the 35-mile speed limit during the summer to save tires.

—The House Ways and Means committee approved 14-11 a 3-year extension and expansion of the Reciprocal Trade Agreements act.

—Dean Frank C. Whitmore of Pennsylvania State college was awarded the 1945 Willard Gibbs Medal of the Chicago section of the American Chemical society for "outstanding contributions to organic chemistry."

May 17—The Senate passed unanimously a bill granting increases in basic pay and overtime compensation to nearly 1,225,000 employees in the executive, judicial and legislative branches of the federal government. Total was expected to be \$487,300,000 annually.

—The Treasury department announced that new dimes would be minted bearing the likeness of Franklin D. Roosevelt.

—Anthracite operators and United Mine Workers of America agreed on compromise pay terms estimated to increase miners' earnings by \$1.37½ daily.

—The War department said army purchases of cigarettes for May, June and July were being cut one third, an estimated 200,000,000 packages.

—The War Labor board adopted a policy for quick disposition of disputes growing out of disciplinary discharges which called for final decisions by compulsory arbitration if necessary.

May 18—The Department of Justice announced that Fritz Kuhn, imprisoned former leader of the German-American Bund, would be deported to Germany as an undesirable alien.

—The House Veterans committee began contempt proceedings against Albert Deutsch, PM writer, after he refused to disclose names of Veterans administration officials who allegedly gave him information he used in criticizing its medical bureau.

—Byron Price, director of censorship, lifted many restrictions on dissemination of news by press and radio in the United States, European and Atlantic areas, but announced a new code to govern the Pacific and Asiatic war zones.

May 19—The OPA said householders might obtain fuel rations during the summer for use in oil cooking stoves and hot water heaters.

—Pending permanent freight classifica-

tion rates for the entire country except the Rocky Mountain-Pacific area, the Interstate Commerce commission order 10 per cent cuts in basic rates in southern, western and south western territories and a 10 per cent increase in the East, effective Aug. 30.

—Federal District Judge Walter J. LaBuy ruled in Chicago that government control of the Toledo, Peoria and Western railroad was illegal and ordered its return to the owners within 30 days.

May 20—The Census bureau reported that deaths in the United States rose in 1943 to 10.9 per 1,000 estimated population, compared with 10.4 in 1942.

The Office of Defense Transportation said more than 52,000,000 passenger miles were saved in February, March and April as a result of the ban on conventions.

—J. Edgar Hoover, FBI director, warned the public to stay alert "for activities inimical to our internal security" particularly during the last phase of the war.

—Marine Corps Commandant Gen. Alexander A. Vandegrift announced that remaining members of families which had lost two or more sons would be assigned to non-hazardous duty on request of the serviceman or member of his family.

May 21—Seven of the 33 anthracite mines under government jurisdiction were idle as 64,000 workers returned to the coal pits, ending a 20-day strike.

—The Army lowered to 40 years the age limit allowing enlisted men to leave the service on their own application, promising a lower limit when the military situation permitted.

—Striking members of the Independent Chicago Truck Drivers union voted to continue their five-day strike for higher pay, in defiance of a War Labor board order to return to work.

—Racing was resumed at the Jamaica track in New York.

—The Supreme court upheld the Federal Communications commission in banning service fees charged by Washington, D. C., hotels on long distance telephone calls.

—The Supreme court ruled 6-3 that each state might decide whether the six weeks' residence required by Nevada divorce laws constituted a legal domicile. In two cases the Court decided such residence was not "bona fide domicile." All uncontested divorces granted up to May 21, except those based on fraudulent domiciles, were ruled valid.

—The War Production board announced a program for production of 700,000 washing machines in the last half of 1945.

May 22—Selective Service National headquarters announced a 25 per cent reduction in manpower needs of the armed services.

—The Census bureau estimated that on Jan. 1, 1945, the population of the United States was 138,955,469, including those in the armed services, an increase of 7,286,000 over the 1940 figure.

—Philip Murray, CIO president, asked President Truman for a 20 per cent increase in wage ceilings to maintain current earnings and purchasing power as working hours were shortened.

—The War Labor board referred the Chicago trucking strike to Stabilization Director William H. Davis for possible sanctions against the idle drivers. The Keeshin Motor Express company filed a \$1,000,000 damage suit in Chicago against the striking union.

May 23—The U. S. filed an anti-trust suit in Toledo, O., accusing the Pittsburgh Plate Glass company, Libbey-Owens-Ford Glass

company, Toledo, National Glass Distributors association, Chicago, seven other glass manufacturers and 16 company officials of conspiring to monopolize production, distribution and sale of flat glass.

—The government formally took over the German embassy and property in Washington to act as a trustee until Germany had a responsible regime.

—The Senate Committee on Education and Labor approved 12-6 a bill to establish a Fair Employment Practices commission.

—The Petroleum administration said that A coupons would be good for 50 per cent more gasoline, or six gallons, after June 22.

—The Independent Chicago Truck Drivers union ordered its 6,500 striking members back to work May 24.

—The Journal of the American Medical association revealed that five typhoid patients in Philadelphia were treated successfully with the new drug streptomycin.

—President Truman accepted the resignations of Attorney General Francis Biddle, Secretary of Labor Frances Perkins and Secretary of Agriculture Claude R. Wickard. As successors he appointed, respectively, Thomas C. Clark, Dallas, Tex., former assistant attorney general, Judge Lewis B. Schwelienbach, Spokane, Wash., and Rep. Clinton P. Anderson, D., N. M.

The President said War Food Administrator Marvin Jones would return to the Federal Court of Claims and that War Food administration would be merged with the Agriculture department under Anderson.

May 24—President Truman asked Congress for permanent legislation similar to the Reorganization act of 1939, empowering the President to reorganize the executive branch of the government.

—The Surplus War Property board issued separate rulings to speed up reconversion in government war plants and manufacturing concerns.

—The House Banking committee approved 23-3 the Bretton Woods international monetary agreements for a world bank.

—Secretary of Commerce Henry A. Wallace asked in New York for lower tariffs and trade with other countries on a "live and let live" basis. He pledged his full cooperation in developing foreign trade, and called for outlawing of restrictive practices of cartels.

—Several Senators protested that the proposed tax-free \$2,500 annual expense account was inflationary and a violation of the Little Steel formula.

—Dr. William J. Robbins, director of New York Botanical gardens, revealed his discovery of six new antibiotic substances. Similar to penicillin in inhibiting the growth of other micro organisms, they would be known as pleurotin, grisic acid, pleurin, irpexin, obtusin and coticin.

May 25—The National War Labor board said employers might increase wages to 55 cents an hour without obtaining its approval.

—The War department announced cutbacks of 17,000 planes scheduled for production in the next 18 months, reducing plane output 30 per cent in the last half of 1945.

—The FBI in New York arrested Jean Marie Cavaille, 43, identified as a former French army flier, on charges of spying for Germany and plotting to send information about U. S. military activities to that country.

—Reporting severe damage to fruit and vegetable crops, President Truman set up a special home food supply division in the War Food administration to be headed by Paul S. Clark.

—Undersecretary of the Navy Ralph A. Bard urged universal military training for world peace.

—Eleven workers were killed and 52 injured in an explosion at Army Chemical Warfare Service headquarters, Edgewood Arsenal, Md.

May 26—The Bureau of Labor Statics said there were 4,956 strikes and lockouts in 1944, involving 2,116,000 workers and amounting to about 8,721,000 idle man-days. April, 1945, strikes were numbered at 450.

—Seven persons were killed and two were missing in an explosion at the Cornhusker Ordinance plant, Grand Island, Neb., during an electrical storm.

—Rep. John E. Rankin, D., Miss., sought President Truman's backing of his bill to give veterans of this war, whether employed or not, \$20 a week for one year after honorable discharge as "readjustment compensation."

—The House of Representatives voted 239-153 to extend and broaden the Reciprocal Trade program.

—The OPA announced 2,000,000 passenger tires for June, 25 per cent above May.

May 27—War Production Board Chairman J. A. Krug outlined the policy of "partial reconversion" of the United States in the midst of "partial demobilization."

—The Senate Appropriations committee approved the bill recently passed by the House of Representatives granting its members \$2,500 annual tax-free expense money, and expanded it to include Senators.

May 28—Selective Service said a number of men under 26 with minor physical defects, including conscientious objectors, would be inducted for limited service.

—The Supreme court forbade 32 New York hotels to collect service fees on long distance telephone calls.

—President Truman ordered army seizure and operation of the Gaffney manufacturing company textile plants in South Carolina because of a labor dispute.

—Treasury Secretary Henry Morgenthau jr., said the Budget bureau approved his request for more agents to probe tax evasions. He intended to ask Congress for \$30,000,000 to \$50,000,000 to employ 10,000 men.

—The Senate rejected 43-9 the annual \$2,500 expense accounts for its members but voted 28-22 to let the House do as it would in the matter.

—President Truman asked Congress for "emergency action" to increase unemployment compensation to \$25 a week for 26 weeks a year, and extend benefits to new groups of workers, including government employees.

May 29—The House Veterans committee, 13-2, rescinded its contempt charge against Albert Deutsch, PM reporter, and ordered his recall for further hearings.

—Lieut.-Gen. William S. Knudson would retire June 1 as its director of production, the War department announced.

—The Senate Banking committee approved extension of the Price Control act to June 30, 1946.

—Commerce Secretary Henry A. Wallace told a House committee more legislation was needed to aid small business and thus promote "free competition."

—Charles Max, president of the Power-Oil Refining company, Irvington, N. J., was sentenced in Newark federal court to seven years in prison and his company fined \$45,000 for illicit gasoline dealings.

—The government sued in federal district court, Los Angeles, to determine whether it or California owned petroleum deposits beyond the low waterline and the 3-mile limit.

May 30—The Association of American colleges and several educational leaders warned against the mushrooming of below-standard "phony" schools and "colleges" designed to mulct returning veterans of their \$500 a year in tuition fees.

—Dorothy S. Shackrey, president and publisher of the **New York Post**, purchased the stock of the **Bronx Home News**, daily in the Bronx section of greater New York.

—The Army revealed that the cost of a soldier's upkeep in the U.S. for his first year had increased almost 15 per cent over 1944. The average cost was \$533 compared with \$465 in 1944.

—Navy Secretary James V. Forrestal said continued warship damage in the Pacific, and the "alarming proportions" of men quitting the West Coast shipyards had created a critical situation.

May 31—Undersecretary of War Robert P. Patterson said lowering the army discharge age further under 40 years would "put the burden of longer front line service on men in the Pacific," and might result in unnecessary loss of life.

—The OPA started a program aimed at a home canning "sugar racket" by "some chiselers" who had falsified applications to get sugar they would not use in canning.

—Treasury Secretary Henry Morgenthau, jr., ordered all the nation's financial institutions to report anyone engaged in a suspiciously large currency transaction.

—Federal Loan Administrator John M. Snyder told a House committee the Reconstruction Finance corporation was operating a 5-point program to liberalize business loans, particularly for returning veterans and small business.

—The American Medical association asked President Truman to defer 8,000 high school graduates from military induction because of the shortage of physicians.

—Jose del Castano, former Spanish Consul General in Manila was expelled by the U.S. State department following his arrival May 10 from the Philippines.

—Guy M. Gillette resigned as chairman of the Surplus Property board.

JUNE

June 1—The "Army said a "planned" riot and fire at the disciplinary barracks at Fort Benjamin Harrison, Ind., resulted in two dead, nine injured and nine barracks destroyed.

—Sewell L. Avery, chairman of the board of directors of Montgomery Ward and company, Chicago, demanded immediate removal of the army from possession of the Hummer Manufacturing company, a subsidiary in Springfield, Ill. The plant was seized May 21, 1944 under Presidential order following a 17-day strike, resulting from Ward's refusal to accept a NLRB order.

—The Senate approved Clinton P. Anderson as secretary of agriculture.

—The War Production board said new passenger automobiles in 1945 would not be equipped with spare tires.

—The American Red Cross reported that 99 per cent of U.S. prisoners of war in German camps had survived and were returning home.

—William Patterson, a soft coal miner of Daisytown, Pa., was ordered in Pittsburgh

federal court to serve a suspended sentence because he violated probation by continuing strike agitation.

June 2—Ford Motor company said it would make its 1946 model after July 1.

—The Oswego (N.Y.) Citizens' Advisory committee appealed to President Truman and Congress to free 984 European refugees now housed at the Fort Ontario refugee center.

June 3—War Mobilization Director Fred M. Vinson gave support to the full employment bill up for hearings in Congress.

—The Internal revenue bureau said a total of \$76,000,000 in refund checks for overpayment of withholding taxes were being sent back to taxpayers.

—A poll of 90,000 American business men by the U.S. Labor department revealed the majority favored some form of guaranteed annual income for their employees and "regularization" of production.

—The American Council on Education revealed that a poll of college presidents showed three-fourths of them felt government action on compulsory military training could wait until after the peace.

—Generals Omar N. Bradley, and Carl A. Spaatz were among other high ranking generals and more than 10,000 troops who debarked in New York.

June 4—President Truman asked Congress for \$1,975,000,000 for defense aid, which, together with "unobligated balances" of about \$2,400,000,000 from the current year, made a \$4,375,000,000 Lend-Lease program for the fiscal year starting July 1.

—The Supreme court upheld the right of stockholders to challenge orders by the Securities and Exchange commission affecting their corporations.

—An 8-1 decision by the Supreme court upheld the OPA's method of determining maximum prices for building materials and other durable goods, defeating an appeal which had been taken by the Seminole Rock and Sand company, Miami, Fla.

—The U. S. Court of Appeals in Washington revealed a unanimous decision voiding Postmaster General Frank C. Walker's revocation of **Esquire** magazine's second class mailing privileges because of alleged impropriety of some of its contents.

—A Chicago referendum approved 7-1 public ownership of a unified transportation system. The vote authorized acquisition and operation of facilities for 50 years by a Chicago Metropolitan authority.

June 5—President Truman asked the House Rules committee to vote out the Fair Employment Practice commission bill and appealed to the House for "prompt enactment of the Bretton Woods legislation."

—Sen. Millard E. Tydings, D., Md., back from his mission to the Philippine government, reported to President Truman the "indescribable" situation he found and asked for a federal loan to the Philippine government and generous aid for reconstruction.

—The War Manpower commission abolished the compulsory 48-hour week in the Detroit area and removed employment "ceilings" and priority referrals.

—New York Democratic leaders nominated District Attorney William O'Dwyer for mayor.

—President Truman transferred the property of the Office of Civilian Defense, which was to terminate June 30, to the Commerce department.

—Members of the AFL Metal and Building Trades councils voted to remain idle until

a new contract was negotiated with Higgins Industries, incorporated, plants at New Orleans in defiance of a National War Labor board back-to-work order. About 5,000 workers were out.

—Albert Deutsch, **PM** correspondent, reiterated his charges before the House Veterans committee that medical care of veterans, especially mental patients, was "in a disturbing degree below standard."

—State Sen. Wesley A. D'Eward, R., Mont., was elected in a special Montana election to fill the House seat left vacant by James F. O'Connor, D.

June 6—Actor Charles Spencer Chaplin's plea for a new trial in the Joan Berry paternity case was denied in Los Angeles Superior court.

—The FBI arrested six persons, two of them in the employ of the State department, three magazine writers and one intelligence officer, with unauthorized possession or transmittal of defense data.

—President Truman commuted the death sentence of Thomas H. Robertson, jr., convicted of kidnapping in Kentucky, to life imprisonment.

—Gov. Thomas E. Dewey named six members of the New York State Commission Against Discrimination to enforce its new anti-discrimination law, effective July 1.

—The National War Labor board approved the new wage contract between the United Mine Workers and anthracite workers.

June 7—The House of Representatives approved 345-18 U. S. participation in the International Monetary fund and Bank for Reconstruction and Development as planned at Bretton Woods.

—Acting Secretary of State Joseph C. Grew said the arrest of six persons was only part of "a comprehensive security program" to stop leaks of "confidential and secret information to persons outside the government."

—Justice Robert H. Jackson said an "inescapable responsibility" rested on the United States to carry out the trials of war criminals.

—President Truman named Paul M. Herzog, former member of the N. Y. State Labor Relations board, as chairman of the National Labor Relations board, succeeding H. A. Hillis, resigned. W. Stuart Symington, St. Louis, was named chairman of the Surplus War Property board, and John B. Hulton, assistant to War Mobilization Director Fred M. Vinson, was named undersecretary of agriculture, replacing Grover B. Hill.

—Gen. Omar N. Bradley, 12th Army commander, was named by President Truman to succeed Brig.-Gen. Frank T. Hines as administrator of Veterans' affairs.

—The U. S. State department announced acceptance by 30 nations of the Interim Agreement on International Civil Aviation.

—George S. Smith, general manager of Ringling Brothers and Barnum and Bailey circus, and Leonard J. Aylesworth, boss canvasser, started their Connecticut prison terms on charges of manslaughter growing out of the disastrous fire that destroyed the "Big Top" and burned many circus-goers to death.

—The Catholic directory of 1945 revealed a 543,970 increase in the number of Roman Catholics in the United States, Alaska and the Hawaiian Islands over 1944, making the total 23,963,671.

—The House of Representatives voted 206-15 to keep the \$2,500 tax-free annual

expense account for members, approved first on May 10.

—Secretary of the Treasury Henry Morgenthau jr. said the investigation of large financial transactions had revealed and broken up a \$1,000,000,000 whisky black market operating out of Chicago and Indianapolis.

—Sen. Hiram W. Johnson, R., Calif., told the Senate Finance committee that repeal of the Johnson act would cancel World War I debts and "leave the individual American citizen" holding the bag.

—Gen. George S. Patton jr. arrived by plane in Boston and was welcomed by a crowd of more than 1,000,000.

June 8—Mark J. Gayne, Kate L. Mitchell and Philip J. Jaffe, arrested in New York on charges of conspiracy in obtaining and using "top secrets" of the State department termed their arrests "silly" and denied charges of a conspiracy and communism.

—The Senate Finance committee voted down 10-9 the House-approved administration bill for extension of the Reciprocal Trade Agreements law authorizing the president to reduce 1945 tariff rates up to 50 percent.

—The Navy announced a new Office of Research and Inventions under Secretary James V. Forrestal, for present and post war research into naval weapons including jet propulsion, rockets and secret devices.

—A bill was introduced into the Senate to increase the \$10,000 yearly salary of members of Congress 100 per cent, of the Vice President and Speaker of the House from \$15,000 to \$25,000, and of Cabinet members from \$15,000 to \$20,000.

June 9—The Federal Court of Appeals, Chicago, reversed a district court decision which ruled that army seizure of Montgomery Ward and company property under Presidential order was unconstitutional.

—The Army announced plans to enforce the NWLB directive to Montgomery Ward and company to grant its employees \$1,342,000 in back pay and check-off and maintenance of membership privileges.

—President Truman appointed Artemus L. Gates, assistant Secretary of the Navy for Air, as Under Secretary of the Navy to Succeed Ralph A. Bard, resigned.

—President Truman authorized James E. Markham, alien property custodian, to seize liquid assets of German and Japanese nationals in the United States and turn the proceeds into the U. S. Treasury.

—ODT Director J. Monroe Johnson asked the public for voluntary adherence to a 6-point, program of cooperation in reducing unnecessary travel in order to avoid travel rationing.

June 10—Wilbur Forrest, assistant editor, **New York Tribune**, Ralph McGill, editor, **Atlanta Constitution**, and Dean Carl W. Ackerman, Columbia School of Journalism, representing the American Society of Newspaper Editors, reported to President Truman that their 40,000-mile world tour for press freedom was well received in other countries.

—Harvest crews in Oklahoma started dumping the new wheat crop on the ground after refusal of grain elevators to store it.

—The Federal Reserve Bank of New York announced that special silver certificates issued to U. S. forces in the Mediterranean and European areas might circulate freely in the United States.

—Harry Slattery, former Rural Electrification administrator, charged Secretary of Agriculture Claude R. Wickard with

using his agency as a "political football," and urged the Senate to reject Wickard's nomination as REA administrator.

—The Brookings Institute estimated the post-war U. S. government would cost Americans about three times as much as the pre-war figure, or approximately \$22,000,000,000 a year. It said state and local governments would increase expenditures about one quarter over the 1940 total of \$9,000,000,000.

June 11—The Senate voted 37-30 to extend the Price Control act another year, but adopted amendments outlawing price ceilings that failed to give meat processors and farmers a "reasonable" profit.

—Gerhard W. Kunze and 23 other members of the German-American Bund, convicted of advising members to evade the draft, were acquitted by Supreme court 5-4 because of lack of evidence that they "knowingly" counseled evasion of military service.

—The War Shipping administration said the 10,500-ton Brazilian freighter "Ayuruoca" was sunk outside New York harbor June 10 in collision with a Norwegian vessel.

—The Department of Agriculture predicted a 1945 wheat crop of about 1,085,000,000 bushels, the largest ever produced by the United States.

—President Truman asked Congress for a military budget of \$39,019,790,474 for the fiscal year 1946, a 25 per cent decrease from the 1945 program.

—Attorney Gen. Francis J. Biddle revealed that foreign countries spent more than \$5,000,000 on propaganda in the United States during the war.

—The Supreme court reversed as excessive an order of the Interstate Commerce commission requiring North Carolina, Kentucky, Alabama and Tennessee to increase passenger rail rates one third.

—The Supreme court 8-1 upheld Oklahoma's tax of four per cent a year on premiums collected in the state by outside insurance firms.

—The Supreme court invalidated a Florida law requiring the licensing of union business agents and information about the union and its officers.

June 12—The House passed 251-105 a bill to ban a poll tax requirement for voting in Texas, Tennessee, Virginia, South Carolina, Alabama, Mississippi and Arkansas.

—The House Rules committee refused to report out the Fair Employment Practices commission bill.

—President Truman said eventually Congressional salaries should be increased to at least \$15,000, but current raises should be consistent with the Little Steel formula.

June 13—A CIO delegation presented a program to War Mobilization Director Fred M. Vinson and Stabilization Director William H. Davis for changes in wage stabilization policy. They asked supplementary unemployment compensation, more authority for the NWLB and "security of employment on an annual basis."

—Solid Fuels Administrator Harold L. Ickes returned to their owners 260 bituminous coal mines which were taken over during the coal wage dispute.

—The National War Labor board approved a wage contract between the CIO Packing House Workers and four major meat packers, involving \$30,000,000 in wage adjustments.

—William H. Willis, former Republican governor of Vermont, was named by President Truman to be member of the Federal

Communications commission.

—Representatives of the AFL and CIO told a House committee they were opposed to peacetime military training, and would prefer to have a better health program and "an international police" rather than national arms.

June 14—The Senate Agricultural committee voted 11-6 in approval of Secretary Claude R. Wickard, to be Rural Electrification administrator.

—The United States Associates was formed in New York to represent American industry, finance and commerce, in the International Chamber of Commerce, with Philip D. Reed, chairman of the General Electric company, as chairman.

—The Chamber of Commerce of the United States told a House committee it was in favor of a peacetime military training program.

—Bus drivers of the N.Y. Omnibus corporation began a "slowdown" affecting 90 per cent of New York city's bus service. Members of the CIO Transport Workers union said they had voted not to work overtime and were trying to compel wage increases and improved working conditions.

—The OPA revealed that nine rings of racketeers in the East had issued spurious ration checks for more than 30,000,000 red points, most of which had been traced to the food merchants in New York city.

—Col. Louis Verdel, manager of the Neuro-psychiatric hospital, Northport, N.Y., which had been condemned for its treatment of patients, testified before the House Veterans committee that the Army assigned incompetent and dissatisfied soldiers as hospital personnel.

June 15—President Truman ordered the ODT to seize the entire trucking industry in Chicago, involving 80,000 drivers who were voting on strike.

—A letter written by Gen. Dwight D. Eisenhower in answer to a House committee request urged peacetime military training for "each able bodied citizen" for action "in time of emergency . . . in fairness to his country."

—Nineteen persons were killed and more than 20 injured in a collision near Milton, Pa., between the Pennsylvania Railroad's Dominion Express and a freight train thrown into its path by a broken journal.

—Six hundred wounded veterans marked Infantry day in the first Purple Heart parade in New York.

—Harry Rosen, convicted of bribing Brooklyn college basketball players was sentenced in New York General Sessions court to 15 months to two and a half years in jail, in addition to a previous sentence of one year.

June 16—The War Production board announced permission to resume gold mining July 1. It revoked controls on production of more than 50 types of electrical appliances, domestic and commercial.

—Gen. George C. Marshall, Secretary of the Navy James V. Forrestal and Fleet Adm. Ernest J. King, testified before the House Committee on Post War Military Policy in favor of universal peacetime military training.

—Following a year's study, the National Commission on Children in Wartime recommended to President Truman immediate expansion of health, welfare, education and other Federal-State services for children and additional \$75,000,000 federal appropriations for the fiscal year 1946.

—Attorney Gen. Francis J. Biddle and Thomas C. Clark, his successor, denied army charges of negligence in their department in investigating graft of the Pan-American highway.

—More than 6,000 Chicago truck drivers went on strike in defiance of a government order. Fifteen hundred military police arrived to drive trucks for the government.

June 17—The War department disclosed that Maj. Gen. Curtis E. LeMay made a record non-stop flight from Hawaii to Washington in a B-29 Superfortress June 15, covering the 4,600 miles in 20 hours and 15 minutes.

—The Army called 5,000 additional troops to operate trucks in Chicago.

—Following authorization of a strike by the CIO United Rubber Workers, more than 20,000 employees in five plants of the Goodyear Tire and Rubber company, Akron, were idle.

—The OPA ordered a complete inventory as of July 31 of rationed and unrationed shoes by everyone in the business of selling them.

—Georgetown university, Washington, D. C., at Commencement exercises, awarded the honorary degree of Doctor of Laws to President Truman.

—Rear Adm. Edward L. Marshall, U. S. Navy, said in Medford, Mass., that the Navy V-12 training program would be absorbed by the NROTC.

June 18—The Supreme court ruled that "it is not a violation of the Sherman act for laborers in combination to refuse to work," and that the AFL Brotherhood of Transportation Workers might not be sued under anti-trust law for action resulting in destruction of an employer's business.

—Attorneys general of 46 states opposed Secretary of the Interior Harold L. Ickes' intention to "grant certain applications for federal oil and gas leases on tide and submerged lands" as a "direct attack on State sovereignty." They claimed the lands belonged to the states.

—President Truman sent to the Senate 72 Army promotions including 12 lieutenants general, 12 majors general and 48 brigadiers.

—The Supreme court ruled 5-3 that the deportation order for Harry Bridges, West Coast labor leader, was illegal.

—Gen. Dwight D. Eisenhower returned home to the greatest reception ever accorded a hero in Washington.

—In a 5-3 decision the Supreme court ruled that Associated Press by-laws violated the Sherman Anti-Trust act in restraint of commerce in the news. The AP would have to disregard possible competitive effects on existing members in passing on admission of new ones.

—The Senate Appropriations committee voted 13-2 to raise Congressional salaries from \$10,000 a year to \$15,000 a year starting Jan. 3, 1947. The bill also called for these raises: Vice President, from \$15,000 to \$20,000; Speaker of the House from \$10,000 to \$20,000; cabinet members, from \$15,000 to \$17,250.

A subcommittee voted to raise 1946 appropriations from the OWI to \$39,750,000 from the \$18,000,000 previously voted by the house.

—The Supreme court reversed a Circuit Court of Appeals ruling and decided that an AFL local of the International Brotherhood of Electrical Workers "conspired" to violate the Sherman act by preventing installation and use of electrical equipment made outside

New York City.

—The Supreme court upheld the New York Civil Rights law in ruling that the Railway Mail association, a labor organization, could not limit its membership to white postal clerks.

June 19—President Truman asked Congress to pass a bill changing the Presidential Succession act of 1886 so as to make the Speaker of the House next in line to the Presidency after the Vice President.

—President Truman flew to Olympia, Wash., from Washington, D. C. He expected to address the San Francisco conference closing session. It was the first time a U. S. president used air transport to travel within the country.

—The Senate voted 47-33 to give President Truman the right to cut tariffs 50 per cent from current rates for nations making concessions.

—A jurisdictional dispute between the CIO United Automobile Workers and AFL building trades mechanics caused idleness of 3,500 workers at the Ford Motor company River Rouge plant in Detroit. The dispute affected also the Packard Motor Car corporation, where 400 were out, and for plants of the Chrysler corporation.

—The CIO United Rubber Workers ignored a WLB order to return to work at Goodyear Tire and Rubber company, Akron. Firestone Tire and Rubber company workers voted to strike. About 3,000 employees at the Pittsburgh Plate Glass company walked out.

June 20—The Senate voted 54-21 to extend the Reciprocal Trade Agreements act for three years. The bill included the provision for Presidential power to reduce tariffs.

—The WPB authorized production by 10 manufacturers of 691,000 passenger cars between July 1, 1945 and March 31, 1946.

—Army officials said conscientious objectors on non-combat duty in the Army would be released under the regular point system.

—The Army announced that at the request of the ODT it was sending 10,000 additional soldiers to operate Chicago trucks.

—The government filed an anti-trust suit in Hammond, Ind., against 10 of the leading manufacturers of railway springs and spring plates.

—A federal Labor Relations bill, abolishing the NLRB and substituting an unfair practices tribunal and a labor relations board, was introduced in the Senate to amend the Wagner act.

June 21—The War Labor board established a Telephone industry commission to decide disputes affecting the industry and pass on wage increases.

—An equal pay bill to protect women workers from wage discrimination after the war was introduced in the Senate.

—A Senate subcommittee rejected the McCarran bill to establish an "All American Flag Line, incorporated" to be the only international air line.

—The Senate confirmed Claude R. Wickard as Rural Electrification administrator.

—The CIO-AFL dispute spread in Detroit, causing the Packard Motor Car corporations main plant to shut down and forcing 21,000 men into idleness. At the Ford River Rouge plant, 1,400 workers walked out.

Members of the CIO Federation of Glass Ceramic and Silica Sand workers quit at the plants of the Pittsburgh Plate Glass company plants in three cities, affecting about 15,000 men.

The War Labor board ordered CIO United

Rubber Workers employees of the Goodyear Tire and Rubber company, Akron, O., back to work.

June 22—The Labor Department Conciliation service said strikes had doubled since V-E day, reaching to between 35 and 40 daily.

—The War Production board warned that a more severe lumber shortage than in any wartime year threatened reconversion and recovery of the construction industry.

—The War department appropriation bill for \$38,500,285,951 was sent to the House of Representatives. It represented a cut of \$586,810,000 from army budget estimates.

—The ODT and War Manpower Commissioner Paul V. McNutt asked the War department to release 25,000 experienced railroad men from the army under the point system and free another 10,000 on furlough to help the transportation crisis.

—Film Star Merle Oberon and cameraman Lucian K. Ballard were married by proxy in Jaurez, Mex.

June 23—The FBI in Philadelphia arrested two Spanish seamen, Emilio Ipes Casau Hernandez, apprentice officer, and Pablo Meso Lagarreta on charges of espionage in behalf of Germany.

—President Truman commuted to life imprisonment the death sentence of William Curtiss Colepaugh and Erich Gimpel, convicted Nazi spies.

—Solid Fuels Administrator Harold L. Ickes returned to their owners 12 bituminous mines, leaving six in government possession.

—The House of Representatives voted 356-12 to pass the Price Control act with its amendment giving the Secretary of Agriculture power over every regulation on food products and power to cancel existing OPA ceilings and regulations.

—The State department issued the first trade black list since V-E day, cutting by 1,980 the number of persons to whom U.S. trade relations were denied.

—The Army announced a 50 per cent overall reduction in artillery shell production releasing 12,000 workers in 44 plants.

—The War Labor board ordered 14 California ship repair yards to pay employees a differential of 11.6 per cent over rates paid on new ship construction to help speed ships back to the Pacific.

June 24—Secretary of Labor Frances Perkins reported mounting costs of food and clothing were responsible for an increase of seven tenths of one per cent in the monthly cost of living to May 15. The index of the Bureau of Labor Statistics was at its highest point of the war, 128 per cent of the 1935-39 average.

June 25—Interior Secretary Harold L. Ickes agreed to recommend to Attorney Gen. Francis J. Biddle "that he dismiss the (oil) action in California." Ickes said he favored filing suit in Supreme court "to clear the title of these specific oil-bearing lands."

—The U.S. Emergency Court of Appeals in Washington, D. C., ruled inadequate rent ceilings fixed by the OPA for "luxury" housing (at least \$100 a month) in New York City.

—Maintenance workers of the CIO United Automobile workers accepted a tentative peace agreement with the AFL in Detroit to avert further walkouts.

—The Independent Truck Drivers union ordered its 6,000 striking members in Chicago to return to work and called their walkout "unprovoked."

June 26—President Truman signed a bill extending for one year the authority of the Reconstruction Finance corporation to pay subsidies on principal food products and strategic materials.

—The U.S. Justice department said 12 of the 24 German-American bundists freed by the Supreme court would be interned as enemy aliens.

—Secretary of the Treasury Henry Morgenthau, Jr., wrote Sen. Raymond E. Willis Jr., Ind., that the Treasury would handle "without discrimination" the investigation of a loan of \$200,000 which John Hartford, president of the Great Atlantic and Pacific Tea Company, said he made in 1939 to Brig. Gen. Elliott Roosevelt.

—The House of Representatives voted unanimously a \$38,500,285,951 War Department appropriation for the fiscal year 1946 and defeated a move to force the army to discharge fathers of four or more children.

—Delegates from 50 nations to the United Nations Conference on International Organization in San Francisco met for their final session.

—Strikers and non strikers clashed outside the Indiana Brass company plant in Elkhart, Ind., and police used tear gas.

—Congress approved retention of 3-cent postage for another two years.

—Union officials said about half of Chicago's striking truckers had resumed work.

—The "Queen Mary" had brought 30,261 servicemen to New York from Europe since June 18.

June 27—President Truman accepted the resignation of Secretary of State Edward R. Stettinius, Jr., and appointed him U.S. member of the Security council and chairman of the U.S. delegation in the General Assembly of the United Nations.

—The Senate and House agreed on a compromise Price Control act giving the Secretary of Agriculture power over commodities at the processors' level but removing House-approved power over previous orders by the OPA and other agencies.

—The House Judiciary committee voted 10-9 in favor of President Truman's suggested Presidential Succession bill, making the House Speaker, rather than the Secretary of State next in line to the Vice President for the Presidency.

—The War Labor board ruled that employers might give white collar workers Saturdays off without deduction from their regular wage during the period from June 1 to September 15 without board approval.

—The Labor department reported 425 strikes and lockouts in May, involving 310,000 workers and causing more lost time than in any May since 1941.

—Gov. Ellis G. Arnall of Georgia in a Louisville, Ky., statement opposed the Fair Employment Practices commission as "unworkable" and said, "we of the South do not believe in social equality with the negro."

—The Senate confirmed President Truman's aide, Col. Harry Vaughan, as brigadier general. Twelve majors general were voted lieutenants general, and 12 brigadiers were made majors general.

June 28—Sen. Tom Conally, D., Tex., chairman of the Foreign Relations committee, formally reported to the Senate on the new world organization and urged speedy ratification of the San Francisco charter.

—The Senate voted 40-8 to extend the OPA another year, accepting the compromise agreed on by both chambers of Congress.

—Accepting the degree of Doctor of Laws, President Truman said at the University of Kansas City he wanted the U.S. to ratify the San Francisco charter first.

—Mayor Fiorella La Guardia revealed the discovery by New York city inspectors of a large "black market area" in Upper New York state.

June 29—The House Ways and Means committee approved a tax bill increasing excess profits tax exemption from \$10,000 to \$25,000.

—The ODT decreed that passenger train reservations might not be obtained more than five days in advance, instead of the current 30-day limit.

—Three Russians, captured while serving in the German army and held as prisoners at Fort Dix, N. J., committed suicide during a riot by 154 other prisoners.

—Maternity care in Navy hospitals was granted Waves, Women Marines, Spars and Navy nurses discharged because of pregnancy. The order was effective July 1.

—The Senate confirmed Luther H. Evans as Librarian of Congress.

—The Brotherhood of Maintenance of Way Employees asked carriers for a minimum wage of 75 cents an hour for its 300 members, correction of inequalities and classification standardization.

—Acting Secretary of State Joseph Grew revealed that the United States leased bases in Newfoundland in June, 1941, for 99 years.

June 30—James F. Byrnes was named by President Truman to be Secretary of State. Clinton P. Anderson, Louis B. Schwelbach, Thomas C. Clark and Robert E. Hannegan were sworn in, respectively as Secretary of Agriculture, Secretary of Labor, Secretary General and Postmaster General.

—Sen. Arthur H. Vandenberg, R., Mich., reported to Congress on the San Francisco conference and asked for early ratification of the charter in the "self-interest of the United States."

—The House of Representatives passed the compromise bill extending the OPA another year and sent it to President Truman.

—The Senate passed 42-26 the bill to continue the Fair Employment Practices commission, allocating \$250,000 for the agency, instead of the proposed \$446,000.

—After a strike vote June 29, 1,500 members of the Newspaper and Mail Deliveries union in New York city went on strike in defiance of a WLB directive to continue work until a new contract was reached.

—WPB Chairman J. A. Krug said May war contract cutbacks totaled \$7,668,000, 600. Ammunition production was \$4,600,000, 000, seven per cent lower than March output.

—The House of Representatives passed and sent to the Senate the Presidential Succession bill.

—President Truman ordered the functions of the War Food administration transferred to Rep. Clinton P. Anderson when he would become Secretary of Agriculture.

JULY

July 1—Secretary of Agriculture Clinton P. Anderson said the effective consolidation of the War Food administration and the Department of Agriculture would mean "an efficient organization serving agriculture and the people."

—The House Veterans' committee approved a liberalized "GI Bill of Rights" but stripped it of a bonus provision to give each

veteran \$1,040.

—President Truman ordered Petroleum Administrator Harold L. Ickes to seize and operate the Texas company's plants at Port Arthur, Tex., because 175 employees, members of the CIO Oil Workers International union, had stopped work.

—The House Post War Economic Planning committee urged planning for at least a \$5,000,000,000 state and local reserve of state and local construction projects to stabilize the building industry after the war.

—About 15,000 members of the CIO United Rubber Workers went on strike at Firestone Tire and Rubber company plants in Akron, O.

—It was announced at Vassar college, Poughkeepsie, N. Y., that an anonymously donated \$40,000 would be used to establish a Franklin D. Roosevelt Memorial scholarship for foreign students.

July 2—President Truman presented the United Nations charter to the Senate and urged its "prompt ratification."

—Two House committees refused to accept the Senate appropriation of \$250,000 for the Fair Employment Practices commission. The Appropriations committee reported out instead a new war agencies bill of \$752,000, 000 eliminating the FEPC and cutting the OWI fund by \$21,000,000.

—The Senate unanimously confirmed James F. Byrnes as Secretary of State.

—Following up NWLB Chairman George Taylor's unheeded warning June 30 to 17,000 striking employees of the Goodyear Tire and Rubber company, the National War Labor board suspended paid vacations and other benefits it had granted them.

—The Securities and Exchange commission ruled that investment banking houses might not bid for securities on whose sale they had advised.

—Claude R. Wickard was sworn in as Rural Electrification administrator.

—President Truman signed the bill extending for another five years government life insurance for members of the armed forces.

—Acting Secretary of State Joseph C. Grew denied charges of anti-Soviet or anti-British prejudice in the State department and reiterated "our friendly attitude to all freedom loving nations."

July 3—President Truman ordered all but six federal agencies to reduce their work week from 48 to 44 hours, affecting about 2,500,000 employees.

—President Truman signed a bill to pay \$101,630 to Sioux Indians for ponies the Army took from them after the Custer massacre in 1876.

—Harry L. Hopkins resigned as special adviser to President Truman because of ill health.

—The Navy ended segregation of negroes from white naval recruits in training.

—Maxwell M. Bilofsky, president of the Industrial Electronics corporation, Newark, N. J., confirmed published reports that he lent Brig.-Gen. Elliott Roosevelt \$50,000 in 1939 and settled in 1941 for a loss of \$29,200.

—From June 27 to July 3, 23,507 GI's arrived in New York and 6,213 at Boston.

July 4—The conference of 41 state governors at Mackinac island, Mich., adopted a resolution backing the San Francisco charter.

—The War Production board ordered use of synthetic rubber in all future tires, regardless of size, to save 1,300 tons of natural rubber a year.

—War Production Chairman J. A. Krug

reported that despite manpower and materials shortages, the United States produced \$61,310,000,000 worth, or 45 per cent, of the world's munitions in 1944.

—The Agriculture department estimated the number of persons living on farms Jan. 1 at 25,190,000, a decline of 5,079,000 or 17 per cent since 1940. It was the lowest farm population in 35 years.

—The Interstate Commerce commission curbed U. S. freight shipments to Mexico July 10 to Feb. 28, 1946 to ease the railroad car shortage.

—Chester Bowles, price administrator, said a chemical solution was being supplied grocers and meat dealers to test the authenticity of ration stamps.

July 5—Henry Morgenthau, secretary of the treasury, Owen J. Roberts, associate justice of the Supreme court, and Thurman Arnold, associate justice of the U. S. District Court of Appeals, resigned.

—President Truman ordered the Navy department to seize and operate strike bound Akron, O., Goodyear Tire and Rubber company plants.

—President Truman signed the bill extending the Reciprocal Trade Agreements act until June 12, 1947 and the \$3,636,000,000 Deficiency bill.

—The House committee on Post War Military policy recommended that Congress adopt a "system of universal military training for the critical years ahead."

—Solid Fuels Administrator Harold L. Ickes warned of an impending coal crisis even worse than in 1944, when consumption was 80 per cent below the normal supply.

—Dr. George W. Taylor, NWLB chairman, demanded that the strikes of the Newspaper Mail and Deliveries Union in New York City be "terminated immediately" on pain of withdrawal of benefits previously granted to members.

—The Civil Service commission reported 17,614 civilians were dropped from the government payroll between April 30 and May 31.

July 6—The House of Representatives passed 246-91 the tax relief bill to aid business and sent it to the Senate.

—The White House announced War Mobilization Director Fred M. Vinson would be formally nominated as Secretary of the Treasury when President Truman returned from the "Big Three" meeting.

—The 17,600 employees of Goodyear Tire and Rubber company plants at Akron, O., started returning to work following seizure of the plants by the Navy.

—A House committee reported out a bill to free war veterans from closed shop and maintenance of membership provisions of union contracts.

—President Truman signed a bill giving postal workers their first general pay raise since 1925. For most employees of the lower grades it amounted to 20 per cent or \$400 annually, whichever was less.

—President Truman asked all government departments and agencies to check expenditures to avoid "misuse or careless handling" of funds.

—A Newark, N. J., Federal court sentenced Paul Graeger, convicted for not disclosing his membership in the Nazi party when he registered as an alien in 1942, to two months in jail.

—The Senate Commerce committee refused to report out the McCarran bill to set up a single U. S. company to handle international air commerce.

—The OPA revealed the arrest in Newark, N. J., of six men in connection with the ration coupon counterfeiting and distribution ring on the Atlantic seaboard.

July 7—The OPA reported in Chicago that "the use of counterfeit red coupons was at its height" with 8,000,000 points passed over the meat counters in May.

—The War Manpower commission abolished the 48-hour work week requirement for less essential industries in the Newark, N. J., area.

—The House Small Business committee reported that the Diamond Match company and the Swedish Match company through agreement "apparently control" the world market in "one of the world's largest cartel arrangements."

—The War department reported that 102 U. S. soldiers had been executed by court martial order during the war, all except one for murder or rape or both. The one exception was a man convicted twice of desertion.

—The Commerce department reported that farm employment in June totaled 9,090,000 compared with 7,950,000 in May. Total unemployment increased by 350,000 to 1,080,000 in June.

—In his report covering the fiscal year 1945, former Postmaster Frank C. Walker urged creation of the office of director of postal service and other changes, decentralizing the organization.

July 8—Members of the Newspaper and Mail Deliverers union voted unanimously to continue their New York city walkout until there was a contract with the Publishers' association in defiance of the government's work order.

—Rep. Joseph W. Martin, Jr., Mass., House Republican leader, urged an amendment to the Constitution to limit tenure of any President to two terms.

—Pvt. Clarence W. Bertuccio, guard at the prisoner of war camp, Salina, U., "for no apparent reason" sprayed the tents of sleeping German prisoners with machine gun fire, killing eight and wounding 20.

July 9—President Truman sailed July 7 from Norfolk, Va., for the "Big Three" conference near Berlin. Secretary of State James F. Byrnes accompanied him.

—A total sun eclipse, beginning in Idaho at 7:59 a.m. EDT, extended through Montana and into Canada, Greenland, Norway, Sweden, Russia and Siberia. In much of the northern hemisphere, only a partial eclipse was visible.

—The administration bill for increasing unemployment compensation to a maximum of \$25 a week was introduced into the House of Representatives.

—The NWLB sent striking paper deliverers in New York an ultimatum that unless they returned to work by 6 a.m. July 11 they would be deprived of their closed shop.

—The Justice department said the FBI completed its busiest fiscal year on June 30 with a record of 13,313 convictions.

—Secretary of War Henry L. Stimson ordered all qualified troops who had not served at least six months overseas to receive foreign assignments by May 1, 1946.

—The Department of Agriculture predicted the 1945 cotton crop would cover the smallest acreage in 60 years.

July 10—Five German soldiers were hanged in Fort Leavenworth, Kan., for the slaying of a fellow prisoner, Johannes Kunze, Nov. 4, 1943 at Tokawa, Okla.

—The Agriculture department reported

that the 1945 feed crops—corn, oats, sorghums—would probably be the smallest since 1943.

—16,000 striking employees of the Firestone Tire and Rubber company, Akron, O., refused a NWLB request to return to work.

—Secretary of the Treasury Henry Morgenthau jr., said 7th War Loan sales were \$26,313,000,000, approximately \$12,000,000,000 over the goal.

—Diamond Match company officials in New York denied charges by a House committee that it had cartel agreements with Swedish or any other match companies or monopoly with any domestic firm.

July 11—Sixteen opponents of the United Nations charter aired their charges before the Senate Foreign Relations committee on the third day of its hearings:

—The War Production board banned use of tin for civilian production because of a "serious" supply situation.

—The Greater New York CIO reaffirmed its no-strike pledge and backed the national CIO reconversion program of wage increases, a minimum wage, higher insurance benefits and stricter price and ration control enforcement.

—The Commerce department estimated income payments to individuals in May at \$12,856,000,000, four per cent over May, 1944, but below April's \$13,194,000,000.

—At the request of Defense Transportation Director J. Monroe Johnson, the Interstate Commerce commission barred railroads and commercial motor carriers to race horse and show animals, except circus animals.

—Heiress Barbara Hutton filed suit in Hollywood for divorce from actor Cary Grant.

—The Petroleum Administration for War announced a reduction in the supply of 100 octane aviation gasoline in order to increase production of Diesel fuel oil.

—The NWLB denied anthracite and bituminous operators authority to extend to various non-mining employees the wage increases won by the United Mine Workers.

July 12—Congress passed compromise legislation to extend the Fair Employment Practices commission another year, appropriating \$250,000.

—The NWLB warned 16,600 striking employees of Firestone Tire and Rubber company, Akron, O., that they would be deprived of contract benefit if they did not return to work by July 16.

—The House Banking committee approved making the Export-Import bank a permanent government agency and increasing borrowing powers to \$3,500,000,000.

—Selective service discontinued drafting of 4-F's over 26 years of age.

—Secretary of Agriculture Clinton P. Anderson charged Glenn L. Martin, airplane manufacturer, and his "agent," Henry L. T. Ulich, with a violation of government trading limits in buying rye futures on the Chicago Board of Trade.

—The House named Rep. John S. Wood, D., Ga., to be chairman of the Committee on Un-American Activities, succeeding Rep. Edward J. Hart, D., N. J., resigned.

—The National War Labor board rescinded all provisions of the Newspaper and Mail Deliverers union's contract with the Publishers' association of New York, allowing the publishers to deal with any other union. The NWLB declared the strike illegal.

—Rep. Clarence F. Lea, chairman of the Committee on Interstate and Foreign commerce, asked the House for a full investigation into the nation's transportation system to provide "remedies for the flaws."

—United Air Lines, incorporated, revealed a four per cent reduction in one-way air travel fares, effective Sept. 1, bringing rates to slightly below four and a half cents a mile.

—Officials of Cheplin Laboratories, Syracuse, N. Y., said penicillin would be released to the public as tablets, ointment and eyedrops on Aug. 1, but only on doctor's prescriptions.

July 13—The Senate Foreign Relations committee approved the United Nations Security charter 20-0. No reservations or amendments were made.

—The House and Senate completed action on a \$769,364,850 appropriations measure extending 20 civilian war agencies for the 1946 fiscal year. The OWI was to get \$35,000,000.

—The House approved 102-6 expansion of the lending authority of the Export-Import bank from \$700,000,000 to \$3,500,000,000 and sent the measure to the Senate.

—Secretary of Agriculture Clinton P. Anderson formally authorized non-federally inspected slaughterers to kill animals for shipment over state lines, effective July 18. He also ordered federally inspected packers to cut by 30 to 25 per cent for their production of army style beef for the government.

—The House Committee on Un-American activities assigned an agent to discover whether there was any basis for rumors of subversive activities in the Hollywood movie colony.

—The Interior department announced closing dates, extending from Oct. 15 through Dec. 15 for eight relocation camps in Utah, Arizona, Arkansas, California, Idaho and Wyoming.

July 14—Striking CIO United Rubber Workers of the Firestone Tire and Rubber company, Akron, O., voted to return to work July 16, ending a strike begun July 1.

—The NWLB took action against the AFL International Typographical union after its officers challenged the board to interfere with its demands that bylaws be written into wage agreements without recourse to collective bargaining, arbitration or NWLB adjustment.

—New York publishers warned striking deliverers to report to work at their regular times July 15 or face immediate dismissal.

—Sen. Hiram W. Johnson, R., Calif., who opposed the League of Nations in World War I, announced in Washington that he would vote against the United Nations Security charter.

July 15—A Washington, D. C. local of the AFL International Typographical union petitioned President Truman to oust Dr. George W. Taylor as chairman and member of the NWLB because he was "biased in favor of the publishers."

—New York's striking newspaper delivery men voted to continue their strike.

—The Western Defense command in San Francisco ordered the West Coast dimout ended Aug. 1 and advised governors of the eight western states that blackout regulations were no longer required.

—The National War Labor board ruled that members of the CIO International Woodworkers union with five years' seniority should have two weeks annual vacation. The

decision affected 326 pacific northwestern companies and 43,000 union members.

July 16—Secretary of Agriculture Clinton P. Anderson told the nation it must consume five per cent less food in 1945 than during "last year's eating spree."

—The Senate Foreign Relations committee submitted its official report on the United Nations charter, asking unreserved ratification.

—The nomination of Fred M. Vinson to be Secretary of the Treasury was sent to the Senate after Secretary Henry Morgenthau, jr., asked President Truman to be relieved of his duties as soon as possible.

—Debate on the Bretton Woods international money plan opened in the Senate.

—A National Housing agency and War Production board announced that lumber for emergency home repairs, except on farms, could be bought without permission from the Federal Housing administration.

—In a statement sent from Germany, President Truman appealed for 65,000 additional employees for western railroads to keep men and materials moving for the Pacific war.

—M. J. Madigan, New York, was named a member of the Aircraft Production board, succeeding Lieut. Gen. William S. Knudson, retired.

July 17—The ODT ordered all railway coaches, combination passenger and baggage cars and express cars pooled for immediate use of the military and "for such purposes as the ODT directs."

—Three thousand members of AFL unions stayed away from work on 21 government ships in two San Francisco bay shipyards as the jurisdictional dispute over employment of some CIO members spread.

—An Eastern Airlines plane collided in mid air with an Army bomber near Syracuse, S. C., killing three persons and injuring several. The bomber exploded in the air but the crippled liner landed 19 passengers.

July 18—The Senate voted 52-31 for immediate consideration of Bretton Woods legislation.

—The House of Representatives moved to adjourn July 21 until Oct. 8 after passing a bill extending the time in which veterans of this war might take advantage of the educational and loan features of the "GI Bill of Rights."

—A New York federal grand jury returned an indictment charging Paul Jean Marie Cavaille, a French citizen, with espionage, conspiracy to commit espionage and violation of the censorship code.

—Bills were introduced in the House and Senate proposing that legal maximum wages start at 65 cents hourly for an estimated 10,000,000 workers and rise after two years to 75 cents.

—A spokesman for the State department said it had no knowledge of a reported peace offer submitted by the Japanese through Premier Joseph Stalin.

—Dr. Vannevar Bush, director of the Office of Scientific Research and Development, suggested in a report to the White House that Congress establish a National Research Foundation to promote a national policy for scientific research and education at a cost of \$33,000,000 annually.

—The Navy department revealed that the U. S. had 1,500 warships and about 100,000 vessels of all types in its navy.

—A subcommittee of the House Military Affairs committee released the names of 16 commissioned and non commissioned army officers with backgrounds which reflected

Communism.

—The War Production board outlined the remainder of the 1945 munitions production program which showed a gradual drop of \$3,400,000,000 in December, 70 per cent of the March peak.

—The American Medical association in Chicago offered a 14-point program for "extending to all people in all communities the best possible medical care" without the need of increased taxation.

July 19—The Senate approved the Bretton Woods bill 61-16, and sent it to the House for concurrence in several amendments.

—The OPA revealed the first half of its program to put ceiling prices on civilian goods made in the reconversion period, assuring good profits for industry and protection against inflation.

—James Bove, secretary-treasurer of the Yonkers, N. Y., local of AFL International Hodcarriers Building and Common Laborers union of America, was sentenced in White Plains, N. Y. to prison from 10 to 20 years for looting the local's treasury.

—The Army again seized five Chicago units of Montgomery Ward and company because of the firm's failure to obey NWLB directives.

—Rep. John E. Rankin, D. Miss., suggested in the House that Secretary of War Henry L. Stimson, Under Secretary Robert P. Patterson and Assistant Secretary John J. McCloy resign because men with communist backgrounds had held army commissions.

—Triangle Publications, incorporated, publishing three daily racing papers in New York City and the Newspaper and Mail deliveries union agreed on a formula to end the latter's strike against Triangle.

—Acting on an order from President Truman, the government seized control of the Houston, Tex., rubber plant of the Sinclair Oil company which was threatened by a strike of the CIO Oil Workers International.

—The WPB reported the U. S. cost of war averaged \$7,400,000 monthly in 1944.

—The Senate passed by voice vote the tax bill designed to provide relief for business. A relief clause for reorganized railroads was stricken and the measure sent to the House.

July 20—The CIO United Rubber Workers ordered about 6,000 workers of the Detroit plant of the U. S. Rubber company to return to work.

—The House approved changes made in Bretton Woods legislation by the Senate and the bill was sent to President Truman for his signature.

—Secretary of the Interior Harold L. Ickes said it was imperative to send 6,000,000 tons of coal to Europe for use next winter.

—Washington disclosed 70 House members had signed a petition asking President Truman to revise the Little Steel wage formula and permit wage increases to at least 20 per cent.

—The Bureau of Census reported an increase of 22 per cent in the number of home owners in 1944 over 1940—19,000,000 against 15,000,000.

—The Labor department said non-agricultural employment in June was 37,495,000. This was 137,000 less than in May and 1,333,000 under June, 1944. It was the first May-June drop in seven years.

July 21—The Senate voted for American membership in the United Nations Food and Agricultural organization, the third international plan approved in support of the world security charter. Provision was made

for payment of \$625,000, the United States' share of expenses for the first year.

—The ODT banned rail group tours and sale of rail tickets to travel agencies.

—Capt. E. M. Zacharias, official U.S. spokesman on broadcasts to Japan, appealed to the Japanese by radio to surrender unconditionally.

—The War department said it would send 2,605 German prisoners from the U.S. to work in German coal mines within six weeks to relieve the coal shortage.

—Basic wage rates in urban manufacturing industries increased 1.6 per cent during the six months ended in April. It was the smallest rise since 1940 for comparable periods, the Bureau of Labor Statistics reported.

—The NWLB approved vacation pay benefits for 331,000 General Motors employees, eligible because of layoffs due to production cutbacks.

—The 72½-ton "Hawaii" Mars," navy cargo carrier and the world's largest flying boat, was launched in Baltimore, Md.

July 22—The Army's Assistant Surgeon General announced the task of bringing home all transportable sick and wounded soldiers would be completed about July 27.

—The Petroleum Industry War council predicted a fuel shortage in homes because of the total demand for crude oil and its products in war.

—The OPA and WPB ended rationing of gas cooking and heating stoves effective July 31.

—The National War Labor Board announced it had ordered Montgomery Ward and company officials to a Washington hearing Aug. 3. The company was accused of ignoring a NWLB closed shop order in seven cities.

—A convention of the New York State Communist political association in New York city voted unanimously in favor of returning the national organization to its status as a political party.

—Reginald G. Coombe, president of the Memorial Hospital for the Treatment of Cancer and Allied Diseases, planned to expand the hospital into the largest cancer center in the world.

—A Harvard committee outlined a program to improve high school and college systems. Its report recommended abolition of the free elective system and less specialization. It proposed several required courses in "general education."

July 23—P. S. Painter, acting president of Texas university, said in Austin that credits earned at the institution, which had been placed on probation July 22 by the Southern Association of College and Secondary Schools, Memphis, Tenn., would not be invalidated by the action.

—Serious floods due to heavy precipitation caused \$2,000,000 damages in northern New Jersey and possibly as much in the Berkshire Mountain area of Massachusetts.

—President Truman proclaimed Aug. 1 as Air Force day.

—The OPA filed suit in federal court, Pittsburgh, against the Pittsburgh Coal company and the Champion Coal company asking \$1,050,000 for alleged price ceiling violations.

—The Civil Service commission said 16,051 veterans were placed in federal civil service jobs during June, including widows and wives of disabled veterans.

—Sen. Tom Conally, chairman of the Foreign Relations committee, presented the

United Nations charter to the Senate for discussion.

—The FBI arrested three employees of J. K. Smit and Sons incorporated, industrial diamond dealers in New York, on charges of conspiring to defraud the government.

—The Internal Revenue commission informed the House of a Treasury ruling permitting the \$2,500-a-year expense allowance of members to go tax free if all the money were spent for official duties.

—Fred M. Vinson took the oath of office as 53rd Secretary of the Treasury. Former Federal Loan Administrator John W. Snyder was sworn in as his successor as Director of the Office of War Mobilization and Reconversion.

July 24—Attorney Gen. John R. Dethmers of Michigan submitted a report in Lansing charging general maladministration and moral laxity at the State Prison of Southern Michigan near Jackson which permitted inmates to gamble and to leave the institution to visit houses of prostitution.

—Secretary of Agriculture Clinton P. Anderson said the national wheat planting goal for 1946 was 68,875,000 acres, compared to the 1945 total of 68,808,000.

—Sen. Burton K. Wheeler, D., Mont., attacked the United Nations charter in the Senate as incapable of dealing with Europe's "rampant totalitarian tyranny," but said he could see no alternative to the document.

—E. P. Carville, D., resigned as governor of Nevada and was named by his successor, Lieut. Gov. Vail Pittman as U.S. Senator.

—The Navy announced an age-service system whereby some 30,000 older officers and enlisted men would be released by December.

July 25—Interstate railroad passenger fares were cut from 2.2 cents to 1.65 cents a mile in Alabama, Tennessee, Kentucky and North Carolina in accordance with a Supreme court decision.

—The War Production Board reported war contract reductions in the first six months of 1945 totaled \$16,300,000,000 and affected nearly 2,500 plants.

—Henry Morgenthau, Jr., denied President Truman had requested his resignation, while repeating the assertion his departure was not of his own choosing.

—Henry J. Kaiser and Joseph W. Frazer, head of Graham-Paige Motors corporation, announced formation of the Kaiser-Frazer corporation, to be owned jointly by their companies. They would produce two post-war autos—the Kaiser and the Frazer.

July 26—The Communist Political association opened its national convention in New York with attacks on Earl Browder and his "opportunistic errors."

—The Senate War Investigating committee charged Curtiss-Wright corporation and the Army Air Forces with responsibility for faulty inspection of war planes at the company's Buffalo, N. Y., plant.

—The Interstate Commerce commission granted railroads an additional three months to make effective freight charges it ordered.

—Sen. Harry F. Byrd, D., Va., reported federal civilian employees increased by 126,130 in June and asked that at least 300,000 federal employees be "immediately eliminated."

—Chairman Malcolm Ross of the Fair Employment Practices commission said the agency would close five field offices in August and cut its staff from 117 to 51 because of its budget cut.

About 2,500 Wright Aeronautical cor-

poration employees returned to work, while other strikers, members of the United Automobile Workers, voted to remain out.

July 27—Sen. Walter F. George, D., Ga., chairman of the Finance committee, predicted a possible federal tax reduction after the surrender of Japan of about \$18,000,000,000.

—Crime rose 8.4 per cent from January to July compared with the same period in 1944, the FBI reported.

—The Wierton Steel company, Wierton, W. Va., granted a five per cent wage increase to salaried employees, affecting about 1,200 currently earning under \$5,000 yearly.

—J. A. Krug, WPB chairman, said the exodus of workers from aircraft plants and other war industries had developed into "a very serious situation," threatening production schedules.

—Secretary of Agriculture Clinton P. Anderson announced subsidization by the Commodity Credit corporation of sheep and lamb raisers and feeders to encourage production.

—The Communist Political association convention voted unanimously to disband and to reorganize the Communist Party.

July 28—The War department said the army lost a total of 1,883,000 men between Pearl Harbor and April 30, 1945 as follows: 238,000 deaths (battle and otherwise); 1,336,000 honorable discharges; 106,000 prisoners and missing, and 203,000 other discharges, retirements and men on inaction status.

—The Bureau of Agricultural Economics predicted food production in 1945 might be three to four per cent below 1944 but 33 per cent above the 1935-39 average.

—The Senate ratified the United Nations charter 89-2 with Senators William Langer, R., N. D., and Henrik Shipstead, R., Minn., dissenting.

—The Communist party convention in New York formally deposed Earl Browder and named William Z. Foster as its head.

—The London, Ky., federal court sentenced 33 Harlan county precinct officers to a year and a day in prison and fined them \$100 each for 1942 election frauds.

—Daniel P. Wooley, price administrator in the New York area, discharged Paul R. Ross, OPA regional enforcement executive, who was suspended June 22 for maladministration.

—A B-25 bomber, en route from Bedford, Mass., to Newark, N. J. in a fog, crashed into New York City's Empire State building at a point 915 feet above the street. The three occupants of the plane and 10 persons in the building were killed. Damage was estimated at \$500,000.

—Bertram R. Campbell, New York, who served more than three years in Sing Sing on a forgery conviction, was cleared by a signed confession from Alexander D. L. Thiel.

July 29—The War department said Brig.-Gen. Elliott Roosevelt had asked release May 11 from active duty.

—The U. S. Coast Guard revealed its rescue work saved 4,243 military personnel and merchant seamen in the European phase of the war.

—The Negro Newspaper Publishers association voted to form the NNPA News Service, a national non profit news gathering organization.

—The National Safety Council reported the country's traffic death toll for the first six months of 1945 as 11,160, one per cent

lower than the first half of 1944.

July 30—American Red Cross Chairman Basil O'Connor said home front disasters in the fiscal year 1945 were fewer—243 operations compared to 259 in 1944—but more catastrophic, with relief costs about \$3,500,000 higher for 1945 than in the previous year.

—The ODT said 1,700 seized Chicago truck lines would be returned to their owners Aug. 1.

—The Army seized two Detroit tire producing plants of the U. S. Rubber company in an effort to recoup the loss of B-29 tires caused by a 17-day work stoppage.

—Sen. Tom Connally, Foreign Relations chairman, suggested that the President be authorized to appoint the World Security council representative of the U. S., without further Congressional action.

July 31—The State department made public draft proposals for the United Nations educational organization, to be discussed at the November session in London.

—Brig.-Gen. Elliott Roosevelt said in Washington that the responsibility for "my own business affairs" was "mine alone." He termed as "deliberate infamous lie" a report that Franklin D. Roosevelt assisted in his monetary affairs.

—Under Secretary of War Robert P. Patterson said the Army would move 25,000 soldiers to the west coast by plane to relieve pressure on railroads.

—The U. S. Circuit Court of Appeals in New York said the NBC and the American Broadcasting company would have to bargain collectively with "platter turners" in all their stations except Chicago, through the National Association of Broadcast Engineers and Technicians.

AUGUST

Aug. 1—Post war legislation to stimulate housing construction was introduced by Senators Robert F. Wagner, D., N. Y., and Alen J. Ellender, D. La. The bill provided for federal subsidies of \$133,000,000 a year and embraced slum clearance, low cost rental housing and rural dwelling units.

—The Labor department said the cost-of-living index as of June 15 stood at 129 per cent of the 1935-39 average, the highest since the spring of 1921.

—The National War Labor board denied travel time pay and a 10-cent hourly increase to United Mine Workers, District 50, members employed at the Newport, Ind., ordinance plant of Du Pont de Nemours company.

—Brig.-Gen. Lawrence G. Fritz piloted an Army Transport command C-69 from New York to Paris, 3,600 miles in 14 hours, and 12 minutes to break the previous non-stop flight record of 18 hours.

—Pvt. Harold W. Garland, guarding 11 German prisoners near Ovid, Colo., shot and killed three "when it looked like they were going to rush me."

—Harold D. Smith, federal budget director, revised figures for the 1946 fiscal year increasing expenditures \$2,800,000 over the January estimate, and decreasing estimate revenues \$2,200,000,000.

Aug. 2—Sen. Arthur H. Vandenberg, R. Mich., asked Secretary of Labor Lewis F. Schwellenbach to call a labor-industry government conference to work toward post war industrial peace. Schwellenbach indorse the suggestion.

—W. R. Ronald, Agriculture department reorganization committee member, recommended "amputation" of such agencies as

the Farm Credit administration, Farm Security administration and Soil Conservation service to save the Agriculture department about \$500,000,000 yearly.

—The War department announced a program to recruit 10,000 Wacs within six months.

Aug. 3—President Truman, en route home aboard the "Augusta," told reporters he had made no secret agreements at the Berlin conference.

—Col. C. J. Hauck jr., liaison officer between the War department and the House Military Affairs committee, denied the accusation of Rep. Andrew J. May, committee chairman, that in the Army "promotion seems to be a customary reward for brutality."

—Following refusal by Montgomery Ward and company officials to obey National War Labor board directives, the board voted unanimously to refer the case to Stabilization Director William H. Davis.

—Yale university adopted a revised undergraduate program beginning September, 1946, limiting electives to 11 out of 20 courses necessary for the bachelor's degree and requiring summer reading.

—The Memphis (Tenn.) Board of Censors banned the eight-year-old movie "Dead End" because "it might influence boys to become gangsters."

—Producers' ceiling prices on soft coal in 13 districts were raised by 3 to 20 cents a ton, an average of 3.47 cents, by the OPA to compensate for higher wages.

—The National War Labor board approved a one and three-quarter cents an hour wage raise to 470 members of the Mailers union, affiliate of the International Typographical union employed by the Publishers' association of New York City.

—The Erie (Pa.) plant of the General Electric company produced its first complete household electric refrigerator since April 30, 1942.

Aug. 4—Washington said President Truman signed the Bretton Woods legislation, making the United States the first country to approve the world bank and fund.

—The War Manpower commission's Chicago board gave highest manpower priority to western trains with Chicago terminals.

—Deputy Solid Fuels Administrator Dr. C. J. Potter said 14 wildcat coal mine strikes had started Aug. 3 and nine others had ended. Coal losses due to strikes since April 1, were 12,445,920 tons.

—The AFL International Typographical union defied a NWLB directive for its members to return to work on Birmingham newspapers.

—Acting Secretary of State Joseph C. Grew said Americans repatriated from the Philippines had been brought home without cost to themselves, with the War department footing the bill.

—Sen. Arthur H. Vandenberg, R., Mich., recommended to Secretary of State James F. Byrnes that American republics have exclusive responsibility of policing the Western Hemisphere. He suggested the President be free to commit a limited quota of U.S. armed forces to the Security Council.

—Acting Secretary of State Joseph C. Grew denied a New York Times report of June 29 that the U.S. had "any present plans" to authorize a \$3,000,000,000 to \$5,000,000,000 credit to Great Britain.

—The National War Labor board refused a request for two weeks' severance pay by the AFL International Association of

Machinists, representing 12,000 employees of the government-owned Douglas Aircraft plant at Tulsa, Okla.

—The Association of American Physicians and Surgeons, incorporated, asked President Truman for an investigation of rumors that there was a surplus of doctors in the armed forces.

—The recently launched "Hawaii Mars," largest flying boat, sank in Chesapeake bay near Rock Hall, Md., when a rough landing ripped the hull. One person of the 10-man crew was injured.

Aug. 6—Sen. Hiram W. Johnson, R., Calif., 79, died in his sleep at Bethesda Navy hospital in Washington, D. C. of cerebral thrombosis. Johnson voted against the first League of Nations and opposed the United Nations Security charter.

—Maj. Richard Bong, leading war ace of the United States, was killed at Burbank, Calif., while testing a jet-propelled fighter plane which crashed.

—The U. S. Board of Immigration Appeals ordered Peter H. Bergson, chairman of the Hebrew Committee of National Liberation, to leave the U.S. by Nov. 1 or be deported to Palestine, of which he is a naturalized citizen.

Aug. 7—The Navy said two German destroyers, flying Nazi and U.S. colors, arrived at Boston harbor, manned by volunteer German crews under American supervision.

—The Federal Communications commission said it would lift its wartime freeze on the construction of new radio stations within 60 days.

—The Petroleum administration authorized immediate upgrading of 158,000 barrels a day of high test automotive gasoline. This would virtually double the civilian supply.

—Georgia voted to adopt a streamlined constitution to replace its often-amended charter of 1877.

—The Selective Service bureau reported that the number of men reaching the age of 18 each month was insufficient for induction quotas and that more men between 18 and 30 years, deferred for occupational reasons, would be inducted.

—The executive council of the American Federation of Labor, in a quarterly session in Chicago, accused Congress of being "remiss in its duty" because it recessed without acting on legislation such as expanded unemployment compensation, increased minimum wage rates, and a broadened Social Security system.

—President Truman arrived at the White House from the Berlin conference and immediately conferred with the members of his cabinet.

Aug. 8—Directors of the National Association of Broadcasters recommended that daytime radio commercials be cut to the same length as those on night programs.

—The executive council of the AFL in Chicago denounced the Ball-Burton-Hatch labor bill as a "thoroughly obnoxious" measure, protesting it would destroy workers' fundamental freedoms.

—Dr. Frank Aydelotte, American secretary to the Rhodes Scholarship trustees, announced in Princeton, N. J., a plan to send 32 war veterans to Oxford university on War Service Rhodes scholarships.

—The Hawaiian Sugar Planters association signed an agreement with the CIO International Longshoremen's and Warehousemen's union, affecting 20,000 sugar mill, factory and agricultural employees in the nation.

—Byron Price, censorship director, lifted the ban on individual mailing of books, magazines, newspapers, catalogues, printed matter and films to neutral European countries.

—President Truman signed the United Nations charter, making the United States the first nation to ratify this document.

Aug. 9—President Truman called a conference of top government and scientific men to discuss the atomic bomb.

—The FBI disclosed Nazi spies sent here to get U.S. atom secrets were used to fill out the FBI's picture of Germany's research.

—President Truman appointed Edward R. Stettinius Jr., as the U. S. representative on the Preparatory Commission of the United Nations with the rank of ambassador.

—President Truman told the nation that Russia's declaration of war on Japan on Aug. 8, and the use of the atomic bomb had been two of the secret arrangements agreed upon at the Potsdam conference.

—The House Military Affairs committee retracted "as a case of mistaken identity" its accusation that Lieut. Edward W. Finkelstein, one of 16 army personnel similarly named, had a "communistic" background.

—Attorney General James A. Emmert of Indiana revealed in Indianapolis that D. C. Stephenson, former Ku Klux Klan Dragon serving a life sentence for murder, was pronounced insane by a psychiatrist in 1942.

—Thirty-four persons were killed and more than 40 injured when the second section of the Great Northern Railway's Empire Builder crashed into the observation car of the first section at Michigan, N. D.

—The Westinghouse Electric corporation and the Glenn L. Martin company announced in New York a new plan for television and frequency modulation broadcasting from airplanes flying in the stratosphere. It would obviate the need for ground stations.

Aug. 10—The Agriculture department predicted that 1945 food crops would be the third largest in the nation's history. It forecast favorably for corn, wheat, oats, sugar cane, sugar beets, tobacco, potato and other crops.

—The Social Security board, reporting on 10 years of social security, said nearly \$8,750,000,000 had been paid in benefits to individuals and families, unemployed, dependent, aged and the blind.

—Of six persons arrested June 6 in connection with the theft of confidential government documents, Emmanuel S. Larson, Andrew Roth and Philip J. Jaffee were indicted on conspiracy charges in Washington by a Federal grand jury.

—William Green, president of the American Federation of Labor, promised "restraint on strikes" despite the fact that labor's no-strike pledge terminated on V-J day.

Aug. 11—Secretary of the Interior Harold L. Ickes proposed that Alaska become the 49th State of the Union and share the "American right of self government."

—The Petroleum administration authorized domestic production of a new "superfuel" aviation gasoline of a higher grade than 100-octane.

—Sen. Alben W. Barkley said that at President Truman's request, Congress would return Sept. 4, about a month earlier than scheduled, to work on reconversion legislation.

—The War Labor board authorized straight time pay for time off on V-J day.

—The Agriculture department said pay-

ments for all programs under the Agricultural Adjustment agency in 1945 fiscal year totaled \$319,529,678.79.

Aug. 12—Col. Charles L. Hull, U. S. division engineer, ordered construction halted immediately on ordnance plants on the Ohio river.

—The War department said soldiers discharged under the point system would not be recalled unless they volunteered for further service. Those discharged under conditions other than honorable were eligible for induction under Selective Service.

—Jack Frye, president of Transcontinental and Western Air incorporated accused Pan American Airways of attempts to confuse and delay America's international air transport program.

—Dr. Robert M. Hutchins, chancellor of the University of Chicago, reversed his opposition to "a world state" because of the atomic bomb.

—British Prime Minister Clement R. Attlee issued a statement in London pledging his government's cooperation with President Truman's proposal to guard the secret of the atomic bomb so that it would "be made to conduce to peace among nations" and become "a fountain of prosperity."

Aug. 13—A sudden unexplained blaze at the Export Box and Sealer company, Detroit, razed the plant, killing 13 persons and injuring 52.

—Senate Committee chairmen called their committeemen for August hearings to prepare Congress for early reconversion action, particularly on the "full employment" bill, unemployment compensation and taxation.

—The Solid Fuels administration lifted restrictions on coal deliveries. Beginning Aug. 15, householders and industrial plants might receive 80 per cent of their normal needs.

—The OPA established rules for reconversion price ceiling determination on building materials, plant machinery and rubber.

—Agriculture Secretary Clinton P. Anderson said civilians would get about 281,000,000 pounds of canned fish in the remainder of 1945, an 89,000,000-pound rise.

—The Civil Aeronautics board gave these air lines 10 days in which to show cause why their air mail rates should not be reduced from 60 cents to 45 cents a ton-mile: American Airlines, United Air Lines, Eastern Airlines and Transcontinental and Western Air.

—The Associated Broadcasting corporation filed suit in Federal district court, Grand Rapids, Mich., to restrain the American Broadcasting company, formerly the Blue Network, from calling itself the ABC network.

—The Solid Fuels administration lifted restrictions on coal deliveries. Beginning Aug. 15 householders and industrial plants might receive 80 per cent of their normal needs.

Aug. 14—President Truman announced at 7 p.m. EWT that Japan had surrendered unconditionally in accordance with the Potsdam declaration. Commanders in the field issued "cease fire" orders. (See p. 51 for account of Japanese surrender.)

—The U. S. War and Navy departments told the story of radar. In London Sir Stafford Cripps told a press conference that radar contributed to the winning of the war more than any other single factor. (See p. 686)

—The War Manpower commission announced abolishment of all manpower controls over employers and workers. Workers

might be hired where and when employers desired.

—The Navy announced nearly \$6,000,000, 000 worth of prime contracts were being cancelled as a result of Japan's surrender in addition to the previously announced \$1,200,000,000 cutback in the shipbuilding program.

—The AFL International Typographical union's month-long strike against the three daily newspapers of Birmingham, Ala. ended.

—Gov. Earl Warren of California, appointed Maj. William F. Knowland, 37, publisher of the **Tribune**, Oakland, Calif., as U. S. Senator to succeed the late Hiram W. Johnson.

—The Association of American Railroads announced in Washington that all freight en route to U. S. ports was halted. Army and Navy freight would be unloaded at storage depots pending disposal.

Aug. 15—Price Administrator Chester Bowles said rationing of gasoline, fuel oil, oil stoves, canned fruits and vegetables had ended and tire rationing would end soon.

—Gen. Omar N. Bradley was sworn in as Administrator of Veterans' Affairs in Washington.

—Censorship Director Byron Price announced that voluntary censorship was ended.

—An army court martial sentenced three prisoners at Fort Benjamin Harrison, Ind., disciplinary barracks to imprisonment at hard labor for inciting the May 31 riot there.

—Members of the International Typographical union voted acceptance of an offer by publishers of Jersey City and Bayonne, N. J., settling a two-month strike.

—The War department announced it would release 5,000,000 men within a year and discharge immediately all those over 38 and the 78,000 high point men in the country.

—Seattle, Wash., revealed that out of possibly thousands of bomb balloons launched by Japan, 230 landed in North America, mostly along the West coast. Results were negligible.

—Treasury Secretary Fred M. Vinson said a Victory loan drive would begin in order to bring overseas men home, provide their mustering out pay and care for the disabled.

—The Army cancelled \$100,000,000 in unfilled ordnance contracts in nine Western states, and the Navy halted construction of 28 additional ships at three Kaiser shipyards in Portland, Ore.

—The War department released a report by Prof. H. D. Smyth of Princeton university revealing that the active material in the Hiroshima atomic bomb, Aug. 6, was plutonium or U-239 obtained from uranium, and not U-235.

—War Production Chairman Julius A. Krug reported that only 30 or 40 of the original WPB controls would remain in effect at the end of the week. Exceptions would include rubber, tin, some textiles, lumber and hard fibres.

—War Mobilization Director John W. Snyder made public his report to President Truman on reconversion, urging these objectives:

1. Jobs for all those willing and able to work.
2. A steadily rising standard of living.
3. Stabilization of the economy to avoid inflation or deflation.
4. Increased opportunities for farmers and businessmen.

—Enoch L. (Nucky) Johnson, former At-

lantic City Republican leader, was paroled from the U. S. Penitentiary at Lewisburg, Pa., after serving four years of a 10-year term for evading income taxes.

Aug. 16—President Truman said he would call an industry-labor conference and asked that strikes be kept at a minimum, and ordered continuation of the NWLB to handle disputes until the conference ended.

—Seven governors, headed by Gov. Edward Martin of Pennsylvania, asked that unemployment services control be returned to the states.

—After investigating the Army bomber-Empire State crash, the War department found the pilot guilty of misjudgment, blamed the accident on unfavorable flying conditions, and rebuked the La Guardia field for clearing the pilot to Newark, N. J.

—The Civil Service commission barred all applications for federal jobs from persons who were not veterans or who had not worked for the government before.

—A strike in St. Louis, Mo., by a carriers' local of the AFL International Printing Pressmen and Assistants union halted printing of three newspapers, the **Post-Dispatch**, the **Star-Times** and **Globe Democrat**.

—Under Secretary of State Joseph C. Grew resigned and Dean Acheson succeeded him.

Aug. 17—The Petroleum Administration for War ended limitations on the manufacture of high test gasoline and released it for use by civilians.

—Archibald MacLeish and Gen. J. C. Holmes resigned as assistant secretaries of state.

—ODT Director J. Monroe Johnson ended curbs on travel to sporting meets, professional and amateur.

—Army Air Forces Gen. Henry H. Arnold revealed the existence of new weapons, some not completed, such as a monster bomber surpassing the B-29, and robot jet propelled atomic bombs guided by television and radar.

—The Board of War Communications lifted the ban on congratulatory and singing telegrams.

Aug. 18—President Truman directed the OPA and the Secretary of Agriculture to take steps "to assure that the cost of living and the general level of prices shall not rise."

—President Truman asked that V-J Day, when proclaimed, be a day of work since Aug. 15 and 16 were observed as holidays.

—ODT Director J. Monroe Johnson ended the nationwide 35-mile-an-hour speed limit.

—The Federal Works agency suspended all projects financed entirely by federal money and not yet under consideration. FWA allotments would continue until Oct. 31 on already approved projects.

—The War Manpower commission said use of prisoners of war in non-agricultural work would end as soon as army personnel could replace them.

—Brig. Gen. Frank T. Hines was named U. S. Ambassador to Panama.

Aug. 19—The Committee for Economic Development estimated on the basis of an 18-month survey among manufacturers in 20 leading industries that 54,448,000 workers would be employed in civilian jobs by September, 1946.

—CIO United Rubber Workers employed at the five Akron, O., plants of the Goodyear Tire and Rubber company voted to end their wartime no-strike pledge and negotiate for return to the pre-war 36-hour work week.

—American, Eastern and United Airlines

cut passenger fares to about four and a half cents per passenger mile.

—James E. Markham, alien property custodian, said he held \$22,660 in royalties due Adolf Hitler for the U.S. sales of his book, **Mein Kampf**.

Aug. 20—The War Production board cancelled 210 production controls, leaving about 130 in effect. A wide range of consumer products was released as well as materials needed to manufacture them.

—President Truman urged haste in enactment of the "full employment" bill.

—War Manpower Commissioner Paul V. McNutt announced a government campaign to enroll 12,000 war veterans in the fall in medical and dental schools to meet the nation's post war needs for doctors and dentists.

—Montgomery Ward and company filed a \$1,300,000 suit in the Kansas City, Mo., federal district court against the CIO United Retail, Wholesaler and Department Store Employees and members. Defendants were charged with injuring the company's good name and credit by printing defamatory matter in the publication **Spotlight**.

—The OPA ended rationing of farm implement and industrial-type tires.

Aug. 21—President Truman revoked the three-year-old executive order providing premium pay for holiday work by war workers, as necessary only "in prosecution of the war . . . to insure uniform treatment."

—The War Production board predicted possible production of 3,500,000 civilian radios by the end of 1945.

—Col. Frank McCarthy, general secretary of the War department, was named an assistant Secretary of State to replace Gen. J. C. Holmes.

—The Foreign News Bureau of the OWI went out of existence at midnight.

Aug. 22—The Army Air forces said it would discharge more than 1,400,000 of its 2,300,000 men within a year under a new demobilization plan.

—Joseph D. Numan, Jr., commissioner of internal revenue, said employers might increase salaries without government approval.

—President Truman welcomed Gen. Charles de Gaulle in Washington.

—The Navy released Robert W. (Bob) Feller, pitcher for the Cleveland Indians, from active duty.

—Philip J. Murray, president of the CIO United Steel Workers, suspended all officers of Youngstown (Ohio) Local 1462 whose members took part in a 23-day wildcat strike at the Youngstown Sheet and Tube company.

—Price Administrator Chester Bowles said sugar controls would be the last to be dropped, predicting no marked increase in current rations.

—Secretary of State James F. Byrnes reinstated John S. Service, foreign service officer, exonerated in the grand jury investigation of confidential government document removal.

—Secretary of the Treasury Fred M. Vinson announced that the Victory loan campaign would start Oct. 29 and end Dec. 8, with a goal of \$11,000,000,000. This would be \$3,000,000,000 under the Seventh War loan total.

—The Federal Communications commission allowed amateur radio operators to go on the air again, in the band between 112 and 115.5 megacycles.

—The U.S. Census bureau said the

country's population had increased more than 8,000,000 since 1940, bringing the total to about 139,682,000 as of July 1.

Aug. 23—President Truman conferred by telephone with British Prime Minister Clement R. Attlee on Lend-Lease and later told reporters cessation of the loan would not work undue hardship on Britain.

—President Truman told French reporters the United States had not had a square deal in the French press.

—President Truman said his V-J day proclamation Aug. 14 did not mean the formal end of the war. That would be up to Congress to declare. He cautioned Congress to pass reconversion legislation with care.

—The Army and Navy announced they would release through Reconstruction Finance corporation 386 surplus government-owned plants with more to be added later.

—On a Presidential order the ODT seized the Illinois Central railroad to prevent a threatened strike by the Brotherhood of Locomotive Engineers and Firemen.

—Secretary of the Interior Harold L. Ickes proposed on the basis of production estimates of 575,000,000 tons for domestic needs, that 8,000,000 tons of bituminous coal be sent to Europe by the end of 1945, instead of the scheduled 6,000,000.

—President Truman ordered all federal departments to return to the basic 40-hour work week not later than Sept. 9 and to discontinue requirements for work on public holidays.

—The FBI arrested 118 dining car employees of the New York Central and Erie railroads on charges of conspiracy to steal money from troops, civilians and railroads.

—Henry J. Kaiser assailed RFC's mortgage readjustment plan for his Fontana steel plant because it "disbarred" the western public from lower cost steel and said he would carry his fight for it "to Congress and the people."

—The Army cancelled contracts for more than 10,700,000 pairs of boots and shoes.

Aug. 24—The NWLB took action to refer 3,000 pending disputes back to the principals for settlement through collective bargaining.

—Dr. George B. Pegram, dean of Columbia university faculties, was named acting president of Columbia to succeed Dr. Nicholas Murray Butler, resigned, effective Oct. 1.

—In spite of British protests against termination of Lend-Lease, including one by Prime Minister Clement R. Attlee to the House of Commons, the U.S. government remained firm in its stand that it had to end with the war. Foreign Economic Administrator Leo T. Crowley said countries might still get supplies, the only difference being that after V-J day they would pay cash or obtain credit through the Export-Import bank.

—The War Production board removed all controls on automobile output for production of as many passenger cars as plant capacities would permit.

Aug. 25—The Federal Communications commission revised its frequency modulation regulations increasing from 70 to 80 the channels originally allocated to FM "in recognition of the heavier frequency needs of the more populous northern section."

—President Truman and Gen. Charles de Gaulle ended their talks in Washington, expressing "fundamental harmony and agreement" to establish closer cooperation in the future.

—President Truman ordered that 24 firms seized by the government to avert work stoppages be returned to their owners "as soon as practicable."

—The ODT said all wartime controls over local bus, trolley, coach and street car service would be lifted Aug. 31.

—Raymond M. Foley, commissioner of the Federal Housing administration said more than 10,000 private financial institutions throughout the country were ready to start on post war home building with FHA aid.

—Seven German captives were hanged at Ft. Leavenworth, Kans., for murdering a fellow prisoner whom they accused of turning traitor.

Aug. 26—The War department said it would draft 50,000 men monthly, a drop of 30,000 a month since before surrender negotiations.

—The OPA outlined plans to assist small business to get under way in reconversion.

—The Census bureau reported that mid-western farmers were cultivating 10,000,000 more acres than five years ago.

Aug. 27—The Surplus War Property board said surplus property inventories were \$2,517,349,000 on July 31 and July declarations totaled \$446,556,000.

—President Truman told Congress that because of the "elements of danger" in the Pacific, the need for 1,200,000 U. S. soldiers in disorganized Europe and "the deep feeling" that veterans be speeded home, Selective Service should continue to draft men between 18 and 25 years of age.

—Secretary of the Navy James V. Forrestal said the Navy had speeded up demobilization, planning to release 2,900,000 men within a year and reduce enlisted personnel to about 500,000.

—Secretary of State James F. Byrnes named Assistant Secretary James C. Dunn his permanent alternate in the Foreign Ministers council to meet in London about Sept. 10.

—Rep. Harold Knutson, R., Minn., proposed a 20 per cent cut in individual income taxes, effective Jan. 1, to be subtracted after the current percentage was computed.

—President Truman asked Gen. Philip Fleming, federal works agency administrator, to obtain authority from Congress if possible to continue the child care centers necessary for servicemen's working wives.

—Dean Acheson was sworn in as Under Secretary of State.

—Secretary of the Interior Harold L. Ickes ordered a return to the 40-hour work week for his department's 44,453 employees.

Aug. 28—The War department told a House committee it would reduce its number from 8,050,000 men to 2,500,000 by July 1, 1946.

—The SEC reported net working capital of U. S. corporations reached a new high of \$46,900,000,000 in 1945's first quarter, \$1,400,000,000 over the same 1944 period.

—A three-day 110-mile-an-hour tropical hurricane caused floods and millions of dollars of damages in several cities and towns of the Texas coast.

—Secretary of State James F. Byrnes ruled that U. S. citizens might travel to all the Americas and adjacent islands without passports.

—The Civil Aeronautics administration announced Oren P. Harwood and Gilbert B. Smith, New York CAA aides, resigned after being charged Aug. 17 with misuse of agency regulations.

Aug. 29—President Truman made public army and navy reports on the unpreparedness and responsibility for the Pearl Harbor disaster, Dec. 7, 1941.

—The War Manpower commission said a survey of the labor market showed 2,000,000 war workers released from jobs since the Japanese surrender.

—Secretary of State James F. Byrnes said he would take John F. Dulles and Benjamin V. Cohen with him as advisers at the London meeting of Foreign Ministers.

—The Labor department reported there were 500 strikes in July, 15 more than in June and the highest July total in five years. About 290,000 workers were involved and 1,500,000 man-days lost.

—The House Ways and Means committee denied Elliott Roosevelt's request for a full public report on his loans because federal law prohibited such publication "unless through a report to Congress."

Aug. 30—President Truman said "the country is as much to blame as any individual" for the Pearl Harbor disaster since wherever the late President Roosevelt pushed preparedness he was "vilified" and "stified."

—In a Lend-Lease report to Congress, President Truman said that to collect the \$42,000,000,000 for supplies sent to the Allies for war use would help sow "the seeds of a new world conflagration."

—Judge Matthew T. Abruzzo in Brooklyn federal court held that a veteran of World War II, Abraham Fishgold, was entitled to the job he held before entering service, even if this meant dismissal of a worker with greater seniority.

—The Commerce department said the nation's per capita income virtually doubled during the war, showing a jump from \$575 in 1940 to \$1,117 in 1944.

—The Navy returned five Akron plants of Goodyear Tire and Rubber company to management control after eight months of government administration.

—President Truman abolished the 48-hour minimum work week for war plants and ordered time and a half pay for hours over 40.

—President Truman named Byron Price, former censorship director, his personal representative in charge of public relations between U. S. occupation forces and the German people.

Aug. 31—President Truman abolished the OWI and officially transferred its foreign information functions, and those of the Office of Inter-American affairs, to a temporary International Information service under the State department.

—The NWLB ordered a \$45 a month increase in seamen's wages to compensate for further bonus cuts by the Maritime War Emergency board of \$2.50 per day and a reduction of bonus areas.

—Price Administrator Chester Bowles reaffirmed the OPA's policy of continued rent control during reconversion.

—The Census bureau said 49,308 marriage licenses were granted in July, 22.1 per cent more than in July, 1944.

SEPTEMBER

Sept. 1—The American Association of Railroads imposed an embargo on grain shipments into Minneapolis and St. Paul, Minn., and the head of the Great Lakes because the manpower shortage at Minnesota was holding up 3,542 loaded cars.

—The Navy announced release of 8,500 V-12 students to inactive duty Nov. 1. The

remaining 25,000 would graduate or were to continue their college training as apprentice seamen on active duty.

—The OWI foresaw a world wide coal shortage. Estimated deficits were 15,000,000 tons of bituminous and 12,000,000 tons of anthracite for the United States. Fifty million tons would go to liberated European nations.

—On receipt of news that the Japanese had signed the surrender papers, President Truman proclaimed Sept. 2 V-J day.

—The Committee for Economic development said, following a survey in the area, that the automotive industry in Detroit expected to make 6,000,000 cars a year in the future, compared to the 5,000,000 record of 1929.

—Members of the CIO Newspaper Guild and the AFL International Typographical, Stereotypers, and Mailers unions, idle during the AFL carriers strike, published a new paper, the St. Louis **Daily News** in St. Louis, Mo.

—A B-29 commanded by Lieut.-Col. Charles J. Miller landed at Washington, D.C., 17 hours and 21 minutes after taking off from Hawaii for a new non-stop flight record.

—Frances Perkins, former secretary of labor, accepted a teaching appointment at Cambridge, Mass., from Jan. 7 to March 9, 1946.

Sept. 2—In a V-J radio address, President Truman paid tribute to the armed forces' work during the war.

—The Army and Navy ordered cessation of censorship on all mail and telegrams of the armed forces abroad.

Sept. 3—The Committee for Economic Development reported industry was reconverting much more quickly than anticipated, and reconversion unemployment was much smaller than expected.

—Secretary of Labor Lewis B. Schwellenbach in a Labor day address appealed to labor to assume its responsibilities "to the common good." He pledged his department to aid labor's cause.

—Sen. Robert A. Taft, R., O., asked Congressional investigation of Pearl Harbor going back to the start of the war with Germany.

—The National War Fund announced it would start its final drive Oct. 1, 1945 to Jan. 1, 1947 to complete its budget requirement for \$115,000,000.

Sept. 4—Herbert Lehman, UNRRA director general, announced in Washington the UNRRA London meeting voted an expanded program of \$1,800,000,000 for 1946. The U.S. contribution would be \$1,350,000,000, which Congress first would have to approve.

—The War Manpower commission estimated that about 4,000,000 would lose their jobs in six months and proposed a "first goal" of 14,000,000 in factory jobs in a few months.

—The War department announced the end of airline travel priorities in the U.S. Oct. 15.

—A strike of members of the Foremen's Association of America which began Sept. 3 against the B. F. Goodrich company in Akron, O., virtually halted production in six plants there because workers refused to cross picket lines.

—A Federal court in Tallahassee, Fla., upheld the state constitutional amendment prohibiting the closed shop, and dismissed a CIO suit attacking the amendment. It was labor's second test suit on the issue.

—Secretary of State James F. Byrnes criticized the Army Board of Inquiry for its condemnation of Cordell Hull in the Pearl harbor report. He said it went beyond its jurisdiction, and that Congress could only criticize civilian policy making government officials.

—The Army removed bans preventing loyal Japanese-Americans from returning to the Pacific coast and promised them the same treatment accorded other American citizens.

—Stabilization Director William H. Davis said he favored permitting substantial wage increases without affecting price levels, which would have to be maintained if the nation was to pay its \$275,000,000,000 public debt.

—The War department announced further service liberalization to keep 665,000 men in the U.S. from going overseas.

—Congress reconvened for its first peacetime session in almost four years. Resolutions were introduced for a joint Senate-House investigating committee into the Pearl harbor disaster.

Sept. 5—The House Military Affairs committee approved the voluntary enlistment bill providing: mustering out pay at once to re-enlistees; permission to sign for two or three years; 90-day furloughs with travel allowances; 20 per cent bonus for overseas service; retirement at half pay after 20 years' service instead of 30 years; extension of the "GI Bill of Rights" for the duration of the new period of enlistment.

—The ODT said most passenger rail curbs would end Sept. 16 except the ban on short-haul sleeper service.

—President Truman asked Congress for a 37 per cent cut, or \$3,500,000,000, in its 1946 appropriation to 28 war agencies as public money was no longer necessary to win war.

—The Navy recommended the U.S. keep 15 major bases in the Atlantic and Pacific to support its expanded fleet and to keep aggressors away. Pacific bases were: Kodiak, east of Alaska peninsula; Adak, in the Aleutians; Hawaii; Balboa, C.Z.; Guam, Saipan, Tinian (considered one base); Manus, in the Admiralties, and the Philippines. In the Atlantic, bases listed were: Argentina, Newfoundland; Bermuda; Roosevelt Roads and San Juan, P.R.; Guantanamo Bay, Cuba, and Coco Solo, C.Z.

—The WPB reduced cotton set-asides for government purchase, placing on the free market most of the 134 fabrics formerly restricted.

—President Truman named Benjamin V. Cohen as counselor to Secretary of State James F. Byrnes, and Donald S. Russel, Spartanburg, S. C., and William Benton, Southport, Conn., as assistant secretaries.

—President Truman assigned Reconversion Director John W. Snyder as head of a group to study at first hand the needs of Western Europe, apprise Lend-Lease stock piles and determine repayment possibilities.

—The WPB reported U.S. industrial capacity more than doubled in 1940 through the 1944 period. Profits increased 120 per cent reaching the record \$6,400,000,000.

Sept. 6—The Senate voted unanimously with approval of the President for a Congressional investigation of Pearl harbor.

—President Truman named War Manpower Commissioner Paul V. McNutt as High Commissioner to the Philippines, his post from 1937 to 1939.

—The ODT returned the Toledo, Peoria and Western Railway to its owners on order from Stabilization Director William H. Davis.

—Atty. Gen. Thomas C. Clark ordered Fritz Kuhn, former German-American Bund leader, deported to Germany as an alien enemy dangerous to the public peace and safety of the U.S.

—The Navy revealed it had virtually completed construction of a \$20,000,000 double fuel pipeline across the Isthmus of Panama.

—James Caley, seatman, and Edward Versteeg, chief electrician, sentenced to a year each in jail for the Ringling Bros. & Barnum & Bailey circus fire in Hartford, Conn., were released by order of Superior Court Judge William J. Shea.

Sept. 7—Montgomery Ward and company filed an appeal with the U.S. Supreme court in Washington to declare government seizure of its properties in seven cities illegal.

—The Army ended all cigarette, chewing gum, cereals, cornstarch, peanuts and chili con carne contracts.

—New York City and Newark, N. J. federal courts indicted Murray Greenberg, N. Y., and Leo Greenberg, Passaic, N. J. brothers, for alleged failure to pay nearly \$1,000,000 in income taxes on profits from diversion of 25,000,000 pounds of sugar from army and navy hospitals to the manufacture of soft drinks and crushed fruits for soda fountains.

—The Fair Employment Practices Committee directed the AFL Seafarers International Union of North America to revise its discriminatory policies and hire seamen without regard to race, creed or color.

—The Associated Press petitioned the U. S. Supreme court for a rehearing of its decision of June, 1945, requiring it to disregard competitive effects on existing members in passing on membership applications.

Sept. 8—The OPA removed all its curbs on livestock slaughtering quotas and on its distribution of meat shipments.

—Congressional leaders promised to abolish by Sept. 30 National Daylight Saving or War Time under which clocks were moved an hour ahead in 1942.

—The Federal Works agency said plans were ready to start on \$2,500,000,000 worth of public construction within a year, as soon as the WPB relaxed building controls.

—The Massachusetts Institute of Technology announced a new radar set which would "revolutionize" coastal artillery defense and guide incoming ships which had no radar.

Sept. 9—The Navy liberalized its discharge system, granting one quarter of a point for every month's service outside continental United States from September, 1939.

—Sen. David I. Walsh and Rep. Carl Vinson, respective chairmen of the Senate and House Naval Affairs committees, proposed a peacetime navy of 1,079 combat ships, 229 fewer than the current fleet strength.

—Gen. Jonathan M. Wainwright, released from a Japanese prison camp, was welcomed in Washington, D. C.

—A petition to President Truman, signed by 64 members of the University of Chicago faculty and research staff, recommended that the United States share the secret of the atomic bomb with other nations.

Sept. 10—The House of Representatives demanded speedier discharges of men in the armed forces.

—Sewell L. Avery, chairman of Mont-

gomery Ward and company, protested to War Secretary Henry L. Stimson that the Army's continued holding of the company's properties and its promises to pay retroactive wage increases from government funds were illegal.

Sept. 11—The Federation of Westinghouse Independent Salaried unions, after calling a halt to a strike by 12,000 members at Westinghouse Electric corporation plants in six states in compliance with a NWLB directive, resumed the strike.

—Former Federal Judge Albert W. Johnson was indicted by a Scranton, Pa., grand jury for conspiring to obstruct justice and defraud the United States.

—The wage policy committee of the CIO United Steel Workers of America, meeting in Pittsburgh, decided to ask for a \$2 a day wage increase which would affect about 1,000,000 workers.

—The House of Representatives voted unanimously to adopt a Senate resolution setting up a joint 10-man committee of investigation to determine responsibility for the Pearl Harbor disaster.

Sept. 12—The House of Representatives passed a resolution to return the country to Standard Time Sept. 30.

—Under Secretary of War Robert P. Patterson told a Senate committee the Army was demobilizing at the rate of 10,000 men a day and expected to discharge 6,000,000 by July 1, 1946.

—Solid Fuels Administrator Harold L. Ickes lifted restrictions on retail deliveries of coal to household consumers.

—U. S. Atty. John F. X. McGohey and OPA officials revealed a large-scale racket in forged ration currency checks involving 500 retail and wholesale food dealers and five gangs in the New York metropolitan area.

—About 600 studio engineers walked out from National Broadcasting company and American Broadcasting company stations, disrupting broadcasting schedules.

—The Douglas Aircraft company, Allison Engine Division of General Motors and propeller division of the Curtiss-Wright corporation announced jointly a new transport train that might enable airlines to compete at the level of railroad coach and bus fares.

—The SEC reported combined assets of 199 electric and gas companies in 42 public utility holding company systems aggregated \$2,880,030,993 in 1944 or more than 80 per cent of the total assets of all registered holding company systems.

Sept. 13—The Senate Finance committee approved a rewritten unemployment compensation bill which rejected the \$25 weekly payment for 26 weeks and required governors to request federal aid if they wanted to increase payments at state-established rates.

—Vice Adm. Edward L. Cochrane, chief of the Bureau of Ships, said the Navy was planning to put more than 1,000 ships into a decommissioned reserve status.

—The strike of radio technicians and engineers ended as the two networks, NBC and the American Broadcasting Company, resumed negotiations with the union for a new contract.

—The State department and War Shipping administration ended priorities for steamship travel, effective Sept. 15.

—The Federal Works agency allotted \$87,830 to aid public works projects in New England and New Jersey, amounting to \$3,151,985.

Sept. 14—Congress named the following joint 10-man committee of lawyers to inves-

tigate Pearl Harbor: Sens. Alben W. Barclay, Walter F. George, Scott W. Lucas, Ralph O. Brewster, Homer Ferguson; Reps. Jere Cooper, J. Bayard Clark, John W. Murphy, Bertrand W. Gearhart and Frank B. Keck.

—The Ford Motor company shut down all of its plants except the Lincoln and Rouge steel factories, laying off "indefinitely" 50,000 workers because "continued outbreaks of irresponsible labor groups" were impeding reconversion progress.

—J. A. Krug, WPB chairman, said in Boston a WPB survey showed 42 industries expected production 87 per cent above the 1939-40 base period by June, 1946.

—The **New York Times** revealed colleges and universities throughout the nation were planning construction and expansion of campus facilities that would cost more than \$2,000,000,000.

—The Army's Surgeon General announced plans to release 13,000 doctors, 3,500 dentists, 25,000 nurses and many other army medical officers by Jan. 1.

—**Sept. 15**—The CIO United Automobile Workers of America set aside a \$4,000,000 strike fund and decided to go all out to obtain a 30 per cent wage increase and full employment.

—The War department reported that between December, 1941, and August, 1945, it shipped 7,306,000 soldiers and 126,859,000 ship tons of cargo out of U. S. ports, excluding men and cargo moving by air.

—A tropical hurricane with a peak velocity of 143 m. p. h. swept inland from Miami, Fla. More than 50 persons were injured in a fire at the Richmond navy blimp base and hundreds of homes were reported damaged by other fires and high winds. Known death toll was two persons.

—The House committee investigating Elliott Roosevelt's loans found from his own account that he borrowed more than \$600,000 to finance a Texas radio network and that he was referred to John Hartford by his uncle.

—The Automotive Council for War Production, comprising 634 manufacturers, planned to go out of existence. Established in December, 1941, it estimated the auto industry's total war output at \$28,970,000,000.

—The Navy cancelled \$38,500 in orders for chewing gum, cigarettes, candy bars and other items sold in ship stores.

—**Sept. 16**—To back up their demands for a 25 cent hourly increase, the CIO United Steel Workers of America estimated the industry's war profits rose 113 per cent in the 1940-44 period above 1935-39.

—More than 15,000 CIO United Rubber Workers voted in Akron, O., to end the strike at the B. F. Goodrich Company. The Foremen's Association of America said foremen pickets would not interfere with production workers who crossed their lines.

—The executive board of the CIO United Farm Equipment and Metal Workers of America announced in Chicago it would demand a flat 30 per cent wage increase.

—The Agriculture department said the 1945 wheat crop was 5,400,000,000 bushels—250,000,000 bushels or five per cent lower than in the previous year.

—Rep. A. Willis Robertson, D., Va., proposed elimination of the three per cent normal tax on personal income and the 95 per cent excess profits on corporations to cut 1946 taxes by \$4,000,000,000.

—**Sept. 17**—President Truman said the United States was in a position to fill the main requests of Europe, "with the excep-

tion of sugar, fats and oils," but that it could not provide more than a subsistence level.

—Atty. Gen. Tom C. Clark recommended to Congress reorganization and subdivision of the Aluminum Company of America into a number of competing companies, to facilitate and aid competition in the Aluminum industry.

—Overriding the Military Affairs committee, the House of Representatives voted to include in the voluntary recruitment bill a provision allowing for a single year's enlistment with full benefits.

—**Sept. 18**—Henry L. Stimson resigned as Secretary of War after serving since July, 1940, and President Truman named Under Secretary Robert P. Patterson to replace him.

—President Truman nominated Sen. Harold H. Burton, R., O., as Supreme court justice to succeed Owen J. Roberts.

—The Selective Service bureau amended its requirements to allow any youth who entered high school before he was 18 to remain until his graduation or until he reached the age of 20.

—Reconstruction Director John W. Snyder said controls on construction would end Oct. 15. A 6-point program to expand the industry was adopted.

—The National War Labor Board denied the Newspaper and Mail Deliverers union's demand that the Publishers association of New York city contribute three per cent of the union's payroll for employee hospitalization and such benefits.

—Price Administrator Chester Bowles rejected flatly a retail trade suggestion that price increases granted to manufacturers to cover rising costs be passed on to consumers.

—The Internal Revenue bureau recommended to the House Ways and Means committee that John Hartford, A & P head, be allowed full income tax deduction on the \$196,000 he lost in his \$200,000 loan to Elliott Roosevelt.

—**Sept. 19**—The Senate confirmed Sen. Harold H. Burton as U. S. Supreme court associate justice.

—Edgar L. Warren, named by Labor Secretary Lewis B. Schwellenbach as conciliation director, took office and got to work immediately on the Detroit strike situation, sending more investigators there.

—President Truman accepted the resignation of William H. Davis as Economic Stabilization director and commended him for his work.

—Eric A. Johnson, president of the U. S. Chamber of Commerce, became president of Motion Picture Producers and Distributors of America incorporated, succeeding Will H. Hayes.

—A House committee unanimously reported out a bill to authorize the President to reorganize the executive agencies of the government, excluding only the Interstate Commerce Commission, the Federal Trade Commission and the Securities and Exchange Commission.

—President Truman assured the nation men overseas were coming home as fast as possible.

—**Sept. 20**—The Senate passed, 61 to 16, a compromise unemployment compensation bill and sent it to the House. It provided payments up to 26 weeks at state-established rates of from \$15 to \$28 weekly.

—John Chamberlain declared in the current **Life** magazine that "more than 15 hours before Pearl Harbor, President Roosevelt and members of the Washington high

command knew that Japanese envoys were going to break with the U. S. the next day."

Sept. 20—Rep. Joseph W. Martin, jr., R., Mass., proposed a slash of at least 20 per cent in 1946 federal taxes.

—William O'Dwyer, executive director of the War Refugee board, in his final report urged the government to take all necessary steps to effect the reopening of Palestine to Jewish immigration.

—New strikes by coal and steel workers causes six bituminous coal mines to shut down, making more than 6,500 employees idle in the Pittsburgh districts.

—The House Newsprint committee recommended that WPB lift all newsprint curbs Dec. 31.

—The War department said total U. S. casualties stood at 1,071,266, an increase of 536 in one week. Army totals were: killed, 205,569; wounded, 571,698; missing, 24,131; prisoners, 120,988. Navy figures were: killed, 54,068; wounded, 80,236; missing, 11,197; prisoners, 3,379.

—The Navy department disclosed discovery and development of the radio proximity fuse, no larger than a pint milk bottle, which packs its power in a tiny glass tube. This tube exploded a shell when it was close enough to a target to inflict damage.

—The OPA raised the price of foreign silver imported into the United States from 45 cents a fine ounce to 71.111 cents, the level of the maximum domestic silver price.

Sept. 21—President Truman officially approved World War II as the name of the world conflict ended in August.

—The Social Security board reported claims for unemployment compensation reached 1,479,606 in the week ended Sept. 15, an increase of 20.7 per cent over the preceding week.

—President Truman awarded the Distinguished Service Medal to Secretary of War Henry L. Stimson on his retirement and 78th birthday.

Sept. 22—The CIO United Automobile Workers union petitioned the NLRB for a strike vote in 96 General Motors corporation plants. About 350,000 workers would be affected by the strike.

About 34,000 workers were idle through strikes in the Pittsburgh area and nine coal mines were shut down.

The strike at Westinghouse Electric entered its 13th day.

A strike by AFL Teamsters and Retail Clerks in Northern New Jersey closed 250 retail stores of the Great Atlantic and Pacific Tea company.

—Sen. Walter F. George, chairman of the finance committee, proposed a 50 per cent cut in federal taxes on personal incomes, from the lowest to the highest brackets.

—The House Ways and Means committee referred the Elliott Roosevelt loan case to the House over strong objections by Republicans.

—M. P. Catherwood, New York State Commerce commissioner, reported to Gov. Thomas E. Dewey that more than 200,000 jobs were available in the state, while 175,000 persons were receiving unemployment insurance.

Sept. 23—Secretary of Commerce Henry A. Wallace said reconversion would cause an \$8,000,000,000 drop in individual incomes during the second half of 1945, putting 1945's total at the 1944 level of \$165,000,000,000, the highest income payments level in history.

—CIO United Automobile Workers

spokesman in Detroit said petitions for strike votes at Ford Motor company and Chrysler corporation would be filed shortly.

—The Bureau of Selective Service ruled that returning veterans were entitled to first priority in re-employment at their old jobs, regardless of union protests.

—Price Administrator Chester Bowles cleared Paul L. Ross, former OPA regional enforcement executive, of maladministration charges by Daniel P. Woolley, former regional OPA chief.

Sept. 24—The Senate confirmed Dean Acheson to be Under Secretary of State by a vote of 69 to 1.

—Reconversion Director John W. Snyder disclosed President Truman would transfer to the State department the disposal of surplus military supplies overseas and of lend-lease and UNRRA functions of the Foreign Economic administration.

—Elevators and service employees in about 2,015 office buildings in New York City went out on strike, paralyzing commercial operations.

—Secretary of Agriculture Clinton P. Anderson predicted the 1946 program would call for over-all reduction of farm production.

—The Navy revealed that during the war 11 of its aircraft carriers were sunk and 30 others damaged on 52 separate occasions.

—Washington disclosed that the Chinese government had rejected the resignation of Dr. Wei Tao-ming as ambassador to Washington and that he would stay on.

Sept. 25—In Washington the NLRB fixed Oct. 25 for strike elections in 20 Chrysler corporation plants affecting 120,000 workers.

—In Detroit the CIO United Automobile Workers opened negotiations with Chrysler on the 30 per cent wage increase demand.

—The oil mediation conference opened in Chicago between representatives of nine leading oil concerns and 30,000 striking members of the CIO and United Oil Workers.

—More than 28,000 miners and supervisory workers were idle and 67 soft coal mines closed as a result of strikes by supervisory employees in Pennsylvania and West Virginia.

—President Truman asked Congress to cut \$28,692,772,000 from war department appropriations because of reduced army requirements.

—Secretary of Labor Lewis B. Schwellenbach urged a Senate committee to provide legislation to raise the legal minimum wage to 65 cents an hour.

—The Senate confirmed Robert P. Patterson as Secretary of War and W. Stuart Symington as Surplus Property administrator.

—The Census bureau reported that U. S. births fell to 2,794,800 in 1944—140,000 below 1943. The 1944 civilian death toll was 1,411,338 compared with 1,459,554 in the preceding year.

Sept. 26—Labor disputes from coast to coast put a force of more than 1,850,000 workers on the production sidelines.

—Radar equipment was being installed in the Rock Island railroad's system in the first stem of a communication system that would remove blind spots of railroad.

—Congressional investigators of Pearl Harbor chose as counsel William D. Mitchell, attorney general in the Hoover administration and solicitor general under Coolidge.

—A nation-wide strike was authorized by the executive council of the Oil Workers International union, CIO, if the industry's

labor-management conciliation in Chicago failed. The union had 250,000 members.

Sept. 27—President Truman asserted the Senate had let him down by disapproving weekly unemployment benefits up to \$25 on a country-wide scale, and said that he expected the House not to follow that example.

—The Army and Navy served notice they could not get along beyond another week unless strike-curtailed oil production was resumed in full, Labor Secretary Lewis B. Schwellenbach reported.

—Government officials were reported to be in the final stages of an agreement with representatives of Soviet Russia on the restoration and financing of some \$400,000,000 of lend-lease goods on the way to that country when lend-lease was cut off.

—Robert P. Patterson was sworn in as Secretary of War by Judge Learned Hand in Washington.

—President Truman accepted Leo T. Crowley's resignation as chairman of the Federal Deposit Insurance corporation and simultaneously abolished the Foreign Economic administration.

—A post war carrier fleet, sixteen times the size of America's flat top forces in December, 1941, was urged by the House Naval Affairs committee.

—The Senate by a vote of 71 to 10 passed the Murray Full Employment bill, much rewritten from its original "jobs for all" draft.

—Student "strike" demonstrations, arising ostensibly from the dispute over extra pay for high school athletic coaches, became riots at an East Harlem building, New York, housing two high schools.

Sept. 29—With War Time ending at 2 a.m. Sept. 30, most citizens were expected to turn their clocks back one hour before retiring, regaining the hour of sleep lost when War Time went into effect Feb. 9, 1942.

—President Truman by proclamation asserted the exclusive right of the United States to all mineral resources in the 759,600 square miles of "Continental Shelf" running out to an off shore depth of 600 feet from the United States mainland, its territories and possessions.

—With 60,000 AFL members in the Pacific Northwest lumber industry still on strike, other labor disputes on the West Coast affecting several hundred thousand workers were heading towards a crisis.

—President Truman directed Gen. Dwight Eisenhower to clean up alleged shocking conditions in treatment of displaced Jews in Germany outside the Russian zone and in Austria.

—The Agriculture committee recommended to Congress an appropriation of \$1,900,000,000 for foreign relief.

—"Fisherman's radar," an electronic depth recorder that provides a constant permanent picture of the ocean bottom on a chart, was demonstrated publicly on a trip in Long Island sound by the Bendix Aviation corporation.

—John L. Lewis, president of the United Mine Workers, declared the operators' spokesman, Ezra Van Horn, had assumed an "insolent attitude" in rejecting an invitation to discuss the organizations of mine supervisors, but renewed his offer for a conference.

—The Department of Labor reported that employment in shipyards fell from 1,092,000 to 871,000 during August.

Sept. 30—The United States, except for Chicago, was back on Standard Time. In Chicago, an ordinance had extended War Time until Oct. 28.

—Republican leaders demanded at least a 20 per cent income tax slash, in advance of Secretary of the Treasury Fred M. Vinson's "moderate" tax trimming plan Oct. 1.

—Army engineers were ready to start work during the fall on rivers and harbors and flood control works, of which the estimated cost was \$900,615,001, the War department announced.

—More than 2,300,000 men and women were unable to serve in America's armed forces because of mental or emotional disorders or inaptitudes, according to an armed forces survey.

The figure included 1,825,000 men rejected in pre-induction physical examinations and 476,023 discharged from service in the Army, Navy, Marine corps and Coast Guard.

OCTOBER

Oct. 1—Labor Secretary Lewis Schwellenbach proposed appointment of an impartial arbitrator to make a binding decision in the coal strike by Dec. 1.

—Republican members of the House Ways and Means committee said the late President Roosevelt "played an important part" in his son Elliott's \$200,000 loan.

—A \$5,000,000,000 income tax reduction for individuals was proposed to Congress by Secretary of the Treasury Fred M. Vinson.

—Selective Service contended that veterans were entitled to re-employment even though job standards in their former positions had increased since they had left for service.

—The nation's strike idle fell approximately 352,000, the first major reduction in a week.

Strikes spread through the coal industry with more than 90,000 miners idle in four states. Almost 450,000 workers were out in strikes across the nation. The soft coal industry was shaken by a series of walkouts in West Virginia, Pennsylvania, Ohio and Kentucky.

Oct. 2—Representatives of the CIO Workers International and 11 major producers weighed an answer to Secretary of Labor Lewis B. Schwellenbach's proposal that they arbitrate the deadlocked oil wage dispute.

—The Administration began its fight in the Senate for the St. Lawrence seaway.

—The House Ways and Means committee voted tentatively for slightly larger income tax reductions than those proposed by the Administration. The committee adopted a motion to increase the exemption from the three per cent normal tax and to lower tax rates by four per cent.

—Coal producers in four eastern districts were prohibited from delivering coal to retail dealers, domestic consumers and other users.

—The oil strike neared its end with Labor Secretary Lewis B. Schwellenbach hopeful of settlement, his aids "confident" and the CIO dubious.

Oct. 3—The American Legion asked Congress to cancel income tax payments overdue from members of the armed forces or at least to extend the time for payment.

—A Lockheed Constellation plane landed in Burbank, Calif., setting a speed record of seven hours, 53 minutes and 30 seconds from Miami, Fla.

—President Truman urged immediate legislation in Congress to create an atomic energy commission to fix a national policy regarding the atomic bomb.

—An "outlaw" strike started Oct. 1 by

members of the AFL Longshoremen's association spread throughout the New York city docks until 30,000 workers were out.

About 350 mines were closed during the soft coal strike with 115,000 men idle.

—General Motors Corporation rejected as "unreasonable" the 30 per cent increase demanded by the United Automobile workers.

—President Truman contended it would be neither just nor fair to the people of the Philippines "to proclaim their independence until the necessary program for rehabilitation has been worked out."

—President Truman named Watson B. Miller, assistant to Paul V. McNutt, to succeed him as Federal Security administrator.

—The Amalgamated Lithographers of America announced in New York withdrawal from the American Federation of Labor as a result of a 30-year-old jurisdictional dispute.

Oct. 4—President Truman ordered Navy seizure of 26 strikebound oil producing and refining companies.

—The House Ways and Means committee voted to give \$5,319,000,000 of tax relief to individuals and corporations in 1946, with at least a 10 per cent income tax cut, a 50 per cent cut in excess profits tax and a four per cent corporate normal-surtax cut.

—Total U. S. casualties were reported as 1,070,524—48 less than the last week in September. Army casualties were: killed, 206,622; wounded, 571,664; missing, 22,552; prisoners, 121,638. Navy figures were: killed, 54,986; wounded, 80,247; missing, 10,259; prisoners, 2,556.

—Gov. Thomas E. Dewey, N. Y., issued a report made to him by Rollin Browne, former president of the New York Tax commission recommending all state income taxes be repealed eventually.

Oct. 5—Long line telephone service was disrupted six hours from coast to coast as 100,000 to 200,000 National Federation of Telephone Workers members attended mass meetings.

—A riot flared up at the Warner Brothers studios in Burbank, Calif., as pickets and non-strikers clashed. Herbert Sorrell, president of the striking Conference of Studio Unions and several aides were arrested on charges of inciting to riot.

—The Navy announced it lost 696 vessels of all types during the war as a result of enemy action and all other causes.

—Adm. Chester W. Nimitz received a rousing welcome in Washington, D. C., parading through the capital and addressing a joint session of Congress.

—After 18 months of negotiations, building, industry and AFL leaders announced agreement on a 5-year contract.

—The WPB lifted controls over distribution of household mechanical refrigerators effective Oct. 10.

Oct. 6—Secretary of Labor Lewis B. Schwellenbach and United Mine Workers President John L. Lewis met in Washington. Lewis rejected the operators' request that he order workers to return to their jobs pending negotiations.

—Adm. Chester W. Nimitz said unnecessary Pacific bases were being "rolled up" so fast as to speed Navy demobilization more than expected. He opposed a merger of the Army, Navy and Air forces.

—The War Department announced the return of advanced courses under its Reserve Officers' Training corps and planned for an interim military training program embracing 29 colleges and universities.

—Norway and the United States agreed on a reciprocal air transport pact giving each nation the right of transit and non-traffic stop along standard lines in each country.

—The Navy revealed that a secret weapon, a wakeless torpedo driven by electric power, sank 300 Japanese ships totaling 1,000,000 tons during the war.

—The Post Office department resumed limited mail service between the United States and Europe.

Oct. 7—Gov. Frank J. Lausche appointed James W. Huffman, Democratic State Director of Commerce, as U. S. Senator from Ohio to succeed Harold H. Burton.

Oct. 8—President Truman announced in Tiptonville, Tenn., the United States would retain the secret of the atomic bomb construction with only Canada and Great Britain sharing the knowledge.

—The Association of American Railroads ordered a freight embargo on shipments to New York until the stevedore strike situation was cleared up. More than 30,000 members of the International Longshoremen's Association rejected their leaders' pleas to return to work.

—The CIO United Automobile Workers filed a petition with the NLRB for a strike vote in 51 Ford Motor Company plants.

—The U. S. Supreme Court denied an Associated Press petition for reconsideration of its decision June 18 on membership by-laws.

—President Truman asked Congress for speedy appropriation of the \$550,000,000 already authorized for the United Nations Relief and Rehabilitation to prevent "widespread starvation."

—The U. S. Supreme court refused in four cases to review state rulings on the validity of divorce decrees or to reopen the Nevada 6-week divorce controversy.

Oct. 9—Negotiations to end the coal strike collapsed when operators rejected an arbitration proposal by the United Mine Workers union.

—The Agriculture department said the Army had declared 80,000,000 pounds of butter surplus and turned it over for civilian use.

—Sen. Albert B. (Happy) Chandler, D., Ky., baseball commissioner, said he had resigned his Senate seat under pressure of baseball club owners.

—Band leader Teddy Powell was sentenced by a New York City federal court to 15 months in prison for conspiring to evade military service.

Oct. 10—As coal mine negotiations in Washington failed to produce results, 82 additional mines were shut down and the daily coal production loss exceeded 1,000,000 tons.

—The Detroit Tigers won the World Series in Chicago from the Cubs, four games to three, by taking the seventh game 9-3.

—Mass picketing at Warner brothers Burbank, Calif., studio was halted as police arrested 450 pickets.

—The Army ordered inactivation of 32 of its wartime peak of 89 divisions. The 32 included 21 infantry, two airborne and nine armored divisions.

—On the 34th anniversary of the Chinese Republic, President Truman saluted the people of China and pledged the assistance of the American people in accomplishment of "the democratic objectives established . . . by Dr. Sun Yat Sen."

Oct. 11—The War Shipping administration said 44 U. S. merchant vessels were sunk

in the Pacific during the war, the majority by suicide planes. The United Nations shipping pool was scheduled to end March 2, 1946.

—Federal Judge T. Hoyt Davis upheld the right of negroes to vote in Georgia's Democratic elections. In a Macon court he awarded Primus E. King, Georgia negro, \$1100 damages for being denied the right to vote in the preceding primary.

—The Bureau of Labor Statistics reported that non-agricultural employment in September totaled 35,268,000 compared with 36,849,000 in August and 38,571,000 in September, 1944. The Department of Agriculture said farm employment in October was .7 per cent lower than in 1944.

—Paul W. Kesten, executive of the Columbia Broadcasting system, told the Federal Communications commission of successful transmission of pictures in full color by television.

—The House of Representatives voted, 343 to 10, to reduce federal taxes by \$5,350,000,000 in 1946. The bill eliminated about 12,000,000 persons from any income taxation.

—Mayor Fiorello La Guardia intervened in New York City's waterfront strike and announced he would confer with all parties.

—Ending the first year of labor peace in Detroit, 425 employees of the Aluminum company of America left their jobs in three plants.

—In his fourth report to Congress on UNRRA, President Truman repeated his request for immediate appropriation of \$350,000,000 to relieve the winter in Europe.

—U. S. Communist leaders issued statements attacking Louis F. Budenz for his "desertion" of the party and admitted error in giving him power and influence. Budenz, former editor of the *Daily Worker*, re-embraced Roman Catholicism and began a job as an economic instructor at Notre Dame University.

—The U. S. casualty figure was reduced by 371 to a total of 1,071,153 as more names were eliminated from those missing.

Oct. 12—The National Safety council reported that total home front accidents during the war reached 36,355,000 of whom 355,000 were killed and 36,000,000 injured. There were 1,250,000 permanently disabled.

Oct. 13—Mass picketing by the Conference of Studio Unions was extended to the Columbia and RKO-Pathe studios.

—A strike of some 2,000 employees of the Eastern Massachusetts Street railway paralyzed bus and trolley transportation in 70 New England cities.

—The National Labor Relations board said petitions for strike votes reached a record of 307 in September. About 200 were filed in 10 days of October.

Oct. 14—Rank and file longshoremen accepted a proposal by Mayor Fiorello La Guardia to go back to work as soon as ship-owners indicated they would resume negotiations.

—The National Association of State Chambers of Commerce criticized the tax reduction bill, urging repeal of the three per cent normal tax on individuals and reduction of surtaxes by not less than 20 per cent and repeal of the excess profits tax.

—Byron Nelson broke his own world record for par-70 golf courses by shooting 66 in the final round of the Seattle open tournament.

Oct. 15—Labor Secretary Lewis B. Schwellenbach said the Washington coal talks had collapsed. John L. Lewis, UMW

president, said the UMW offered to go back to work if the operators would negotiate the issues but the operators refused.

—The War department recommended retention of 85 domestic flying installations by the Army Air forces on a permanent basis for post war use.

—Treasury Secretary Fred M. Vinson told a Senate committee the House tax cut bill would cut revenues \$2,000,000,000 beyond the \$5,000,000,000 safety limit, and called for a Senate veto of the measure.

Oct. 16—The National War Labor board announced it would terminate all operations by Jan. 1. Beginning Oct. 22 it would merely make recommendations, designating arbitrators to decide disputes. Lloyd K. Garrison was sworn in as the board's new chairman.

—The Senate Judiciary committee, rewriting the government reorganization bill passed by the House, curtailed the President's power to make changes. Under the changes the President could not tamper with 13 agencies and any plan could be vetoed by the House or Senate acting alone.

—The Bureau of Labor Statistics said jobs lost in manufacturing industries in August were 2,400,000. Deducting rehiring, the total labor decline was 1,600,000.

—Harold L. Ickes, solid fuels administrator, conferred with President Truman on the coal crisis and warned that "we are in for very serious trouble" unless the 200,000 coal strikers returned to work. He said coal production was less than half of normal and 1,010 mines were closed.

—Thirty prominent Americans, meeting at Dublin, N. H., signed the "Declaration of the Dublin Conference" proposing to scrap the United Nations organization and create a World Federal government to insure against an atomic war which would "destroy civilization and possibly mankind itself." Justice Owen J. Roberts of the U. S. Supreme Court was one of the sponsors.

—Pan American airways announced a cut from the pre-war \$375 to \$275 for air passenger service between the United States and England and to \$495 for the round trip.

Oct. 17—American Airlines announced that 16-hour passenger service between New York city and London would start Oct. 23. Three round trips would be made weekly.

—President John L. Lewis of the United Mine Workers ended the coal strike "in the public interest." Miners were ordered back to work Oct. 22.

—Three atomic bomb scientific experts testified before a Senate committee that the atom bomb was "not just another weapon" but so dangerous as to necessitate control of further activities by an international commission.

—The House Appropriations committee reported out a bill to cut military and civilian war appropriations and contract authorizations by \$52,453,535,278, effective on funds already appropriated or authorized for the current fiscal year ending June 30, 1946.

—The Senate Finance committee voted to repeal the wartime excess profits taxes, release 12,060,000 individuals from income tax rolls for 1946, freeze social security tax rates at one per cent for a year and reduce other individual and business payments.

—The Army relinquished control of the properties of Montgomery Ward and company in Chicago and six other cities. The company said maintenance of membership and dues checkoff were terminated. It offered a seven and a half cent hourly increase to employees in Chicago.

—United States war casualties dropped 521 to a total of 1,069,632, including 264,599 killed. The number of dead increased by 1,396.

—John C. Collett, stabilization director of the OWMR, and Chester Bowles, price administrator, announced an increase of five cents to six cents a pound in the retail price of butter, effective Nov. 8 as government subsidies ended.

—Two bills were introduced into the House of Representatives to withdraw privileges from the Daughters of the American Revolution, void its charter, and withhold tax exemption on Constitutional hall, because the organization had declined to permit a negro artist to use the hall.

Oct. 19—The Netherlands government signed an agreement with the Export-Import bank to provide a credit of \$50,000,000 to purchase agricultural and industrial products in the United States.

—The Senate Finance Committee approved bigger tax slashes to give \$2,648,000,000 of relief to individuals and \$2,841,000,000 to business, and providing revenue reductions totaling \$5,629,000,000.

—Gen. Henry H. Arnold, commander of the AAF, told a Senate committee a single national defense unit, in which air power was co-equal in strength and influence to the army and navy was essential to prepare the U. S. against future aggression.

—The House of Representatives passed and sent to the Senate, 162 to 101, a bill giving control of the Employment Service back to the States within 30 days, refusing the President's request that federal control be maintained until June 30, 1947.

—Archibald MacLeish, former assistant secretary of state, was named chairman of the U. S. delegation to the conference in London, Nov. 1, which would draw up the final program for the Educational, Scientific and Cultural organization of the United Nations.

—William E. Warren, N. Y., insurgent leader of the International Longshoremen's association, and two newspapermen from the **New York Post** were beaten by a gang of men near a longshoremen's hangout.

—Negotiations between the General Motors Corporation and the CIO United Automobile Workers Union were resumed after a 90-minute "walkout" by company representatives in protest against the presence of newspapermen.

Oct. 20—The War Department said nearly half the soldiers from the Atlantic and Pacific were home. About 1,519,000 men would still have to be returned from Europe and 1,103,000 from the Pacific.

—President Juan Antonio Rios of Chile dedicated the Avenue of Americas, formerly Sixth Avenue, in New York city.

—In answer to the demand by the CIO United Automobile Workers for a 30-per cent wage increase, Charles E. Wilson, president of General Motors, proposed that labor accept a 45 to 48 hour week during a three to five year post war adjustment period, with a five to eight per cent increase in basic hourly rates.

—Director General Herbert Lehman warned that unless UNRRA received \$1,800,000,000 in new contributions asked at the recent UNO conference, UNRRA would "have to liquidate with the minimum job only half completed."

—The Combined Production and Resources board reported purchases of consumer goods in the United States and

Canada rose from 10 to 15 per cent during the war years, while British expenditures dropped 15 to 20 per cent below the 1938 level.

—Three B-29 Superfortresses, commanded by Lt.-Gen. Nathan Twining, landed in Washington after blazing a new air trail from Guam via India and Germany. Flying time was 59 hours, 30 minutes for the 13,167 miles.

Oct. 21—Walter P. Reuther, UAW president, accused General Motors of using "the Hitler technique of the big lie" in its argument that higher wages meant higher prices.

—Vice Adm. Emory S. Land, War Shipping Administration chairman, said the return of 6,000,000 troops was scheduled for completion by May, 1946.

—The AAF said it released 64,865 officers and enlisted men during the Week ended Oct. 20, bringing its total of discharged since Sept. 17 to 172,683.

Oct. 22—The CIO Federation of Glass, Ceramic and Silica Sand Workers union halted production at 12 plants at the Libby-Owens-Ford and Pittsburgh Plate Glass companies in seven states. The union said the company's refusal to continue contract negotiations because of a walkout of less than 400 workers resulted in a "technical lockout."

—A committee investigating executive agencies reported to the House of Representatives that the OPA, by "restrictive" and outdated policies, dangerously jeopardized the nation's economy and retarded conversion.

—The State Department lifted the wartime ban on study abroad by U. S. citizens. It also released three of the government's short wave broadcasting frequencies for the exclusive use of the American press in sending news to the Orient.

—The Senate adopted a resolution authorizing a special committee to study the development, use and control of atomic energy.

—W. Stuart Symington, surplus property administrator, estimated that government property valued at more than \$32,000,000,000 would be declared surplus during the fiscal year ending June, 1946.

—The Civil Aeronautics board authorized Northwest Airlines incorporated to install three routes to provide nonstop service between points north of Boston and New York city.

Oct. 23—At a joint session of Congress President Truman asked enactment of a program for one year's universal military training. He proposed that all males of 18 years, or upon graduation from high school, be eligible and should enter training before they reach 20.

—Nearly 900 maintenance and mechanical workers of the American Export Airlines and American Airlines went on strike at La Guardia Field, New York city, when negotiations between the company and the CIO United Automobile Workers failed.

—Renewed violence broke out in a picket line at Paramount studio, Hollywood, resulting in the injury of 50 persons and the arrest of 13.

—The Senate Finance committee reported a tax bill providing cuts of \$5,625,000,000.

—Fleet Adm. Ernest J. King urged a Senate committee to reject Army-Navy merger bills.

—President Truman named James W. Angell, assistant foreign economic administrator, as the U.S. representative on the

Allied Reparations committee in Germany, succeeding Edwin W. Pauley.

Oct. 24—The NBC, CBS and Mutual ordered all their stations to drop all frequency modulation programs containing music starting Oct. 29 because of demands for double crews by James C. Petrillo, AFM president.

—An American Airlines plane arrived at Hurn airfield, England, from New York City in 14 hours, five minutes flying time, to complete the first land plane commercial flight from North America to Europe.

—The National board of the United Council of Church Women voted to oppose the one year compulsory military training program advanced by President Truman.

—The Senate passed a \$5,788,000,000 tax reduction bill, \$613,000,000 in excess of cuts proposed by the Treasury.

Oct. 25—President Truman made public the agenda of the labor-management-government parley scheduled for Nov. 5 in Washington. Discussion would include problems of industrial strife, grievance machinery, conciliation, collective bargaining, voluntary arbitration and responsibilities of both parties to respective contracts.

—Dr. Karl T. Compton, president of the Massachusetts Institute of Technology, and three other leading physicists active on development of the atomic bomb, told a Senate committee scientists would have freedom of exchange of information with other scientists and liberty of action.

—The American Broadcasting company joined the other three networks in announcing discontinuation of FM music as of Oct. 29.

—Members of the CIO United Automobile Workers employed at General Motors voted 70,853 to 12,438, or six to one, for a strike to obtain a 30 per cent increase.

—Dr. C. C. Furnas, director of the Curtiss-Wright Research laboratory at Buffalo, N.Y., revealed that special supersonic flying devices, built for the government, had attained speeds of 1,400 miles an hour, almost twice the speed of sound.

Oct. 26—President Philip Murray of the CIO United Steel Workers said in Pittsburgh, Pa., the union would file petitions with the NLRB for strike votes in 766 steel, aluminum and iron ore companies, involving 1,900,000 workers.

—The CIO United Automobile Workers union completed presentation of its case for a 30 per cent wage raise to General Motors corporation and received an unequivocal refusal.

—House conferees on the tax bill agreed to accept the Senate provision exempting service pay of enlisted men of the armed forces from income tax and giving them and other officers three years to pay deferred taxes.

—Secretary of the Navy James V. Forrestal and Adms. Ernest J. King and Chester W. Nimitz issued Navy day statements calling for maintenance of "the greatest naval power the world has ever known."

Oct. 27—American and American Export Airlines rejected a proposal of the CIO United Automobile Workers to return to work if management would arbitrate.

—Congressional tax conferees agreed unanimously on a tax reduction bill of \$5,920,000,000, repealing the excess profits tax on Jan. 1 and the automobile use tax, and reducing corporate and individual taxes.

—The Department of the Interior announced that reclamation jobs and construction and conservation projects, if authorized

by Congress, would provide enough work to keep 1,500,000 men busy for a year.

—Navy Secretary James V. Forrestal, speaking in New York city, released information recovered from the Japanese heavy cruiser "Nachi", sunk in Manila bay, showing the Pearl Harbor attack had been planned a month before it happened.

Oct. 28—The CIO United Electrical, Radio and Machine Workers announced it was filing a petition with the NLRB for a strike vote at 54 plants of General Electric.

Oct. 29—The War Production board placed lumber under inventory control "to prevent hoarding of building materials" and speed expansion of industry.

—Speaking in New York city, Gen. George C. Marshall warned that if the UNO was to have "even a remote chance of success" the United States would have to remain strong.

—Labor Secretary Lewis B. Schwellenbach told a Senate committee the payment of "uniformly lower wages" to women depressed the whole wage structure. He urged legislation banning differentials because of sex.

—Price Administrator Chester Bowles and WPB Chairman J. A. Krug announced the ending of rationing on all automobiles.

Oct. 30—In an executive order amending his wage-price policy statement of Aug. 18, President Truman recommended higher wages.

—The House of Representatives voted unanimously for a post war Navy larger than the combined fleets of other nations.

—The OPA announced the end of shoe rationing. The agency revised pricing methods for manufacturers of consumer durable goods.

—The House Military Affairs committee approved 17 to 10 the atomic energy bill setting up a strong commission and powerful administrator.

—James H. R. Cromwell won a New Jersey limited divorce in Elizabeth, from Doris Duke Cromwell and was granted the privilege of starting action to make the divorce absolute.

Oct. 31—The Bureau of Labor Statistics reported 550 strikes and lockouts in September, involving 455,000 workers and 3,650,000 man days of idleness.

—Secretary of State James F. Byrnes absolved Cordell Hull of charges that his "so-called ultimatum . . . started the Japanese war," explaining the Japanese had ordered the attack three weeks before.

NOVEMBER

Nov. 1—Brig.-Gen. Frank A. Armstrong, jr., of the AAF led four B-29's from Hokkaido, Japan, to Washington, D. C., in a non-stop flight. The lead plane covered the 6,554 miles in 27 hours, 29 minutes.

—Robert E. Burns, 55, convicted in 1922 for a \$5.85 holdup of an Atlanta grocer, and author of the best-seller I Am a Fugitive from a Chain Gang, surrendered himself to Gov. Ellis Arnall. The Georgia parole board commuted his 23-year sentence to time served.

—Eight hundred AFL service employees struck at Marshall Field and company, Chicago, for a 15 per cent wage increase and union shop.

—The Senate passed the \$5,920,000,000 tax reduction bill, releasing 12,060,000 individuals from taxes Jan. 1, 1946, and repealed the excess profits tax and the \$140,000,000 automobile use tax.

—Commerce Secretary Henry A. Wallace

reported industry could raise wages 10 per cent in 1946, and the auto industry 15 per cent with another 10 per cent in 1947, without raising prices.

—Navy Secretary James V. Forrestal's proposal that the aircraft carrier "Enterprise" be preserved was approved by President Truman.

—U. S. war casualties dropped 409 to a total of 1,068,794 as more missing men returned.

Nov. 2—Northwest lumber operators granted a 12 and a half cent hourly increase to 30,000 CIO Woodworkers of America union employees.

—About 1,100 members of the AFL Commercial Telegraphers union employed by Western Union stopped work for five hours in four cities to protest a four cent hourly wage increase granted by the NLRB. They voted to petition the NLRB for a strike vote.

—Striking members of AFL and CIO machinists on the west coast came to blows when AFL members went through a United Steel Workers picket line.

—Navy Secretary Forrestal said in New York city the Navy would complete its demobilization definitely by Sept. 1, 1946. As of Oct. 27, 1945, 381,077 enlisted men and 41,112 officers were released, of whom 1,567 were Wave officers and 11,745 enlisted Waves.

—The OPA announced a new rent policy for new houses to provide "liberal allowances for increased building costs since 1939."

—Dr. James Conant, Harvard president, and several others backed atom bomb development when they appeared before the final Senate committee hearing on the projected National Science foundation.

Nov. 3—The War Production board officially ended its duties.

—Irvin C. Mollison, negro Republican of Chicago, was sworn in as U. S. Customs court judge in New York. He became the first negro on the federal bench within the continental United States.

—The Navy revealed rescues during the war by U. S. submariners of 504 U. S. and Allied aviators in enemy waters.

—Seven persons were killed and 12 missing when a four-engine Consolidated Airways LB-30 crashed 450 miles northeast of Honolulu.

Nov. 4—Lieut.-Gen. James H. Doolittle landed at Washington on a non-stop flight from Oakland, Calif., in a B-29 in six hours, 59 minutes—one minute short of Howard Hughes' 1944 record.

—Drew Pearson charged the FCC and Navy picked up the final Japanese "winds" message broadcast from Tokyo to Japanese diplomats throughout the world three days before Pearl Harbor. The direction of the wind was to signify which nations Japan would attack.

—The Eastman Kodak company announced in Rochester, N. Y., a new color printing process, the dye transfer method, which would reduce printing time by two-thirds to three-quarters.

—The War Shipping administration charged in San Francisco the AFL-CIO Machinists' strike was holding up repair work on 12 troopships and delaying return of troops from overseas.

—Bernard M. Baruch, financier, urged a national inventory on current debts, war contracts, foreign loans, productive capacity and resources before the inflation question was decided.

—The National Farmers union recom-

mended a plan to give "adequate credit facilities" to an estimated 1,000,000 war veterans wanting farms or seeking farm employment.

Nov. 5—U. S. military authorities in Germany asked the War department for 300,000 tons of food to supply civilians in the U. S. zone.

—The U. S. Supreme court refused a plea by Montgomery Ward and company for a decision on whether the government was right or wrong in its seizure of the company's properties in seven cities in December, 1944.

—President Truman opened the labor-management conference in Washington, with a plea to end industrial strife.

—Rep. F. Edward Hebert, D., La., introduced a bill in the House to amend the anti-trust law to include strikes and labor disorders among actions "in restraint of trade."

—The New Jersey Court of Pardons in Trenton refused a pardon and a commutation of sentence to John R. Longo, political foe of Frank Hague. Longo was convicted of falsifying his voting record and given a term of 18 months to three years in state prison.

—The House Military Affairs committee filed a majority report urging passage of the Atomic Energy act, giving wide domestic control to a nine-man commission and its administrator and retaining atomic secrets.

—The Civilian Production administration lifted all controls on gas production and coke inventories, effective Nov. 15, because of "an expected early return to normal by-product coal production."

—The New York Port of Embarkation said 229,878 veterans of the European, Mediterranean and China-Burma-India theaters landed there during October, a new record. Total landed there since the beginning of the war was 1,229,545.

Nov. 6—Eight labor and high management representatives were named to an executive committee for the labor-management parley.

—Sen. Joseph H. Ball, R., Minn., introduced in the Senate a substitute bill for the May-Johnson Atomic Energy bill to create a nine-man control commission, including the Secretaries of War, Navy, State, Interior and Commerce.

The commission would form three advisory boards for research, industrial and military applications of atomic energy. The only security provisions would be those necessary to safeguard military application of nuclear force.

—Frank A. Mathews, jr., R., N. J., was elected to fill the vacancy in the House of Representatives left by Rep. D. Lane Powers, resigned.

—The Senate Finance committee approved a liberalized GI Bill of Rights.

Nov. 7—The CPA reported July-October auto production totaled 19,136 new passenger cars, about 26 per cent of the 72,740 unit output anticipated in the summer.

—The AFL transit workers voted to end their walkout in Washington following an agreement on a 14-day truce for negotiation of a 30-cent hourly wage increase.

—General Motors corporation offered the UAW wage increases to all employees whose incomes since 1941 had lagged behind living costs, about an eight to ten per cent payroll rise. The UAW rejected the proposals as an attempt to "sandbag" the government and the public into accepting higher auto prices.

—The Senate Foreign Relations committee unanimously approved full U. S. participation in the United Nations organ-

Election results for two states and 16 cities

ization, giving the U. S. representative on the Security council specific authority to vote the use of American troops to enforce peace.

—President Truman asked the House for action on his recommendation for a \$107,500,000 public works fund.

—Atty. Gen. Tom C. Clark revealed the entire story of German sabotage plans in the U. S., based on information from two captured saboteurs. All eight who landed here by submarine in June, 1942, had said they never intended to carry out instructions to blow up the TVA project, New York's Hell Gate bridge and other places.

Nov. 8—President Truman ordered all government departments to give the Congressional Pearl Harbor committee any information they might have on the disaster.

—The Bell Aircraft corporation announced in Niagara Falls, N. Y., it had successfully conducted test flights of jet-propelled planes by remote control. Flight data was transmitted from the robot plane by television.

—Agriculture Secretary Clinton P. Anderson estimated food exports to the United Kingdom and liberated European countries in the last quarter of 1945 at some 4,500,000 tons, 50 per cent more than in the previous quarter.

—The UAW filed complaints of unfair labor practices with the NLRB against General Motors for refusing to bargain collectively with employee representatives.

—A U. S. proposal, approved by President Truman, for creation of an International Trade Organization which would investigate all private cartels was reported approved by the British on condition that they get a U. S. loan of \$4,000,000,000.

—The Senate passed and sent to the House the revised GI Bill of Rights which would cost the government about \$9,000,000,000 over the total period of operation.

Nov. 9—The NLRB said UAW members employed by Ford Motor company voted 42,235 to 1,951 in favor of a strike to support their 30-cent pay rise demand.

—Fifteen thousand CIO Industrial Union of Marine and Shipbuilding Workers walked out at the Kearny and Port Newark, N. J. shipyards of U. S. Steel to protest the discharge of a shop steward.

—John B. Blandford, Jr., National Housing administrator, appealed to the mayors of all cities with more than 25,000 population

to organize local emergency housing committees. One million two hundred thousand American families were living "doubled up," he said.

—Dr. Robert L. Jones, specialist on sex hormones, obtained a U. S. patent on a method of preparing therapeutic concentrates to speed up childbirth.

—The Commerce department reported a decline in exports for the first half of 1945, which totaled \$5,808,600,000, and a five per cent import increase.

—The FBI reported it had investigated 525,756 draft violations, resulting during the past five years in 12,789 convictions, compared with 15,111 convictions in World War I.

—President Truman signed the new tax bill, effective Jan. 1, 1946.

Nov. 10—Prime Ministers Clement R. Attlee of Britain and W. L. Mackenzie King of Canada arrived in Washington to start discussions at the White House on the atomic bomb.

—Members of the CIO United Electrical, Radio and Machine Workers voted to end a six-week strike in three New Jersey plants of Thomas A. Edison, incorporated, and accept an agreement providing double time for Sundays.

—The UAW authorized a special board headed by R. J. Thomas, president, to act for it in negotiations with General Motors and Ford.

Nov. 11—The 27th Armistice day was observed throughout the world.

—Gen. Henry A. Arnold predicted in his last AAF report to War Secretary Patterson that any future war would begin by enemy robot planes attacking the U. S. unannounced. He recommended:

1. preparation to strike back with 3,000 m.p.h. robot atom bombs launched from space ships operating "outside the earth's atmosphere."
2. a world wide intelligence organization.
3. one integrated U. S. military organization with an air force of 400,000 men.

Nov. 12—Rep. Frank B. Keefe, R., Wis., said Capt. Alwin D. Kramer, USN, delivered the Japanese "winds" message Dec. 4, 1941, to higher authorities, but it was ignored and was missing from Navy files.

—About 600 rabbis marched to the Capitol in Washington and then visited the White House and the British Embassy to plead the opening of Palestine to Jews.

—A Senate appropriations subcommittee voted to return the USES facilities to the states within 120 days after passage of legislation.

Nov. 13—Benjamin F. Fairless, president of U. S. Steel, rejected Secretary Schwelienbach's invitation to resume negotiations with the USW and a special conciliator.

—Prime Minister Attlee, addressing a joint session of Congress, asserted that "man's material discoveries have outpaced his moral progress" and that world cooperation would have to be won.

—The Bureau of Labor Statistics said 1,400,000 were laid off in September, 1,000,000 less than in August. September hiring was 73 per 1,000 workers, the highest since June, 1944.

—President Truman asked Congress for a new \$1,350,000,000 appropriation for UNRRA.

—President Truman accepted the resignation, effective Dec. 31, of Samuel I. Rosenmann, his special counsel and member of Roosevelt's original "brain trust."

Nov. 14—Secretary of State James F. Byrnes disclosed Soviet Commissar Vyacheslav M. Molotov had replied to the U. S. request for Russian representation on the Far Eastern Advisory commission by demanding the unanimity rule be adopted.

—General Motors granted a 10 per cent pay increase to all salaried personnel earning under \$500 a month. This affected about 70,000 employees.

—Rear Adm. Howard F. Kingman was named commander of the 3rd Fleet, replacing Adm. William F. Halsey and Vice Adm. Daniel Barbey succeeded Adm. T. C. Kinkaid.

—Petroleum Administrator for War Harold L. Ickes ended his duties with a speech in Chicago. He would remain Interior Secretary.

—The War department said 3,000,000 men had been released since May 12, when the point system took effect.

—Nearly 1,000 petitions were filed in a San Francisco federal district court by Nisei residents of the Tule Lake segregation camp to regain their U. S. citizenship.

—About 30,000 persons crowded a vacant field in New York city to see a well appear, as predicted by nine-year-old Joseph Vitolo, who claimed he had had visions of the Virgin Mary since Oct. 30. The well did not appear.

Nov. 15—President Truman and Prime Ministers Clement R. Attlee and W. L. Mackenzie King announced their joint decision to share the atomic bomb secret with the United Nations.

They recommended: creation of a commission within the United Nations Organization to study the question; elimination of atomic weapons from "national armaments," and "inspection and other means to protect complying states against the hazards of violations and evasions."

—The Pearl Harbor investigation by a joint Congressional committee started in Washington, with Counsel William D. Mitchell presenting two volumes of 379 pages containing Japanese messages issued between Dec. 2, 1940 and Dec. 6, 1941.

—The Ford Motor company joined GM and Chrysler in opposing the UAW demand for a 30 per cent wage rise, and requested the union to grant 31 modifications of the current wage contract, guarantee against

strikes, restrict seniority, reimburse the company on strike damages and readjust grievance machinery.

—The Senate voted amendments to the agency reorganization bill, exempting 14 agencies from Presidential pruning. The program would be effective in 60 days unless vetoed by both Houses.

Nov. 16—An eastbound New York Central train hit derailed freight cars at Lydick, eight miles west of South Bend, Ind., injuring 22 persons.

—The United Electrical, Radio and Machine Workers of America rejected a GM offer of a 10 per cent wage increase to 30,000 electrical division workers.

—An Elmer Roper poll of 3,330 Jews in the U. S. showed 80.1 per cent favored a Jewish Palestine state.

—Surrounded by a military guard, 88 German scientists arrived in New York harbor to work on secret national scientific projects.

—Gen. Dwight D. Eisenhower declared before a Senate committee a single defense command was essential "in time of peace."

—The AFL Amalgamated Association of Street, Electric Railway and Motorcoach Employees and the CIO Transport Workers Union struck in New York City, tying up the bus systems.

Nov. 17—Rear Adm. Thomas B. Inglis, chief of naval intelligence, testified Japanese carrier plane pilots were briefed at a secret meeting attended by Adm. Isoroku Yamamoto on Oct. 5, 1941, for a Dec. 7 attack on Pearl Harbor.

The Japanese lost 27 planes and five midget submarines at Pearl Harbor, compared with five U. S. battleships sunk, four damaged, and 92 Navy planes and 96 Army planes lost.

—Reversing his stand of December, 1944, Fleet Adm. Chester W. Nimitz, at a Senate committee hearing opposed a service merger and creation of a co-equal air force.

—The CIO United Farm Equipment and Metal Workers union, employed at 11 International Harvester company plants, voted 16,194 to 3,777 to strike.

—Telephone operators in Chicago belonging to the Illinois Telephone Telephone union voted 6,293 to 996 to strike.

—The TWU ended its bus strike in New York city.

—Final count of Nov. 6 ballots for New York City Council elections showed reelection of two Communists—Benjamin J. Davis, Jr., and Peter V. Cacchione—and election of two ALP members, two Liberals, three Republicans and 14 Democrats.

Nov. 18—The 27,000-ton aircraft carrier "Valley Forge" was launched in Philadelphia, followed by commissioning of her sister ship, the "Princeton."

—The American Legion, at its 27th annual national convention in Chicago, attended by 2,000 delegates, 2,000 alternates and thousands of members, heard Adm. Ernest J. King repeat his opposition to a service merger.

—The Zionist Organization of America, meeting in Atlantic City, elected Rabbi Abba Hillel Silver of Cleveland to succeed Dr. Israel Goldstein as president. It endorsed a proposal for the Jewish National Fund of America to buy 500,000 additional acres of land in Palestine in defiance of British land transfer regulations.

Nov. 19—A twin-engine plane crashed

and sank in the Hudson river near Edgewater, N. J. Five persons were believed to have been aboard, including Chester A. Bolles, 44, chairman of Continental Industries, incorporated.

—The Zionist Organization of America approved a \$51,700,000 budget for 1946 to be used for settlement programs of the United Palestine Appeal.

—The Senate passed and sent to the House for conference the agency reorganization bill. Between the two bills, 17 agencies were exempted from changes, including the ICC, FCC, FTC, SEC, FDIC, Tariff Commission, FPC, Federal Land Bank System, Veterans' Administration, Maritime Commission, Army, Railroad Readjustment Board, Railroad Retirement Board, Medication Board and Civil Service.

—Seattle daily newspapers suspended publication when the AFL International Typographical union started picketing.

—A UAW ultimatum gave GM 24 hours to declare whether it would agree to arbitration.

—President Truman asked Congress for a five-point health legislation program to include: compulsory health insurance; broadened grants to states for hospitals; expanded public health; maternal and child health services; greater medical research, and benefits for "sickness and long term disability."

Nov. 20—Commanded by Col. Clarence S. Irvine, a Boeing Superfortress set a new world non-stop non-refueling record in an 8,198 mile hop from Guam to Washington in 35 hours, five minutes.

—President Truman named Gen. Dwight D. Eisenhower Army Chief of Staff and Adm. Chester W. Nimitz, Chief of Naval Operations, succeeding Gen. George C. Marshall and Adm. Ernest J. King.

—The Senate voted 35 to 31 against a compromise proposal to return the USES to the states June 30, 1946, one year earlier than originally asked by President Truman. The agency would go back within 120 days.

—President Truman suggested the proposed atomic commission to guard against use of atomic weapons in war be named by the UNO General Assembly at its scheduled meeting, Jan. 10, 1946.

—The UAW ordered a nationwide strike at GM plants to start Nov. 21, following receipt of a company note which promised a reply to its ultimatum "on or before Nov. 23."

Nov. 21—Al Davis, 26, welterweight boxer, was slain in a New York bar while resisting a holdup by four gunmen.

—About 180,000 United Automobile Workers struck at 80 General Motors plants in 20 states, raising the nation's total number of strikers to between 462,000 and 625,000. UAW Vice President Walter P. Reuther said the union would produce "every possible" car for GM competitors.

—The Census Bureau said U. S. population went over 140,000,000 about Oct. 1, an increase of about 8,330,725 over the 1940 tabulation.

—Rep. John S. Wood, D., Ga., chairman of the Un-American Activities committee, introduced a bill to restrict radio stations and news commentators, make them more available for legal action and set up rules to govern "opinionated" broadcasts, which would be clearly separated and distinguished from "news items."

—At a House committee hearing, Dr.

Karl T. Compton, M.I.T. president, said universal military training was more necessary since the "advent of the atomic bomb," and would help to relieve unemployment.

Nov. 22—The Air Transport Association of America announced a 13 per cent reduction in express rates, from the current 70 cents to 61.4 cents a ton-mile, by the 13 domestic airlines, effective Jan. 1, 1946.

—Americans at home and abroad celebrated their first peacetime Thanksgiving day in four years.

—Gen. Dwight D. Eisenhower pleaded before a House committee for the \$1,350,000,000 UNRRA appropriation.

Nov. 23—Eight Tammany district leaders were arrested in New York on charges of vote fraud in connection with nominating petitions filed in August.

—The Senate passed a bill raising the age limit for admission to West Point and Annapolis to 24 and 23 respectively, to permit discharged servicemen to qualify.

—Replying to the UAW ultimatum, GM rejected the union's demand for arbitration and withdrew its offer of a 10 per cent wage increase, charging the union had asked, in effect, its "abdication."

—Agriculture Secretary Clinton P. Anderson announced the end of rationing of meat fats and oils, canned fish and other red point foods. He said sugar, the only food still rationed, would probably have to remain under control into 1946.

—Former Secretary of State Cordell Hull, 74, testified at the Pearl Harbor investigation he warned President Roosevelt and the Cabinet Nov. 7, 1941 that the country should be alerted for an attack "anywhere by Japan at any time."

Nov. 24—The Navy reported a complete cure for cholera through the proper use of blood plasma and sulfadiazine and saline solution, based on successful experiment performed during a Calcutta epidemic.

—The telephone strike in Illinois and Indiana ended as the union and company agreed to a \$2 weekly wage rise.

—Walter P. Reuther of the UAW answered GM's arbitration rejection by charging that the company was seeking "a industrial economic dictatorship."

Nov. 25—The Commerce department reported the U. S. spent \$13,045,000,000 abroad between July 1, 1940 and June 30, 1945, on servicemen's pay, bases, food, materials and loans. Receipts from abroad were \$4,060,000,000 consisting mostly of payment for goods sold to other nations and money sent home by troops. Lend-lease totaled \$42,021,000,000 and relief supplies \$800,000,000.

—Food costs were expected to rise 10 to 40 per cent within six months as subsidies ended and price ceilings were lifted. OPA-Agricultural department survey indicated.

—President Truman made a surprise trip to Grandview, Mo., to wish his mother 93, a happy birthday and then returned Washington.

—In a campaign to round up criminal elements responsible for 71 violent deaths 86 days, New York police arrested Vince J. Giarrappa in connection with the murder of Al Davis, welterweight boxer.

Nov. 26—A bus driver and 13 school children were drowned when a bus hit a rock and fell over a 20-foot embankment in Lake Chelan, near Chelan, Wash.

—An ammonia refrigerating plant

ploded in an A & P warehouse near Newark, N. J., killing four men and injuring 25 others.

—Senate debate opened on the United Nations Participation act, to put into practice U. S. ratification of the United Nations charter.

The bill established a U. S. representative with a \$20,000 annual salary and ambassadorial rank and a deputy representative with a \$12,000 salary; provided for a Presidential report to Congress at least once a year on U. S. activities on UNO; empowered the President to make U. S. military commitments without first consulting Congress; authorized him to make agreements with the Security council on numbers and types of armed forces which would then be approved by Congress, and authorized annual U. S. appropriations to UNO.

—GM told the UAW it would not arbitrate unless the union withdrew its "unreasonable" wage demand.

—Ford Motor company announced it would lay off 40,000 production workers because of 15 strikes against parts plants.

—The House unanimously passed and sent to the Senate a bill for governmental investigation of the Panama canal to determine its vulnerability to atomic bomb attack and whether it should be rebuilt.

—Atty.-Gen. Thom C. Clark said Ezra Pound had been indicted a second time on 19 counts for treason on charges of receiving payment from fascist Italy for propaganda broadcasts during the war.

Nov. 27—A State department report listed 140,000,000 hungry and homeless in Europe, 84,000,000 in China and 130,000,000 in Southeast Asia.

—Cordell Hull at the Pearl Harbor inquiry denied the Army investigating Board's charge that he had "touched the button that started the war."

—Patrick J. Hurley resigned as Ambassador to China with a stinging attack on the administration of U. S. foreign policy by career diplomats. President Truman appointed Gen. George C. Marshall, retiring Army Chief of Staff, as his special envoy to China with rank of ambassador.

Nov. 28—Emily Hahn, author, was married in New Haven, Conn., to Maj. Charles Boxer, British officer, whom she had named in her autobiography, *China to Me*, as the father of her illegitimate child.

—The Associated Press elected Marshall Field (Chicago *Sun*) as an associate membership and Hearst Publications, incorporated, (Oakland, Calif., *Post-Enquirer*); Mrs. Eleanor M. Patterson (Washington *Times-Herald*), and the Times Publishing company (Detroit *Times*) to regular membership.

—CIO United Steel Workers, on the bases of incomplete returns, voted 281,047 to 59,042 in favor of a strike to enforce a \$2 daily wage increase.

—President Truman nominated Adm. William F. Halsey, Jr., for promotion to the five-star rank of Admiral of the Fleet.

—President Truman made public Byron Price's report criticizing Allied policy in Germany and urging reappraisal.

Nov. 29—Atty.-Gen. Walter D. Van Riper and three co-defendants got a directed verdict of acquittal by Judge John C. Knox in a Newark, N. J. federal court, freeing them from charges of check-kiting.

—President Truman told reporters he was confident of Russian cooperation with UNO; that he backed modification of the Potsdam declaration to prevent France from nulli-

fying the general occupation policy in Germany; that reconversion was ahead of schedule with 93 per cent of plants currently on peacetime production; that he had withdrawn his support for a Palestine Jewish commonwealth.

—The United Press said Charles A. Lindbergh shot down a Jap Zero with his P-38 on Oct. 10, 1944.

Nov. 30—A two-day storm in New England caused at least 34 fatalities and heavy property damage.

—Evidence at the Pearl Harbor inquiry showed Adm. Harold R. Stark, then Chief of Naval Operations had sent two warnings regarding Japanese actions to Rear Adm. Husband E. Kimmel in Hawaii and other Pacific Navy commanders on Nov. 27 and Dec. 3, 1941.

—The labor-management conference ended with agreement only on these issues: "Arbitration should be invoked to settle all disputes under contracts which have no-strike, no-lockout clauses; negotiations for new contracts should use every means, including mediation and voluntary arbitration, before strikes be permitted;" the U. S. Conciliation Service should be strengthened; there should be no discrimination in employment.

—Employees of Western Union Telegraph company voted 5,277 to 478 in favor of a strike.

—The CIO United Packinghouse Workers voted 17,938 to 889 for a strike to enforce a 25-cent an hour increase.

—The House passed a deficiency appropriation bill of \$1,435,267,312, adding \$122,275,000 for flood control and navigation projects and providing \$182,820,000 for veterans' hospitals and housing.

DECEMBER

Dec. 1—R. J. Thomas, UAW president, accepted GM's offer to reopen the company's parts plants, and promised to provide workers after ratification by union locals.

—Commerce Secretary Wallace named Arthur Paul as special deputy in charge of international trade and foreign commerce operations.

—The Army cut its discharge score for enlisted men from 60 to 55.

Dec. 2—The New York State Health department reported that Elliott Roosevelt's bull mastiff, Blaze, who was killed Nov. 25 after a fight with Fala, President Roosevelt's Scottish terrier, at Hyde Park, did not have rabies.

—Twenty-five State Medical societies, meeting in Chicago, suggested a voluntary health insurance program as an alternative to President Truman's federally-supervised compulsory plan.

—Following complaints of non segregation, the Alabama Public Service commission ordered 15 railroad companies to post copies of the state negro segregation law in every passenger car.

—Rep. Joseph W. Martin, jr., R., Mass., offered a resolution to scrap the universal military training program and urged the House to work through the UNO to outlaw compulsory training.

—Mayor Fiorello H. LaGuardia of New York said he had signed a 26-week contract with American Broadcasting company for a weekly 15-minute broadcast sponsored by *Liberty* beginning Jan. 6. Reported salary was more than \$100,000.

Dec. 3—A survey by James H. Brady and American university revealed total war costs

were \$1,154,000,000,000 and property damage \$230,900,000,000 excluding China. The U. S. spent \$317,600,000,000 for materials; Russia, \$192,000,000,000; the United Kingdom, \$120,000,000,000; Germany, \$272,900,000,000; Italy, \$94,000,000,000; and Japan, \$56,000,000,000.

—Because of the failure of the labor-management conference to solve "the all-important question of how to avoid work stoppages" when other expedients were exhausted, President Truman asked congress for "workable legislation" to avoid industrial strife.

—Oscal Lange, former U. S. citizen and professor at the University of Chicago, arrived in New York as Polish Ambassador to the United States.

—The Navy opened a general court-martial in Washington, charging Capt. Charles B. McVay III with "culpable negligence" for not zigzagging the "Indianapolis" through an enemy submarine area.

—Sen. Pat McCarran, D., Nev., introduced a new bill directing the Civil Aeronautics board to form a single federal international airline, providing for railroad and steamship participation.

—Dr. Vanevar Bush told a Senate committee President Roosevelt did not make the decision to use atomic bombs on Japan since they had not been tested at the time of his death.

Dec. 4—The Paris Sky Chief, TWA Lockheed Constellation, set a commercial record of 12 hours, 57 minutes in its first flight from Washington to Paris.

—Henri Bonnet, French Ambassador to the United States told in Washington of an agreement with the Export-Import bank for a \$550,000,000 loan to France.

—Jean C. Collett, Stabilization administrator, said \$16,000,000 in additional meat subsidies would be paid to packers, in accord with commitments.

—The Friends of the World Council of Churches, incorporated, received a \$1,000,000 gift from John D. Rockefeller, Jr., to help finance "the religious reconstruction of the stricken European countries."

—CIO President Phillip Murray charged in a Pittsburgh broadcast that President Truman had appeased industry with "ever greater opportunities for increased profits at the expense of the American people."

—The Senate passed 65 to 7 the UNO participation bill, with 41 Democrats, 23 Republicans and one Progressive voting pro and six Republicans—Langer, Moore, Revercomb, Shipstead, Wherry and Taft—and one Democrat, Wheeler, voting con.

—Tyler Kent denied in New York on his arrival from Britain that he had removed files from the U. S. Embassy in London to give information to the Axis.

—The House passed and sent to the Senate a bill authorizing a post war Navy of 666,000, including 500,000 enlisted men and 8,000 officers of the Marine Corps.

Dec. 5—Stabilization Administrator John C. Collett designated 33 per cent. a rise of as three per cent since the spring of 1945, as the percentage increase in the cost of living between January, 1941, and September, 1945.

—Lieut.-Gen. Leonard T. Gerow, War Plans Division chief in 1941, accepted responsibility at the Pearl Harbor inquiry for failing to evaluate correctly General Short's answer ("alerted to prevent sabotage") to General Marshall's Nov. 27, 1941, war warning.

—Maj.-Gen. Partick J. Hurley told the

Senate Foreign Relations committee the following five career diplomats had sabotaged U. S. policy in China: George A. Atcheson, Jr., John S. Service, John Davies, Fulton Freeman and Arthur Ring.

—State Secretary Byrnes said the U. S. might propose to Russia and Britain that the Big Three powers establish a centralized administration for their German zones without the French.

—The Senate passed the \$550,000,000 UNRRA appropriations bill, minus restrictive amendments.

Dec. 6—The Labor Department's Children's bureau said infant mortality from 1933 to 1943 was cut 31 per cent, from 58 to 40 deaths per 1,000 live births. Maternal mortality in the same period fell 61 per cent in the same period, from 62 to 24 deaths per 10,000 live births. The birth rate rose 30 per cent.

—Henry Lustig, president of the Longchamps restaurant chain in New York, and four associates were indicted by a New York Federal grand jury on charges of falsifying records to evade income and excess profits tax payments of \$2,872,766 for the years 1940 to 1944.

—President Truman and Prime Minister Attlee announced in Washington and London the signing by State Secretary Byrnes, Treasury Secretary Vinson, Ambassador to the U. S. Lord Halifax and British Treasury Adviser Lord Keynes of a \$4,400,000,000 loan agreement with Britain under which the U. S. waived repayment of about "\$25,000,000,000 in lend-lease."

—The House voted 327 to 39 for a second \$1,350,000,000 UNRRA appropriation for 1946, adding a request that U. S. correspondents be allowed to report on disposition of supplies.

—At a resumption of negotiations in Detroit, GM renewed its offer of a 10 per cent wage increase. The UAW rejected it, maintaining its stand for a 30 per cent rise.

—President Truman signed the bill strengthening Congressional control over government corporations.

Dec. 7—Two letters dated Sept. 25, and Sept. 27, 1941, written by Gen. George C. Marshall to Gov. Thomas E. Dewey, revealing the U. S. had broken both the German and Japanese codes were introduced at the Pearl Harbor Inquiry. Marshall urged Dewey to keep the secret from leaking out during the Presidential campaign.

—The State department announced that in accordance with the Yalta decision State Secretary Byrnes, British Foreign Secretary Bevin and Soviet Foreign Commissar Molotov would meet in Moscow Dec. 15 to discuss atomic energy and other international issues.

—UAW President R. J. Thomas said in Detroit the Justice department had been investigating complaints that GM violated anti-trust laws.

—The FBI announced it had arrested more than 1,500 Axis agents in North and South America during the war.

Dec. 8—Lieut.-Col. H. E. Warden and Capt. Glenn W. Edwards piloted the Douglas XB-42, a twin-engine bomber with dual rotation pusher propellers, from Long Beach, Calif., to Washington, D. C., in five hours, 17 minutes 34 seconds, cutting 46 minutes from the west-east record. The propellers were in the tail of the plane.

—Nineteen persons, mostly veterans, were killed when a C-47 crashed at Billings, Mont.

—General Marshall testified at the Pearl

Harbor inquiry he did not telephone his final warning of Dec. 7, 1941 to Honolulu but sent it directly by commercial telegraph because the transatlantic talks of President Roosevelt and Churchill were being tapped.

—In his third and final report as Commander-in-Chief of the U. S. Fleet and Chief of Naval Operations, Adm. Ernest J. King asserted Japan's defeat was due to U. S. sea power.

—The UAW rejected President Truman's appeal to end its 18-day GM strike, and denounced his legislative proposals, including the fact-finding boards.

Dec. 9—The Labor department reported 1944 family incomes the highest in history, with half of all families and single persons having incomes after taxes of at least \$2,700 compared with \$1,900 in 1941.

—Gen. George S. Patton, Jr., suffered a fractured vertebra in the neck when a two and a half ton army truck crashed into his sedan near Mannheim.

—Bobby Riggs, Los Angeles, defeated Don Budge, 9-11, 6-3, 6-0, for the world's professional hard court tennis championship in Los Angeles.

—The Network Hooper ratings for radio popularity in 1945 ranked programs as follows: Bob Hope, Fibber McGee and Molly, Radio Theater, Walter Winchell, Charlie McCarthy, Jack Benny, Mr. District Attorney, Fred Allen, Abbott and Costello, Screen Guild Players, Take it or Leave it, Music Hall, Eddie Cantor, Jack Haley, and the Aldrich Family.

Dec. 10—The Navy ended its search for 27 Navy airmen who disappeared off the Miami coast in six planes Dec. 5.

—President Truman and Prime Ministers Attlee and King jointly announced dissolution on Dec. 31 of the Combined Production and Resources board and the Combined Raw Materials board as unnecessary world trade controls.

—The Supreme court ruled 5-3 it was unfair labor practice for an employer to ask authority to raise wages without dealing through the employees' certified union. (Famous-Barr Co. vs CIO-URWSE).

—The Supreme court ruled in two cases from Louisiana and Texas, "community property" states, that all "community property" of a married couple should be included in the estate of the husband or wife who dies first" and taxed accordingly.

—General George C. Marshall revealed three secrets of November, 1941, at the Pearl Harbor inquiry:

1. The Army knew as early as Nov. 25 several Japanese divisions had embarked in about 40 ships at Shanghai and were on their way south in the China sea.
2. Two armed B-24 bombers, their crews instructed to fight if attacked, were ordered Nov. 26 to make a reconnaissance flight over the Japanese-mandated islands of Truk, Jaluit and Ponape, but the planes were caught in the Pearl Harbor raid.
3. The British request to station some U. S. warships at Singapore to free British ships for the European theater had been rejected.

—The UAW offered the Ford Motor company in Detroit a security plan, agreeing not to participate in any unauthorized strike while under contract.

—General Motors cancelled its agreement with UAW in accordance with terms giving it the right to do so after the strike lasted 10 days.

Dec. 11—Piloted by Col. Clarence S. Irvine and Lieut.-Col. G. R. Stanley, the B-29 "Dreamboat" made a 2,464 mile trip from Burbank, Calif., to New York in five hours, 27 minutes, eight seconds, averaging 450 m.p.h.

—U. S. Education Commissioner John W. Studebaker declared college and university enrollment in the fall of 1945 reached 950,000, or 200,000 above 1944, compared with the 1,400,000 peak in 1939.

—Philip Murray, president of the United Steel Workers, announced a nation wide steel strike would begin Jan. 14, 1946, unless the union's \$2-a-day wage demand was met or compromised.

—The Senate voted for a \$700,000,000 federal-aid bill for hospital and health center construction within five years. The government would provide \$375,000,000 through grants, to be increased by the states.

The Senate also passed the Mead resolution to provide 100,000 temporary housing units for veterans' families, authorizing \$160,000,000.

Secretary of State Byrnes released the following statement of U. S. policy toward Germany:

1. To increase German coal exports to liberated countries.
2. To prevent mass starvation.
3. To reach an agreement on industrial reparations.
4. To speed up the organization of German administration in production and trade.

—The Army Pearl Harbor Inquiry board's records were found to contain a statement that the FCC intercepted Dec. 3, 1941, and turned over to the Navy the Japanese "winds execute message." The message read "War with the United States, war with Britain, including the Netherlands East Indies, except peace with Russia."

Dec. 12—The Treasury reported top incomes in the 1944 fiscal year, with Louis B. Mayer heading the list with \$903,070.

—President Truman named a fact-finding board for the GM-UAW dispute in spite of labor opposition. Walter P. Stacy, Chief Justice of the North Carolina Supreme court headed it and Lloyd K. Garrison, NWLB chairman and Milton S. Eisenhower, Agriculture department aide were other members.

—Atty.-Gen. Tom C. Clark opened in Washington a drive with the Agriculture and Treasury departments, OPA and FBI to smash a nationwide black market in textile products.

—Navy Secretary Forrestal presented the Navy's security plan to the Senate Military Affairs committee, providing for an autonomous AAF and maintaining separate Army and Navy cabinet members.

—President Truman adopted the following housing program prepared by Reconstruction Director John W. Snyder and appointed Wilson W. Wyatt, former Louisville (Ky.) mayor, as Housing Expediter under the OWMR. The program:

1. Speeded release of surplus housing units and building materials and suspension of unnecessary construction.
2. Gave priorities on building materials, channeling 50 per cent into construction of \$10,000, or less, dwelling units.
3. Strengthened price ceilings on materials and sale of old and new housing.

Dec. 13—The State department invited Belgium, Australia, Brazil, Canada, China, Cuba, France, Czechoslovakia, the Netherlands, India, New Zealand, South Africa, Russia and Britain to a preliminary meeting

of the International Trade conference to discuss reciprocal lowering of tariffs.

—The Senate and House passed a compromise agency reorganization bill, exempting from presidential revamping the ICC, FTC, SEC, National Mediation board, National Railroad Adjustment board and Railroad Retirement board. Partially exempted were the Army Engineer corps, General Accounting Office, Controller General, FDIC, FCC, Tariff Commission and Veterans Administration. The House vote was unanimous, and the Senate, 48 to 23.

Dec. 14—The Civil Aeronautics board approved British restrictions on U. S.-London flights to 14 weekly by American lines.

—Because of the slow pace of the inquiry, William D. Mitchell, counsel for the Pearl Harbor Congressional committee and three of his assistants resigned.

—The House passed, 254 to 126, a modified version of the Senate full employment bill, stripping it of the statement that the government would assure jobs for all.

—The Senate voted 23 to 45 against a temporary 33 per cent salary increase for members of Congress to meet the rise in living costs since 1941.

—The House Foreign Affairs committee approved legislation making permanent the State department unit disseminating U. S. news to the world.

Dec. 15—As General Marshall left Washington for his new China post, President Truman issued the following statement on the U. S. official policy toward China:

1. "a cessation of hostilities . . . be . . . arranged between the armies of the National government and the Chinese Communists and other dissident Chinese"
2. "a national conference . . . of major political elements" to bring about "the unification of China."

—UAW President R. J. Thomas appealed to British Prime Minister Clement R. Attlee for a "demonstration of solidarity" with the union, pointing out that since the British Government owned 434,000 shares of GM common stock, the corporation's profits were its concern.

—The Labor department said total November employment, excluding agricultural workers, was 35,620,000, a 413,000 increase over October.

—Fleet Adm. Chester W. Nimitz took the oath of office as Chief of Naval Operations on the retirement of Fleet Adm. Ernest J. King.

Dec. 16—The record-breaking Douglas XB-42 "Mixmaster" crashed at Oxon hill, Md. Three army officers aboard bailed out.

—A United Jewish Appeal meeting in Atlantic city voted for a 1946 campaign to raise \$100,000,000 for its work.

—The Seaboard Air Line Railway's south-bound "Silver Meteor" crashed into the north-bound "Sun Queen" near Kollock, S. C., killing seven persons and injuring 65.

—The Navy announced Sinclair Oil company had granted an 18 per cent wage increase with a 40-hour week to the CIO United Oil Workers, affecting about 2,500,000 workers. The Navy would return the company's 11 properties, seized Oct. 5 on Dec. 17.

—Henry Ford II said in Detroit auto parts suppliers were responsible for his company's failure to produce its promised 80,000 by Christmas.

Dec. 17—Vice Adm. Theodore S. Wilkin-

son, Chief of Naval Intelligence in 1941, testified at the Pearl Harbor inquiry he knew at 9:15 a.m. Dec. 7, 1941 the Japanese were about to break off negotiations and tried unsuccessfully to get Adm. Harold R. Stark, Chief of Naval Operations, to send a general warning to the fleet.

—The Senate passed and sent to the President the \$1,350,000,000 UNRRA fund bill.

—President Truman ordered the FEPC to investigate discrimination against displaced war workers seeking peacetime jobs.

—Charles A. Lindbergh asked in a Washington speech for a world organization backed by military power and guided by Christian ideals.

—David A. Simmons, president of the American Bar association, said at its Cincinnati meeting Supreme court justices color their decisions by their "own notions of equity" through legal "double talk."

Dec. 18—The motorman of a Hudson and Manhattan railroad train was killed and 67 passengers were injured when it crashed into a lift bridge over the Passaic River, N.J.

—The Agriculture department reported the 1945 U. S. crop the third largest on record, falling 1.5 per cent below 1944 and two percent below 1942. Wheat production was 1,123,143,000 bushels, a new high; tobacco more than 2,000,000,000 pounds, also a record; corn, 3,018,410,000 bushels below 1944.

—The UAW rejected a Ford Motor Company offer of a 15 cents an hour, or 12.4 per cent average increase, in return for which the union must guarantee management prerogatives, elimination of unauthorized work stoppages and reduction of the number of union committeemen.

—The UAW reiterated its stand for a 30 per cent wage increase from General Motors.

—The Senate voted 62 to 3 for the Byrd-Hart-Hickenlooper bill providing a \$200,000,000 pay increase, averaging 11 per cent, for more than 1,000,000 federal employees.

—The Senate passed a bill disposing of 4,750 surplus war cargo ships of nearly 50,000,000 deadweight tons and costing about \$10,000,000,000.

—Washington reported the State department planned to employ 2,000 persons in its new Office of International Information and Cultural Affairs under William T. Stone.

Dec. 19—President Truman asked Congress for unification of the nation's armed services under a single Secretary of National Defense.

—Both Houses of Congress accepted the conference report on the UNO participation bill, voted favorably Dec. 18 in the House 344 to 15.

President Truman nominated Edward R. Stettinius, Jr., U. S. representative with the rank of Ambassador to the Security Council and principal representative to the UNO General Assembly, meeting in London Jan. 10. State Secretary James F. Byrnes was named senior representative to the Assembly.

Other representatives: Mrs. Eleanor Roosevelt; Sen. Tom Connally, D., Tex.; Sen. Arthur H. Vandenberg, R., Mich. Assembly alternates: Rep. Sol Bloom, D., N. Y.; Rep. Charles A. Eaton, R., N. J.; former Postmaster Gen. Frank C. Walker, John Foster Dulles and ex-Sen. John G. Townsend.

—The House adopted the Senate-approved Palestine resolution.

—Both Houses passed the revised GI Bill of Rights and sent it to the White House.

—The Senate voted 31-30 against ex-

tending the Second War Powers act until the end of 1946, limiting it to June 30, in opposition to the Administration.

—Sen. J. William Fulbright, D., Ark., introduced a bill to transfer from the SPA to the State department control over disposition of all surplus property.

—The Pearl Harbor Congressional committee asked Congress to extend its life from Jan. 3 to Feb. 15.

—The Selective Service bureau ordered the drafting of all fathers discontinued.

—The President's fact-finding board opened hearings in Washington on the GM-UAW dispute, with GM insisting that its profit position concerns it alone.

Dec. 20—The Appellate division of the New York Supreme court rejected the appeal of John S. Fay and James Bove, AFL Union leaders, and upheld, 3-2, their conviction in March, 1945, on conspiracy and extortion charges.

—A severe storm over the Atlantic delayed five of 13 troop ships due to dock in New York Dec. 19, and damaged the U. S. aircraft carrier "Wasp" and cruiser "Augusta", which put in at Plymouth and Portsmouth for repair.

—The Association of American Railroads imposed a freight embargo on Buffalo, N. Y. because of snow clogged railroad yards left by a blizzard over northern U. S. which deposited 73 inches of snow there and eight and a half inches in New York City.

—The Senate confirmed the President's nominations to the UNO General Assembly as Mr. Truman signed the UNO participation bill.

—The Senate also approved there other bills: to increase regular Army officers from the present 16,719 authorized to 25,000; to establish permanent stock piles of critical materials, and to permit 20,000 Naval Reserve students to stay in college at government expense until July 1, 1946.

—The Senate subcommittee on war mobilization approved a revised measure to create a national science foundation with guarantees of scientific freedom, member selections on a non-political basis and provision for a President-appointed administrator and a deputy administrator.

—The House passed the Second War Powers act limiting it to June 30, 1946 and authorized overloading of ships until troops overseas were returned.

—Both Houses approved extension of the Pearl Harbor inquiry until Feb. 15; passed a conference-approved \$2,400,000,000 deficiency supply bill, carrying \$750,000,000 for UNRRA, \$191,000,000 for veterans housing and \$125,000,000 for navigation and flood control projects, and agreed to delay opening the second session of Congress until Jan. 14.

—President Truman signed the Government Reorganization bill. He also ruled that fact-finding boards such as the GM-UAW and oil boards had to have authority to examine employers' books, because "ability to pay" was always relevant to "the issue of an increase in wages."

—The Kings County (New York City) grand jury, that accused Mayor-elect William O'Dwyer of misconduct in October, charged him with failure to indict and convict Albert Anastasia for the murder of Peter Panto, longshoreman, when O'Dwyer possessed "legal evidence" of Anastasia's guilt in 1940.

Dec. 21—Americans mourned the death of Gen. George S. Patton, Jr., 60, who died

in Heidelberg following a motor accident Dec. 9.

van Rensselaer, Stephen, 74, Dec. 17, in Morristown, N. J. Author, antique collector, early American firearms authority.

Buzzard, Sir E. Farquhar, 74, Dec. 18 in London. Medical attendant to Kings George V, VI, and Edward VIII.

Nutt, Joseph R., Dec. 18, in Cleveland. Financier, former treasurer of the Republican National committee.

Pattin, Gen. George S., Jr., 60, Dec. 21, in Heidelberg, Germany, of a lung congestion caused by paralysis of the chest suffered in an auto accident Dec. 9. Former commander of the U. S. 3rd Army who led his troops to victory in North Africa, Sicily and on the Western front. General most feared by Nazi troops during World War II.

Yoelson, The Rev. Morris R., 88, Dec. 23, in Washington. Father of Al Jolson.

Gay, Byron, 59, Dec. 23, in Los Angeles. Composer of "Avalon," "Horses," and "Song of the West."

Kersey, Dr. Charles Anselm, 100, Dec. 23, in Muncie, Ind. Oldest living graduate of the University of Michigan.

Sullivan, Arthur W., 66, Dec. 25, in Chicago. President of Central Manufacturing District Printing company.

Neurath, Dr. Otto, 63, Dec. 26 in London. Developer of the isotope method of illustrating statistics.

Keyes, Lord, 73, Dec. 26 in London. Founder of the British Commandos and admiral of the fleet. Died of a lung affliction suffered at Leyte.

Dreisler, Thomas, 74, Dec. 28 in Hollywood. Novelist, author of *An American Tragedy*.

Whelan, George J., 80, Dec. 29 in East Orange, N. J. Co-founder of United Cigar Stores company of America.

Jackson, Josephine Agnes, 80, Dec. 31 in Palo Alto, Calif. First woman graduated from Rush medical school, University of Chicago.

Douglas, Donald, 40, Dec. 31 in Hollywood. Film character actor and former New York stage figure.

Farmer's Share

In 1943, farmers of this country received 52 cents of the consumer's food dollar. In prewar years, his share was about 40 cents.

Secondary Roads

Six million American farms, with a total annual production of 12 billion dollars, are served by secondary roads.

DIMENSIONS OF CONTINENTAL UNITED STATES

The two points farthest apart in the United States are Cape Flattery, Wash., and a point on the Florida coast south of Miami, an air-line distance of 2,835 miles. The southernmost part of the United States is at Cape Sable, Fla., latitude 25°07', longitude 81°05'. The southernmost part of Texas is 49 miles north of this point. The nation's northernmost point is the Lake of the Woods projection, 49°23'04.5" latitude, longitude 95°09'11.6", in Minnesota.

Easternmost land is West Quoddy head, near Eastport, Me., in longitude 66°77', latitude 44°49', and westernmost is Cape Alava, Wash., longitude 124°44', latitude 48°10'. From the south point of Texas to the Canadian boundary due north is 1,593 miles. From West Quoddy head westward to the Pacific ocean is 2,807 miles.

The length of the Mexican boundary, from the Gulf of Mexico to the Pacific ocean, is about 2,013 miles. The length of the northern boundary, including the water boundary

of the Great Lakes, is 3,987 miles. Lengths of the mainland tidal coastlines are: Atlantic ocean, 5,565 miles; Gulf of Mexico, 3,641 miles; Pacific ocean, 2,730 miles; total, 11,936 miles, which, added to the Canadian and Mexican boundary lines, gives a grand total boundary mileage of 17,936 miles. It is estimated that the total length of the coast line of the United States and all its outlying possessions is nearly 50,000 miles.

The total area of continental United States, excluding the water area of the Great Lakes, is 3,022,387, according to the 1940 Census.

Farthest south United States' possession is Rose Islet of the Samoan group—almost exactly 1,000 miles south of the Equator. The point farthest north is Point Barrow, Alaska, nearly 5,000 miles north of the Equator. The total area of outlying possessions, excluding the Philippines, is, according to 1940 Census, 597,257; including Philippines, 712,857 square miles.

HISTORY, SHAPE AND SIZE OF THE EARTH

Source: U.S. Hydrographic Office

EARTH HISTORY — ORIGIN

The most generally accepted theory of the origin of the earth is the Gaseous-Tidal Hypothesis. It states that the earth and the other members of the Solar System, which includes the sun, the planets and their satellites the planetoids, the comets, and the meteors are linked in their history and have had a common origin. The earth and the planets consist of material torn from the sun and set revolving in individual orbits by a stellar explosion which partially disrupted the sun. The separation of this material was effected by the tremendous gravitational attraction of a star passing relatively close to the sun, the disrupted substance taking the

form of a long filament of gas streaming forth from the tidal cone nearest the star. The instability of this stream of gas tended to break it into sections, these sections contracting into spheres. After the recession of the passing star, each segment was allowed to fall back toward the sun, the origin; highly elliptical orbits being rounded into more circular form by the resistance of the original gaseous envelope. The earth was thus first gaseous and self luminous, gradually cooling through a molten stage to solidify, being molten until just before the beginning of geologic time.

AGE OF THE EARTH

Three methods have been used to estimate the age of the earth: (1) Rate at which sediments are laid down; (2) Rate at which the salinity of the ocean has increased; (3) Radio-active minerals. The last method is considered the most reliable. It depends upon the rate at which lead is formed in the disintegration of uranium. This rate has been accurately determined by electrical devices.

It has been found that 1 gram of uranium yields annually $\frac{1}{7,600,000,000}$ of a gram of lead. Therefore when the ratio of lead to uranium in a crystal of uranium bearing mineral has been determined, the age of the mineral can be found. From such investigations it appears that the age of the earth is at least 2,000,000,000 years.

CONTINENTAL MASSES AND OCEANIC BASINS

Most geologists hold that since the earth passed through a fluid stage its solidified crust was originally as level as the ocean surface. Regional differentiation in density led to the formation of continents and ocean basins. The oceanic segments were depressed

below the continents because of their great density, the continental masses being vast plates of granitic rocks resting in isostatic equilibrium on a substratum of more basic materials.

CLIMATE

Great changes in earth climate have occurred during geological time, large portions of the continents being alternately covered with ice and then freed by its recession. During the last great ice advance, which occurred during the Pleistocene epoch, ice sheets spread over nearly one-sixth of the existing lands. These ice sheets have not completely disappeared, the desolate continent of Antarctica, like the ice-capped island of Greenland being remnants of the greater ice

fields of this period. Aside from Antarctic the great ice sheets of the Pleistocene were in the northern hemisphere, one centering over Canada, the other over Scandinavia. The Ice Age is generally accepted as beginning about 1,000,000 years ago.

Three factors were probably responsible for these changes in earth climate: (1) Continental elevation; (2) Changes in Atmospheric Composition; (3) Variation in Solar Radiation.

EARTH TEMPERATURES

The average temperature (Fahrenheit) at the North Pole ranges from 30.2° in July to -41.8° in January with a yearly average of -8.9°. The Russian weather observers from Moscow, who flew to the North Pole in airplanes and camped near there on a drifting ice flow in May 1937 experienced days when the temperature was up to 32.0°. At the

South Pole (Little America lat. 78°34' lon. 163°55' W.) the range is from 19.2° January to -38.9° in July with a yearly average of -13.0°.

At the equator the annual range is from 78.3° in July to 79.9° in April with an average of 79.3°.

AREA AND DIMENSIONS OF THE CONTINENTS

In square miles (statute):
 Africa: 11,500,000.
 America (North): 8,300,000 including outlying lands and islands.
 America (South): 6,800,000.
 Asia: 17,000,000 with appertaining islands.
 Europe: 3,750,000.
 Oceania: 4,000,000.
 Antarctica: 6,000,000.
 Asia the largest continent is about 6,000 statute miles from east to west and over 5,300 miles from north to south. Africa is

5,000 miles from north to south. Europe 2,400 miles from north to south and 3,3 miles from east to west. South America 4,600 miles from north to south and 3,2 miles from east to west. North America 4,900 miles from north to south and over 4,000 miles from east to west.

Of the earth's area, fertile regions occupy about 33,000,000 square miles, steppes about 19,000,000 square miles, deserts about 10,000,000 square miles.

SHAPE OF THE EARTH

In defining the shape of the earth it is necessary to distinguish between three separate surfaces: (1) The Spheroid or Ellipsoid; (2) The Geoid; (3) The Topographical Surface.

(1) The Spheroid or Ellipsoid is the regular, symmetrical, mathematical surface formed by the rotation of an ellipse about its shorter axis. The International Geodetic and Geophysical Union has adopted as the International Ellipsoid of Reference such a surface whose dimensions are: Semi-major axis (equatorial radius) $a = 6,378,388$ m. or 3963.34 statute miles, Semi-minor axis (polar radius) $b = 6,356,911.9$ m. or 3949.99 statute miles. Ellipticity (flattening)

$$\frac{a-b}{a} = \frac{1}{297} = 0.003,367,0034$$

(2) The Geoid is defined as the surface

which is everywhere normal to the force of gravity and which coincides with the mean surface of the oceans of the earth.

(3) The Topographical Surface is the actual physical surface of the earth as it exists.

These three surfaces do not coincide. The Geoidal Surface coincides with the mean surface of the ocean but intersects the Spheroid. Neither the Spheroid or the Geoid coincides with the Topographical Surface. The simplest method by which the dimensions of the spheroid can be determined is by the measurement of two meridian arcs. The length of each arc and the latitudes of the terminal points must be measured. If the earth were a perfect spheroid and there were no errors of measurement the two arcs would determine exactly the elements of the spheroid.

SIZE OF THE EARTH

The spheroids which have been most extensively used are those of Bessel (1841) and Clark (1866). The Bessel Spheroid is generally used in Europe in geodetic surveys. It was employed in the United States up to about 1880. Clark's Spheroid (1866) is larger and flatter than Bessel's. It was adopted by the U.S. Coast and Geodetic Survey about 1880 after it became evident that the earth's surface in this part of the globe has a flatter curvature than that indicated by the Bessel Spheroid. The semi-axes of these two spheroids are as follows:

Bessel (1841) semi-major axis $a = 6,377,397$ m or 3962.72 statute miles, Bessel (1841) semi-minor axis $b = 6,356,079$ m or 3949.48 statute miles, Clark (1866) semi-major axis $a = 6,378,206$ m or 3963.23 statute miles, Clark (1866) semi-minor axis $b = 6,356,584$ m or 3949.79 statute miles. Other dimensions

of the earth derived from the elements of the International Ellipsoid are:

Equatorial Circumference of the Earth: 40,076,593.6 m or 24,902.39 statute miles.

Meridional Circumference of the Earth: 40,009,153.2 m or 24,860.49 statute miles.

Area: 510,100,934 sq. Km., or 196,950,312 sq. miles (statute).

Length of 1° of longitude along equator: 111,323.8 m or 69.17 statute miles.

Length of 1° of latitude at equator: 110,575.5 m or 68.71 statute miles.

Length of 1° of latitude at pole: 111,699.9 m or 69.41 statute miles.

Mass of ellipsoid (Mean density taken as 5.527) : 5.988 X 10.21 metric tonnes or 6,600,572,400,000,000,000 that is six sextillion, 600 quintillion five hundred seventy-two quadrillion, four hundred trillion short tons.

Physical Oceanography

ORIGIN OF THE OCEAN

The high temperatures originally prevailing in the gaseous earth prevented the formation of chemical compounds. When the temperature had fallen to the neighborhood of 4800° C. metallic carbides began to solidify in patches to form a crust, but the oxygen remained uncombined until the temperature had fallen below 3000° C. Until this stage had been reached the earth was surrounded by an atmosphere largely of free oxygen. When the temperature reached this stage all

the available hydrogen combined with oxygen to form water, but until the earth had cooled to a temperature of 374° C. all the water remained in the atmosphere in a vaporized condition. As soon as the temperature had fallen below 374° C. the vapors commenced to condense and precipitation took place on a large scale, lightening the atmosphere and covering the earth with its ocean waters.

OCEANIC BASINS

The present oceanic basins and continental masses were thus established early in the history of the earth and have persisted throughout the geologic ages. The oceans have always been where we see them now but have repeatedly grown larger and deeper, while the continents have lost part of their marginal areas and have attained from time to time higher average levels. When the oceanic basins subsided the continents stood higher above sea level though they had not risen at all. The added gravity and resulting greater pressure then caused them to flatten

down through continental creep. Through crustal movements and continental creep, the oceans repeatedly spread over the continents as shallow seas, and spilled more widely because of the added land wash that the rivers transported into them. The incursions of the oceans over the continents were often withdrawn by the recurrent deepening of the oceans, but there never has been general interchange in position between the continental masses and the basins of the oceans.

BOTTOM CONFIGURATION OF THE OCEANS

Although some work has been done by scientific organizations, by far the greater portion of the knowledge of submarine topography is based on soundings taken in the preparation of navigational charts. In the United States the Hydrographic Office of the U. S. Navy carries out this work on the high seas and in foreign waters. Devices for measuring the depth by timing the interval for a sound impulse to travel to the sea bottom and back again have greatly simplified the mapping of the topography of the bottom of the ocean.

The topography of the ocean bottom is characterized by depressions and elongated ridges, some of which are of very great dimensions. Longitudinal ridges divide the three oceans into elongated troughs, this feature being most conspicuous in the Atlantic Ocean, where the Atlantic Ridge separates the western and eastern troughs. Throughout its extent of more than 8,000 miles in the Atlantic, the general rise of its crest is of the order of 10,000 feet above the bottoms of the basins which it separates. A longitudinal ridge, the Indian Ridge, is present in the Indian Ocean, and extends from India to Antarctica. It differs from the one in the Atlantic Ocean in that it is wider and does not extend so near the surface. In the Pacific Ocean the longitudinal elevations are not so conspicuous but the West Pacific Ridge, composed of several shorter ridges, can be traced from Japan to Antarctica. Within the major depressions which are bordered by the continents and the longitudinal ridges are transverse ridges which separate a number of basins. The conspicuous features of the bottom topography of the Arctic Ocean are the deep isolated basins and the wide shelf from which rise the large islands of the Canadian Archipelago, Greenland, and most of the islands to the north of Europe and Asia.

The bottom topography of the North and South Polar Regions is strikingly different. The semi-isolated basins of the North are lacking in the South Polar Regions. A shelf exists only off the coast of South America where the Falkland Islands rise from it. Antarctica is joined to South America by a ridge, the South Antilles Arc, upon which are located South Georgia, South Sandwich, South Orkney, and South Shetland Islands. The ridge extending from Australia to Antarctica supports Macquarie Island and is known as the Macquarie Ridge. The deep basins extend close to the continent of Antarctica and their slopes are relatively steep.

The deepest recorded place in each of the several oceans is as follows:

North Atlantic Ocean, "Milwaukee Depth" 30,246 feet in (approximately) lat. 19°36' N., lon. 68°20' W., recorded by the U. S. S. *Milwaukee*, February 14, 1939. This spot is located in the western part of the Puerto Rico Trough.

Caribbean Sea, 23,748 feet, in Oriente Deep (part of Caymen Trough), lat. 19°35' N., lon. 76°51' W., recorded by the U. S. S. *S-21*, in October 1928.

South Atlantic Ocean, a sounding of 26,575 feet in (approximately) lat. 55°05' S., lon. 26°45' W., recorded by the German research and surveying ship *Meteor* in 1926.

North Pacific Ocean, "Emden Depth," 35,400 feet, in (approximately) lat. 9°41' N., lon. 26°51' E., recorded by the German cruiser *Emden* on April 29, 1927. The second greatest depth of 34,626 feet was recorded by the U. S. S. *Ramapo*, April 30, 1933 in lat. 30°43' N., lon. 142°28' E.

Previously the German surveying ship *Planet* recorded a sounding of 32,113 feet in (approximately) lat. 9°55' N., lon. 126°58' E., on June 2, 1912 and the U. S. S. *Nero* a sounding of 31,614 feet in lat. 12°43'15" N., lon. 145°49'00" E., on November 14, 1899. There is also a sounding of 32,212 feet obtained by the Japanese surveying ship *Mansyu* on December 4, 1927, in lat. 11°13' N., lon. 142°09'30" E. Previously a sounding of 30,954 feet in "Tuscarora Depth" in (approximately) lat. 30°49' N., lon. 142°18' E., was recorded by the *Mansyu* on August 14, 1924.

South Pacific Ocean, "Aldrich Depth" 30,930 feet, in (approximately) 30°27' S., lon. 176°39' W., recorded by the British ship *Penguin* in 1895.

Indian Ocean, "Wharton Depth", 22,967 feet, in (approximately) lat. 10°01' S., lon. 108°00' E., recorded by the German surveying ship *Planet* in 1906.

Arctic Ocean, a sounding of 17,850 feet in (approximately) lat. 77°45' N., lon. 175°00' W., recorded by Hubert Wilkins on March 29, 1927.

Antarctic Regions, Pacific sector, a sounding of 15,720 feet in lat. 56°45' S., lon. 104°30' W. Atlantic sector, a sounding of 16,272 feet in lat. 67°00' S., lon. 11°10' W. Indian sector, a sounding of 19,044 feet in lat. 60°30' S., lon. 43°30' E.

As the deepest spot in the ocean is 35,400 feet below sea level and the highest mountain 29,141 feet above sea level (Mt. Everest in Indo-China in the Himalayas), there is a range of 64,541 feet or about 12.2 mile between the bottom of the ocean and the top of the land.

Physical Properties of Sea Water

TEMPERATURE

The temperature of the ocean is due directly or indirectly to the effects of solar radiation and to a far lesser degree to adiabatic heating or cooling and volcanic disturbances.

The surface temperature varies with the seasons. In summer, in some of the larger seas there is a very warm layer floating over the deeper, colder water and between the two a discontinuity or thermocline. In autumn the two layers merge because of convection currents produced by the cooling of the surface water. In winter there will often be a layer of cold water floating on

warm water of greater density; below the warm layer the temperature gradually decreases with depth. The water in the tropic may have surface temperatures as high as 28°C. (82.4°F.) and lower than 0°C. (32.0°F.) at the bottom.

SALINITY

It has been found that regardless of the absolute concentration, the relative proportions of the major constituents of seawater are virtually constant. From this it follows that any of the major constituent may be used as a measure of the others and

of the total amount of salt, and that water samples having the same total salt content, regardless of their source, are virtually identical in their physical properties.

The salinity of the ocean is generally between 33 parts per thousand and 37 parts per thousand. The surface salinity in high latitudes, in regions of high rainfall, or where there is dilution by rivers may be less. In isolated areas where evaporation is excessive salinities may reach 40 parts per thousand. As the range in the open ocean is small, 35 parts per thousand is sometimes used as an average for all oceans.

COLOR

A scattering is produced by the molecules of water and is the greatest for light of the short wave lengths. Thus pure water is blue, and a deep body of water will be blue when viewed from above. Suspended particles will reflect and absorb light. The light of the longer wave lengths is reflected by the suspended particles, and this, blending with scattered blue light gives the characteristic green color of water rich in suspended matter.

COMPRESSIBILITY

The coefficient of compressibility is exceedingly small but is decidedly effective when dealing with a large water mass. It is slightly affected by temperature and chlorinity. The mean value is approximately 0.0000046.

DENSITY

A constant relationship between chlorinity and density has been found to exist and is expressed by:

Density = $-0.069 + 1.4708cl - 0.00157cl^2 + 0.0000398cl^3$ cl = chlorinity
When the chlorinity the density can be found from tables.

FREEZING POINT

If the chlorinity is known the freezing point can be found from the formula:

Freezing point = $-0.0966cl - 0.0000520cl^3$ where cl = chlorinity.

Tables are available showing the freezing point vs. salinity. As an example, the freezing points of samples of water of varying salinity are: Salinity 25 parts per thousand, freezing point 29.6° F. salinity 35 parts per thousand, freezing point 28.6° F.

TRANSMISSION OF SOUND IN SEA WATER

The ocean water is a very efficient medium for the transmission of sound which travels more rapidly and with much less absorption of energy through water than air. This characteristic has made possible the development of acoustic methods which are of great value in navigation. Examples are: Echo-sounding used in determining depth, radio acoustic ranging used in position determination of hydrographic surveying, submarine sound signals transmitted from lightships and light houses to enable ships to determine their positions, and sound devices for locating navigational hazards in the path of a vessel. In the use of some of these devices it is necessary to know the velocity of sound in sea water. The fundamental expression for this velocity is:

$$\text{Velocity} = \sqrt{\frac{\text{elasticity}}{\text{density}}}$$

Tables of velocity of sound in sea water are available. For example: At a temperature of 70° F. and salinity of 33 parts per thousand the velocity at the surface is 4985 feet per second.

OCEAN CURRENTS

Ocean currents may be divided into three groups:

(1) Currents caused by the stress of the wind on the sea surface.

(2) Currents related to the distribution of density.

(3) Tidal Currents.

The velocity of ocean currents varies from zero to over 3 miles per hour.

Geography of the Oceans

BOUNDARIES

Complete international acceptance has not been accorded any definition of the limits of the oceans and seas. Three Oceans: the Atlantic, Pacific and Indian are in general recognized. In addition the north and south circumpolar seas are sometimes termed the Arctic and Antarctic Oceans. The approximate boundaries of the three oceans are: The Arctic and Antarctic circles, the continents, and imaginary lines drawn from the southern points of Africa, South America, and Tasmania south to the Antarctic Circle. This gives the five divisions commonly used. For convenience the equator is used as a dividing line between the North and South Atlantic and the North and South Pacific Oceans.

More specifically the Atlantic Ocean extends from Antarctica northward and includes the North Polar Sea. It is separated from the Pacific Ocean by the line forming the shortest distance from Cape Horn (70° W.) to the South Shetland Islands and the boundary between the Atlantic and Indian Oceans is placed at the meridian of the Cape of Good Hope (20° E.). The boundary between the Pacific and Indian Oceans follows the line from the Malay Peninsula through Sumatra, Java, Timor, Australia (Cape Londonderry) and Tasmania and follows the meridian of 147° E. to Antarctica.

In the North, the boundary between the Atlantic and Pacific Oceans is placed in Bering Strait, which is only 36 miles wide. The waters surrounding Antarctica and extending northward about as far as the southern tips of the continents are sometimes designated as the Great Southern Ocean or Antarctic Ocean. Usually the Oceans as defined above are considered to include semi-enclosed adjacent seas that connect with them.

United States, Kansas, Smith County, Latitude 39°50', Longitude 98°35'

State	County	Locality
Alabama.....	Chilton.....	12 miles southwest of Clanton.
Arizona.....	Yavapai.....	55 miles southeast of Prescott.
Arkansas.....	Pulaski.....	12 miles north of west of Little Rock.
California.....	Madera.....	35 miles northeast of Madera.
Colorado.....	Park.....	30 miles northwest of Pikes Peak.
Connecticut.....	Hartford.....	At East Berlin.
Delaware.....	Kent.....	11 miles south of Dover.
D. C.....	Washington.....	Near corner of Fourth and "L" streets N.W.
Florida.....	Hernando.....	12 miles west of north of Brooksville.
Georgia.....	Twiggs.....	18 miles southeast of Macon.
Idaho.....	Custer.....	24 miles south of west of Challis.
Illinois.....	Logan.....	28 miles northeast of Springfield.
Indiana.....	Boone.....	14 miles west of north of Indianapolis.
Iowa.....	Story.....	5 miles northeast of Ames.
Kansas.....	Barton.....	15 miles northeast of Great Bend.
Kentucky.....	Marion.....	3 miles west of north of Labanon.
Louisiana.....	Avoyelles.....	3 miles southeast of Marksview.
Maine.....	Piscataquis.....	18 miles north of Dover.
Maryland.....	Anne Arundel.....	3 miles east of Collington.
Massachusetts.....	Worcester.....	In northern part of city of Worcester.
Michigan.....	Wexford.....	5 miles west of north of Cadillac.
Minnesota.....	Crow Wing.....	10 miles southwest of Brainerd.
Mississippi.....	Leake.....	9 miles north of west of Carthage.
Missouri.....	Miller.....	20 miles southwest of Jefferson City.
Montana.....	Fergus.....	12 miles west of Lewistown.
Nebraska.....	Custer.....	10 miles northwest of Broken Bow.
Nevada.....	Lander.....	23 miles southeast of Austin.
New Hampshire.....	Belknap.....	3 miles east of Ashland.
New Jersey.....	Mercer.....	5 miles southeast of the State Capital, Trenton.
New Mexico.....	Torrance.....	12 miles west of south of Willard.
New York.....	Madison.....	6 miles east of south of Oneida.
North Carolina.....	Chatham.....	10 miles northwest of Sanford.
North Dakota.....	Sheridan.....	5 miles southwest of McClusky.
Ohio.....	Delaware.....	25 miles east of north of Columbus.
Oklahoma.....	Oklahoma.....	8 miles north of Oklahoma City.
Oregon.....	Crook.....	25 miles east of south of Prineville.
Pennsylvania.....	Centre.....	2½ miles southwest of Bellefonte.
Rhode Island.....	Kent.....	1 mile west of south of Crompton.
South Carolina.....	Richland.....	13 miles southeast of Columbia.
South Dakota.....	Hughes.....	8 miles northeast of Pierre.
Tennessee.....	Rutherford.....	5 miles northeast of Murfreesboro.
Texas.....	McCulloch.....	15 miles northeast of Brady.
Utah.....	Sanpete.....	3 miles north of Manti.
Vermont.....	Washington.....	3 miles east of Roxbury.
Virginia.....	Appomattox.....	11 miles south of east of Amherst.
Washington.....	Chelan.....	10 miles south of west of Wenatchee.
West Virginia.....	Braxton.....	4 miles east of Sutton.
Wisconsin.....	Wood.....	9 miles southeast of Marsfield.
Wyoming.....	Fremont.....	58 miles north of east of Lander.

The geographic center of Alaska is difficult to determine, for the outline of the Territory is very irregular, but if the outlying islands are included in the determination it is not far from a point 95 miles south of Fort Gibbon, in latitude 63°46', longitude 152°20'.

The geographic center of the North American Continent is in Pierce County, North Dakota, a few miles west of Devils Lake.

TERRITORIAL ACQUISITIONS OF THE UNITED STATES

Year	Description	How Obtained	Area in Square Miles	Cost to U. S. (Including Interest)	Administered By
1783	Original States	Treaty with England	626,257		
1783	*Northwest Territory	Treaty with England	265,878		
1803	Louisiana Purchase	Bought from France	922,495	\$23,213,567.73	
	Red River Basin	Treaty with England	48,080		
1819	*Florida Cession	Treaty with Spain	81,500	6,674,057.47	
1845	Texas	Annexation	388,687	15,496,447.77	
1846	Oregon Territory	Treaty with England	286,541		
1848	Mexican Cession	Ceded by Mexico	529,189	16,361,616.31	
1853	Gadsden Purchase	Bought from Mexico	29,670	10,000,000.00	
1867	Alaska	Bought from Russia	586,400	7,200,000.00	Interior Dept
1898	Hawaii	Annexation	6,407		Interior Dept
1899	Philippine Islands	Acquired from Spain	114,400	20,000,000.00	*War Dept.
	Guam, Puerto Rico				
1899	*Philippine Purchase	Bought from Spain		100,000.00	War Dept.
1900	Samoa	Annexation	76		Navy Dept.
1904	Panama Canal Zone	Bought from Panama	554	53,500,000.00	Independent.
1917	Virgin Islands	Bought from Denmark	133	25,000,000.00	Navy Dept.

¹ Northwest territory might be included under original treaty with Great Britain, excluding water surfaces of the Great Lakes excepting Lake Michigan. The water surfaces were obtained separately.

² Actually, when the United States acquired Florida, a territory 15,650 square miles larger than the total purchase, was relinquished in the Mississippi river basin. This territory later was acquired in the annexation of Texas, and the Mexican cession.

³ Includes several small islands in the archipelago which were overlooked in the original treaty.

* Guam is administered by the Navy department.

All cost figures shown above include interest.

The cost to the United States in acquiring Texas, and Hawaii includes assumption of the debts of those territories.

In addition to the above, the United States owns Wake Island, various Guano islands, and exercises treaty, lease, or other rights over Guantanamo and Bahia Honda, Great and Little Corn islands, Tonga islands, Wrangell island, Yap island, Bennett, Henrietta and Jeannette islands, other small polar islands and various other small islets.

LAKE MICHIGAN WHOLLY IN U. S.

The largest lake wholly in United States territory is Lake Michigan. The second is Great Salt Lake, the third Okeechobee, and the fourth Pontchartrain.

The highest lake in the United States having an area greater than one-tenth of a

square mile, is Tulainyo, one and one-half miles northeast of Mount Whitney, Calif. elevation 12,865 feet, area about 0.2 square mile. The Salton sea in southern California is 246 feet below sea level and has an area of 287 square miles.

The elevations given for coast resorts are those of the highest points of the places named.

The elevation of any U. S. city not listed above can probably be obtained by addressing the Director, United States Department of the Interior Geological Survey, Interior Building, Washington, D. C.

Highest Eastern U. S. Peaks

Mount Mitchell, N. C., 6,684 feet above mean sea level, probably is the highest point in the United States east of the Mississippi river, according to the most recent data of the Department of the Interior Geological survey, which has run accurate level lines to six of the high peaks in the eastern part of the country.

Four peaks in the Great Smoky Mountains National park are Clingmans Dome, on the North Carolina-Tennessee State line, which has an elevation of 6,643 feet; Mount Guyot, also on the North Carolina-Tennessee line, 6,622 feet; Le Conte (Myrtle Top), in Tennessee, 6,593 feet, and Roan High Knob, North Carolina-Tennessee, 6,286 feet.

HIGHEST AND LOWEST POINTS OF THE EARTH

(Source: National Geographic society)

Highest mountain, Mt. Everest	29,002 feet above sea level
Lowest depression, Dead Sea	1,290 feet below sea level
Greatest ocean depth, Mindanao Deep	35,400 feet
Difference between highest and lowest points on the lithosphere	64,402 feet or 12,197 miles
Average elevation of land	2,750 feet
Average depth of the oceans	12,300 feet

¹ Tidal shore line, unit measure 3 statute miles.—The figures under this heading give the length in statute miles of the shore line on tidal waters to points where such waters narrow to a width of 3 statute miles. The figures for Louisiana do not include the shore line of Lakes Maurepas and Ponchartrain, and the delta of the Mississippi River was measured as mainland. The measurements were made on charts of 1/200,000 and 1/400,000 scale when available.

² Tidal shore line, unit measure 1 statute mile.—The figures under this heading give the length in statute miles of the shore line on tidal waters to points where such waters narrow to a width of one statute mile, and include the shore line of those bodies of tidal waters more than 1 mile wide which lie close to the main waters, even though the entrance width is less than the unit measure. The measurements were made on charts of 1/80,000 scale for the Atlantic and Gulf coasts, on charts of 1/200,000 scale for the Pacific coast, and on charts as near those scales as available for the other regions.

LIMITS OF THE CONTINENTAL UNITED STATES

Cape Sable, Florida, is in latitude 25°07', longitude 81°05'. The extreme south point of Texas is in latitude 25°50', longitude 97°24'. The Lake of the Woods projection extends to latitude 49°-23' 04.5" at longitude 95° 09' 11.6". The easternmost land is West Quoddy Head, near Eastport, Maine, in longitude 66° 57', latitude 44° 49'. Cape Alava, Washington, extends into the Pacific Ocean to longitude 124° 43' 36.81", at latitude 48° 10' 17.41". Cape Flattery, 48° 23' 21.10"; 124° 43' 33.44" from C & Qs charts. Thus, Cape Alava is 341 feet farther W.

From the south point of Texas due north to the forty-ninth parallel the distance is 1,598 miles. From West Quoddy Head west along the parallel to the Pacific Ocean the distance is 2,807 miles. These distances are computed to mean sea level.

The length of the Mexican boundary from the Gulf of Mexico to the Pacific Ocean is approximately 2,013 miles. The length of the northern boundary, excluding Alaska, is 3,987 miles.

Report Banded Birds

Persons who find banded birds may assist in the conservation of a natural resource worth millions of dollars annually by reporting the number on the band, date, manner and locality in which the bird was taken, to the United States Bureau of Biological survey.

Bird banding originally was started by private individuals and was later taken up by ornithological societies. It became a governmental activity in the United States in 1920, and in Canada in 1923.

Mammoths Lived Recently

Since ancient times a trade in fossil ivory found in the far north was maintained with the countries of southwestern Asia and western Europe. The ivory came from the woolly mammoth, which became extinct so recently that its carcasses still are found intact, preserved in the arctic ice-box.

Ancient Chinese worked deposits of fossil ivory, and may even have eaten the pre-

served flesh. They thought the animal lived entirely underground because that was the only place the remains were found. Europeans, on the other hand, thought the bones were those of St. Christopher.

In March, 1803, a Siberian ivory hunter found the body of a mammoth intact near the Lena river, and cut off the tusks.

GLACIERS FLOW LIKE RIVERS

A glacier is a body of ice and snow formed where the snowfall is greater than the melting, and flowing to a region where the melting or other waste is greater than the snowfall. A glacier flows much like a river except more slowly—one of the fastest-flowing glaciers known, the Upernivik in Greenland, has been found to have a velocity of 99 feet per day at one point.

The Mer de Glace, fastest-flowing glacier in the Alps, has been found to have a maximum velocity of 35 ½ inches per day. The Muir glacier, Alaska, has a velocity of about 7 feet per day near tidewater.

Exactly what makes glaciers move is a point of argument among scientists, but all associate it with the weight of the ice itself in a way not exactly determined.

Modern day glaciers in Iceland and Scandinavia are much larger than they were 30 years ago, though somewhat smaller than 4 years ago. Great continental ice sheets once covered all the northern parts of the land masses of the earth. Today they are confined to mountains, except in polar regions, or sub-polar regions.

*No lives lost in Mississippi Valley floods of 1922. †Loss of life carried only where considerable.

‡Partly storm damage caused by tropical disturbance. §Incomplete.

CAUSES OF GREAT FLOODS

Studies by government meteorologists and other students of the weather have convinced them that absolute maximum floods do not occur at regular intervals but are dependent upon a combination of circumstances thrown together by chance. There is no orderly progression of floods with the lapse of years. Great floods, furthermore, are essentially local phenomena, dependent upon local conditions.

Great floods are primarily due to precipitation, usually rain, and fall into two classes, (1) heavy widely distributed rain which would cause a flood by its own excessive volume, and (2) moderate rains continued intermittently for several days, with conditions favorable to a high run-off. The latter type, indeed, may cause the heaviest floods.

Very intense rainstorms in the United States are seldom long continued or of great

extent. Though they may affect small parts of the watersheds and cause extreme floods in small streams, they are absorbed in the trunk stream. On the other hand, widespread moderate rains may have a high run-off due to already saturated soil, or to the fact that the ground may be frozen and the rain cannot be absorbed.

Average run-off in a typical eastern watershed is believed to sink as low as 5 to 6 per cent of the total precipitation. Summer floods are generally infrequent because of the demands of the vegetation, and the loss by evaporation. North of the 37th parallel the movement of summer rainstorms ordinarily is too rapid to permit heavy rains on two consecutive days. Further south, slow-moving cyclonic storms of tropical or extra-tropical origin may cause floods in the warm season regardless of the soil and vegetal conditions.

VOLCANIC ZONES

Volcanoes, with hardly any exceptions, are situated in areas of weakness in the earth's crust, especially ocean basins or their borderlands, or the mountain ranges which flank the continents. Inland volcanoes, with the possible exception of Mount Wrangel, Alaska, are not found except in regions where the earth's crust is unstable, or recently has been unstable. There are four main lines of volcanic distribution:

1. Pacific-Caribbean zone, following the western continental mountain chain of the two American continents including the West Indies, across the Aleutian islands, Kamchatka in Asia, Japanese islands, Philippines, south through New Zealand to Antarctica.

2. Mediterranean-Caspian zone, through the Mediterranean sea and along the central Asiatic mountain chain.

3. Atlantic zone, including Iceland, the Azores, and others.

4. Central Pacific zone, including Hawaii and small islands of the Polynesian group.

Theories of what causes volcanoes differ. The most generally accepted associate them with faulting and deep rock displacements in the earth's crust. The explosions and violent eruptions are generally believed to be caused by release of steam pressure.

Among the most violent of eruptions in the past 200 years are those of Skaptar Jokull, Iceland, in 1783, believed to have thrown out enough material to equal Mount Blanc in size; the eruption of Tambora on the island of Sumbawa in 1815, believed to have thrown out 500 cubic miles of debris; the explosion of Krakatoa, in 1883, which was heard hundreds of miles and blew away half of the island; and the eruption of Mount Pelee in 1902, which destroyed St. Pierre, capital of Martinique.

HOMESTEAD LAWS

All unappropriated surveyed public lands adaptable to any agricultural use may be used for homesteads, if they are not mineral or saline in character, are not occupied for purposes of trade or business, and have not been embraced within the limits of any withdrawal, reservation, or incorporated town or city.

Each applicant for a homestead is required to swear that he is well acquainted with the

character of the land described in his application. Information on vacant eligible lands may be obtained from the district land offices. Entries ordinarily are limited to 160 acres except in Arizona, California, Colorado, Idaho, Kansas, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming, where they may not exceed 320 acres.

CAUSES OF EARTHQUAKES

Most earthquakes are caused by faulting, or slipping of the earth's crust, although some are of volcanic origin. From time to time, stresses accumulate in the strata until the elastic limit is reached. Then the rocks rupture until equilibrium is once more restored. Causes of the stresses are not definitely known, and indeed they may vary. Among suggested causes have been: (1) changing weight of the overlying rocks, (2) centrifugal motion of the earth, particularly in equatorial regions, (3) shrinking of the earth's interior because of cooling, (4) the escape of gases, and others.

Most earthquakes occur along lines of structural weakness in the earth's strata, especially near lofty mountain ranges where there is great inequality between the land surface and the nearby sea bottom. Most active volcanoes fall within the zones where great earthquake activity exists. The main seismic, or earthquake zones are:

1. The western coasts of North and South America, joining on the north—

2. A zone which extends from southeast Asia across the Japanese archipelago the Kurile islands, and the Aleutian chain to the Alaskan mainland.

3. A belt with an east-west trend encircling the globe through the Mediterranean, the Azores, West Indies, Central America, Hawaii, East Indies, Himalayan mountain range, Persia, and Asia Minor.

No portion of the earth's surface is wholly without earthquakes, however. The so-called earthquake zones are only places where the disturbances are more frequent and general more violent. One of the greatest earthquakes since white men came to North America centered near New Madrid, Mo just below the mouth of the Ohio river which is comparatively flat land.

Estimates on the origin of most shocks vary from 15 miles to 100 miles below the earth's surface. Volcanic shocks are seldom as serious as those caused by faulting, slipping of the rocks along an old fault line.

MOST SEVERE EARTHQUAKES OF ALL TIME

Source: Seismograph Station, Univ. of Calif.

7 A.D. November 10. China, Hsian destroyed.

119. March 11. China, (Honan). Loyang destroyed.

138. March 1. China, (Kansu). Imperial City, Chingching and Lungshi destroyed.

180. March 1. China, (Kansu). Chinchuan destroyed.

1037. December. China, (Shansi). More than 22,000 lost.

1707. October 28. Japan. Sea waves. "Greatest of all Japanese earthquakes." Davison.

1737. October 11. India, Calcutta. 300,000 lost.

1755. November 1. Portugal, (Lisbon). City destroyed. 50,000 to 60,000 killed. Great sea wave.

1762. April 2. India, (Bengal, Arracan and Burma). Coast of Bay of Bengal elevated over distance of 100 miles.

1811. December 16. United States, (New Madrid, Mo.). Changed course (in part) of Mississippi River. Felt over 3,000,000 square miles. Cracked plaster 575 miles away.

1822. November 19. Chile, (Copiapo to Valdivia, 900 miles). Coast elevated over length of 100 miles, three to five feet for a distance of thirty-five miles. Sea waves.

1835. February 20. Chile, (Copiapo to Chiloe). Coast elevated 4 to 5 feet over 130 miles.

1875. May 16-18. Colombia and Venezuela. 16,000 killed.

1886. August 31. United States, (Charleston, S. C.). About 100 persons killed. Property damage estimated at \$5,500,000.

1891. October 28. Japan, (Mino-Owari). 7,279 killed. 17,393 wounded. 197,530 houses destroyed, 78,692 houses partially destroyed. Sensibly shaken area 243,000 square kilometers.

1892. December 20. Baluchistan, (Old Chaman). Sparsely settled country. Damaged railroad.

1897. India, (Assam). Felt over 1,750,000 square miles. Not a masonry structure

left standing, trees snapped from sway. Serious damage to buildings within an area of 160,000 square miles.

1899. September 10. Alaska, (Yakut Bay). No loss of life or property because sparsely settled country. Greatest known uplift occurred, 47 feet, 4 inches.

1905. April 4. India, (Kangra). 19,000 people killed. 110,000 buildings thrown down.

1906. United States, (San Francisco, Calif.). About 700 killed. Property damage \$400,000,000 of which only about \$20,000,000 was caused by earthquake directly. Mostly fire damage.

1908. December 28. Italy, (Messina). Estimated 100,000 people killed. Several cities destroyed.

1920. December 16. China, (Kansu). Very destructive. 180,000 people killed.

1922. November 11. Chile, Over 90 killed, many hurt. Much damage at Copapo, Ovalle, Coquimbo, Vallemar, Charral and San Fernando. Vallemar almost obliterated.

1923. September 1. Japan, (Tokyo and Yokohama). Property damage from quake and fires nearly \$3,000,000,000, 99,300 killed, 103,733 wounded and 43,476 missing.

1925. March 16. China, 6,500 killed. Talifu in Yunnan Province.

1932. December 25. China; 70,000 killed by earthquake and flood in Kansu Province.

1934. January 15. India, Bihar and mad towns destroyed. About 10,000 killed.

1935. May 31. India, Quetta and mad surrounding villages destroyed, about 60,000 killed.

1936. August 16-17. Valparaiso, Chile 3,700 killed. \$256,000,000 damage.

1939. January 24. Chillan, Chile. 25,000 killed. \$50,000,000 damage.

1942. May 14. Guayas Province, Ecuador 200 killed. \$2,500,000 damage.

1944. January 15. San Juan, Argentina. Great loss of life. \$100,000,000 damage.

1944. February 1. Gerede, Turkey. 3,500 killed.

¹Gross area means land within the established boundaries.²Allienated lands are within the boundaries but not owned by the U.S.³Not alienated lands are within the boundaries and administered by the United States.

Boundaries of national forests are established by acts of congress, presidential proclamation, or executive orders. Boundries of purchase units were established by the secretary of agriculture with concurrence of the National Forest Reservation committee. Many units and forests extend into more than one state. Purchase units do not have national forest status.

CHILLED FOODS

A Department of Agriculture report dated October 1 quoted by Herman Gastrell Seely, financial editor of the Chicago Daily News, indicated a decline in the use of tin to preserve and package foods for market.

holdings over 1944 totals of 303,000,000 pounds.

It is believed by some that tin cans are no longer necessary to market all foods because the freezing process adequately protects perishable commodities.

The report showed an increase in 1945 of 44,000,000 pounds in frozen food storage

SAN FRANCISCO-OAKLAND BRIDGE

The San Francisco-Oakland bridge is the longest bridge in the world. It was opened to automobile traffic in autumn, 1936, and to electric trains in 1938.

Total length is four and one-half miles over navigable water. Deepest pier in the world, 242 feet, the equivalent of a twenty-story building.

Bridge has two decks, with six lanes of roadway for automobiles and light vehicles on the upper deck, three lanes on lower deck for busses, trucks and heavy traffic with two tracks reserved for electric commuter trains.

Crossing between San Francisco and Yerba Buena island by suspension spans, and between Yerba Buena and Oakland by cantilever and truss spans. The two crossings are connected by the earth's largest vehicular bore piercing the island, 76 feet wide, 58 feet high and 540 feet long. Height of suspension towers above water 474 and 519 feet. Length of center spans, 2, 310 feet, side spans 1,160 feet.

Clearances: West Bay 200 feet, East Bay 185 feet above water.

Cables 28 $\frac{3}{4}$ inches in diameter; 70,815 miles total length of cable wire; 17,464 wires in cable. Total cost of structure, \$77,200,000.

LENGTH OF PROJECT

San Francisco terminal to San Francisco anchorage.....	4,200 feet
West Bay crossing.....	10,450 feet
Island section.....	2,950 feet
East Bay crossing to Toll Plaza.....	19,400 feet
Toll Plaza to Oakland terminal.....	6,500 feet
Total.....	43,500 feet equals 8 $\frac{1}{4}$ miles

THE GOLDEN GATE BRIDGE

The suspension span of the recently completed Golden Gate bridge is 4,200 feet in length—longer by 700 feet than the next longest span, that of the Hudson river bridge, New York city.

Total length.....	9,200 feet
Length of main span.....	4,200 feet
Length of side spans.....	1,125 feet
Cost.....	Not more than \$35,000,000
Width of roadway.....	60 feet
Automobile lanes.....	Six
Sidewalks.....	Two, each 10 $\frac{1}{2}$ feet wide
Decks.....	One
Clearance of center span.....	220 feet
Height of deck above water.....	266 feet at center
Length of Fort Point arch span.....	319 feet
Length of north approach truss spans.....	875 feet
Length of south approach truss spans.....	500 feet
Diameter of two suspension cables.....	36 $\frac{1}{2}$ inches
Length of cables.....	770 feet
Number of strands.....	61
Number of wires in each cable.....	27,572
Diameter of each wire.....	0.196 inches
Diameter of suspender ropes.....	2 $\frac{1}{4}$ inches

QUANTITIES OF MATERIALS	
Structural steel.....	152,000 tons
Cable wire.....	18,500 tons
Reinforcing steel.....	30,000 tons
Concrete.....	1,000,000 cu. yds.
Cement.....	1,300,000 bbls.
Timber.....	30,000,000 F.B.M.
Paint.....	200,000 gals.

WEST BAY CROSSING

Height of towers above water.....	474 and 519 feet
Depth of piers below water.....	100 to 235 feet
Height of center anchorage above water.....	281 feet
Length of center spans.....	2,310 feet
Length of side spans.....	1,160 feet
Inside width of roadway.....	58 feet
Outside width of roadway at towers.....	80 feet
Clearances (vertical)	
Center of center span.....	200 feet
At center anchorage.....	216 feet
Number of cables.....	2
Diameter of cables.....	28 $\frac{3}{4}$ in.
Number of wires in each cable.....	17,464
Diameter of each wire.....	0.195 in.
Total length of cable wire.....	70,815 miles
Total length of 2 $\frac{1}{4}$ -inch suspender ropes.....	43 miles

EAST BAY CROSSING

Length of main span.....	1,400 feet
Clearance above high water.....	185 feet
Depth of piers.....	50 to 242 feet

ESTIMATED TRAFFIC

Year	Vehicles	Passengers	Interurban
1937.....	8,000,000	16,000,000	
1943.....	10,000,000	20,000,000	36,600,000
1950.....	12,600,000	25,000,000	40,000,000

Cost, cables, suspender ropes, etc.....	\$5,855,000
Height of two towers.....	746 feet
Weight of each tower.....	22,200 tons
Width of towers at base.....	121 feet
Cost of each tower.....	\$3,400,000
Capacity of two cables.....	430,000,000 pounds
Safety factor.....	2.6
Tension on each cable.....	63,000,000 pounds
Vertical load on pier shafts.....	165,000,000 pounds
Horizontal wind force resistance at tower tops (90-mile wind).....	1,900,000 pounds
(Highest wind recorded in San Francisco, 55 miles per hour, of short duration)	
Designed deck deflection (rise or fall).....	10 feet
Designed wind sway, or horizontal deflection.....	21.25 feet

Materials Used

Steel.....	100,000 tons
Cable wire length.....	80,000 miles
Concrete.....	300,000 cubic yards
Paint.....	110,000 gallons
Excavation.....	510,000 cubic yards
Concrete roadway.....	725,000 square feet
Man hours of labor.....	28,000,000
Annual automobile capacity.....	70,000,000
Annual truck and bus capacity.....	6,000,000

WORLD'S OLDEST LIVING THING

A macrozamia tree in Queensland, Australia, estimated to be more than 12,000 years old, is believed to be the oldest living thing on earth.

LEIF ERICSON'S TOMB?

A stone marked in what is considered to be Runic characters unearthed at Hampton, N. H., is believed by some to be the tombstone of Leif Ericson, first white man to be buried in America. Norse sagas relate Leif requested his body be placed under a stone marked with crosses.

LANDMARKS

SEVEN WONDERS OF THE ANCIENT WORLD

PYRAMIDS OF EGYPT: About 75 pyramids still exist in Egypt, extending in groups from Abu Roash on the north to Medum on the south. The most important group is that of Gizeh, and the largest of the group is the tomb of Cheops, the Great Pyramid. Its present perpendicular height is 451 feet, but originally it measured 482 feet, or more than 50 feet higher than St. Peter's at Rome. The sloping sides are now 568 feet from top to base, and have a length of 750 feet at the base. The cubic content amounted to 3,057,000 cubic yards, and weighed 6,848,000 tons, containing an estimated 2,300,000 blocks of stone averaging about 40 cubic feet in size. At present it covers a space of nearly 13 acres.

The second pyramid, situated about 200 yards southwest of the Great Pyramid, was erected by Chephren, successor to Cheops. Its present perpendicular height is 450 feet and formerly it was 458 feet. The sloping sides measure 566 $\frac{3}{4}$ feet, and the base 649 $\frac{1}{2}$ feet. The third pyramid was built by menkaure, successor to Chephren, and the Mycerinus of Herodotus. Its perpendicular height is 204 feet, and the sides, 262 $\frac{3}{4}$ feet from top to base, are 356 $\frac{1}{2}$ feet at the base. The lower part of the pyramid is cased with slabs of polished red granite.

The outer casing of the pyramids always was of massive blocks of fine stone, well joined and carefully polished. The interior varied with different periods. Each pyramid contained a sepulchral chamber, usually low down and excavated in the rock underlying it. It was reached by a passage opening from the northern face of the pyramid and passing, in its course, through one or more lesser chambers.

PHAROS OF EGYPT: A great lighthouse begun by Ptolemy I, one of Alexander's generals, on the island of Pharos near Alexandria. It was finished by Ptolemy's son in 282 B.C. The architect was Sostratus of Cnidus, and the lighthouse was a lofty tower with a square base measuring about 100 feet on a side, with the outer walls of white marble. Statements that it was 400 feet high and that the light was visible 60 miles at sea are believed exaggerations. The island of Pharos was connected with the mainland by a seven-furlong mole by Alexander, thus making it possible to build two harbors. One side of the lighthouse was thrown down by an earthquake in 1303, and by 1346 it was completely ruined. In 1478 the foundations were used for Fort Kait Bai. The side of the great central tower of this fort has the same length as that given for the side of the old Pharos. The name Pharos was borne by at least 20 other lighthouses of the ancient classical world.

COLOSSUS OF RHODES: A gigantic bronze statue representing Helios, the sun god, national deity of the islanders, erected at a cost of 300 talents (\$300,000) apparently as an offering of thanks for the successful defense of the city against Demetrius Poliorcetes. It was said to have been cast in sections, by Chares, of Lindus, and to have taken him 12 years to construct. Legends say that the statue straddled the entrance

to the harbor and ships passed between its legs, and that a light was kept burning at the top, but modern estimates place its height at about 90 feet. Set up about 280 B.C., it was overthrown by an earthquake in 224 B.C., where it lay in bottom of harbor until 653 A.D., when the Arabs captured the city and sold it to a Jewish merchant for salvage.

HANGING GARDENS OF BABYLON

The hanging gardens appear to have been a sort of building on the roof of which were planted trees, shrubs, and flowers. Their construction is ascribed to Nebuchadnezzar for his Median queen to whom the Babylonian plain was dreary. According to Strabo the structure rested on arches supported by hollow pillars of brick, filled with earth, in which the roots of trees were planted. A force of men was kept at work constantly pumping water to the gardens which were terraced at the top.

STATUE OF JUPITER BY PHIDIAS

The statue at Olympia does not survive, but according to legend represented the god seated on his throne, wearing on his head a wreath of olive, and holding in his left hand the sceptre crowned with an eagle; on his extended right hand stood a "Nike" holding a fillet. The throne was elaborately decorated with figures in relief and in the round. Only knowledge of the statue is from descriptions, and representations on late coin of Elis. The composition was of wood, overlaid with ivory to represent the flesh, and gold, to represent the draperies.

MAUSOLEUM OF ARTEMISIA

Erected at Halicarnassus to Mausolus, king of Caria, by his widow Artemisia and completed about 350 B.C. after her death. It seems still to have been standing in the middle ages, but was overthrown by an earthquake. The Knights of St. John of Jerusalem took possession of the site in 1402 and used the ruins as a quarry in building their castle. The Mausoleum consisted apparently, of a lofty rectangular base or podium, about 230 by 250 feet, on which stood a chamber surrounded by an Ionic colonnade of 36 columns, apparently surmounted by a pyramid of 24 steps on the apex of which was a marble four-horsed chariot.

TEMPLE OF DIANA AT EPHEBUS

At least four temples bore the same name in this ancient city of Asia Minor. One temple was burned in 356 B.C. by Herostratus, who wished to immortalize himself. It seems that the fire destroyed only part of the temple, however, and its reconstruction, begun under Dinocrates, is the one that came to be regarded as a wonder of the world. Its columns, of great diameter, were at least 60 feet high. It was plundered and partially destroyed by the Goths in 262 A.D. but restored. Theodosius closed it with an edict against all pagan temples. Its stone then were used in the construction of a cathedral to St. John. One of the temples was built in the time of Croesus.

OTHER WONDERS OF THE WORLD

ALHAMBRA: Finest example of Moorish architecture in Spain, though partially destroyed by Charles V and Philip V. What remains is grouped around two principal oblong courts, with porticoes, pillared halls, small gardens, baths and a mosque. There are exquisite halls and apartments, decorated with a bewildering mass of color and design in tiles, stucco, painting.

TOWER OF BABEL: A structure erected in the valley of Shinar, lower Mesopotamia, in earliest antiquity, and probably added to by later peoples. According to mythology, the place where the gods, jealous of the encroaching height of the structure, made all the people speak a different tongue so they would disperse. The tower itself consisted of six platforms or stages, and a sanctuary rising on the sixth. The lowest was 330 feet in length and breadth and 121 feet high; the second, 286 feet on each side and 66 feet high; the third, 220 and 22 feet; the fourth, 187 and 22 feet; the fifth, 154 and 22 feet; the sixth, 121 and 22 feet. The shrine at the top was 88 feet long, 77 feet wide, and 55 feet high. Total height of the tower thus was 275 feet, and gross height with the temple was 330 feet. Each stage was of a different color.

CATACOMBS OF THE CHRISTIANS: Most notable catacombs are in Rome, but they also exist in Crimea, Asia Minor, Syria, Alexandria, Cyrenaica, Tunis, Malta, Sicily, Naples and Chiusi. Only through the study of Roman catacombs, many still unexplored, as the life, feelings, manners and customs of the early Christians come to be understood. Excavated in the tufa, a soft rock, originally for burial of Christians because their doctrines forbade cremation, about 60 catacombs are known within a radius of three miles of the city walls. The galleries were filled with earth in the ninth century to prevent desecration by the Saracen invasion, and were entirely lost sight of until 1578 when they were rediscovered and recklessly despoiled, especially of inscribed stones.

GREAT WALL OF CHINA: The most gigantic defensive work in the world constructed in the latter part of the 14th century as protection against the horse-riding northern Mongols. Since 1644, and after the accession of the Manchus whom the wall did not stop, it has been allowed to fall into decay. It is generally about 22 feet high, 20 feet thick, with 40-foot high towers every few hundred yards. Construction is of a brick or dressed granite shell filled with earth and covered with a hard coating of bricks in lime. It is about 1500 miles long, but breast works extend farther.

COLISEUM OF ROME: According to contemporary accounts, the great amphitheater seated 87,000 persons, but later estimates are 50,000. Its greatest length was 116 feet, and greatest breadth 510 feet. Several other Roman amphitheaters were as large or larger. The exterior was nearly 160 feet high, divided into four stories, each with a tier of seats. Each row of seats was numbered and the places marked, and seating was according to social rank. Under the central part was an elaborate substructure or under-draining, housing men and animals, with wells, windlasses, and inclined planes for hoisting the animals. Thousands of men and animals died in the bloody shows held there.

EIFFEL TOWER: Erected in the Champ de Mars, Paris by Engineer Alexandre Gustave Eiffel as a feature of the Paris Exposition of 1889. The lower section of the tower consists of four built-up iron columns, each of which consists of four smaller columns resting on masonry piers, the whole curving upwards to unite in a single column at a height of 620 feet. Cost was over \$1,000,000, of which the French government supplied \$292,000, the rest Mr. Eiffel. There are platforms at 189 feet, 380 feet, and 906 feet above the ground. On the first there is a floor space of nearly an acre with restaurants. Beyond the third platform, which is reached by elevator, a spiral staircase ascends to the top of the tower, 984 feet. The tower has searchlights, and is used for wireless experiments.

THE LOUVRE: An extensive group of buildings in Paris on the north bank of the Seine, in the center of the city. The Louvre contains the most valuable collection of art works in the world. The area covered by the Louvre and Tuileries was about 50 acres, but the Tuileries was destroyed by fire in 1871 and rebuilding was completed in 1883. In the middle ages, the Louvre was used as a fortress, arsenal, and prison, and only occasionally as a residence. Louis XIV neglected it for the Versailles, and Napoleon turned it into an art gallery.

LEANING TOWER OF PISA: A campanile at Pisa, Italy, which has an obliquity of 13 feet in a height of 179. It was begun in 1174 and completed in 1350, in Romanesque style. From this tower, Galileo conducted various experiments on falling objects. It is believed that the Pisa tower, in common with others like it in Italy, was designed to lean.

PORCELAIN TOWER OF NANKING: An eight-sided structure in Nanking, China, erected early in the 15th century. It was nine stories and 261 feet high, faced with porcelain. It was destroyed in the Taiping revolt in 1853.

BASILICA OF ST. PETER AT ROME: The largest Christian church in the world is closely connected with the Vatican palace. It succeeds a Fourth century basilica, and rebuilding was begun under Pope Nicholas V in 1450 and continued with interruptions and additions for two centuries. It has a huge cupola and great mass. Height to the top of the cross on the dome is 435 feet. It covers 18,000 square yards and is 636 feet long.

MOSQUE OF ST. SOPHIA: One of the great masterpieces of architecture, completed in 538 under the Emperor Justinian. Daringly original in conception, it occupies a square 243 feet long. The hall of worship is 243 feet long and 107 feet wide, terminating in a semi-circle at each end, and flanked by huge side aisles in two stories. Over the central part of the nave is a dome 107 feet in diameter, rising to a height of 180 feet, and borne by four huge arches of nearly 100 foot span. The whole interior is inset with precious marbles and alabasters, all covered with exquisite glass mosaic. When the Turks conquered Istanbul (Constantinople) in 1453, minarets were erected at the corners of the edifice, crosses were chiseled from the bronze doors, and the entire interior was covered with whitewash to remove all Christian symbols.

STONEHENGE: A famous stone circle whose ruins stand on Salisbury plain, $1\frac{1}{2}$ miles from Amesbury, Wiltshire, England. When built, at least as early as the bronze age, it consisted of two circles of monoliths, the outer 100 feet in diameter inclosing two smaller rows in the shape of a horseshoe, opening to the northeast. Within there is a block of blue marble, 15 feet long. It is thought that Stonehenge was connected with sun worship, since the arrangement points to a means of determining the time of the summer solstice. A deep trench surrounds the ruins.

TAJ MAHAL: A mausoleum of white alabaster, one mile east of Agra, India, built in 1629-50 by Shah Jehan as a burial place for his favorite wife, Mumtaz-i-Mahal. Eight-sided, 130 feet in length and width, and 70 feet high, exclusive of the dome which rises another 100 feet above the main section. It has four cylindrical minarets 133 feet high. The interior is lighted with diffused daylight filtering through the translucent alabaster of the dome. It is reckoned one of the most beautiful structures in the world—by some the most beautiful.

PALACE OF THE VATICAN: Residence of the Pope and home of some of the most famous art treasures in the world. Originally a simple dwelling house in the Fifth century, it has been enlarged, neglected, and repaired in turn until the present palace covers 13 or 14 acres on the Vatican hill, with about 20 courts and 1,000 halls, chapels, and

apartments. In the Sistine chapel, which part of the system, is Michael Angelo's great work, "The Last Judgment." The library of the Vatican, in 25 rooms, now contains over 250,000 volumes, and many manuscripts of great value. The residential portion of the Vatican contains about 200 rooms.

THE VERSAILLES: The famous palace built by Louis XIV 12 miles southwest of Paris. It consists of a central block and two immense wings, each enclosing two or more courts. Length of the palace is over a fourth of a mile, including its dependencies nearly half a mile. Contains gorgeous rooms, terraces, art works, fountains. The French court moved there permanently in 1682. King William I was crowned emperor of Germany at the Versailles after the Franco-Prussian war. It has not been a residence since 1789 when the States-General met there at the beginning of the French revolution.

WOOLWORTH BUILDING: For years one of the tallest skyscrapers in the world the Woolworth building is located at Broadway, from Barclay street to Park place, is 55 stories high. Foundations were sunk through 115 feet of quicksand to bed rock. Total cost, including site, \$14,000,000. Extreme height is 750 feet above the sidewalk that of the tower, 730 feet. Tenants and employees number about 14,000 persons. It was dedicated April 24, 1913, when President Woodrow Wilson pressed a button in the White House, lighting up the monumental structure.

NATURAL LANDMARKS OF THE UNITED STATES

Bad Lands, North Dakota, a weird region of lonely ridges, isolated buttes, and deep gullies, with many strange and fantastic formations of rocks and earth, often brilliantly colored.

Black Hills, South Dakota, a young and rugged island of peaks rising out of the great plains and averaging 2,000 to 4,000 feet in height, culminating in Harney peak, 7,242 feet above sea level. There are mineral springs, deep canyons, waterfalls, caverns and lakes. Nearby are famous gold mines.

Charleston Gardens, South Carolina, consists of three famed gardens near the city. Magnolia gardens, 12 miles west of Charleston, was begun in 1843 by the Rev. John G. Drayton. Three miles farther are the formal Middleton gardens, planted more than 150 years ago. North of Charleston are the Cypress gardens of Dean hall, with rare flowers and shrubs.

Charter Oak, Connecticut, felled by a storm in 1856, and the legendary hiding place of the colonial Connecticut charter which was supposed to have been stolen during a dispute with the crown. Nearly 1,000 years old when overthrown, part of it is preserved by the Connecticut Historical society. The site is marked by a marble shaft.

Chimney Rock, North Carolina, rises 222 feet above the crest of Chimney mountain. Below flows Rocky Broad river, and Old Bald mountain and Sugar Loaf mountain rise on either side. Chimney Rock is in the midst of the highest part of the Appalachians, in the rectangle of eastern Tennessee, western North Carolina, and north Georgia.

Delaware Water Gap, Pennsylvania, a deep precipitous notch cut through the 1,600-foot high Kittatinny range. The gap is a sharp cleft, 1,200 feet deep, through which pass the river, two railroads and a highway. S-shaped, it is about two miles long.

Evangeline's Tree, St. Martinville, La. a huge oak, and legendary place where the character in Longfellow's famous poem embarked in the course of her wandering in search of her lover.

Everglades, Florida, nearly 5,000 square miles, where the Florida limestone bed forms a broad shallow basin, kept full by spring and rain. The shallow lake thus created is dotted with islands and spun through with canals and channels. The Tamiami trail from Miami west, goes through the heart of the Everglades.

Grand Coulee, Washington, scene of what once was the mightiest waterfall on the American continent, 417 feet high, on one-half mile wide, and 50 feet deep. The old bed of the Columbia river here is a gorge 50 miles long and 1,000 feet deep.

Great Salt Lake, Utah, in the great central basin whence no rivers pass to the sea. A huge shallow pool of brine whose only outlet is evaporation. The saltiest body of water on the earth next to the Dead sea of Palestine. With a maximum depth of 30 feet, the lake is 4,200 feet above sea level, 80 miles long, and 20 to 30 miles wide. A remnant of prehistoric Lake Bonneville.

Great Stone Face ("Old Man of the Mountain"), New Hampshire, a realistic profile outlined against the western sky from the side of Profile mountain, in the White mountains. Formed by five layers of granite ledge, 1,200 feet above a lake at the base of the mountain. The boulder forming the upper forehead has been chained in place, after threatening to become dislodged. Immortalized by Nathaniel Hawthorne in a short story.

Lake Tahoe, Nevada, near the California boundary, rests between evergreen trees on snow-clad mountains, 6,225 feet high. Dotted with resorts and colonies, Lake Tahoe is renowned as a vacationer's paradise. It is 7 miles in circumference.

Lookout Mountain, Tennessee, scene of the battles of Lookout mountain and Missionary ridge, in the War Between the States. A long narrow mountain, 1,700 feet above the nearby Tennessee valley, and about 2,400 feet high. From the top is a magnificent view, overlooking famed Moccasin bend and the Cumberlands.

Mammoth Cave, Kentucky, with various passageways and chambers totalling 150 miles in length under an area ten miles in diameter. Formed by water in limestone. Cave contains three rivers, two lakes and a sea, finding an outlet through Echo river. Thousands of rock formations.

Mount Washington, New Hampshire, central mountain of the Presidential range of the White mountains. Canada, Massachusetts, and the Atlantic can be seen from its summit, reached by a cog railway, built in 1869, and a highway.

Muscle Shoals, Alabama, a 37-mile cascade in the Tennessee river in some places narrowing to 1,000 feet, in others two miles wide. Takes name not from cataract but from curious rock formations glistening like muscles. Also a huge dam by that name built in the Tennessee valley.

Natural Bridge, Virginia, over Cedar creek, is 215 feet above the surface of the creek. The rock across the top is 55 feet thick and about 80 feet wide, with an automobile highway across it. The entire bridge is from one massive block of limestone.

Niagara Falls, New York. The American fall is 167 feet high and has a fairly straight crest 1,000 feet wide. The Canadian fall is 158 feet high and is 2,500 feet long in a horseshoe shape. Most of the water flows over the Canadian fall. The falls can be reached from below by a tiny boat. At night they are lit up by searchlights, sometimes colored.

Old Faithful, Wyoming, a geyser in Yellowstone park which at regular intervals of 60 to 75 minutes sends aloft a shower of water and steam. Discharges several hundred thousand gallons in an eruption that lasts several minutes, from a crater two feet wide and four feet long.

Ozark Mountains, Missouri, extend slightly into Illinois, Kansas, Arkansas and Oklahoma. A series of graceful hills, 1,200 to 1,800 feet above sea level, with lakes and rivers and natural caves.

Palisades of the Hudson, New Jersey, flank the west bank of the river for 13 miles from Fort Lee, to just over the New York line. An unbroken perpendicular cliff of colored basalt, 300 to 500 feet above the river.

Pikes Peak, Colorado, discovered by Lieut. Zebulon M. Pike in November, 1806. Especially picturesque because it rises abruptly from the surrounding plateau, but not the highest peak in the state. Reached by a nine-mile cog railway or a 30-mile highway. Magnificent view from the top.

Plymouth Rock, Plymouth, Mass., a granite boulder at the water's edge upon which, according to story, the Pilgrims disembarked. It now rests beneath a canopy of Grecian design.

Redwood Trees, California, preserved in several public parks and monuments, are among the oldest living things in the world. Redwood bark is from 6 to 12 inches thick

and consequently is not often damaged by fires which kill nearby trees that are less hardy. Redwoods are cousins of the sequoias.

Serpent Mound, Ohio, a long, narrow ridge of earth 5 feet high and over 1,300 feet long, representing a snake about to swallow a huge egg. This mound, and others nearby, probably were built by ancestors of modern Indians.

Shoshone Falls, Twin Falls, Ida., last of the trio of cataracts in the Snake river. An upstream river canyon, is 750 feet wide and 1,200 feet deep, and the falls drop 50 feet over short cascades and then leap sheer 212 feet. Canyon is spanned by Jerome bridge, 1,400 feet long.

Starved Rock, Illinois, an historic bluff rising 140 feet out of the Illinois river between Ottawa and La Salle. When the Ottawa Indians began a campaign of extermination against the Illinois to avenge the death of Pontiac, the remnant of the Illinois took refuge here, were besieged, and all but 11 were killed.

Stone Mountain, Georgia, a huge granite monadnock, nearly a mile long, rising sheer from the surrounding plain, and nearly bare of all vegetation. Colossal figures of General Lee and his associates of the Confederate army are being blasted out of the smooth side of the rock, and when complete will represent a group 200 feet high and 1,300 feet long.

Turkey Run State Park, Indiana, where Sugar creek has cut its way through a deep narrow gorge in sandstone. In many places it is wider at the bottom than at the top. There are several smaller gulches entering the main gorge, and 285 acres of virgin timber.

Versailles Oaks, Louisiana, planted by Pierre Dennis de la Ronde II, just below New Orleans, on April 20, 1783, now forming a splendid avenue. Within sound of them, the Battle of New Orleans was fought in the War of 1812.

Wisconsin Dells, Wisconsin, a narrow steep-sided gorge about seven miles long and from 50 to 1,000 feet wide, in colored sandstone. Several gulches, some so crooked that the sky cannot be seen overhead. Many fantastic rock formations.

GREAT SPHYNX OF GIZEH: About 300 feet east of the second pyramid, and made probably to protect the neighboring tombs from evil spirits. It is sculptured out of native rock with masonry added in some places. Height from the pavement on which the forelegs rest is 66 feet, length is 172.5 feet. The head is 30 feet long, and the face originally was colored red. The front of the Sphinx was cleared of sand by Caviglia in 1815.

STATUE OF LIBERTY: Highest statue in the world, it represents a female figure holding a torch aloft, and was presented to the people of the United States by the people of France to commemorate the 100th anniversary of American independence. Unveiling was Oct. 28, 1886. Height from base to torch is 151 feet 1 inch; foundation of pedestal to torch, 305 feet 6 inches; heel to top of head, 114 feet 6 inches. Forty persons can stand within the head, to which there is access by stairs inside the statue. Sculptor was Frederick Bartholdi.

MAN-MADE LANDMARKS OF THE UNITED STATES

Adler Planetarium. Chicago, a 12-sided structure of granite, topped by a copper dome. The planetarium chamber, 72 feet across, reproduces the heavens with its projection machine, and all the apparent movement of the planets, stars, and the moon.

The Alamo. San Antonio, Texas, once a mission church, scene of the siege of 182 Texans by Santa Anna's army in 1836. The Alamo today is a museum containing documents, weapons, and other relics of Texas history.

Colonial Williamsburg. The restoration of Colonial Williamsburg on the Virginia peninsula, capital of the colony from 1699 to 1779, was undertaken by John D. Rockefeller, Jr., in an effort to preserve the most significant portions of an historic and important city of America's colonial period.

Williamsburg is one of the most historic cities in America. It was settled as Middle Plantation in 1633—an outpost, palisaded against the Indians. After becoming the capital it received its present name from William III of England. It remained capital until the seat of government was removed to Richmond in 1779.

The College of William and Mary, second oldest in America, was founded at Williamsburg in 1693. Jamestown, site of the first permanent English settlement in America, was established in 1607 only six miles southwest of the city. Yorktown, where Cornwallis surrendered, is 15 miles away.

Williamsburg has retained much of its heritage from the days of the Colonial great. Its restoration is essentially an educational undertaking. Present restored area includes Duke of Gloucester street, extending seven-eighths of a mile from the College of William and Mary to the reconstructed capitol, together with the adjacent greens.

Up to the present, 67 colonial buildings have been restored; 91 colonial buildings have been rebuilt; 459 modern buildings have been torn down; 33 shops and stores have been erected to provide a suitable business district, and a number of old gardens have been restored.

Williamsburg continues to be a living city—much more than a museum. Its homes are lived in and its buildings still being used. According to its sponsors, "it will be, in effect, a shrine where great events of colonial American history may be visualized in their proper setting."

Among buildings of special interest is the Wren building, 1695, oldest academic structure in America, one of the three historic buildings of the College of William and Mary which have been restored.

Others are the Public Magazine, 1714, in which were stored arms and ammunition of the Virginia colony; the Capitol, 1699-1705, rebuilt on original foundations; the Raleigh tavern, 1742, restored with furnishings on a basis of inventories of its early keepers; Ludwell-Paradise house, 1717-1719, restored as a typical home of the 18th century gentry and now being used to exhibit Mrs. John D. Rockefeller, Jr.'s collection of American folk art; the old Courthouse, 1770, a desirable starting place for tours; Bruton Parish church, 1710-1715, to be restored; the Wythe house, 1755, home of George Wythe, first professor of the first law course offered by an American college, and headquarters of George Washington prior to the siege of

Yorktown; the Public Gaol, and the Governor's palace.

The Governor's palace and its dependencies, preeminent among notable estates in colonial America, have been rebuilt on original foundations. Many of the rooms in the place are of special interest because of the collection of antique furniture, paintings and other furnishings that have been chosen to conform with inventories of royal governors. The gardens are considered more typical of formal 18th century English gardens than any others in America.

The exhibition buildings of the Restoration are open each day, including Sunday, from 10 a.m. to 6 p.m. Hostesses are on duty to receive visitors and accompany them through the buildings. Escorts may be engaged at the Old Courthouse at an hourly fee for a guided tour through the city. All income is devoted to historical and educational purposes.

Confederate Capitol. Montgomery, Ala., a white colonial building, started in 1851 after the first capitol had burned in 1849. In the central section of the building, first started, representatives of six states formed the Confederacy and seceded from the union.

The Edison Institute and Greenfield Village. The Edison Institute, Dearborn, Mich., was created by Henry Ford and dedicated to the memory of his friend, Thomas Alva Edison.

It consists of a great technological museum, an early American village containing approximately 60 structures, most of which are of considerable historic importance and many of which are small museums in their own right, and, now nearing completion, a large "recreation" building, housing, in addition to such features as a gymnasium, swimming pool and auditorium, class rooms, work shops and laboratories, for the institute's students. The structures are set in a 200-acre plot at a bend in the River Rouge, adjoining Ford airport at Dearborn, and Ford engineering laboratory.

The facade of the museum consists of reproductions, two on either side, of the old City hall and Congress hall, at Philadelphia, joined to each other and to a reproduction of Independence hall, which is the central unit.

Behind this front are the libraries, class rooms, laboratories, and theater of the Edison Institute; the smaller exhibition rooms of the museum, in which fine collections of early American furniture, glassware, ceramics, silverware and the like are on display, and, finally, the main exhibition hall, whose teakwood floor has an area of approximately eight acres.

In this huge hall are arranged in meaningful historical sequence, the tools and products of man's industry in three major divisions, agriculture, manufacture, transportation.

The village of Greenfield, which complements the museum, centers about a "green" or common, bordered by church, general store, inn, town hall, courthouse and school. Pleasant, tree-lined carriage roads converge on the green, and along them stand houses that once were the homes of famous men, or that typify the development of early American domestic architecture, and small public buildings in which the trades and crafts of the pioneers were practiced—in which, in fact, they are being practiced today.

The ancient mills still turn in Greenfield

village, grinding out good meal; the cobbler is at his last; the cooper makes his buckets; the potter thumbs his wheel. In most of the shops, children from the Edison Institute high school, or the primary schools in the village are to be found, particularly during vacation time, learning the old crafts by both ancient and modern methods.

Among the buildings are the Martha-Mary chapel, named for the mothers of Mrs. and Mr. Ford; the Scotch Settlement school which Mr. Ford attended as a youth; the Logan county (Illinois) courthouse where Abraham Lincoln once practiced law; the Clinton Inn, typical American hostelry of a century ago; the birthplace of Luther Burbank and his office; the Charles P. Steinmetz cottage; Stephen Foster Memorial cottage; birthplace of Orville Wright and the Cycle shop where he and his brother, Wilbur, built the first successful airplane; and the Noah Webster house which formerly stood on the Yale university campus.

Several groups bespeak the country or place of their origin. The Cotswold group of buildings was transported from England. The McGuffey group includes the log cabin birthplace of William Holmes McGuffey, compiler of the celebrated McGuffey readers. The Menlo Park compound has grouped about it the several buildings in which Edison labored during the most productive decade of his life—recreated to the very dump in which the inventor discarded the broken tools and other debris of his experiments. The Edison ancestral Ontario home is here, and several other buildings in which the scientist labored. Smith's Creek depot, formerly a way-station on the Detroit-Port Huron line, where the boy Edison was ungenitally "helped" to the platform when a train conductor discovered a fire in the baggage car which he was using as a traveling chemical laboratory, has been placed here.

Empire State Building, New York City, has a capacity of 25,000 tenants. Exterior of Indiana limestone, granite and chrome-nickel steel. Framework of steel weighs 60,000 tons, includes 10,000,000 bricks. Has 63 passenger elevators, nearly seven miles of elevator shaft, 6,500 windows, 50 miles of piping, 3,200 miles of telephone and telegraph wires. Height from street level to tip of mooring mast is 1,265 feet—266 feet higher than the Eiffel tower. Visitors can go to the 102nd floor observatory in the mooring mast. The building occupies about two acres.

Fort McHenry, Baltimore, Md., protected the city from the British fleet during the War of 1812. It was the flag over this fort of which Francis Scott Key wrote in his poem set to music as "The Star-Spangled Banner."

The Hermitage, Nashville, Tenn., historic home of Andrew Jackson, a model of colonial architecture. It was built in 1835 on the site of a two-story log house in which the Jacksons lived since 1804. On the grounds are the tomb of Jackson and his wife, slave quarters, and the high-wheeled carriage in which he made trips to Washington.

Hopewell Village, Pennsylvania, site of the famous Hopewell furnace of the American Revolutionary period, restoration of which is planned by the National Park service. The furnace is one of the oldest cold-blast charcoal furnaces still standing in the country, and during the Revolution turned out iron for cannon and shot.

Independence Hall, Philadelphia, Pa., was built by the general assembly of Pennsylvania between 1732 and 1734. The second continental congress met here. George Washington was chosen commander-in-chief of the Continental army, and the Declaration of Independence was signed here. Comprises three main buildings—the original building and two structures erected by the city and county of Philadelphia.

Lewis and Clark Memorial, Council Bluffs, Iowa, being constructed by the Colonial Dames of America to honor the famous explorers. Depicts in bas-relief their historic meeting with the Indians.

Mormon Temple, Salt Lake City, Utah, with extreme dimensions of 186½ feet by 118½ feet and its highest tower 210 feet. Materials of gray Wasatch granite. Construction started in 1853, and dedication in 1893. Classical features in the architecture. Only members of the Mormon church allowed to enter.

Mount Rushmore, South Dakota, site of the largest piece of sculpture ever attempted by man, with mammoth figures of Washington, Jefferson, Lincoln and Theodore Roosevelt scaled to the size of men 465 feet high with heads 60 feet from crown to chin. Near the faces in the hard granite expected to be legible after 500,000 years will be carved a summary of the history of the United States.

New Castle Courthouse, New Castle, Del., whose east wing was built as the seat of government in 1675. The center section was constructed in 1701, and the west wing more than a century later. Was state house until 1777, and county courthouse until 1880, since has been used for city and school purposes.

Old Capitol, Little Rock, Ark., now the Arkansas War Memorial building, was mostly constructed between 1833 and 1836, and finished shortly after 1840. The legislature met continuously in the building from 1836 to 1911 except for a brief time in the War Between the States, and in 1874 during a local disturbance.

Old Stone Mill, Newport, R. I., the inspiration for Longfellow's "Skeleton in Armor," and probably the ruin of a windmill built by an earlier colonial official. Legend has the structure being built by early Viking invaders, but there is little evidence for this belief.

Rockefeller Center, New York City, comprises a group of buildings occupying 12 acres, nearly the whole of the three blocks from 48th to 51st streets between Fifth and Sixth avenues. Eleven buildings so far have been completed, and construction of three more is contemplated. The lowest buildings, of six stories, are 85 feet tall, and the highest, the 70-story RCA building, soars to a height of 850 feet.

Below its lofty pinnacle are offices; roof gardens, theaters, broadcasting studios, exhibitions, restaurants, and a labyrinth of halls, corridors, and concourses lined with smart shops.

The western portion of Rockefeller Center is known as Radio City. It contains five buildings—the Radio City music hall, RKO building, RCA building, RCA building west, and Center theater.

More than 20,000 persons work in Rockefeller Center, and 80,000 persons, bent on business or pleasure, visit the development each day. The RCA building is the largest office building in the world in gross area.

Two of the fastest elevators in the world are in the structure, traveling 1,400 feet per minute and covering the distance from the ground to the 65th floor in about 39 seconds. It is estimated that on full schedule, the elevators of the RCA building travel a total of 2,100 miles daily between 8 a.m. and 6:30 p.m.

At the foot of the RCA building is an open area approximately 18 feet below street level and 125 feet wide by 95 feet long. On the Fifth avenue front of the center are two seven-story buildings, La Maison Francaise, and the British Empire building, both substantially restricted in tenancy to French and British organizations.

Five buildings have been completed in the northernmost block. On Fifth avenue are two six-story structures, the Palazzo d'Italia and the International Building East. These are joined to the 41-story tower of the International building which has been set back 15 feet from Fifth avenue. The western end of the block is occupied by the Radio City music hall and by the 31-story exotic RKO building.

Two buildings have been completed in the south block; the Center theater at the corner of 49th street and Sixth avenue, and the 36-story office building known as 9 Rockefeller Plaza. The latter fronts on Rockefeller Plaza and on 48th and 49th streets and extends eastward about half way to Fifth avenue. Two additional low buildings are planned tentatively for the south block.

On the 11th floor level of the RCA building are the Gardens of the Nations, with 12 outdoor gardens planted on roof terraces, containing 250,000 flowers, 30,000 bulbs, 50 trees, and 1,000 smaller plants. The National

Broadcasting company's studios are in the RCA building. Radio City music hall, seating 6,200 persons, is the largest theater in the world.

St. Augustine, Florida, the oldest city in the United States, is 36 miles southeast of Jacksonville on a narrow, sandy peninsula formed by the Mantanzas and Sebastian rivers. Still boasting old Spanish buildings, and Ponce de Leon's Fountain of Youth, St. Augustine once was the center of Spain's vast Mississippi empire. A project now is under way to restore many of the old structures.

San Xavier del Bac, Tucson, Ariz., a mission constructed about 1727 by Jesuits, and later turned over to the Franciscans. When Mexico expelled all religious orders in 1827, neighboring Indians preserved the structure. It is built in the form of a cross, of adobe brick on a stone foundation.

Singing Tower, Lake Wales, Fla., on Iron Mountain, 325 feet above sea level, the highest part of Florida. A carillon tower built by the late Edward K. Bok. It is in Mountain lake sanctuary which he also created.

Soldiers' and Sailors' Monument, Indianapolis, Ind., rated one of the finest examples of architectural art, a colossal monument, with sculptures, a statue of Victory, a central shaft, and great fountains.

Terminal Tower, Cleveland, O., central unit in the terminal group of buildings representing an investment of \$100,000,000 and covering 35 acres. More than a thousand obsolete buildings and shacks were demolished in clearing land for construction. The tower itself is 52 stories high, and is 708 feet above the surrounding area at its tip.

PLACES OF INTEREST IN

ARCHIVES BUILDING: The national documents and records, long exposed to fire and other hazards, now are stored in the Archives building at 7th street and Pennsylvania avenue, where they are accessible to research workers. The new building was opened officially in November, 1935, and is one of the most imposing structures in Washington, with classic lines. There is room for 2,500,000 cubic feet of archives. The inner building is windowless, protecting documents and papers from the outside light, while the humidity and chemical content of the air are regulated to afford additional security.

ARLINGTON CEMETERY: Open every day from sunrise to sunset, the cemetery is situated in the Virginia hills across the Potomac from Washington, and is reached by several fine automobile roads, or by sight-seeing buses. It is on ground formerly owned by Robert E. Lee. More than 50,000 soldiers who served in various wars of the United States are buried in Arlington. The grave of the Unknown Soldier is situated there. In the southern part of the cemetery are buried victims of the destruction of the Battleship Maine, in Havana harbor, and several hundred soldiers who died in Cuba and Puerto Rico during the Spanish-American war. The Lee Mansion still is preserved, and a Memorial amphitheater has been constructed.

THE CAPITOL BUILDING: The Capitol building dominates all Washington, dwarfing the great buildings nearby. It is approximately 750 feet long and half as wide, covering about 3.5 of the 58.8 acres of the Capitol grounds. As seen from the east or west, it is composed of seven units. In the

THE NATIONAL CAPITAL

center directly under the dome is the rotunda, the walls and floor of which are built of Aquia creek sandstone, painted white to harmonize with the marble portions of the building. Flanking it are rectangular wings rising to a level with the base of the dome. These, the oldest units, once were joined by a wooden arcade and constitute the central section which from 1827 to 1857 composed the entire structure.

Linked to these two wings by short narrow passageways are the extended wings, housing, respectively, the house of representatives and the senate. These two are the largest units and built of Massachusetts dolomite marble.

The central dome, which cost more than \$1,000,000, is painted white to harmonize with the masonry. It has a base diameter of 135 feet, 5 inches, and rises 285 feet above the eastern plaza. It is composed of two shells, one imposed upon the other, expanding and contracting with temperatures variations. Between them winds a stairway. With all trusses and girders, the dome supports a weight of 4,000 tons. The cap of the dome rises from a drum, around which is a peristyle colonnade of 36 columns representing the states of the union at the time the dome was completed. Atop the cap is a "lantern" decorated with 13 columns representing the original states of the union, at the base of which is a lookout gallery, and at its top Thomas Crawford's 19-foot bronze statue of Freedom.

The structure has five stories, of which three, the sub-basement, basement, and ground floor, have little interest to the tourist. From the basement radiate subways to

the Library of Congress, to the House office building, and to the Senate office building. The ground floor, which housed a military bakery during the Civil war, now houses offices, restaurants, barber shops, and various service offices. The principal floor houses the major rooms and objects of historical and artistic interest, with the exception of the Senate and House galleries which are on the gallery floor of their respective extensions.

The **rotunda** is the circular central hall of the building and is 95 feet and 8 inches in diameter. From it four doorways lead to the principal parts of the building. The funeral rites of all presidents who have died in office since 1865 have been held here. The rotunda's north door leads to a smaller rotunda, and from this a door leads north to the **Supreme court section**, now no longer occupied by the court. From the same corridor, a short passage continues to the **Senate extension**, on the principal floor of which is the **Senate chamber**. The gallery floor is one story higher. Various other rooms are in this section.

A long central corridor, running from north to south, connects the Senate extension with the **House extension**. Passing under the Supreme court section, it opens into an oval hall under a small dome. A door on the southeast (left) leads to the corncob foyer which gives access to the law library and leads to an immense circular hall known as the crypt. This leads south to the House of Representatives extension and the **Hall of Columns**. House extension contains **Speaker's lobby**, **House Chamber**, and leads back out to Statuary hall, described in another section of Almanac.

A comprehensive view of the beautiful Capitol grounds may be obtained from the top of the dome, reached by a stairway from the great rotunda.

The site of the Capitol, 88 feet above the Potomac, was chosen by Major Pierre Charles L'Enfant, because it seemed to him "a pedestal waiting for a monument." From the plans, that of Dr. William Thornton, an amateur architect, was selected, and after several other architects tried to alter the plan, Dr. Thornton himself was placed in charge. When federal funds gave out in 1796 the State of Maryland supplied money raised through a lottery. In 1800 the North wing, later called the Supreme court wing, was completed, and Congress met here for the first time, Nov. 21. In 1807, the House of Representatives moved into the permanent south wing, on its completion by Benjamin H. Latrobe. At this time the two stone wings were joined by a wooden arcade where the rotunda now stands.

A great set-back occurred in the War of 1812 when the British destroyed the wooden roofing, the interior of the House wing, the west side of the Senate interior, and many marble columns. The war-scarred structure was restored under Latrobe in 1819. In 1827, under Charles Bulfinch, the link between the two buildings was completed and crowned with a small wooden dome. In 1850, Congress authorized construction of two extensions, and the House extension was completed and occupied in 1857, the Senate extension in 1859. In 1860 the Supreme court moved into the old Senate chamber, and in 1864 Congress transformed the old house wing into Statuary hall. The great iron dome was assembled during the Civil war, and Thomas Crawford's statue of Freedom was placed Dec. 2, 1863. Subsequent minor renovations are steam heating installed (1865), elevators

(1874), fireproofing (1881); electric lighting (1882), and a modern drainage system (1893).

COMMERCE BUILDING: Housing next to the youngest department of the federal government, the new commerce building at the time of its completion in 1932 was the largest office structure in the capitol. It cost \$17,000,000 and is an adaptation of the Italian Renaissance Palazzo style. The exterior walls are faced with granite for the first two stories. The upper portions are of Indiana limestone. An attic story is set back at the sixth-floor level. The interior, except for special rooms, is finished as a commercial office building. All working offices are standardized and so arranged that they can be used as single offices 15 feet wide or as long working spaces 200 to 300 feet long. A large departmental library contains 208,640 publications. West of the east lobby is a conference room for groups of American business representatives, and seating 800 persons. In the main lobby is a series of models showing development of the airplane. An aquarium in the basement contains 2,000 American freshwater fish and other marine oddities. The building is open weekdays from 8:30 a.m. to 4 p.m. and the aquarium also is open Sundays from 10 a.m. to 4 p.m.

HISTORIC HOUSES: It is probable that no house erected prior to 1760 stands in the District of Columbia today, and most of the houses built in the eighteenth century were Georgian in style. Probably the oldest standing house in Washington is what is now a minor wing of the Mackall place on R street between 28th and 29th streets NW. It consists of one large room with a huge fireplace which also still stands. Among the historic houses in or near Washington are:

Arlington house, stuccoed brick, former home of Robert E. Lee.

Tudor place, yellow stucco, former home of Martha Parke Custis.

Dumbarton house, brick, home of National Society of Colonial Dames.

Octagon house, brick, Georgian, where the Treaty of Ghent was signed.

Monroe house, red brick, stone trim, now the Arts club building.

The Maples, white-painted brick, now a private estate.

Frederick Douglass Memorial (Cedar Hill), home of the former slave.

Private estates include Rosedale, Woodley, Rippon lodge, and Gunston hall.

INTERIOR DEPARTMENT BUILDING: The new structure was completed in January, 1937, stands on a site of two square blocks and covers more than 5 acres. In contrast with the administrative buildings in the Triangle group, it is simple and modern in design. It consists of the huge central section two blocks long with six wings on each side. It is seven stories high. The two upper stories are set back slightly, and there is an extensive roof promenade. It contains exhibits of charts, maps, and working models explaining the various bureaus on the ground floor.

DEPARTMENT OF JUSTICE: The new building combines classical treatment with modern forms, and was completed in October, 1934, at a cost of \$10,000,000. The exterior walls, faced in limestone, are six stories high and on Pennsylvania and Constitution avenues have Ionic colonnades three stories high. A set-back and attic story are roofed with polychromatic glazed terracotta tile. The central court is landscaped.

General interior finish is of plaster, Mankato stone and limestone. It is richly decorated with designs and bas-reliefs. A law library contains 95,000 volumes. It is open during business hours, and guided tours of the Bureau of Investigation exhibits are conducted each week day except Saturday at 10:30 a.m. and 2:30 p.m. Saturday, one tour at 2:30 p.m. is conducted.

LIBRARY OF CONGRESS: The world's greatest library, situated on the eastern edge of Capitol plaza, facing the Capitol. It contains more than 5,000,000 volumes, including the original Declaration of Independence, the Constitution of the United States, and other rare manuscripts and books. Contains beautiful paintings and mural decorations. Open to visitors from 9 a.m. to 10 p.m. week days, and 2 p.m. to 10 p.m. Sundays and holidays. It is open from 9 a.m. to 6 p.m. on Saturdays in the winter time, and 9 a.m. to 1 p.m. in summer time.

LINCOLN MEMORIAL: Perhaps the most stately monument in the Capital city, the Lincoln Memorial is at the end of the Mall—a great temple with Greek Doric columns executed in white marble. The building is situated upon a terraced platform, retained by a 14-foot granite wall and surrounded by a circular lawn. The approach is by a flight of marble steps about 130 feet wide which sweeps upward from the reflecting pool, breaking the terraces on the east side. The stairway is flanked by huge cheek blocks. The interior floors and wall base are of pink Tennessee marble and the walls are of Indiana limestone. The main chamber contains an heroic statue of Lincoln, the work of Daniel Chester French. The figure is 19 feet high. The memorial is open daily from 9 a.m. to 9:30 p.m.; holidays 9 a.m. to 4:30 p.m. except Christmas and Labor day, when it is closed.

Mount Vernon: The historic home of George Washington is reached by crossing the new Arlington Memorial bridge and following the Mt. Vernon Memorial highway along the Potomac. It is open from 9 a.m. to 5 p.m. daily from April 1 to Oct. 1, and from Oct. 1 to March 31 is open from 10 a.m. to 4 p.m. week days, and 2 p.m. to 4 p.m. Sundays. Admission is 25 cents. Here George Washington is buried, and the gardens, servants' quarters, kitchens, and stables remain much as they were in Washington's time. The furnishings also remain in the house. Mount Vernon is on the Virginia side of the Potomac river, 16 miles south of Washington. Bus and steamship service is maintained.

NATIONAL STATUARY HALL: For the list of statues see the chapter on Arts and Culture, section devoted to Halls of Fame. The hall itself is a semicircular room 96 feet in diameter extended on the flat side by a colonnaded bay. It was dedicated in 1864 so that each state might send statues of two distinguished deceased persons. Because of overcrowding, some of the statues now are distributed in the Hall of Columns, several principal corridors, and elsewhere.

PAN-AMERICAN UNION: A white marble building and annex within broad lawns set with trees and shrubbery in the developing group of monumental buildings along 17th street and Constitution avenue. It is a blending of North and South American styles, "symbolizing a common understanding of the nations of the Western hemisphere." It contains a reference library and

research rooms, and is open from 9 a.m. to 4 p.m. It contains many exhibits from North and South American countries, both ancient and modern.

PARKS: The focal point of Washington's extensive park system is the Washington monument. Between it and the Capitol grounds to the east lies the Mall, a mile long and approximately one-fourth of a mile wide. To the north are the White house ground and Lafayette park. To the south is East Potomac park with its tidal basin and wide expanse of groves, driveways, and recreation grounds. To the west is West Potomac park, the Lincoln memorial and the reflecting pool.

From the Memorial, driveways connect with Rock Creek park and its tributaries including the Zoological gardens; also with the first of the disjointed Georgetown parks now being knitted into a coherent system. Beside the Memorial is the Arlington Memorial bridge, which connects the system with the 14-mile Mount Vernon Memorial parkway. The Anacostia group, stretching five miles along the Anacostia river, alone is inaccessible through connecting parks with Washington monument.

POST OFFICE DEPARTMENT: The new and impressive building of the Post office department was dedicated in June 1934, and cost \$10,800,000. Its general plan was established in accordance with the scheme of the Federal Triangle group of buildings, and comprises two semicircular units set back to look like a script letter X. These units are flanked on the north by a rectangular wing and on the south by the Interstate Commerce building. The structure has 12 entrances, 10 stairways, 17 elevators. The principal lobbies and public portions of the building are finished in marble. The offices and reception room of the postmaster general are on the third floor overlooking the great plaza. At one end of the reception room is a 7-foot marble figure of Benjamin Franklin and at the other end one of Samuel Osgood, first postmaster general. The building is open daily 9 a.m. to 4:30 p.m., Saturdays 9 a.m. to 12 noon.

SMITHSONIAN INSTITUTION GROUP: Included in these buildings situated in the Mall south of the Federal Triangle are the Smithsonian Institution National Museum, Arts and Industries building, Aircraft building, and the Free Gallery of Art. The library of the Smithsonian institution in reality is a system composed of 46 distinct libraries. The National Museum's zoological and botanical collections consist of material gathered by the government agencies and various expeditions. There are various scientific, historical, and technological exhibits in the other buildings. They are open from 9 a.m. to 4:30 p.m. on weekdays, and from 1:30 p.m. to 4:30 p.m. Sundays and holidays. Other museums, libraries, and art galleries situated in other parts of the city include the Phillips Memorial Art gallery, Corcoran Gallery of Art, Folger Shakespeare Library, Washington Public Library, Library of the Catholic university of America, Lincoln museum (at Ford's theater where Lincoln was assassinated) and Textile museum.

SUPREME COURT BUILDING: The new Supreme court building, designed as a marble temple with flanking wings, stands haughtily at First and East Capital streets

NE. It is open to visitors from 9 a.m. to 4:30 p.m. daily, though the court chamber has a limit of seating accommodations and is in session only alternate fortnights. Immediate approach to the building is impressive, with a short flight of steps, flanked by tall candelabra leading to a great marble plaza. The main court chamber is nearly hidden within the massiveness of the structure. The building also contains a memorial hall, suites of offices for the justices, two large impressively decorated chambers intended for international conferences, a room for members of the bar, suites for government attorneys, library, main reading room and smaller reading room.

WASHINGTON MONUMENT: This memorial to the first president was dedicated Feb. 21, 1885, and opened Oct. 9, 1888 after 90 years of procrastination, quarrels and penury by Congress. At the time of its construction the tallest man-made structure in the world, the monument still is the tallest piece of masonry in existence. It is situated on a mound in Washington Monument grounds, just south of Constitution avenue and west of 14th street. It is open from 9 a. m. to 4 p. m. daily and from 12:30 p. m. to 4:30 p. m. on Sundays and holidays, without charge. An elevator ascends about every five minutes, the last trip starting at 4 p. m. on weekdays. There is an ascent by 898 stairs between the walls and the elevator shaft. Visitors who wish to see the tribute stones inside the shaft should ascend by the elevator and walk down. There are 202 carved tribute stones.

Dimensions

Height above floor	555 feet 5 1/4 inches
Side of base of shaft	55 feet 1 1/2 inches
Side of top of shaft	34 feet 5 1/2 inches
Wall thickness at base	15 feet
Wall thickness at top	18 inches
Depth of foundation	36 feet 10 inches
Area of foundation	16,002 square feet
Weight of foundation	36,912 tons
Weight of monument	81,120 tons
Maximum pressure on soil	.9 tons per sq. foot

THE WHITE HOUSE: This building is situated about a mile and a half west-northwest of the Capitol, with Pennsylvania avenue connecting the two. It faces Lafayette square on the north and is flanked by the Treasury on the east and the State, War, and Navy building on the west. Admittance to the East terrace and East room from 10 a. m. to 2 p. m. except Saturdays when they close at 1 p. m. Admittance to State dining room and the Red, Blue, and Green rooms by special card from a representative or senator, 10:30 a. m. to noon except Sundays and holidays.

The south facade of the White House rises from a mass of shrubbery and flower gardens, and forms the north end of a long vista into Potomac park to the south. To the west of facade are elaborate flower gardens, tennis courts, and clustered trees and thickets, one of which conceals the "President's walk." On the east are more small groves and gardens, and an oblong pool, bordered by evergreens.

The White House walls are not white, but of grey sandstone from the Aquia quarries in neighboring Virginia. "They derive their dazzling exterior from the painter's brush." Today the building stands virtually as its designed, James Hoban, planned it in the late 18th century. It was completed in 1800, but has been altered several times since, though not much in appearance.

The White House seems to be of two stories, but has a basement at ground level, and an attic concealed by a crowning balustrade. There are two long galleries on the east and west ends, but the architecture maintains the principle of symmetry.

Unless they have come by invitation, visitors enter the White House from the East Executive avenue entrance. Approaching from the foyer, the first room is a library. Across the corridor is a room holding a display of White House china gathered from successive administrations since Washington. The third room on the south, once known as the Diplomatic room, is elliptical in form, and was the scene of President Roosevelt's broadcasts. A fourth room has access from the Diplomatic room. At this point the corridor is closed off from the general public by a curtain. The corridor passes through to the West terrace.

The main floor may be considered in four sections. The great East room, occupying the entire eastern wing, is a section in itself. The reception hall, occupying the north front center is another. West of it, the State and private dining rooms balance the east room and form a third main division. Lining the south front, three formal reception rooms, familiarly known as the Red room, Blue room, and Green room comprise the fourth section.

Only the president and his family have access to the second floor, which has seven bedroom suites, a library, and a study, all joined by a wide hall running the length of the building. The four corner suites include small dressing rooms. A large Blue bedroom directly over the southern end of the East room once was Lincoln's study, and was where he signed the Emancipation proclamation.

The third or attic floor contains 14 rooms, including several store rooms, the sewing room, servants' quarters, and the housekeeper's cedar fitted room.

The kitchens are in the part of the lower floor not accessible to the public. During the summer of 1935, the kitchen was extensively remodeled by the National Parks service, department of the interior, which has physical supervision of the White House. New underground storerooms were built, having refrigerated compartments. The kitchen is divided into three rooms, all refitted with walls of Carrara glass and work surfaces of stainless steel. The food is cooked by electricity, and there is an electric stock kettle, electric food chopper, electric meat grinder, electric batter mixer and waffle irons, a 30-gallon ice cream storage box, and similar devices.

After the food is prepared, a dumb waiter conveys it to the butler's pantry between the two dining rooms on the main floor. Here the table service arrives in a dumb waiter from the dish closet on the floor above. After the food is served, the kitchen utensils are returned to the basement, then washed in an electric dishwasher. Thus the table service never goes to the kitchen, and the only cooking done on the main floor is the boiling of water for tea. "The various units are so arranged that a state dinner may be served, or an informal tea, with equal efficiency and lack of confusion."

Recent changes include a steward's room and a carpenter's shop, and on the lower floor a new servants' dining room, servants' rest rooms, and a furniture storage room. A housekeeper's office has been installed, and the doctor's office remodeled.

CLIMATES OF THE EARTH

If mountain climates are excluded, the various climates of the earth can be subdivided roughly into ten types, with a few subtypes. There are three major divisions (a) tropical climates, (b) middle climates, (c) polar climates.

A climate is the average of weather during the year. Any region over which the temperature, air pressure, winds, and moisture are similar is called a climatic region. Areas with similar climates are found in widely separated parts of the earth, though generally in corresponding positions on the continents. The various climatic regions are as follows:

1. Tropical Forest. Typical example: Amazon basin. Straddling the equator, this climate is characterized by high temperatures which are continuous, with few extremes and very little daily or monthly range. The warmest and coldest months do not differ more than 10 degrees Fahrenheit and the temperatures are about the same every day and every year. There is great humidity, and the air expands continuously during the day, especially in mid-afternoon, clouds accumulate because the rising air is cooled, and rain falls nearly every day at about the same time.

Rainfall is very heavy, from 60 inches to 200 inches every year, and averages perhaps one-half inch per day, usually being distributed quite evenly throughout the year. Although the temperature may not get above 80 degrees, it is felt greatly because of the high humidity. Respiration cannot evaporate readily, and white men are subject to intestinal and kidney diseases.

There are few winds and no strong prevailing winds. Between the opposing trade winds, the air oftentimes is almost stagnant. In this "hot-house" climate grows luxuriant vegetation, often tall trees and entangling undergrowth. Diseases abound, and on the whole the low latitudes are sparsely populated. Occasionally, near the ocean, there are daily cooling breezes.

2. Savanna. Typical example: African plains south of the Sahara desert. Savanna climate is periodically dry, and the tropical forest vegetation gives way to lighter forests and grass. Sometimes the trees are only in patches, and there are long periods every year without rain. Temperature ranges are greater than tropical forest climates, both daily and annual. The tropical forest climate grades into the wet savanna climate which grades into the dry savanna climate, which in turn grades into desert climate.

The alternate dry and wet seasons are caused by the shifting of wind belts with the northward and southward movements of the sun. When the sun is overhead most of the rain falls, usually in sharp quick showers accompanied by thunder and lightning. As one travels closer toward the pole away from the tropical rain climates, length of the rainy season becomes shorter, and the dry trade winds become more dominant. Savanna soils are leached of their fertility almost as much as are tropical forest soils, and there are seldom extensive populations.

3. Tropical Desert. Typical example: Sahara desert. The tropical desert climates are extremely dry and hostile to life. Ten inches of rain per year may be accepted as their outer limits, and this verges to regions which

may have no rain for ten years. Desert rains are erratic, and may cause damage when they do fall. At times rain may be seen falling from a thunder cloud and being evaporated before it reaches the ground.

The rains do replenish the supply of ground water, however. There often are heavy dews and fogs. As chilled air from the sea is carried over the deserts, it is heated, thus becoming relatively more dry, and more absorbent to what little moisture there may be.

Seasonal temperatures may range as much as 35 degrees, and temperatures within a single day may range as much as 45 degrees—terrifically hot in the day time and cool at night. There frequently are high winds and sand storms. The soil is high in mineral plant foods, and if watered consequently is enduring in fertility. Humus is absent. Plants are sparse or non-existent.

4. Mediterranean. Examples: Most of Western California, Italy. This climate, named for that region where it is most widespread, is situated about between 30° and 40° latitude on the western sides of continents, and lies between the trade winds and the prevailing westerlies. Characteristic are cool winters and warm to hot summers, modified in some marine locations. Summer days are usually hot but seldom sultry. There is a great amount of sunshine in the summer. The growing season usually is about ten months long.

Most of the rain falls during the cool season, and thunderstorms are rare. In coastal regions there often are summer fogs. There is no sod covering, pastures are relatively poor. Evergreens are common but there are few high forests. Irrigation is practiced. Trees with thick corky bark and extensive root systems, do best because of the dry season in summer. Fruits, especially citrus fruits, do well and out-of-door drying is practiced on a large scale.

5. Wet Sub-Tropical. Example: Alabama. This climate resembles somewhat the Mediterranean climate in temperature, but is more sultry. It differs from the Mediterranean climate in being located on the eastern rather than the western sides of continents, and in having a much more abundant summer rainfall. Winters are relatively mild and the growing season is long. There are occasionally severe invasions of cold, however, accompanied by killing frosts, and occasional zero weather, especially where there are no mountain barriers. Typical average monthly temperatures vary between 49 degrees in January to 82 degrees in July.

There are many local thunderstorms, and though more rain falls in the summer, the winter has more cloudy weather and more rainy days. Cotton and maize are typical crops, and the natural vegetation is coniferous forest. In the drier areas, the soil generally is more fertile in the leached out forest soils.

6. Marine West Coast. Examples: Pacific N. W. Coast, England. This climate is on the western side of the continent as is the Mediterranean climate, but is situated north or south of it, from 40° of latitude poleward. It derives its characteristics from the on-shore westerly winds. Seasonal ranges in temperature are remarkably small for the latitude, and may be no more than 25 degrees between warmest and coldest

month. Hot days are relatively rare, and winters are mild.

Amount of rainfall depends in a large measure upon the topography. Rain-bearing winds penetrate much deeper into western Europe than into western North America. Thunderstorms are rare, but there are many gray drizzly days. Rain is heaviest in winter, but there is no period of absolute drought. Heavy stands of coniferous trees are characteristic. Summers are too cool for most cereal crops, except oats and rye.

7. Wet Continental. Examples: Long summer phase, Indianapolis; short summer, Minneapolis. Continental climates differ from marine climates in having greater extremes of temperature, sudden sharp changes of weather, and usually less precipitation, mostly in the warm season. Summers are warm to hot and winters are cold. Extreme temperatures vary from 100° to -20° . The sensible temperature is very high because of the humidity.

They are divided into two general types, those with long summers and those with short summers. In the former, growing seasons are five to seven months in length. Thunderstorms are numerous, the winters are relatively cold but with numerous spells of mild weather. Agriculture is inclined to be less specialized, and dairying becomes increasingly important toward the northern margins. The drier margins suffer lean years.

In the climate with short summer, the growing season may be only three to five months long. The summers are slightly cooler, and the winters very much colder. Longer days in summer somewhat offset the lower temperatures. Thunderstorms are fewer. The skies are clearer in all seasons. Coniferous trees are characteristic, and the soils often remarkably fertile, especially on the prairies. Blizzards are severe and in summer tornadoes are characteristic. It is well to note that there are no wet continental climates in the Southern hemisphere.

8. Dry Continental. Examples: Western Texas, Central Asia. These climates are similar to the wet continental except that they have less rainfall. They are much like the tropical deserts in having little rainfall except that they have a season of severe cold. Characteristically, they are deep in the interior of continents, far distant from the

oceans which are the principal sources of moisture. Much of the area is typically steppes, where the rainfall may be 10 to 20 inches, most of it in the summer time. Vegetation is tufted grass and drought resistant shrubs, and normal agriculture is seldom practiced though there may be considerable grazing.

The desert phase with heat arid and dry cold does support some drought-resistance vegetation such as sage brush, and only scattering animal life can be supported, except at oases. There is much bare ground. Snow cover is not deep. Winters are stormy with variable weather, summers are always bright and clear.

9. Sub-Arctic. Example: Canada south of tundra. These continental climates have the greatest extremes in temperature of any type, with monthly averages as low as -46° and as high as 66° . They exist only in the northern hemisphere and are bounded on the south by the dry and wet continental climates, on the north by treeless tundra. Winters are long and severe, summers short. Growing season usually is less than three months. Midsummer days are surprisingly warm because the sun is always above the horizon. The ground is perpetually frozen to great depths, and only the upper surface thaws out. There are occasional severe blizzards. Coniferous forests are characteristic, though much of the timber is small and stunted.

10. Arctic and Antarctic. Example: Greenland. The sun never is high above the horizon and for months is not seen at all. The polar caps have the lowest mean annual temperatures and the lowest summer temperatures, although the winters are not so severe as in the sub-Arctic climate of north-eastern Siberia. Seasonal ranges are large. There usually is less than 10 inches of precipitation, and the area might be called desert. Aquatic life is abundant, however. Generally, winds tend to blow out from the inner polar areas. Ordinarily, a tundra phase is distinguished from that of ice caps by higher summer temperatures. The weather is characteristically clear and bright. Animal life is not abundant. Crops cannot be grown. Reindeer are herded and the population is nomadic. On the ice caps, life is virtually non-existent.

U. S. LOAN TO BRITISH

Conditions of the Anglo-American loan agreement, announced Dec. 6, were as follows:

1. A line of credit to the United Kingdom of \$3,750,000,000 might be drawn on between the effective date of the pact and Dec. 31, 1951. It would be payable in 50 annual installments at two per cent interest on the amount outstanding.

2. Interest would be waived when Britain could not muster the dollars to pay.

3. Britain would seek settlement on sterling claims of Empire members to end "any discrimination arising from the so-called sterling area dollar pool," making receipts freely available "for current transactions anywhere."

4. The British agreed not to use proceeds of U. S. credit to repay other creditors and to remove exchange restrictions on current transactions with the U. S. and all restrictions on imports from the U. S.

5. Both governments agreed to lower tariff rates on a reciprocal basis.

6. Lend-lease accounts and British purchases of U. S. surpluses were settled for \$650,000,000, subject to later readjustments. The British would not use the materials to compete with U. S. exports.

7. The agreement would become effective upon ratification and provision for funds by the U. S. Congress.

WORLD POPULATION INCREASES

In the last 50 years the population increase alone has been about as great as the total population of 545 millions in the world

in 1650. This grew to 903 millions in 1800, to 1,608 millions in 1900 and to 2,171 millions in 1940.

FORESTRY AND CONSERVATION

FOREST PROBLEMS OF THE UNITED STATES

The early years of the nation's history, and to a large extent even recent years have been characterized by a prodigious waste of soils and their products, the forests, and the animal and bird life of the United States. Whatever the reasons for this profligacy in pioneer days, there is no doubt that today it affects the entire national economy.

Common sense calls for a systematic study of our lands, determination of the sort of service for which they are most useful, and the formulation of methods to obtain these services. According to a United States senate report, there are eight fundamental problems in American forestry:

1. **Problem of privately owned forest lands.** Nearly 341,000,000 acres of commercial forest land is in private ownership, 202,000,000 is in industrial holdings, and 134,000,000 is in farm woodlands. More than 98 per cent of the 10,000,000 acres cut over each year is privately owned and "fully 95 per cent of the private cutting is probably made without any conscious regard to the future productivity of the forest." Private forest land is unstable in ownership; much of it is tax delinquent. Because of huge capital investments in standing timber, it is necessary to cut much of it, even when there is no demand, and a cut-out-and-get-out policy has been followed, with attendant waste.

2. **Problem of agricultural land available for forestry.** An estimated 50,000,000 acres of land east of the plains have been abandoned by agriculture and are available for forestry. This trend is continuing, and much of the land is being harmed by erosion, and its timber productivity decreasing.

3. **Problem of unmanaged public lands.** The public domain includes about 200,000,000 acres, of which about 23,000,000 acres are forest land, and about 4,500,000 acres are commercial forest. It receives inadequate fire protection and no timber management. Unrestricted private use of the range has in many instances ruined it. The same conditions prevail in most of the new public domain of states and counties, growing rapidly because of tax reverted forest land.

4. **The problem of balancing the national timber budget.** The total annual drain from the forests of the United States is about 17,000,000,000 cubic feet,

(1943 report) while total annual growth is estimated at only about 11,200,000,000 cubic feet. The ratio of requirements of saw timber to growth is much larger—five times more being needed than is grown. The country still has about 475,000,000,000 cubic feet of timber—56 per cent of it in the west. Almost half of the total is economically unavailable. The deficit must be made up on private land, and private ownership universally tends to reduce the timber supply instead of to build it up.

5. **The problem of watershed protection.** The services which forests render in watershed protection may be even more valuable than their service in producing wood. Absence of forest cover leads to devastating erosion in many locations. It has been estimated that 1,000 years may be necessary to build up one inch of soil—an amount often removed by erosion in one year. Most critical conditions are found in the Mississippi bluff and silt-loam uplands, the piedmont and upper coastal plain of the Atlantic and Gulf drainages, and the central state farmlands of the Mississippi basin. In some instances, 40 per cent of entire counties is being destroyed.

6. **The problem of forest recreation.** The use of forest land for recreation purposes seems only in its infancy. Some forests must be kept entirely from being cut. It is doubtful whether permanent preservation can be insured except in public ownership.

7. **The problem of forest wild life.** The Biological survey estimates the total positive national value of wild life at \$1,000,000,000 annually. In general, wild life has decreased and is continuing to decrease. Food and cover must be restored and protection given. The tendency is to exclude hunters and fishermen from privately owned lands.

8. **The problems of forest ranges.** More than 330,000,000 acres of forest land are being used for grazing—more than half of the total acreage. Most critical problem is on privately owned western forest range. It has been over-grazed, watershed protection has been reduced, and the land has deteriorated greatly. The same situation prevails on about 21,500,000 acres of unmanaged federal public domain and on several million acres of state forest range. Timber growing is impossible with heavy range use.

THE NATIONAL FORESTS

The National forests of the United States, open to the public, include an aggregate area larger than all of New England, New York, Pennsylvania, Ohio and Indiana. Within this vast domain are lakes, rivers, mountain peaks and meadows, cattle and sheep ranges, wilderness areas, glaciers, virgin timber, and young-growing forests.

In addition, there are many national monuments, areas of historic or scientific interest set aside within national forests, and 14 national game refuges situated wholly or in part within national forests. National forest lands are administered with the policy

always in mind of putting the land to its best use.

Fire causes the most damage to national forests, and the Forest Service expects its guests to use the utmost care to prevent fires starting in the woods. Camp fires must not be left unless thoroughly out; cigar and cigarette stubs and matches must be dead before they are thrown away. In some forests smoking is prohibited entirely during the dangerous fire season; in some it is required that every automobile camping party carry a shovel and an ax.

THE TENNESSEE VALLEY IMPROVEMENT

Objectives of the TVA are navigation, flood control, agricultural and industrial development, and national defense. "As incidental to these," declares a brochure from the TVA, "and in order to avoid the waste of public property, it (the TVA act) authorizes a sixth: the development of electrical power and transmission and sale of such part of that power as may not be needed for governmental purposes."

The planning of the entire future of the Tennessee valley is entrusted to TVA. The TVA desires to develop the social and economic life of the valley, though not by imposing a "plan from above." The TVA program is as follows:

Navigation: Navigation of the river could have been improved by a series of low dams, but it was thought this would waste power, and in addition would not provide adequate flood control. Navigation control was put under the federal government with authority to construct a 9-foot channel from the mouth of the Tennessee to Knoxville. Such a channel would require ten large dams. Three of them, the government's dam No. 1 below Muscle Shoals, the Wilson dam at Muscle Shoals, and the privately owned dam at Hale's bar already existed. Regulation of navigation can best be assured by provision for storing water in the wet season and releasing it in the dry season. Hence a series of tributary dams was projected some of which, such as Norris dam, have been completed. An accompanying table shows the progress of the TVA dams.

Flood Control: The requirements of navigation and flood control, according to TVA authorities, "dominated the location and design of dams. Hence there was again no room for dams designed for power only, which were the only kind which private enterprise would be interested in building and operating." It was felt that the federal government alone could operate the dams as coordinated units for river control.

Power: Power is regarded as a valuable by-product of the primary purposes of the development. It was mainly on this basis—that power is a by-product and not an end-product—that the TVA was declared constitutional by the United States Supreme court. After all government uses are considered, a large surplus of power remains.

Industrial Development: Since there is no competitive bidding for TVA power at the dams, the government must build, buy, or acquire the use of transmission lines if it is to sell its power. New low rates already have expanded existing markets and created new ones. It is expected that the valley soon will be able to use all privately and publicly created power. Reduction in rates by the private power companies has increased consumption of electricity from 26 to 57 per cent.

Agricultural Development: Reforestation, proper use of marginal lands, and agricultural development, all have to do with the land and the life of the people on the land. The TVA is experimenting in methods to prevent washing of silt, erosion, and to re-establish forests. Plant No. 2 at Muscle Shoals is able to produce cheap fertilizer, especially phosphates for impoverished lands.

The government is conducting tests and experiments for the future economic development of the area. Extensive recreational facilities in the chain of lakes created back of the dams are being developed. A soil mechanics laboratory has been established. Rainfall studies are being made. Money-saving machinery is being developed for rural electrification. Agricultural clubs are being formed to instruct farmers on soil re-construction and conservation. Phosphate rock is being mined and processed. Agricultural industries are being established. All natural resources are being investigated for their future importance to industry.

STATUS OF ANIMALS IN NATIONAL PARKS

Bison: The Yellowstone park herd of bison in 1935 numbered about 1,128 out of an original nucleus of 40 natives in 1900 and 21 imported in 1902. In addition, 300 had been shipped alive, 682 slaughtered for meat, and 48 outlaws and cripples destroyed. It is planned to reduce the number to about 1,000 because of the declining carrying capacity of the range. The herd now will be allowed to return to the wild state from its present semi-domesticated one. There are small exhibits of bison on Wind Cave, Colorado National monument, and Platt.

Wapiti: Although the elk in the national parks are not in danger of extermination, serious problems are affecting them and other animals as well. The range is restricted and becoming badly overgrazed, especially in northern Yellowstone.

Moose: Moose do not have the herding habit and there are an estimated 700 Shiras moose in Yellowstone alone. They mostly are found in the inaccessible portions of the parks, except at Willow park.

Caribou: There are an estimated 15,000 caribou in Mount McKinley, Alaska park, where they take part in the great annual run in central Alaska, and are threatened as a pure stock by the reindeer. A few have been observed in Glacier park, and the Isle Royale herd has disappeared.

Deer: White-tailed deer, and usually mule deer are familiar throughout the western parks, and the former throughout the eastern United States.

Bighorn: The number of bighorn sheep in the parks, and throughout the western United States has been decreasing. The 1933 census estimated 3,500 bighorn in Mount McKinley, compared with 15,000 in 1929. It is believed that they pass through cycles of abundance, but this does not explain the entire decrease. Rocky Mountain bighorn are found in Glacier, Yellowstone, Grand Teton, and Rocky Mountain National parks, but in Glacier are victims of poaching. They are handicapped by domestic sheep on their ranges.

Pronghorn: The American pronghorn is rather poorly represented in the parks be-

cause of lack of range. An attempt is begun made to start a herd in Petrified Forest National monument.

Mountain Goat: The status of mountain goats is regarded as "satisfactory from every standpoint." There are more than 800 in Glacier park, and they do not leave the park at any season. In addition to this favorable factor, their chosen terrain is so rugged that civilization does not affect them. They are increasing.

Bear: The only park problem with black bears is to establish a mutually satisfactory relationship between them and humans. Grizzlies, however, are entirely gone from the parks of the Pacific coast and southwest regions, but are found in Glacier and Yellowstone. They are expected to survive indefinitely there. They are increasing in Mount McKinley, and so are brown bears, largest living carnivores.

Cougar: Cougars have almost disappeared, though in recent years they have been given almost complete protection within the parks. They range widely and are persecuted outside the parks. Their absence is responsible for many game problems.

Wolf: It is believed there are no wolves in the national parks outside of Alaska.

Coyote: Coyotes are present in all western parks and recently have become established in Mount McKinley. They are becoming more abundant in places where wolves have been exterminated. They are controlled only when endangering the survival of some other species.

Fisher and Wolverine: These two animals are approaching extinction in the national parks. Mount Rainier still has a few chosen wolverines, and Yosemite and Sequoia a small number of the southern wolverine. Fisher are believed to exist in Glacier, Yellowstone, Mount Olympus, Mount Rainier, and Yosemite.

Beaver: These rodents have increased, especially in Rocky Mountain and Yellowstone parks. Gray squirrels have been increasing in Yosemite and Sequoia. Kaibab and Abert squirrels at Grand Canyon are numerous.

POISONOUS SNAKES OF THE UNITED STATES

Of about 205 species and varieties of snakes in the United States and Lower California, less than 15 per cent can be considered dangerous to man. The actual quantity of venom injected into a victim depends upon the size of the snake, the length of time its supply has been accumulating, the depth of the fang thrust, and the location of the bite. In most cases, human beings recover without any treatment, because the quantity of venom injected is not a fatal dose.

With modern methods of treatment, fatalities have been reduced to less than 4 per cent. Of 150 cases reported in one year in Texas, however, antivenin was given in 83 cases, with 78 recoveries and five deaths, or a death rate of 6 per cent, which would have been lower if the antivenin had been administered sooner. Of the remaining 67 cases in which no anti-venin was injected, 23 died—a death rate of 34.3 per cent.

In the northeastern states, the mortality rate in the absence of special treatment is

estimated at 10 to 18 per cent—an increase for which the copperhead is blamed. In Georgia, Florida, and Alabama, the average death rate in some years is 18 to 25 per cent, and in Texas, New Mexico, and Arizona even higher.

Most dangerous poisonous snakes in the United States are:

Coral, or harlequin snakes. Smooth-scaled, brilliant colors; markings are of broad alternating rings of crimson and black, separated from each other by narrower yellow rings; black bands as broad as the crimson; a pair of short, erect longitudinally grooved fangs in front of the upper jaw; head as wide as the neck. Two species, one common to Gulf states northward to North Carolina and in the Mississippi valley to Indiana and Ohio. The other is in the southwest, and called the Sonoran coral snake.

Pit Vipers. Keel-scaled snakes, characterized by duller colors; markings not forming regular alternating bands, but consisting of

blotches, diamonds, or incomplete bands; a pair of long, hollow, freely movable fangs that fold back against the roof of the mouth when jaws are closed; deep pit on face between nostril and eye; scales on upper parts keeled; pupils elliptical in shape, vertical in position; head wider than neck. In one form, the tail is without a rattle, ending in a point, with the top of the head covered with shields. Rattlesnakes, copperheads, and moccasins are pit vipers.

Copperhead, highland moccasin, chuck-head, poplar leaf, or deaf adder. Color pattern distinct; ground color pale brown (in Texas grading into pale green), with large dorsal blotches of darker chestnut brown (usually in the form of a butterfly with outspread wings). Range: Massachusetts to northern Florida, westward to Illinois, Kansas, Texas.

Cotton-mouth water moccasin. Color pattern obscure, ground color light to dark

brown; cross bands darker, often indistinct and bordered with yellow spots; some of ventral scales on tail undivided. Found in lowlands from southeastern Virginia to Florida and the Gulf states northward through the Mississippi valley to southern Illinois.

Rattlesnakes. There are no true vipers on the American continents. Rattlesnakes, which are pit vipers, are the most specialized of all venomous snakes, and have proved extraordinarily adaptable to all parts of the United States. The grayish ground rattler or pygmy rattlesnake, found in the central and east-central part of the country, and the brownish massauga, found from central New York westward and southward, are seldom fatal to adults, except possibly through septic complications. Of 20 cases on record, none ended fatally, but of 408 persons bitten by larger rattlesnakes (*Crotalus*, with many small scales on top of head), 48 died.

ECONOMIC VALUE OF SNAKES

Many common snakes are largely beneficial and should be protected. They are not poisonous, and though they may attempt to bite, their bite is usually no more than a scratch and is nonvenomous. Snakes devour large numbers of insects and mice, many of which are injurious to garden crops and stored foodstuffs.

Among these are the garter or ribbon snake, blacksnake, pine snake, house snake or checkered adder, kingsnake, red-bellied snake, green snake, ring-necked snake, bull snake, or gopher snake, ball snake, water snake, moon or queen snake, coach whip snake, and spreading adder.

Snakes, like other animals, will satisfy their hunger with whatever food is available. Whenever snakes are present in what appear to be abnormally large numbers, there must be an abundance of living animal food in the vicinity to attract them. Most nonvenomous snakes should be given as much consideration as any other animal, according to the United States Biological survey, but poisonous snakes have no place in a settled country, no matter how beneficial their food habits.

LARGEST SNAKES

Largest snakes in the world are the reticulated pythons of the Philippine Islands, measuring 30 feet in length and 15 inches in diameter. The largest of this species ever found was 42 feet long. Although such huge snakes can crush most of the large animals by wrapping themselves about their victim, they can swallow nothing larger than a small pig.

AGE OF RATTLESNAKE

The age of a rattlesnake is not computed by the number of his rattles. A rattler grows anywhere from two to three or four buttons on his tail in the course of a year, depending upon climate, food, and other factors. Every time the snake sheds its skin a new button is added. By the time a dozen buttons have been produced, the oldest ones begin to break off. Now and then rattlers have been found with as many as 22 or 23 buttons on their tails, but this is very unusual. As a rule the maximum is 12 to 14.

PLAINS SHELTERBELT PROJECT

To provide windbreaks, snow traps, and shade in a region where these are entirely lacking, the federal government has undertaken to establish and develop a series of shelterbelts and other tree plantings in a protection forest zone—1,000 miles long and about 100 miles wide. This vast planting will stretch from the Canadian boundary of North Dakota generally south to the Texas Panhandle. Its western boundary in general will coincide with the westernmost limits of reasonably likely forest growth.

A shelterbelt is a dense plantation of trees in a strip about 100 to 150 feet wide, situated to provide protection from wind. In general, the shelterbelts of the forest protection zone are being planted at intervals of one mile, and consist usually of 10 to 20 rows of trees. There will be frequent breaks in the strips, with variations in form, direction, and arrangement to meet the changing topography, soil, direction of prevailing winds and other local conditions.

The kinds of trees to be planted for the

most part are those locally native which have become adjusted to local conditions. Government nurseries have been established and will be developed to a capacity of about 200,000,000 trees per year. The government requires that it own or control the land on which trees are planted, to guarantee permanency of protection. In addition, the government does not wish to subsidize certain favored individuals owning the land.

The United States Forest service believes that trees will temper the effects of future droughts by preventing quick drying and consequent blowing away of the soils, and in the same way protect growing crops from excessive drying, slightly modifying extremes of temperature in the same way that green fields cool the air.

The Plains Shelterbelt project is expected to be only a beginning for more extensive tree-planting in the Plains region. It is also expected to stimulate private planting. Since 1935, a total of some 200 million trees have been planted.

EXTINCT NORTH AMERICAN ANIMALS AND BIRDS

(Source: U. S. Biological survey)

Birds

Passenger pigeon.
Great auk
Labrador duck
Carolina parakeet
Heath hen
Guadalupe caracara
Guadalupe towhee (probably)
Guadalupe rock wren (probably)

Animals

Maine giant mink
California grizzly bear
Tejon grizzly bear
Texas grizzly bear
Plains grizzly bear
Gull Island meadow mouse
Amargosa meadow mouse
Pacific white-tailed deer
Merriam elk
Badlands mountain sheep
Texas mountain sheep

Dusky kinglet
Laysan teal
Laysan finch
Florida Seaside sparrow

Animals

Cuban almiqui
White Mts., California dwarf shrew (probably already extinct)
Spotted bat
Glacier bear
Arizona grizzly bear
Fisher
Black-footed ferret
Wolverine
Sea otter
Desert fox
Kit fox
Plains or buffalo wolf
Guadalupe fur seal
Monk seal
Hooded seal
Pacific walrus
Atlantic walrus
Eastern fox squirrel
Peninsula fox squirrel
San Joaquin kangaroo rat
Beach meadow mouse
Block Island meadow mouse
Key deer
Buttonwillow elk
Nelson mountain sheep
Sierra mountain sheep
Florida manatee
Gray whale
Atlantic right whale
Greenland right whale
Practically all grizzlies in U. S. except in Yellowstone Park.

THREATENED WITH EXTINCTION

Birds

Whooping crane
Great white heron
Eskimo curlew
Attwater prairie chicken
Masked bobwhite (probably now extinct in U. S.)
California vulture
Peregrine falcon (duck hawk)
Red-bellied hawk
Everglade kite
Ivory-billed woodpecker
Ipswich sparrow
Bachman warbler

Practically all grizzlies in U. S. except in Yellowstone Park.

THE WORLD'S FIGHTINGEST ANIMALS

Name	Where Found	Maximum Size	Qualifications
Killer Whale.... (Orca)	Most oceans.....	30 feet long	Fearless, strong jaws, hunt in packs.
White Shark....	Most oceans.....	40 feet long	Powerful jaws, fast swimmers.
Elephants.....	Africa, Asia.....	20,000 lbs.	Crushing feet, great weight, tusks, trunk, cleverness.
Hippopotamus...	Africa.....	8,500 lbs.	Huge jaws and teeth, thick hide, relative great quickness, amphibious.
Rhinoceros.....	Africa, Asia.....	6,500 lbs.	Strong neck and horns, thick skin, ferocious disposition.
Buffalo.....	Africa.....	4,500 lbs.	Ferocious disposition, strong neck, heavy horns and head, cleverness, sharp hoofs.
Bull.....	Civilized world....	4,000 lbs.	Sharp horns, hoofs, occasional ferocity.
Brown Bear....	Northern tundra..	1,500 lbs.	Strong jaws, great weight, powerful fore-paws.
Crocodile.....	Africa, Asia.....	500 lbs.	Slashing jaws, powerful armored tail, quickness.
African Lion....	Africa.....	500 lbs.	Powerful claws, jaws, great agility.
Tiger.....	Asia.....	400 lbs.	Powerful claws, jaws, great agility.
Jaguar.....	South America....	400 lbs.	Powerful claws, jaws, speed.
Gorilla.....	West Africa.....	400 lbs.	Strong arms, jaws, intelligence.
Orang-utang....	Southeastern Asia, East Indies	400 lbs.	Strong arms, jaws, intelligence.
Python.....	Equatorial regions	400 lbs.	Powerful muscles.
Leopard.....	Africa, Asia.....	300 lbs.	Sharp claws, strong jaws, tremendous agility, ferociousness.
Hyena.....	Africa, S. E. Asia	200 lbs.	Tremendously strong jaws, hunts in packs.

AMERICAN HISTORY

NATIONAL ANTHEM OF THE UNITED STATES

Source: Dictionary of American History

Composed by Francis Scott Key (1780-1843), recognized by the United States army and navy and applauded as a favorite tune of America. "The Star Spangled Banner" did not receive official designation as the national anthem until Congress, in March, 1931, pronounced it as "the national anthem of the United States of America."

To the tune of "Anacreon in Heaven," the words were composed by Key, a lawyer of Maryland and later district attorney of the District of Columbia, while he was detained on a British ship during the British bombardment of Fort McHenry, the defense of Baltimore, in 1814. After a night spent listening to and watching the fight from the British side and seeing in the morning that "the flag was still there," he wrote the words.

The army and navy prescribed certain regulations for the song to be used on all formal occasions in which the army and navy participated.

Orders from the office of the adjutant general of the army provided that "the musical composition familiarly known as 'The Star Spangled Banner' be designated as the national air of the United States of America, but that these regulations are binding only upon the personnel of the military and naval services."

Whenever the national anthem is played at any place where persons belonging to the military or naval services are present all officers and enlisted men not in formation are required to stand at attention, facing toward the music, except when the flag is being lowered at sunset, on which occasion they are required to face toward the flag. If in uniform, covered, they shall salute at the first note of the anthem, retaining the position of salute until the last note of the anthem. If not in uniform and covered, they are required to stand and uncover at the first note of the anthem, holding the headdress opposite the left shoulder until the last note is played, except in inclement weather, when the headdress may be held slightly raised. The custom of rising and remaining standing and uncovered while "The Star Spangled Banner" is being played has grown in favor among civilians.

"The Star Spangled Banner" should be played through without repetition of any part not required to be repeated to make it complete. It should not be played as part of a medley nor for dance music, nor at any point in a program or performance except at the beginning or the end. It is the practice in the army to play "The Star Spangled Banner" at the end of a musical program.

THE UNITED STATES FLAG

Prior to the Continental Congress' act of June 14, 1777, designating "That the flag of the United States be 13 stripes, alternate red and white; that the union be 13 stars, white in blue field, representing a new constellation" there had been many different flags in use in the colonial states. Among those were the flag used by General Washington on ships of the Continental navy, and the one known as the Grand Union flag. The latter flag consisted of 13 stripes alternately red and white, typifying the 13 colonies with a union in the corner bearing the crosses of St. George and St. Andrew combined and signifying the Mother Country.

This flag was carried until the Stars and Stripes was announced by Congress; it remained the national emblem until after the admission of Vermont and Kentucky into the union. Approved by President Washington Jan. 13, 1794, the second flag act was:

"Be it enacted by the senate and house of representatives of the United States in Congress assembled, that from and after the first day of May, 1795, the flag of the United States be 15 stripes, alternate red and white; that the union be 13 stars, white in a blue field."

After other states had been admitted to the union, further modification of the flag was needed and April 4, 1818, a third flag act was passed providing for the addition of a star for each new state added to the union and limiting the horizontal stripes to 13 alternate red and white and that the union be white on a blue field.

Historians disagree on the origin of the design of the stars and stripes. The story that Betsy Ross of Philadelphia made the first flag, does not seem to have historical basis. During the Sesquicentennial celebration of the Constitution in 1937 the Betsy Ross house in Philadelphia was reopened to the public after a restoration of the house to the days of 1776 when "Betsy Ross sewed busily in a back room, joining stripes of red and white silk and a circle of stars on a blue field, carrying out General Washington's instructions for making a new American flag." Many writers, however, believe that the design was suggested by the coat of arms of the Washington family.

The white in the flag signifies purity and innocence; the red, hardiness and valour; the blue, vigilance, perseverance and justice, according to the department of state.

Description

The flag of the United States has thirteen horizontal stripes—seven red and six white—the red and white stripes alternating, and a union, which consists of white stars of five points on a blue field placed in the upper quarter next the staff and extending to the lower edge of the fourth red stripe from the top. The number of stars is the same as the number of states in the union. The canton

or union now contains forty-eight stars, arranged in six horizontal and eight vertical rows, each star with one point upward. On the admission of a state into the union a star will be added to the union of the flag, and such addition will take effect on the 4th day of July next succeeding such admission.

In the army regulations four kinds of national flags are described: viz., flags which

are flown at military posts or on ships and are used for display generally; small flags or ensigns which are used on small boats; colors which are carried by unmounted regiments and standards which are carried by mounted regiments and are therefore smaller in size than colors.

National flags, with the exception of the colors and standards carried by troops, will be of the following proportions:

- Hoist (width) of flag, 1.
- Fly (length), 1.9.
- Hoist (width) of union, 7/13.
- Fly (length) of union, 0.76.
- Width of each stripe, 1/13.

For a number of years there has been prescribed in army regulations a knotted fringe

of yellow silk on the national standards of mounted regiments and on the national colors on unmounted regiments. The war department, however, knows of no law which either requires or prohibits the placing of a fringe on the flag of the United States. No act of congress or executive order has been found bearing on the question. In flag manufacture a fringe is not considered to be a part of the flag and it is without heraldic significance. In the common use of the word it is a fringe and not a border. Ancient custom sanctions the use of fringe on the regimental colors and standards, but there seems to be no good reason or precedent for its use on other flags.

PROPER WAY TO DISPLAY FLAG

The United States Senate and House of Representatives passed a joint resolution which became public law No. 829 on December 22, 1942, setting forth certain customs and rules regarding the proper use and display of the flag of the United States of America.

These rules are intended to guide civilians and groups of civilians and organizations which are not required to conform with regulations made by an executive department of the Government of the United States. Public Law 829—77th Congress Chapter 806—2d Session H. J. Res. 359 Joint Resolution

To amend Public Law Numbered 623, approved June 22, 1942, entitled "Joint resolution to codify and emphasize existing rules and customs pertaining to the display and use of the flag of the United States of America."

Resolved by the Senate and House of Representatives of the United States of America in Congress Assembled, That Public Law Numbered 623, approved June 22, 1942, entitled "Joint resolution to codify and emphasize existing rules and customs pertaining to the display and use of the flag of the United States of America," be, and the same is hereby amended to read as follows:

That the following codification of existing rules and customs pertaining to the display and use of the flag of the United States of America be, and it is hereby, established for the use of such civilians or civilian groups or organizations as may not be required to conform with regulations promulgated by one or more executive departments of the Government of the United States.

Section 2. (a) It is the universal custom to display the flag only from sunrise to sunset on buildings and on stationary flagstaves in the open. However, the flag may be displayed at night upon special occasions when it is desired to produce a patriotic effect.

(b) The flag should be hoisted briskly and lowered ceremoniously.

(c) The flag should not be displayed on days when the weather is inclement.

(d) The flag should be displayed on all days when the weather permits, especially on New Year's Day, January 1; Inauguration Day, January 20; Lincoln's Birthday, February 12; Washington's Birthday, February 22; Army Day, April 6; Easter Sunday (variable); Mother's Day, second Sunday in May; Memorial Day (half staff until noon), May 30; Flag Day, June 14; Independence Day, July 4; Labor Day, first Monday in September; Constitution Day, September 17; Columbus Day, October 12; Navy Day,

October 27; Armistice Day, November 11; Thanksgiving Day, fourth Thursday in November; Christmas Day, December 25; such other days as may be proclaimed by the President of the United States; the birthdays of States (dates of admission); and on State holidays.

(e) The flag should be displayed daily, weather permitting, on or near the main administration building of every public institution.

(f) The flag should be displayed in or near every polling place on election days.

(g) The flag should be displayed during school days in or near every schoolhouse.

Section 3. That the flag, when carried in a procession with another flag or flags, should be either on the marching right; that is, the flag's own right, or, if there is a line of other flags, in front of the center of that line.

(a) The flag should not be displayed on a float in a parade except from a staff, or as provided in subsection (i).

(b) The flag should not be draped over the hood, top, sides or back of a vehicle or of a railroad train or a boat. When the flag is displayed on a motorcar, the staff shall be fixed firmly to the chassis or clamped to the radiator cap.

(c) No other flag or pennant should be placed above, or if on the same level, to the right of the flag of the United States of America, except during church services conducted by naval chaplains at sea, when the church pennant may be flown above the flag during church services for the personnel of the Navy.

(d) The flag of the United States of America, when it is displayed with another flag against a wall from crossed staffs, should be on the right, the flag's own right, and its staff should be in front of the staff of the other flag.

(e) The flag of the United States of America should be the center and at the highest point of the group when a number of flags of States or localities or pennants of societies are grouped and displayed from staffs.

(f) When flags of States, cities, or localities, or pennants of societies are flown on the same halyard with the flag of the United States, the latter should always be at the peak. When the flags are flown from adjacent staffs, the flag of the United States should be hoisted first and lowered last. No such flag or pennant may be placed above the flag of the United States or to the right of the flag of the United States.

(g) When flags of two or more nations are displayed, they are to be flown from separate staffs of the same height. The flags should be of approximately equal size. International

usage forbids the display of the flag of one nation above that of another nation in time of peace.

(h) When the flag of the United States is displayed from a staff projecting horizontally or at an angle from the window sill, balcony, or front of a building, the union of the flag should be placed at the peak of the staff unless the flag is at half staff. When the flag is suspended over the sidewalk from a rope extending from a house to a pole at the edge of the sidewalk, the flag should be hoisted out, union first, from the building.

(i) When the flag is displayed over the middle of the street, it should be suspended vertically with the union to the north in an east and west street or to the east in a north and south street.

(k) When used on a speaker's platform, the flag, if displayed flat, should be displayed above and behind the speaker. When displayed from a staff in a church or public auditorium, if it is displayed in the chancel of a church, or on the speaker's platform in a public auditorium, the flag should occupy the position of honor and be placed at the clergyman's or speaker's right as he faces the congregation or audience. Any other flag so displayed in the chancel or on the platform should be placed at the clergyman's or speaker's left as he faces the congregation or audience. But when the flag is displayed from a staff in a church or public auditorium elsewhere than in the chancel or on the platform it shall be placed in the position of honor at the right of the congregation or audience as they face the chancel or platform. Any other flag so displayed should be placed on the left of the congregation or audience as they face the chancel or platform.

(l) The flag should form a distinctive feature of the ceremony of unveiling a statue or monument, but it should never be used as the covering for the statue or monument.

(m) The flag, when flown at half staff, should be first hoisted to the peak for an instant and then lowered to the half-staff position. The flag should be again raised to the peak before it is lowered for the day. By "half staff" is meant lowering the flag to one-half the distance between the top and bottom of the staff. Crepe streamers may be affixed to spearheads or flagstaves in a parade only by order of the President of the United States.

(n) When the flag is used to cover a casket, it should be so placed that the union is at the head and over the left shoulder. The flag should not be lowered into the grave or allowed to touch the ground.

Section 4. That no disrespect should be shown to the flag of the United States of America; the flag should not be dipped to any person or thing. Regimental colors, State flags, and organization or institutional flags are to be dipped as a mark of honor.

(a) The flag should never be displayed with the union down save as a signal of dire distress.

(b) The flag should never touch anything beneath it such as the ground, the floor, water or merchandise.

(c) The flag should never be carried flat or horizontally, but always aloft and free.

(d) The flag should never be used as drapery of any sort whatsoever, never festooned, drawn back, nor up, in folds, but always allowed to fall free. Bunting of blue,

white and red, always arranged with the blue above, the white in the middle and the red below, should be used for covering a speaker's desk, draping the front of a platform, and for decoration in general.

(e) The flag should never be fastened, displayed, used or stored in such a manner as will permit it to be easily torn, soiled, or damaged in any way.

(f) The flag should never be used as a covering for a ceiling.

(g) The flag should never have placed upon it, nor on any part of it, nor attached to it any mark, insignia, letter, word, figure, design, picture, or drawing of any nature.

(h) The flag should never be used as a receptacle for receiving, holding, carrying, or delivering anything.

(i) The flag should never be used for advertising purposes in any manner whatsoever. It should not be embroidered on such articles as cushions or handkerchiefs and the like, printed or otherwise impressed on paper napkins or boxes or anything that is designed for temporary use and discard; or used as any portion of a costume or athletic uniform. Advertising signs should not be fastened to a staff or halyard from which the flag is flown.

(j) The flag, when it is in such condition that it is no longer a fitting emblem for display, should be destroyed in a dignified way, preferably by burning.

Section 5. That during the ceremony of hoisting or lowering the flag or when the flag is passing in a parade or in a review, all persons present should face the flag, stand at attention, and salute. When not in uniform, men should remove the headdress with the right hand holding it at the left shoulder, the hand being over the heart. Men without hats should salute in the same manner. Aliens should stand at attention. Women should salute by placing the right hand over the heart. The salute to the flag in the moving column should be rendered at the moment the flag passes.

Section 6. That when the national anthem is played and the flag is not displayed, all present should stand and face toward the music. Those in uniform should salute at the first note of the anthem, retaining this position until the last note. All others should stand at attention, men removing the headdress. When the flag is displayed, all present should face the flag and salute.

Section 7. That the pledge of allegiance to the flag, "I pledge allegiance to the flag of the United States of America and to the Republic for which it stands, one Nation indivisible, with liberty and justice for all," be rendered by standing with the right hand over the heart. However, civilians will always show full respect to the flag when the pledge is given by merely standing at attention, men removing the headdress. Persons in uniform shall render the military salute.

Section 8. Any rule or custom pertaining to the display of the flag of the United States of America, set forth herein, may be altered, modified, or repealed, or additional rules with respect thereto may be prescribed, by the Commander in Chief of the Army and Navy of the United States, whenever he deems it to be appropriate or desirable; and any such alteration or additional rule shall be set forth in a proclamation. Approved, December 22, 1942.

THE GREAT SEAL OF THE UNITED STATES

The present great seal of the United States is the fourth that has been designed and approved by Congress. The seal, in the custody of the secretary of state who, however, does not have authority to affix it to any paper that does not bear the presidential signature, is affixed to all communications of the president to heads of foreign governments, treaties and formal agreements of the president with foreign powers, etc., and to all miscellaneous commissions of civil officers whose business is not specifically done under some other seal.

The first committee to design a seal for the United States was named the afternoon of the signing of the Declaration of Independence and consisted of Benjamin Franklin, Thomas Jefferson and John Adams. The report of the committee was tabled, however, and it was not until June 20, 1782, that the design made by Charles Thomson, secretary of Congress, and William Barton, of Philadelphia, was adopted. The great seal was ratified again after the adoption of the Constitution in 1789.

The second seal was made in 1841 by Edward Stabler of Sandy Springs, Md., who

changed the number of arrows in the talon of the eagle and made other changes, which were among the reasons why Congress appropriated another sum of money for a new design in 1884. The present seal of the United States was approved in 1903.

The reverse of the great seal has been used twice on money, once in 1882 when a centennial medal was issued by the United States mint to celebrate the 100th anniversary of the adoption of the seal. The second time was in 1935 when a series of silver \$1 certificates was issued, on the back of which was a representation of both the obverse and the reverse of the seal.

The obverse of the great seal is the American eagle with a shield, grasping an olive branch in one talon and arrows in the other, surmounted by 13 stars and the Latin motto "E pluribus unum." The reverse of the seal shows an unfinished pyramid, surmounted by an eye in a triangular glory. The pyramid bears in roman numerals the year of the Declaration of Independence, 1776. Above the eye is the Latin motto, "Annuit coeptis." The motto at the bottom is "Novus ordo seclorum."

THE AMERICAN CREED

The American creed was written by William Tyler Page, then clerk of the house of representatives (1917), in a contest sponsored by the city of Baltimore, the birthplace of "The Star Spangled Banner." The contest was to obtain "the best summary of the political faith of America."

The following words to the creed were accepted by Congress April 13, 1918:

"I believe in the United States of America as a government of the people, by the people, for the people; whose just powers are derived from the consent of the governed; a democ-

racy in a republic; a sovereign nation of many sovereign states; a perfect union, one and inseparable; established upon those principles of freedom, equality, justice, and humanity for which American patriots sacrificed their lives and fortunes.

"I therefore believe it is my duty to my country to love it; to support its Constitution; to obey its laws; to respect its flag; and to defend it against all enemies.

*Authorized version.

THE SHIELD OF THE UNITED STATES

The shield of the United States of America has thirteen vertical stripes — seven

white and six red — with a blue chief with-out stars.

WEDDINGS IN THE WHITE HOUSE

- 1811—Thomas Todd, associate justice of the United States, and Lucy Payne Washington, widow of the nephew of George Washington, and sister of Mrs. James Madison.
- 1812—John J. Jackson, member of Congress and a great-uncle of Gen. "Stonewall" Jackson, and Anna Todd, a cousin of Mrs. James Madison.
- 1820—Samuel L. Gouverneur and Marie Hester Monroe, daughter of President James Monroe.
- 1828—John Adams, son of President John Quincy Adams, and Marie Helen Jackson, niece of Mrs. John Quincy Adams.
- 1829—Alphonse Joseph Pageot, member of the French legation, and Miss Della Lewis, daughter of a member of President Jackson's "kitchen cabinet."
- 1831—Lewis Donaldson, grandson of Thomas Jefferson, and Emily Martin, niece of President Andrew Jackson.
- 1835—Lucien B. Polk, relative of James K. Polk, and Mary Easton, niece of President Andrew Jackson.

- 1842—William Waller and Elizabeth Tyler, daughter of President John Tyler.
- 1874—Algernon C. F. Sartoris, officer of the British legation, and Nellie Grant, daughter of President U. S. Grant.
- 1878—Russell Hastings, United States army officer, and Emily Platt, niece of President Rutherford B. Hayes.
- 1886—President Grover Cleveland and Miss Frances Folsom.
- 1906—Congressman Nicholas Longworth and Alice Roosevelt, daughter of President Theodore Roosevelt.
- 1913—Francis B. Sayre and Jessie Woodrow Wilson, daughter of President Woodrow Wilson.
- 1914—William G. McAdoo, secretary of the treasury, and Eleanor Wilson, daughter of President Woodrow Wilson.
- 1942—Harry L. Hopkins, presidential adviser, and Mrs. Louise Macy.

MINORITY PRESIDENTS

Nine times have American presidents been elected with popular votes totaling less than 50 per cent of the entire number of votes cast. In only two cases, however, has the candidate receiving the largest popular vote failed to win a majority in the electoral college. Those two were Samuel J. Tilden in 1876 and Grover Cleveland in 1888. The "minority" presidents were: James A. Buchanan, Abraham Lincoln, Rutherford B. Hayes, James A. Garfield, Grover Cleveland (twice), Benjamin Harrison, Woodrow Wilson (twice).

The following table shows the percentages of the electoral and popular votes received by the winners of the past 23 presidential elections:

		Electoral Vote	Popular Vote
		Pct.	Pct.
1856	Buchanan (D).....	58.7	45.3
1860	Lincoln (R).....	59.4	39.9
1864	Lincoln (R).....	90.9	55.0
1868	Grant (R).....	72.8	52.6

		Electoral Vote	Popular Vote
		Pct.	Pct.
1872	Grant (R).....	81.9	55.6
1876	Hayes (R).....	50.1	47.9
1880	Garfield (R).....	57.9	48.3
1884	Cleveland.....	54.6	48.8
1888	Harrison (R).....	58.1	47.8
1892	Cleveland (D).....	62.4	46.0
1896	McKinley (R).....	60.6	50.8
1900	McKinley (R).....	65.3	51.6
1904	Roosevelt (R).....	71.2	56.4
1908	Taft (R).....	66.5	51.5
1912	Wilson (D).....	81.9	41.8
1916	Wilson (D).....	52.1	49.2
1916	Wilson (D).....	52.1	49.2
1920	Harding (R).....	76.0	61.0
1924	Coolidge (R).....	71.9	54.2
1928	Hoover (R).....	83.6	58.9
1932	Roosevelt (D).....	88.8	57.3
1936	Roosevelt (D).....	98.4	60.7
1940	Roosevelt (D).....	84.7	54.7
1944	Roosevelt (D).....	81.3	53.3

PRESIDENTIAL VETOES

Every bill which passes both the house of representatives and senate is presented to the president for his signature. If he approves the bill and signs, it becomes law; if he doesn't approve, he returns it to the house in which it originated together with his objections. It then must be reconsidered in the light of the objections by the two houses. If a two-thirds majority of each house approves the bill for passage, it becomes a law over the executive veto.

A president may, for various reasons, prefer to give a bill a "pocket veto," rather than openly refuse to sign. The bill thereby becomes law and the president has not had to make public his objections to the bill. If any bill is not returned to Congress within ten days (Sundays not included) by the president, it becomes law, although constituting a pocket veto by the president. Congress, by adjourning, may prevent the bill's return.

Presidents	Regular	Pocket Vetoes	Total
Washington.....	2	..	2
Madison.....	5	1	6
Monroe.....	1	..	1
Jackson.....	7	6	13
Tyler.....	8	2	10
Polk.....	2	1	3

Presidents	Regular	Pocket Vetoes	Total
Pierce.....	9	1	10
Buchanan.....	5	3	8
Lincoln.....	1	..	1
Johnson.....	21	..	21
Grant.....	42	..	42
Hayes.....	12	..	12
Arthur.....	4	..	4

Total.....	1009	568	1,577
Grand Total.....			1,577

Presidents whose names do not appear on the list did not veto any bills passed by Congress.

ORIGIN OF THE DOLLAR SIGN

The American dollar sign is not an abbreviation of "Uncle Sam" or "United States," rather it is a modification of the Mexican sign **ps** for pesos, according to Dr. James Alton James, dean emeritus of the Northwestern university graduate school. Dr James based his conclusions on a study of Oliver Pollock and on a suggestion from Prof. Florian Cajori of the University of California, and incorporated it in his *The Life of Oliver Pollock, An Unknown Patriot*.

Communications and letters from Oliver Pollock to George Rogers Clark and Robert Morris and the financial committee of the Revolutionary war trace the development of the dollar sign.

The sign **ps** supplanted the abbreviations for pounds, shillings and pence and later the modifications of "dolls," or "Drs.," or dollars.

Oct. 10, 1775, Oliver Pollock wrote the abbreviation **ps** as **p** with the **s** beside it; April 1, 1778, another communication shows the **p** made almost with a single stroke.

QUALIFICATIONS OF PRESIDENT OF THE UNITED STATES

"No person except a natural born citizen, or a citizen of the United States at the time of the adoption of the Constitution, shall be eligible to the office of president, neither shall any person be eligible to that office

who shall not have attained the age of thirty-five years, and been fourteen years a resident within the United States."—Constitution of the United States.

Famous Documents and Speeches

THE DECLARATION OF INDEPENDENCE

Although war had been going on for almost a year before the Declaration of Independence was adopted by the Second Continental Congress, July 4, 1776, the colonists still considered themselves as defending their rights as British citizens.

Thomas Paine, in his *Common Sense*, questioned the inconsistency of the colonists' recognizing George III as their sovereign while at the same time fighting his troops and Congress had passed resolutions recommending independent governments for the colonies. But the colonists hesitated to say the final word disavowing allegiance to the king.

However, June 7, 1776, Richard Henry Lee moved that "These united colonies are, and of right ought to be, free and independent states; that they are absolved from all allegiance to the British Crown, and that all political connection between them and the state of Great Britain is, and ought to be, totally dissolved."

John Adams seconded Lee's motion and June 10 two committees were appointed to draw up a declaration and a plan of confederation. On the declaration committee were Thomas Jefferson, Benjamin Franklin, Roger Sherman and Robert R. Livingston, but it was Thomas Jefferson who wrote the famous document.¹ July 2, 1776, Lee's resolutions were accepted by 12 of the 13 colonies,² and July 4, 1776, the Declaration of Independence was accepted by Congress.

John Hancock, the presiding officer, put his signature on the document July 4 and, after the document was engrossed on parchment as had been voted, it was signed by 53 of the members present Aug. 2.

Copies were sent to the various assemblies and commanding officers of the continental army. The original document first was deposited in the department of state and now is in the Library of Congress.

Jefferson was a plagiarist if five resolutions written from memory in 1800 by John M. Alexander, recording secretary, actually were adopted May 20, 1775, by citizens of Charlotte, Mecklenburg county, North Carolina. The so-called Mecklenburg Declaration was first published April 30, 1819, in the *Raleigh Register* and in 1830 Jefferson issued a trenchant denial of its authenticity. No original ever was found. It was said to have been sent to England by Gov. Josiah Martin. President Polk ordered Ambassador Bancroft to search for it because he believed an ancestor to have been a signer; the quest was futile. An issue of a newspaper, *Cape Fear Mercury*, containing copies of the resolutions, has been proved spurious: Upon the great seal of the state of North Carolina today is emblazoned the date of the Mecklenburg Declaration and by legislative action May 20 is a state holiday.

²Delegates from New York did not vote because they had not had instructions. When they received permission five days later to join the other colonies, they voted, making it a unanimous decision for independence.

THE UNANIMOUS DECLARATION OF THE 13 UNITED STATES OF AMERICA

When in the Course of human events, it becomes necessary for one people to dissolve

the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed. That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security. Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.

He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operation till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public Records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the Legislative powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the meantime exposed to all the dangers

of invasion from without, and convulsions within.

He has endeavored to prevent the population of these States; for that purpose of obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their migrations hither, and raising the conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary Powers.

He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of New Offices, and sent hither swarms of Officers to harrass our people, and eat out their substance.

He has kept among us, in times of peace, Standing Armies without the consent of our legislature.

He has affected to render the Military independent of and superior to the Civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitution, and unacknowledged by our laws; giving his Assent to their Acts of pretended Legislation:

For quartering large bodies of armed troops among us:

For protecting them, by a mock Trial, from punishment for any Murders which they should commit on the Inhabitants of these States:

For cutting off our Trade with all parts of the world:

For imposing Taxes on us without our Consent:

For depriving us in many cases, of the benefits of Trial by jury:

For transporting us beyond Seas to be tried for pretended offenses:

For abolishing the free System of English Laws in a neighboring Province, establishing therein an Arbitrary government, and enlarging its Boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these Colonies:

For taking away our Charters, abolishing our most valuable Laws, and altering fundamentally the Forms of our Governments:

For suspending our own Legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated Government here, by declaring us out of his Protection and waging War against us.

He has plundered our seas, ravaged our Coasts, burnt our towns, and destroyed the lives of our people.

He is at this time transporting large Armies of foreign Mercenaries to compleat the works of death, desolation and tyranny, already

begun with circumstances of Cruelty & perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation.

He has constrained our fellow Citizens taken Captive on the high Seas to bear Arms against their Country, to become the executioners of their friends and Brethren, or to fall themselves by their Hands.

He has excited domestic insurrections amongst us, and has endeavored to bring on the inhabitants of our frontiers, the merciless Indian Savages, whose known rule of warfare, is an undistinguished destruction of all ages, sexes and conditions.

In every stage of these Oppressions We have Petitioned for Redress in the most humble terms: Our repeated Petitions have been answered only by repeated injury. A Prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free people.

Nor have We been wanting in attentions to our British brethren. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, in Peace Friends.

WE, THEREFORE, the REPRESENTATIVES OF THE UNITED STATES OF AMERICA, IN GENERAL CONGRESS, Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the Name, and by authority of the good People of these Colonies, solemnly PUBLISH and DECLARE, That these United Colonies are, and of Right ought to be FREE AND INDEPENDENT STATES; that they are Absolved from all Allegiance to the British Crown, and that all political connection between them and the State of Great Britain, is and ought to be totally dissolved; and that as FREE AND INDEPENDENT STATES, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which INDEPENDENT STATES may of right do. And for the support of this Declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our Lives, our Fortunes and our sacred Honor.

DOLLAR SIGN USED IN FOREIGN COUNTRIES

The conventional symbol associated with American currency and commonly referred to in the United States as the dollar sign is used to denote a currency in some 20 foreign countries.

Countries that have employed the dollar sign in designating their local currency are: Argentina, Brazil, British Guiana, Canada, Chile, China, Colombia, Ethiopia, Hong Kong, Macao, Mexico, Newfoundland, Paraguay, Portugal, Straits Settlements, and Uruguay.

Outside the United States, United States

currency is used as a medium in British Honduras, Dominican Republic, Hawaii, the northern part of Honduras, Liberia, Panama and Puerto Rico. Cuba employs United States currency in conjunction with the peso, the national unit of currency.

In addition to the countries using American banknotes and coin as their currency, several countries normally base their money on the dollar. Such countries include: Bolivia, Chile, Colombia, Ecuador, Guatemala, Honduras, Nicaragua, Peru and the Philippine Islands, Danzig, Greece, and Portugal.

HINTS FOR THE MOTORIST

The professional driver uses first gear only to get his wheels moving. He shifts smoothly into second and goes into high at twenty miles an hour. Coasting to a stop saves gasoline. That was once the convincing argument for free-wheeling—that every ride was one long coast; hence a great money saver. But manufacturers are now stressing safety. Coasting with engine braking power is safer, since wheels are constantly enmeshed with the engine.

Letting the motor idle for long periods is hard on the purse strings. Underinflated tires mean a harder drag on the wheels and more gas for the engine. Faulty spark plugs can waste up to 10 per cent on the fuel. Overheated engines steal power from the gasoline. The good driver watches his cooling system as the tennis star watches his racket.

Every car has a speed at which it functions most smoothly. Find that speed and you have the key to maximum economy from your car.

THE CONSTITUTION

FORMATION OF THE CONSTITUTION

By the time the inadequacy of the Confederation government was becoming apparent and the failure of the Alexandria conference in 1785, called by Maryland and Virginia to negotiate an agreement concerning the navigation of Chesapeake Bay and certain rivers, really to settle regional difficulties, Virginia proposed that commissioners be sent from all states to meet to adopt uniform regulations for all the states of the then weak United States. Five states, New York, New Jersey, Pennsylvania, Delaware and Virginia, were represented at this convention in 1786 at Annapolis and delegates decided that action was futile unless all the states were represented. Accordingly a call was sent out for a general convention the second Monday of May, 1787, in Philadelphia.

Not until May 25 that next year, however, did delegates from a majority of states convene. Rhode Island was not represented at the convention. It was decided that all proceedings of the convention should be secret, although James Madison kept a diary of the activities. These notes, which comprise the chief knowledge of what happened in the closed sessions, were published 52 years later and were bought by the government from Madison's widow, Dolly Madison, for \$40,000. Robert Yates published in 1821 "Secret Proceedings and Debates of the Convention at Philadelphia", but as he had withdrawn from the convention his records were incomplete.

The Virginia plan, introduced by Edmund Randolph, and drafted by James Madison, which formed the basis of the Constitution, proposed that a national government be created to operate directly upon the individuals of the different states, not upon the states themselves, and that representation in both branches of the national legislature be proportioned to quotas of contributions by states or number of free inhabitants. This plan definitely abandoned the Articles of Confederation.

Another plan, meanwhile, was devised and submitted. Known as the New Jersey plan, it would have retained the Articles, leaving the states sovereign as before, but giving Congress additional powers over commerce and revenue.

Representation was another cause for dispute in the struggle for a governmental plan. The small states were fearful that the gov-

ernment would be dominated by the more populous states if representation was on the basis of population. The first great compromise of the convention provided that representation in the lower house where revenue bills would be originated would be upon the basis of population, but that representation in the upper house would be equal for all states.

Conflict between slave and non-slave states arose even as early as the Constitutional convention. The three-fifths rule was adopted by which five slaves were to be counted as the equivalent of three white persons for apportioning both representatives and direct taxes.

Another compromise was necessary between the North and South on the basis of commerce. The southern states were interested only in agriculture; the northern, interested in shipping, wanted strong governmental regulation of commerce to protect them against foreign discrimination. The South also was fearful that a heavy tax might be put upon agricultural exports. Hence, taxation of exports by the states or Congress was forbidden and Congress was given power to regulate commerce by a majority vote but was forbidden to prohibit the importation of slaves prior to 1808.

The resolutions offered by Randolph, together with certain features of the New Jersey plan and other suggestions by Pinckney, formed the framework of the Constitution. One important clause of the Virginia plan, however, was replaced by one from the New Jersey plan which declared that the national Constitution, laws and treaties would be above any acts of the states to veto them.

Provisions of the Constitution already agreed upon were sent to a committee of revision Sept. 8 and Sept 17, 1787. The document was completed and signed. Washington, as president of the convention, sent the document to the Confederation government recommending that the question of its adoption be submitted to conventions of delegates chosen by the people of the several states.

After the Constitution was made public there followed bitter controversy in the press. Madison, Hamilton and Jay published *The Federalist*, under the common signature of "Publius," in defense of it. When New York ratified the Constitution a newspaper "extra" was published and a parade on the Fourth of July was held in Philadelphia celebrating ratification by ten states.

THE CONSTITUTION OF THE UNITED STATES

We the People of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America.

Article I

Section 1. All Legislative Powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

Section 2. The House of Representatives shall be composed of Members chosen every second Year by the People of the several

States, and the Electors in each State shall have the Qualifications requisite for Electors of the most numerous Branch of the State Legislature.

No Person shall be a Representative who shall not have attained to the Age of twenty five Years, and been seven Years a Citizen of the United States, and who shall not, when elected, be an Inhabitant of that State in which he shall be chosen.

Representatives and direct Taxes shall be apportioned among the several States which may be included within this Union, according to their respective Numbers, which shall be determined by adding to the whole Number of free Persons, including those

bound to Service for a Term of Years, and excluding Indians not taxed, three fifths of all other Persons. The actual Enumeration shall be made within three Years after the first Meeting of the Congress of the United States; and within every subsequent Term of ten Years, in such Manner as they shall by Law direct. The Number of Representatives shall not exceed one for every thirty Thousand, but each State shall have at Least one Representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to choose three, Massachusetts eight, Rhode-Island and Providence Plantations one, Connecticut five, New York six, New Jersey four, Pennsylvania eight, Delaware one, Maryland six, Virginia ten, North Carolina five, South Carolina five, and Georgia three.

When vacancies happen in the Representation from any State, the Executive Authority thereof shall issue Writs of Election to fill such Vacancies.

The House of Representatives shall chuse their speaker and other Officers; and shall have the sole Power of Impeachment.

Section 3. The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six Years; and each Senator shall have one Vote.

Immediately after they shall be assembled in Consequence of the first Election, they shall be divided as equally as may be into three Classes. The Seats of the Senators of the first Class shall be vacated at the Expiration of the second Year, of the second Class at the Expiration of the fourth Year, and of the third Class at the Expiration of the sixth Year, so that one third may be chosen every second Year; and if Vacancies happen by Resignation, or otherwise, during the Recess of the Legislature of any State, the Executive thereof may make temporary Appointments until the next Meeting of the Legislature, which shall then fill such Vacancies.

No Person shall be a Senator who shall not have attained to the Age of thirty Years, and been nine Years a Citizen of the United States, and who shall not, when elected, be an Inhabitant of that State for which he shall be chosen.

The Vice President of the United States shall be President of the Senate, but shall have no Vote, unless they be equally divided.

The Senate shall chuse their other Officers, and also a President pro tempore, in the Absence of the Vice President, or when he shall exercise the Office of President of the United States.

The Senate shall have the sole Power to try all Impeachments. When sitting for that Purpose, they shall be on Oath or Affirmation. When the President of the United States is tried, the Chief Justice shall preside: And no Person shall be convicted without the Concurrence of two thirds of the Members present.

Judgment in Cases of Impeachment shall not extend further than to removal from Office, and disqualification to hold and enjoy any Office of honor, Trust or Profit under the United States: but the Party convicted shall nevertheless be liable and subject to Indictment, Trial, Judgment and Punishment, according to law.

Section 4. The Times, Places and Manner of holding Elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by Law make or alter such Regulations, except as to the Places of

chusing Senators.

The Congress shall assemble at least once in every Year, and such Meeting shall be on the first Monday in December, unless they shall by Law appoint a different Day.

Section 5. Each House shall be the Judge of the Elections, Returns and Qualifications of its own Members, and a Majority of each shall constitute a Quorum to do Business; but a smaller Number may adjourn from day to day, and may be authorized to compel the Attendance of absent Members, in such Manner, and under such Penalties as each House may provide.

Each House may determine the Rules of its Proceedings, punish its Members for disorderly Behaviour, and, with the Concurrence of two thirds, expel a Member.

Each House shall keep a Journal of its Proceedings, and from time to time publish the same, excepting such Parts as may in their Judgment require Secrecy; and the Yeas and Nays of the Members of either House on any question shall, at the Desire of one fifth of those Present, be entered on the Journal.

Neither House, during the Session of Congress, shall, without the Consent of the other, adjourn for more than three days, nor to any other Place than that in which the two Houses shall be sitting.

Section 6. The Senators and Representatives shall receive a Compensation for their Services, to be ascertained by Law, and paid out of the Treasury of the United States. They shall in all Cases, except Treason, Felony and Breach of the Peace, be privileged from Arrest during their Attendance at the Session of their respective Houses, and in going to and returning from the same; and for any Speech or Debate in either House, they shall not be questioned in any other Place.

No Senator or Representative shall, during the Time for which he was elected, be appointed to any civil Office under the Authority of the United States, which shall have been created, or the Emoluments whereof shall have been encreased during such time; and no Person holding any Office under the United States, shall be a Member of either House during his Continuance in Office.

Section 7. All Bills for raising Revenue shall originate in the House of Representatives; but the Senate may propose or concur with Amendments as on other Bills.

Every Bill which shall have passed the House of Representatives and the Senate, shall, before it become a Law, be presented to the President of the United States; if he approve he shall sign it, but if not he shall return it, with his Objections to that House in which it shall have originated, who shall enter the Objections at large on their Journal, and proceed to reconsider it. If after such Reconsideration two thirds of that House shall agree to pass the Bill, it shall be sent, together with the Objections, to the other House, by which it shall likewise be reconsidered, and if approved by two thirds of that House, it shall become a Law. But in all such Cases the Votes of both Houses shall be determined by yeas and Nays, and the Names of the Persons voting for and against the Bill shall be entered on the Journal of each House respectively. If any Bill shall not be returned by the President within ten Days (Sundays excepted) after it shall have been presented to him, the Same shall be a Law, in like Manner as if he had signed it, unless the Congress by their Adjournment

prevent its Return, in which Case it shall not be a Law.

Every Order, Resolution, or Vote to which the Concurrence of the Senate and House of Representatives may be necessary (except on a question of Adjournment) shall be presented to the President of the United States; and before the Same shall take Effect, shall be approved by him, or being disapproved by him, shall be repassed by two thirds of the Senate and House of Representatives, according to the Rules and Limitations prescribed in the Case of a Bill.

Section 8. The Congress shall have Power To lay and collect Taxes, Duties, Imposts and Excises, to pay the Debts and provide for the common Defence and general Welfare of the United States; but all Duties, Imposts and Excises shall be uniform throughout the United States;

To borrow Money on the Credit of the United States;

To regulate Commerce with foreign Nations, and among the several States, and with the Indian Tribes;

To establish a uniform Rule of Naturalization, and uniform Laws on the subject of Bankruptcies throughout the United States;

To coin Money, regulate the Value thereof, and of foreign Coin, and fix the Standard of Weights and Measures;

To provide for the Punishment of counterfeiting the Securities and current Coin of the United States;

To establish Post Offices and post Roads;

To promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries;

To constitute Tribunals inferior to the supreme Court;

To define and punish Piracies and Felonies committed on the high Seas, and Offences against the Law of Nations;

To declare War, grant Letters of Marque and Reprisal, and make Rules concerning Captures on Land and Water;

To raise and support Armies, but no Appropriation of Money to that Use shall be for a longer Term than two Years;

To provide and maintain a Navy;

To make Rules for the Government and Regulation of the land and naval Forces;

To provide for calling forth the Militia to execute the Laws of the Union, suppress Insurrections and repel Invasions;

To provide for organizing, arming, and disciplining, the Militia, and for governing such Part of them as may be employed in the Service of the United States, reserving to the States respectively, the Appointment of the Officers, and the Authority of training the Militia according to the discipline prescribed by Congress;

To exercise exclusive Legislation in all Cases whatsoever, over such District (not exceeding ten Miles square) as may, by Cession of particular States, and the Acceptance of Congress, become the Seat of the Government of the United States, and to exercise like Authority over all Places purchased by the Consent of the Legislature of the State in which the Same shall be, for the Erection of Forts, Magazines, Arsenals, dock-Yards, and other needful Buildings;—And

To make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers, and all other Powers vested by this Constitution in the Government of the United States, or in any Department or Officer thereof.

Section 9. The Migration or Importation of such Persons as any of the States now existing shall think proper to admit, shall not be prohibited by the Congress prior to the Year one thousand eight hundred and eight, but a Tax or duty may be imposed on such Importation, not exceeding ten dollars for each Person.

The Privilege of the Writ of Habeas Corpus shall not be suspended, unless when in Cases of Rebellion or Invasion the public Safety may require it.

No Bill of Attainder or ex post facto Law shall be passed.

No Capitation, or other direct, Tax shall be laid, unless in Proportion to the Census or Enumeration herein before directed to be taken.

No Tax or Duty shall be laid on Articles exported from any State.

No Preference shall be given by any Regulation of Commerce or Revenue to the Ports of one State over those of another: nor shall Vessels bound to, or from, one State, be obliged to enter, clear, or pay Duties in another.

No Money shall be drawn from the Treasury, but in Consequence of Appropriations made by Law: and a regular Statement and Account of the Receipts and Expenditures of all public Money shall be published from time to time.

No Title of Nobility shall be granted by the United States: And no Person holding any Office of Profit or Trust under them, shall, without the Consent of the Congress, accept of any present, Emolument, Office, or Title, of any kind whatever, from any King, Prince, or foreign State.

Section 10. No State shall enter into any Treaty, Alliance, or Confederation; grant Letters of Marque and Reprisal; coin Money; emit Bills of Credit; make any Thing but gold and silver Coin a Tender in Payment of Debts; pass any Bill of Attainder, ex post facto Law, or Law impairing the Obligation of Contracts, or grant any Title of Nobility.

No State shall, without the Consent of the Congress, lay any Imposts or Duties on Imports or Exports, except what may be absolutely necessary for executing its inspection Laws: and the net Produce of all Duties and Imposts, laid by any State on Imports or Exports, shall be for the use of the Treasury of the United States; and all such Laws shall be subject to the Revision and Controul of the Congress.

No State shall, without the Consent of Congress, lay any Duty of Tonnage, keep Troops, or Ships of War in time of Peace, enter into any Agreement or Compact with another State, or with a foreign Power, or engage in War, unless actually invaded, or in such imminent Danger as will not admit of delay.

Article II

Section 1. The executive Power shall be vested in a President of the United States of America. He shall hold his Office during the Term of four Years, and, together with the Vice President, chosen for the same Term, be elected, as follows

Each State shall appoint, in such Manner as the Legislature thereof may direct, a Number of Electors, equal to the whole Number of Senators and Representatives to which the State may be entitled in the Congress: but no Senator or Representative, or Person holding an Office of Trust or Profit under the United States, shall be appointed an Elector.

The Electors shall meet in their respective States, and vote by Ballot for two Persons,

of whom one at least shall not be an Inhabitant of the same State with themselves. And they shall make a List of all the Persons voted for, and of the Number of Votes for each; which List they shall sign and certify, and transmit sealed to the Seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the Presence of the Senate and House of Representatives, open all the Certificates, and the Votes shall then be counted. The Person having the greatest Number of Votes shall be the President, if such Number be a Majority of the whole Number of Electors appointed; and if there be more than one who have such Majority, and have an equal Number of Votes, then the House of Representatives shall immediately chuse by Ballot one of them for President; and if no Person have a Majority, then from the five highest on the List the said House shall in like Manner chuse the President. But in chusing the President, the Votes shall be taken by States, the Representation from each State having one Vote; A quorum for this Purpose shall consist of a Member or Members from two thirds of the States, and a Majority of all the States shall be necessary to a Choice. In every Case, after the Choice of the President, the Person having the greatest Number of Votes of the Electors shall be the Vice President. But if there should remain two or more who have equal Votes, the Senate shall chuse from them by Ballot the Vice President.

The Congress may determine the Time of chusing the Electors, and the Day on which they shall give their Votes; which Day shall be the same throughout the United States.

No Person except a natural born Citizen, or a Citizen of the United States, at the time of the Adoption of this Constitution, shall be eligible to the Office of President; neither shall any Person be eligible to that Office who shall not have attained to the Age of thirty-five Years, and been fourteen Years a Resident within the United States.

In Case of the Removal of the President from Office, or of his Death, Resignation, or Inability to discharge the Powers and Duties of the said Office, the Same shall devolve on the Vice President, and the Congress may by Law provide for the Case of Removal, Death, Resignation or Inability, both of the President and Vice President, declaring what Officer shall then act as President, and such Officer shall act accordingly, until the Disability be removed, or a President shall be elected.

The President shall, at stated Times, receive for his Services, a Compensation, which shall neither be encreased nor diminished during the Period for which he shall have been elected, and he shall not receive within that Period any other Emolument from the United States, or any of them.

Before he enter on the Execution of his Office, he shall take the following Oath or Affirmation:—"I do solemnly swear (or affirm) that I will faithfully execute the Office of President of the United States, and will to the best of my Ability, preserve, protect and defend the Constitution of the United States."

Section 2. The President shall be Commander in Chief of the Army and Navy of the United States, and of the Militia of the several States, when called into the actual Service of the United States; he may require the Opinion, in writing, of the principal Officer in each of the executive Departments,

upon any Subject relating to the Duties of their respective Offices, and he shall have Power to grant Reprieves and Pardons for Offences against the United States, except in Cases of Impeachment.

He shall have Power, by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur; and he shall nominate, and by and with the Advice and Consent of the Senate, shall appoint Ambassadors, other public Ministers and Consuls, Judges of the supreme Court, and all other Officers of the United States, whose Appointments are not herein otherwise provided for, and which shall be established by Law; but the Congress may by Law vest the Appointment of such inferior Officers as they think proper, in the President alone, in the Courts of Law, or in the Heads of Departments.

The President shall have Power to fill up all Vacancies that may happen during the Recess of the Senate, by granting Commissions which shall expire at the End of their next Session.

Section 3. He shall from time to time give to the Congress Information of the State of the Union, and recommend to their Consideration such Measures as he shall judge necessary and expedient; he may, on extraordinary Occasions, convene both Houses, or either of them, and in Case of Disagreement between them, with Respect to the Time of Adjournment, he may adjourn them to such Time as he shall think proper; he shall receive Ambassadors and other public Ministers; he shall take Care that the Laws be faithfully executed, and shall Commission all the Officers of the United States.

Section 4. The President, Vice, President and all civil Officers of the United States, shall be removed from Office on Impeachment for, and Conviction of, Treason, Bribery, or other high Crimes and Misdemeanors.

Article III

Section 1. The judicial Power of the United States, shall be vested in one supreme Court, and in such inferior Courts as the Congress may from time to time ordain and establish. The Judges, both of the supreme and inferior Courts, shall hold their Offices during good Behaviour, and shall, at stated Times, receive for their Services, a Compensation, which shall not be diminished during their Continuance in Office.

Section 2. The judicial Power shall extend to all Cases, in Law and Equity, arising under this Constitution, the Laws of the United States, and Treaties made, or which shall be made, under their Authority;—to all Cases affecting Ambassadors, other public Ministers and Consuls;—to all Cases of admiralty and maritime Jurisdiction;—to Controversies to which the United States shall be a Party;—to Controversies between two or more States;—between a State and Citizens of another State;—between Citizens of different States;—between Citizens of the same State claiming Lands under Grants of different States, and between a State, or the Citizens thereof, and foreign States, Citizens or Subjects.

In all Cases affecting Ambassadors, other public Ministers and Consuls, and those in which a State shall be Party, the supreme Court shall have original Jurisdiction. In all the other Cases before mentioned, the supreme Court shall have appellate Jurisdiction, both as to Law and Fact, with such Exceptions, and under such Regulations as the Congress shall make.

The Trial of all Crimes, except in Cases of Impeachment, shall be by Jury; and such Trial shall be held in the State where the said Crimes shall have been committed; but when not committed within any State, the Trial shall be at such Place or Places as the Congress may by Law have directed.

Section 3. Treason against the United States, shall consist only in levying War against them, or in adhering to their Enemies, giving them Aid and Comfort. No Person shall be convicted of Treason unless on the Testimony of two Witnesses to the same overt Act, or on Confession in open Court.

The Congress shall have Power to declare the Punishment of Treason, but no Attainder of Treason shall work Corruption of Blood, or Forfeiture except during the Life of the Person attained.

Article IV

Section 1. Full Faith and Credit shall be given in each State to the public Acts, Records, and judicial Proceedings of every other State. And, the Congress may by general Laws prescribe the Manner in which such Acts, Records and Proceedings shall be proved, and the Effect thereof.

Section 2. The Citizens of each State shall be entitled to all Privileges and Immunities of Citizens in the several States.

A Person charged in any State with Treason, Felony, or other Crime, who shall flee from Justice, and be found in another State, shall on Demand of the executive Authority of the State from which he fled, be delivered up, to be removed to the State having Jurisdiction of the Crime.

No Person held to Service or Labour in one State, under the Laws thereof, escaping into another, shall, in Consequence of any Law or Regulation therein, be discharged from such Service or Labour, but shall be delivered up on Claim of the Party to whom such Service or Labour may be due.

Section 3. New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the Jurisdiction of any other State; nor any State be formed by the Junction of two or more States, or Parts of States, without the Consent of the Legislatures of the States concerned as well as of the Congress.

The Congress shall have Power to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States; and nothing in this Constitution shall be so construed as to Prejudice any Claims of the United States, or of any particular State.

Section 4. The United States shall guarantee to every State in this Union a Republican Form of Government, and shall protect each of them against Invasion; and on Application of the Legislature, or of the Executive (when the Legislature cannot be convened) against domestic Violence.

Article V

The Congress, whenever two thirds of both Houses shall deem it necessary, shall propose Amendments to this Constitution, or, on the Application of the Legislatures of two thirds of the several States, shall call a Convention for proposing Amendments; which, in either Case, shall be valid to all Intents and Purposes, as Part of this Constitution; when ratified by the Legislatures of three fourths of the several States, or by Conventions in three fourths thereof, as the one or the other Mode of Ratification may be proposed by the Congress; Provided that no Amendment

which may be made prior to the Year One thousand eight hundred and eight shall in any Manner affect the first and fourth Clauses in the Ninth Section of the first Article; and that no State, without its Consent, shall be deprived of its equal Suffrage in the Senate.

Article VI

All Debts contracted and Engagements entered into, before the Adoption of this Constitution, shall be as valid against the United States under this Constitution, as under the Confederation.

This Constitution, and the Laws of the United States which shall be made in Pursuance thereof; and all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby, any Thing in the Constitution or Laws of any State to the Contrary notwithstanding.

The Senators and Representatives before mentioned, and the Members of the several State Legislatures, and all executive and judicial Officers, both of the United States and of the several States, shall be bound by Oath or Affirmation, to support this Constitution; but no religious Test shall ever be required as a Qualification to any Office or public Trust under the United States.

Article VII

The Ratification of the Conventions of nine States, shall be sufficient for the Establishment of this Constitution between the States so ratifying the Same.

done in Convention by the Unanimous Consent of the States present the Seventeenth Day of September in the Year of our Lord one thousand seven hundred and Eighty seven and of the Independence of the United States of America the Twelfth In witness whereof We have hereunto subscribed our Names,

Amendments

(The first 10 Amendments were adopted December 15, 1791, and form what is known as the "Bill of Rights")

Amendment 1

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

Amendment 2

A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed.

Amendment 3

No soldier shall, in time of peace be quartered in any house, without the consent of the Owner, nor in time of war, but in a manner to be prescribed by law.

Amendment 4

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

Amendment 5

No person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a Grand Jury, except in cases arising in the land or naval forces, or in the Militia, when in actual service in time of War or public danger; nor shall any person be subject for the same offence to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation.

Amendment 6

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the Assistance of Counsel for his defense.

Amendment 7

In Suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury, shall be otherwise re-examined in any Court of the United States, than according to the rules of the common law.

Amendment 8

Excessive bail shall not be required, nor

excessive fines imposed, nor cruel and unusual punishments inflicted.

Amendment 9

The enumeration in the Constitution, of certain rights, shall not be construed to deny or disparage others retained by the people.

Amendment 10

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

Amendment 11

(Adopted January 8, 1798)

The judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by Citizens of another State, or by Citizens or Subjects of any Foreign State.

Amendment 12

(Adopted September 25, 1804)

The Electors shall meet in their respective states and vote by ballot for President and Vice-President, one of whom, at least shall not be an inhabitant of the same state with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for a Vice-President, and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which lists they shall sign and certify, and transmit sealed to the seat of the government of the United States, directed to the President of the Senate;—The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates and the votes shall then be counted;—The person having the greatest number of votes for President, shall be the President, if such number be a majority of the whole number of Electors appointed; and if no person have such majority, then from the persons having the highest numbers not exceeding three on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the votes shall be taken by states, the representation from each state having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the states, and a majority of all the states shall be necessary to a choice. And if the House of Representatives shall not choose a President whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President.—The person having the greatest number of votes as Vice-President, shall be the Vice-President, if such number be a majority of the whole number of Electors appointed, and if no person have a majority, then from the two highest numbers on the list, the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

Amendment 13

(Adopted December 18, 1865)

Section 1. Neither slavery nor involuntary servitude, except as a punishment for crime

whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

Section 2. Congress shall have power to enforce this article by appropriate legislation.

Amendment 14

(Adopted July 28, 1868)

Section 1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

Section 2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice President of the United States, Representative in Congress, the Executive and Judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male inhabitants of such State, being twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion, or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

Section 3. No person shall be a Senator or Representative in Congress, or elector of President and Vice President, or hold any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid or comfort to the enemies thereof. But Congress may by a vote of two-thirds of each House, remove such disability.

Section 4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection or rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations and claims shall be held illegal and void.

Section 5. The Congress shall have power to enforce, by appropriate legislation, the provisions of this article.

Amendment 15

(Adopted March 30, 1870)

Section 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

Section 2. The Congress shall have power to enforce this article by appropriate legislation.

Amendment 16

(Adopted February 25, 1913)

The Congress shall have power to lay and collect taxes on incomes, from whatever

source derived, without apportionment among the several States, and without regard to any census or enumeration.

Amendment 17

(Adopted May 31, 1913)

The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislatures.

When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: **Provided**, That the legislature of any State may empower the executive thereof to make temporary appointments until the people fill the vacancies by election as the legislature may direct.

This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution.

Amendment 18

(Adopted January 29, 1919)

Section 1. After one year from the ratification of this article the manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

Section 2. The Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.

Section 3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

Amendment 19

(Adopted August 26, 1920)

The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex.

Congress shall have power to enforce this article by appropriate legislation.

Amendment 20

(Adopted February 6, 1933)

Section 1. The terms of the President and Vice President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3d day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

Section 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3d day of January, unless they shall by law appoint a different day.

Section 3. If, at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice President elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President elect nor a Vice President elect shall have quali-

fied, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice President shall have qualified.

Section 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice shall have devolved upon them.

Section 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

Section 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legis-

latures of three-fourths of the several States within seven years from the date of its submission.

Amendment 21

(Adopted December 5, 1933)

Section 1. The eighteenth article of amendment to the Constitution of the United States is hereby repealed.

Section 2. The transportation or importation into any State, Territory, or possession of the United States for delivery or use therein of intoxicating liquors, in violation of the laws thereof, is hereby prohibited.

Section 3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by conventions in the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

WASHINGTON'S FAREWELL ADDRESS

Prominent for more than 140 years in orations and debates regarding so-called "foreign entanglements" as the League of Nations, World Court and the United States' traditional policy of isolation from European political affairs has been the Farewell Address of George Washington, issued Sept. 19, 1796, just before his retirement to private life after eight years as president.

Published in the Philadelphia **Daily Advertiser** the address was written just before the end of Washington's first term. The main features of the contemplated address first were submitted to Washington's friend, James Madison, for elaboration, but when he decided to accept another term, the address was delayed. May 15, 1796, he again brought out the manuscript and gave it to Alexander Hamilton for suggestions. Hamilton returned the address to Washington after he had conferred with John Jay about it.

David C. Claypoole, editor and publisher of the Philadelphia paper publishing the address, was given the original manuscript. Later it was sold to James Lenox, founder of the Lenox library, and is now in the possession of the New York public library.

The address, composed of 1,086 lines and 174 erased lines, was written by Washington on 32 pages of quarto letter paper.

The address follows:

To the people of the United States.

Friends and Fellow Citizens: The period for a new election of a citizen to administer the executive government of the United States being not far distant, and the time actually arrived when your thoughts must be employed in designating the person who is to be clothed with that important trust, it appears to me proper, especially as it may conduce to a more distinct expression of the public voice, that I should now apprise you of the resolution I have formed, to decline being considered among the number of those, out of whom a choice is to be made.

I beg you, at the same time, to do me the justice to be assured, that this resolution has not been taken, without a strict regard to all the considerations appertaining to the relation which binds a dutiful citizen to his country; and that, in withdrawing the tender of service which silence in my situation might imply, I am influenced by no diminution of zeal for your future interest; no deficiency of grateful respect for your past kindness; but am supported by a full conviction that the step is compatible with both.

The acceptance of, and continuance hitherto in the office to which your suffrages have

twice called me, have been a uniform sacrifice of inclination to the opinion of duty, and to a deference for what appeared to be your desire. I constantly hoped that it would have been much earlier in my power, consistently with motives which I was not at liberty to disregard, to return to that retirement from which I had been reluctantly drawn. The strength of my inclination to do this, previous to the last election, had even led to the preparation of an address to declare it to you; but mature reflection on the then perplexed and critical posture of our affairs with foreign nations, and the unanimous advice of persons entitled to my confidence, impelled me to abandon the idea.

I rejoice that the state of your concerns external as well as internal, no longer renders the pursuit of inclination incompatible with the sentiment of duty or propriety; and am persuaded, whatever partiality may be retained for my services, that in the present circumstances of our country, you will not disapprove my determination to retire.

The impressions with which I first undertook the arduous trust, were explained on the proper occasion. In the discharge of this trust, I will only say that I have, with good intentions, contributed towards the organization and administration of the government, the best exertions of which a very fallible judgment was capable. Not unconscious in the outset, of the inferiority of my qualifications, experience, in my own eyes, perhaps still more in the eyes of others, has strengthened the motives to diffidence of myself; and, every day, the increasing weight of years admonishes me more and more, that the shade of retirement is as necessary to me as it will be welcome. Satisfied that if any circumstances have given peculiar value to my services, they were temporary, I have the consolation to believe that, while choice and prudence invite me to quit the political scene, patriotism does not forbid it.

In looking forward to the moment which is to terminate the career of my political life, my feelings do not permit me to suspend the deep acknowledgment of that debt of gratitude which I owe to my beloved country, for the many honors it has conferred upon me; still more for the steadfast confidence with which it has supported me; and for the opportunities I have thence enjoyed of manifesting my inviolable attachment, by services faithful and persevering, though in usefulness unequal to my zeal. If benefits have resulted to our country from these services, let it always be remembered to your praise,

and as an instructive example in our annals, that under circumstances in which the passions, agitated in every direction, were liable to mislead amidst appearances sometimes dubious, vicissitudes of fortune often discouraging—in situations in which not unfrequently, want of success has counteracted the spirit of criticism,—the constancy of your support was the essential prop of the efforts, and a guarantee of the plans, by which they were effected. Profoundly penetrated with this idea, I shall carry it with me to my grave, as a strong incitement to unceasing vows that heaven may continue to you the choicest tokens of its beneficence—that your union and brotherly affection may be perpetual—that the free constitution, which is the work of your hands, may be sacredly maintained—that its administration in every department may be stamped with wisdom and virtue—that, in fine, the happiness of the people of these states, under the auspices of liberty, may be made complete by so careful a preservation, and so prudent a use of this blessing, as will acquire to them the glory of recommending it to the applause, the affection and adoption of every nation which is yet a stranger to it.

Here, perhaps, I ought to stop. But a solicitude for your welfare, which cannot end but with my life, and the apprehension of danger, natural to that solicitude, urge me, on an occasion like the present, to offer to your solemn contemplation, and to recommend to your frequent review, some sentiments which are the result of much reflection, of no inconsiderable observation, and which appear to me all important to the permanency of your felicity as a people. These will be offered to you with the more freedom, as you can only see in them the disinterested warnings of a parting friend, who can possibly have no personal motive to bias his counsel. Nor can I forget, as an encouragement to it, your indulgent reception of my sentiments on a former and not dissimilar occasion.

Interwoven as is the love of liberty with every ligament of your hearts, no recommendation of mine is necessary to fortify or confirm the attachment.

The unity of government which constitutes you one people, is also now dear to you. It is justly so; for it is a main pillar in the edifice of your real independence; the support of your tranquility at home; your peace abroad; of your safety; of your prosperity; of that very liberty which you so highly prize. But, as it is easy to foresee that, from different causes and from different quarters much pains will be taken, many artifices employed, to weaken in your minds the conviction of this truth; as this is the point in your political fortress against which the batteries of internal and external enemies will be most constantly and actively (though often covertly and insidiously) directed; it is of infinite moment, that you should properly estimate the immense value of your national union to your collective and individual happiness; that you should cherish a cordial, habitual, and immovable attachment to it; accustoming yourselves to think and speak of it as of the palladium of your political safety and prosperity; watching for its preservation with jealous anxiety; discountenancing whatever may suggest even a suspicion that it can, in any event, be abandoned; and indignantly frowning upon the first dawning of every attempt to alienate any portion of our country from the rest, or to enfeeble the sacred ties which now link

together the various parts.

For this you have every inducement of sympathy and interest. Citizens by birth, or choice, of a common country, that country has a right to concentrate your affections. The name of American, which belongs to you in your national capacity, must always exalt the just pride of patriotism, more than any appellation derived from local discriminations. With slight shades of difference, you have the same religion, manners, habits, and political principles. You have, in a common cause, fought and triumphed together; the independence and liberty you possess, are the work of joint counsels, and joint efforts, of common dangers, sufferings and successes.

But these considerations, however powerfully they address themselves to your sensibility, are greatly outweighed by those which apply more immediately to your interest. Here, every portion of our country finds the most commanding motives for carefully guarding and preserving the union of the whole.

The **north**, in an unrestrained intercourse with the **south**, protected by the equal laws of a common government, finds in the productions of the latter, great additional resources of maritime and commercial enterprise, and precious materials of manufacturing industry. The **south**, in the same intercourse, benefiting by the same agency of the **north**, sees its agriculture grow and its commerce expand. Turning partly into its own channels the seamen of the **north**, it finds its particular navigation invigorated; and while it contributes, in different ways, to nourish and increase the general mass of the national navigation, it looks forward to the protection of a maritime strength, to which itself is unequally adapted. The **east**, in a like intercourse with the **west**, already finds, and in the progressive improvement of interior communications by land and water, will more and more find a valuable vent for the commodities which it brings from abroad, or manufactures at home. The **west** derives from the **east** supplies requisite to its growth and comfort—and what is perhaps of still greater consequence, it must of necessity owe the secure enjoyment of indispensable outlets for its own productions, to the weight, influence, and the future maritime strength of the Atlantic side of the Union, directed by an indissoluble community of interest as **one nation**. Any other tenure by which the **west** can hold this essential advantage, whether derived from its own separate strength; or from an apostate and unnatural connection with any foreign power, must be intrinsically precarious.

While then every part of our country thus feels an immediate and particular interest in union, all the parts combined cannot fail to find in the united mass of means and efforts, greater strength, greater resource, proportionably greater security from external danger, a less frequent interruption of their peace by foreign nations; and, what is of inestimable value, they must derive from union, an exemption from those broils and wars between themselves, which so frequently afflict neighboring countries not tied together by the same government; which their own rivalry alone would be sufficient to produce, but which opposite foreign alliances, attachments, and intrigues, would stimulate and embitter. Hence, likewise, they will avoid the necessity of those overgrown military establishments, which under any form of government are inauspicious to liberty, and which are to be regarded as

particularly hostile to republican liberty. In this sense it is, that your union ought to be considered as a main prop of your liberty, and that the love of the one ought to endear to you the preservation of the other.

These considerations speak a persuasive language to every reflecting and virtuous mind, and exhibit the continuance of the union as a primary object of patriotic desire. Is there a doubt whether a common government can embrace so large a sphere? Let experience solve it. To listen to mere speculation in such a case were criminal. We are authorized to hope that a proper organization of the whole, with the auxiliary agency of governments for the respective subdivisions, will afford a happy issue to the experiment. It is well worth a fair and full experiment. With such powerful and obvious motives to union, affecting all parts of our country, while experience shall not have demonstrated its impracticability, there will always be reason to distrust the patriotism of those who, in any quarter, may endeavor to weaken its bands.

In contemplating the causes which may disturb our Union, it occurs as matter of serious concern, that any ground should have been furnished for characterizing parties by **geographical discriminations,—northern and southern—Atlantic and western;** whence designing men may endeavor to excite a belief that there is a real difference of local interests and views. One of the expedients of party to acquire influence within particular districts, is to misrepresent the opinions and aims of other districts. You cannot shield yourselves too much against the jealousies and heart burnings which spring from these misrepresentations: they tend to render alien to each other those who ought to be bound together by fraternal affection. The inhabitants of our western country have lately had a useful lesson on this head: they have seen, in the negotiation by the executive, and in the unanimous ratification by the senate of the treaty with Spain, and in the universal satisfaction at that event throughout the United States, a decisive proof how unfounded were the suspicions propagated among them of a policy in the general government and in the Atlantic states, unfriendly to their interests in regard to the Mississippi. They have been witnesses to the formation of two treaties, that with Great Britain and that with Spain, which secure to them everything they could desire, in respect to our foreign relations, towards confirming their prosperity. Will it not be their wisdom to rely for the preservation of these advantages on the union by which they were procured? will they not henceforth be deaf to those advisers, if such they are, who would sever them from their brethren and connect them with aliens?

To the efficacy and permanency of your Union, a government for the whole is indispensable. No alliances, however strict, between the parts can be an adequate substitute; they must inevitably experience the infractions and interruptions which all alliances, in all times, have experienced. Sensible of this momentous truth, you have improved upon your first essay, by the adoption of a constitution of government, better calculated than your former, for an intimate union, and for the efficacious management of your common concerns. This government, the offspring of our own choice, uninfluenced and unawed, adopted upon full investigation and mature deliberation, completely free in its principles, in the distribu-

tion of its powers, uniting security with energy, and containing within itself a provision for its own amendment, has a just claim to your confidence and your support. Respect for its authority, compliance with its laws, acquiescence in its measures, are duties enjoined by the fundamental maxims of true liberty. The basis of our political systems is the right of the people to make and to alter their constitutions of government. But the constitution which, at any time exists, until changed by an explicit and authentic act of the whole people, is sacredly obligatory upon all. The very idea of the power, and the right of the people to establish government, presuppose the duty of every individual to obey the established government.

All obstructions to the execution of the laws, all combinations and associations under whatever plausible character, with the real design to direct, control, counteract, or awe the regular deliberations and action of the constituted authorities, are destructive of this fundamental principle, and of fatal tendency. They serve to organize faction, to give it an artificial and extraordinary force, to put in the place of the delegated will of the nation the will of a party, often a small but artful and enterprising minority of the community; and, according to the alternate triumphs of different parties, to make the public administration the mirror of the ill concerted and incongruous projects of faction, rather than the organ of consistent and wholesome plans digested by common councils, and modified by mutual interests.

However combinations or associations of the above descriptions may now and then answer popular ends, they are likely, in the course of time and things, to become potent engines, by which cunning, ambitious, and unprincipled men, will be enabled to subvert the power of the people, and to usurp for themselves the reins of government; destroying afterwards the very engines which have lifted them to unjust dominion.

Towards the preservation of your government and the permanency of your present happy state, it is requisite, not only that you steadily discountenance irregular oppositions to its acknowledged authority, but also that you resist with care the spirit of innovation upon its principles, however specious the pretext. One method of assault may be to effect, in the forms of the constitution, alterations which will impair the energy of the system; and thus to undermine what cannot be directly overthrown. In all the changes to which you may be invited, remember that time and habit are at least as necessary to fix the true character of governments, as of other human institutions:—that experience is the surest standard by which to test the real tendency of the existing constitution of a country:—that facility in changes, upon the credit of mere hypothesis and opinion, exposes to perpetual change from the endless variety of hypothesis and opinion: and remember, especially, that for the efficient management of your common interests in a country so extensive as ours, a government of as much vigor as is consistent with the perfect security of liberty is indispensable. Liberty itself will find in such a government, with powers properly distributed and adjusted, its surest guardian. It is, indeed little else than a name, where the government is too feeble to withstand the enterprise of faction, to confine each member of the society within the limits prescribed by the laws, and to maintain all

n the secure and tranquil enjoyment of the rights of person and property.

I have already intimated to you the danger of parties in the state, with particular reference to the founding of them on geographical discriminations. Let me now take a more comprehensive view, and warn you in the most solemn manner against the baneful effects of the spirit of party generally.

This spirit, unfortunately, is inseparable from our nature, having its root in the strongest passions of the human mind. It exists under different shapes in all governments, more or less stifled, controlled, or repressed; but in those of the popular form it is seen in its greatest rankness, and is truly their worst enemy.

The alternate domination of one faction over another, sharpened by the spirit of revenge natural to party dissension, which in different ages and countries, has perpetrated the most horrid enormities, is itself a rightful despotism. But this leads at length to a more formal and permanent despotism. The disorders and miseries which result, gradually incline the minds of men to seek security and repose in the absolute power of an individual; and, sooner or later, the chief of some prevailing faction, more able or more fortunate than his competitors, turns this disposition to the purposes of his own elevation on the ruins of public liberty.

Without looking forward to an extremity of this kind, (which nevertheless ought not to be entirely out of sight) the common and continual mischiefs of the spirit of party are sufficient to make it the interest and duty of a wise people to discourage and restrain it.

It serves always to distract the public councils, and enfeeble the public administration. It agitates the community with ill-founded jealousies and false alarms; kindles the animosity of one part against another; prompts occasionally riot and insurrection. It opens the door to foreign influence and corruption, which find a facilitated access to the government itself through the channels of party passions. Thus the policy and the will of one country are subjected to the policy and will of another.

There is an opinion that parties in free countries are useful checks upon the administration of the government, and serve to keep alive the spirit of liberty. This within certain limits is probably true; and in governments of a monarchical cast, patriotism may look with indulgence, if not with favor, upon the spirit of party. But in those of the popular character, in governments purely elective, it is a spirit not to be encouraged. From their natural tendency, it is certain there will always be enough of that spirit for every salutary purpose. And there being constant danger of excess, the effort ought to be, by force of public opinion, to mitigate and assuage it. A fire not to be quenched, it demands a uniform vigilance to prevent its bursting into a flame, lest instead of warming, it should consume.

It is important likewise, that the habits of thinking in a free country should inspire caution in those intrusted with its administration, to confine themselves within their respective constitutional spheres, avoiding in the exercise of the powers of one department, to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create, whatever the form of government, a real despotism. A just estimate of that love of power and proneness to abuse it which predominates in the human heart, is

sufficient to satisfy us of the truth of this position. The necessity of reciprocal checks in the exercise of political power, by dividing and distributing it into different depositories, and constituting each the guardian of the public weal against invasions of the others, has been evinced by experiments ancient and modern: some of them in our country and under our own eyes. To preserve them must be as necessary as to institute them. If, in the opinion of the people, the distribution or modification of the constitutional powers be in any particular wrong, let it be corrected by an amendment in the way which the constitution designates. But let there be no change by usurpation; for though this, in one instance, may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always greatly overbalance in permanent evil, any partial or transient benefit which the use can at any time yield.

Of all the dispositions and habits which lead to political prosperity, religion and morality are indispensable supports. In vain would that man claim the tribute of patriotism, who should labor to subvert these great pillars of human happiness, these firmest props of the duties of men and citizens. The mere politician, equally with the pious man, ought to respect and to cherish them. A volume could not trace all their connections with private and public felicity. Let it simply be asked, where is the security for property, for reputation, for life, if the sense of religious obligation desert the oaths which are the instruments of investigation in courts of justice? And let us with caution indulge the supposition that morality can be maintained without religion. Whatever may be conceded to the influence of refined education on minds of peculiar structure, reason and experience both forbid us to expect, that national morality can prevail in exclusion of religious principle.

It is substantially true, that virtue or morality is a necessary spring of popular government. The rule, indeed, extends with more or less force to every species of free government. Who that is a sincere friend to it can look with indifference upon attempts to shake the foundation of the fabric?

Promote, then, as an object of primary importance, institutions for the general diffusion of knowledge. In proportion as the structure of a government gives force to public opinion, it is essential that public opinion should be enlightened.

As a very important source of strength and security, cherish public credit. One method of preserving it is to use it as sparingly as possible, avoiding occasions of expense by cultivating peace, but remembering, also, that timely disbursements, to prepare for danger, frequently prevent much greater disbursements to repel it; avoiding likewise the accumulation of debt, not only by shunning occasions of expense, but by vigorous exertions, in time of peace, to discharge the debts which unavoidable wars may have occasioned, not ungenerously throwing upon posterity the burden which we ourselves ought to bear. The execution of these maxims belongs to your representatives, but it is necessary that public opinion should co-operate. To facilitate to them the performance of their duty, it is essential that you should practically bear in mind, that towards the payment of debts there must be revenue; that to have revenue there must be taxes; that no taxes can be devised which are not more or less inconvenient and un-

pleasant; that the intrinsic embarrassment inseparable from the selection of the proper object (which is always a choice of difficulties,) ought to be a decisive motive for a candid construction of the conduct of the government in making it, and for a spirit of acquiescence in the measures for obtaining revenue, which the public exigencies may at any time dictate.

Observe good faith and justice towards all nations; cultivate peace and harmony with all. Religion and morality enjoin this conduct, and can it be that good policy does not equally enjoin it? It will be worthy of a free, enlightened, and at no distant period, a great nation, to give to mankind the magnanimous and too novel example of a people always guided by an exalted justice and benevolence. Who can doubt that, in the course of time and things, the fruits of such a plan would richly repay any temporary advantages which might be lost by a steady adherence to it; can it be that Providence has not connected the permanent felicity of a nation with its virtue? The experiment, at least, is recommended by every sentiment which ennobles human nature. Alas! is it rendered impossible by its vices?

In the execution of such a plan, nothing is more essential than that permanent, inveterate antipathies against particular nations and passionate attachments for others, should be excluded; and that, in place of them, just and amicable feelings towards all should be cultivated. The nation which indulges towards another an habitual hatred, or an habitual fondness, is in some degree a slave. It is a slave to its animosity or to its affection, either of which is sufficient to lead it astray from its duty and its interest. Antipathy in one nation against another, disposes each more readily to offer insult and injury, to lay hold of slight causes of umbrage, and to be haughty and intractable when accidental or trifling occasions of dispute occur. Hence, frequent collisions, obstinate, envenomed, and bloody contests. The nation, prompted by ill will and resentment, sometimes impels to war the government, contrary to the best calculations of policy. The government sometimes participates in the national propensity, and adopts through passion what reason would reject; at other times, it makes the animosity of the nation subservient to projects of hostility, instigated by pride, ambition, and other sinister and pernicious motives. The peace often, sometimes perhaps the liberty of nations, has been the victim.

So likewise, a passionate attachment of one nation for another produces a variety of evils. Sympathy for the favorite nation, facilitating the illusion of an imaginary common interest, in cases where no real common interest exists, and infusing into one the enmities of the other, betrays the former into a participation in the quarrels and wars of the latter, without adequate inducements or justification. It leads also to concessions, to the favorite nation, of privileges denied to others, which is apt doubly to injure the nation making the concessions, by unnecessarily parting with what ought to have been retained, and by exciting jealousy, ill will, and a disposition to retaliate in the parties from whom equal privileges are withheld; and it gives to ambitious, corrupted or deluded citizens, who devote themselves to the favorite nation facility to betray or sacrifice the interests of their own country, without odium, sometimes even with popularity; gilding with the appearances of a virtuous

sense of obligation, a commendable deference for public opinion, or a laudable zeal for public good, the base or foolish compliances of ambition, corruption, or infatuation.

As avenues to foreign influence in innumerable ways, such attachments are particularly alarming to the truly enlightened and independent patriot. How many opportunities do they afford to tamper with domestic factions, to practice the arts of seduction, to mislead public opinion, to influence or awe the public councils! Such an attachment, a small or weak, towards a great and powerful nation, dooms the former to be the satellite of the latter.

Against the insidious wiles of foreign influence, (I conjure you to believe me fellow citizens,) the jealousy of a free people ought to be constantly awake; since history and experience prove, that foreign influence is one of the most baneful foes of republican government. But that jealousy, to be useful, must be impartial; else it becomes the instrument of the very influence to be avoided, instead of a defense against it. Excessive partiality for one foreign nation and excessive dislike of another, cause those whom they actuate to see danger only on one side, and serve to veil and even second the arts of influence on the other. Real patriots, who may resist the intrigues of the favorite, are liable to become suspected and odious; while its tools and dupes usurp the applause and confidence of the people, to surrender their interests.

The great rule of conduct for us, in regard to foreign nations, is, in extending our commercial relations, to have with them as little political connection as possible. So far as we have already formed engagements, let them be fulfilled with perfect good faith:—Here let us stop.

Europe has a set of primary interests, which to us have none, or a very remote relation. Hence, she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns. Hence, therefore, must be unwise in us to implicate ourselves by artificial ties, in the ordinary vicissitudes of her politics, or the ordinary combination and collisions of her friendships or enmities.

Our detached and distant situation invites and enables us to pursue a different course. We remain one people, under an efficient government, the period is not far off when we may defy material injury from external annoyance; when we may take such an attitude as will cause the neutrality we may at any time resolve upon, to be scrupulously respected; when belligerent nations, under the impossibility of making acquisitions upon us, will not lightly hazard the giving us provocation, when we may choose peace or war as our interest, guided by justice, shall counsel.

Why forego the advantages of so peculiar a situation? Why quit our own to stand upon foreign ground? Why, by interweaving our destiny with that of any part of Europe, entangle our peace and prosperity in the toils of European ambition, rivalry, interest, humor, or caprice?

It is our true policy to steer clear of permanent alliance with any portion of the foreign world; so far, I mean, as we are now at liberty to do it; for let me not be understood as capable of patronizing infidelity to existing engagements. I hold the maxim no less applicable to public than to private affairs, that honesty is always the best policy: I repeat it, therefore; let those engagements be observed in their genuine sense. But in my opinion,

unnecessary, and would be unwise to extend them.

Taking care always to keep ourselves by fitable establishments, on a respectable defensive posture, we may safely trust to temporary alliances for extraordinary emergencies.

Harmony, liberal intercourse with all nations, are recommended by policy, humanity, and interest. But even our commercial policy would hold an equal and impartial hand; neither seeking nor granting exclusive favors or preferences; consulting the natural course of things; diffusing and diversifying by gentle means the streams of commerce, but forcing nothing; establishing with powers so disposed, in order to give trade a stable course, to define the rights of our merchants, and to enable the government to support them, conventional rules of intercourse, the best that present circumstances and mutual opinion will permit, but temporary, and liable to be from time to time abandoned or varied as experience and circumstances shall dictate; constantly keeping in view, that it is folly in one nation to look for disinterested favors from another; that it must pay with a portion of its independence for whatever it may accept under that character; that by such acceptance, it may place itself in the condition of having given equivalents for nominal favors, and yet of being reproached with ingratitude for not giving more. There can be no greater error than to expect, or calculate upon real favors from nation to nation. It is a illusion which experience must cure, which just pride ought to discard.

In offering to you, my countrymen, these counsels of an old and affectionate friend, I am not hope they will make the strong and lasting impression I could wish; that they will control the usual current of the passions, or prevent our nation from running the course which has hitherto marked the destiny of nations, but if I may even flatter myself that they may be productive of some partial benefit, some occasional good; that they may now and then recur to moderate the fury of party spirit, to warn against the mischiefs of foreign intrigue, to guard against the impostures of pretended patriotism; this hope will be a full compensation for the solicitude for your welfare by which they have been dictated.

How far, in the discharge of my official duties, I have been guided by the principles which have been delineated, the public records and other evidences of my conduct must witness to you and to the world. To myself, the assurance of my own conscience is, that have, at least, believed myself to be guided by them.

In relating to the still subsisting war in Europe, my proclamation of the 22nd of April, 1793, is the index to my plan. Sanctioned by your approving voice, and by that of your representatives in both Houses of Congress, the spirit of that measure has con-

tinually governed me, uninfluenced by any attempts to deter or divert me from it.

After deliberate examination, with the aid of the best lights I could obtain, I was well satisfied that our country, under all the circumstances of the case, had a right to take, and was bound, in duty and interest, to take a neutral position. Having taken it, I determined, as far as should depend upon me, to maintain it with moderation, perseverance and firmness.

The considerations which respect the right to hold this conduct, it is not necessary on this occasion to detail. I will only observe that, according to my understanding of the matter, that right, so far from being denied by any of the belligerent powers, has been virtually admitted by all.

The duty of holding a neutral conduct may be inferred, without any thing more, from the obligation which justice and humanity impose on every nation, in cases in which it is free to act, to maintain inviolate the relations of peace and amity towards other nations.

The inducements of interest for observing that conduct will best be referred to your own reflections and experience. With me, a predominant motive has been to endeavor to gain time to our country to settle and mature its yet recent institutions, and to progress, without interruption, to that degree of strength, and consistency which is necessary to give it, humanly speaking, the command of its own fortunes.

Though in reviewing the incidents of my administration, I am unconscious of intentional error, I am nevertheless too sensible of my defects not to think it probable that I may have committed many errors. Whatever they may be, I fervently beseech the Almighty to avert or mitigate the evils to which they may tend. I shall also carry with me the hope that my country will never cease to view them with indulgence; and that, after forty-five years of my life dedicated to its service, with an upright zeal, the faults of incompetent abilities will be consigned to oblivion, as myself must soon be to the mansions of rest.

Relying on its kindness in this as in other things, and actuated by that fervent love towards it, which is so natural to a man who views in it the native soil of himself and his progenitors for several generations; I anticipate with pleasing expectation that retreat in which I promise myself to realize, without alloy, the sweet enjoyment of partaking, in the midst of my fellow citizens, the benign influence of good laws under a free government—the ever favorite object of my heart, and the happy reward, as I trust, of our mutual cares, labors and dangers.

GEO. WASHINGTON.

United States,
17th September, 1796.

Constitution Insured for \$500,000

The original draft of the Constitution, signed by James Wilson, secretary of the constitutional convention, was insured for \$500,000 during the short period it was placed on display in Independence hall in

Philadelphia during the four months' sesquicentennial celebration of the Constitution there in 1937. The draft is kept by the Pennsylvania Historical society and during the days it was on display it was heavily guarded.

LINCOLN'S GETTYSBURG ADDRESS

"Fourscore and seven years ago our fathers brought forth on this continent a new nation, conceived in liberty and dedicated to the proposition that all men are created equal.

"Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battlefield of that war. We have come to dedicate a portion of that field as a final resting place for those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this.

"But, in a larger sense, we cannot dedicate—we cannot consecrate—we cannot hallow—this ground. The brave men, living and dead, who struggled here have consecrated it, far

above our poor power to add or detract. The world will little note nor long remember what we say here, but it can never forget what the did here. It is for us the living, rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us—that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion—that we here highly resolve that these dead shall not have died in vain—that this nation under God, shall have a new birth of freedom—and that government of the people, by the people, for the people shall not perish from the earth."

THE MONROE DOCTRINE

Promulgated by President James Monroe in his message to Congress, Dec. 2, 1823, to warn European nations away from the New World and to dissuade them from attempting to regain lost colonies here, the Monroe doctrine has since been interpreted and expanded as a cornerstone of United States' foreign policy to include policing the Latin and Central American nations, to upholding governments, to collecting debts and keeping peace generally in the Western Hemisphere. Not always have the United States' efforts been appreciated and, in the opinion of some, the Inter-American Conference for the Maintenance of Peace, held in December, 1936, in Buenos Aires, restated the Monroe Doctrine to mean that not the United States alone would be responsible for keeping the peace but that all the American republics, gathered in Argentina, would pledge themselves to that end.

The Monroe Doctrine was pronounced at a time when Czar Alexander of Russia was attempting to preserve the divine authority of kings in Europe after the Napoleonic wars and while Great Britain was anxious to keep her lucrative trade with the ex-Spanish colonies in the New World which had declared their independence. George Canning, British foreign minister, fearful lest restoration of Spanish power in South America endanger British trade, suggested a mutual agreement between the United States and Great Britain. His theories were embodied in Monroe's message to Congress which, however, omitted reference to Great Britain.

The doctrine is in two parts, the first dealing with the existent boundary disputes in the northwest and the second with the Spanish situation.

As President Monroe gave the doctrine:

"In the discussions to which this interest has given rise and in the arrangements by which they may terminate, the occasion has been judged proper for asserting, as a principle in which the rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European powers. It was stated at the commencement of the last session that a great effort was then making in Spain and Portugal to improve the condition of the people of those countries, and that it appeared to be conducted with extraordinary moderation. It need scarcely be remarked that the result has been so far very different from what was then anticipated. Of events in that quarter

of the globe, with which we have so much intercourse and from which we derive our origin, we have always been anxious and interested spectators. The citizens of the United States cherish sentiments the most friendly in favor of the liberty and happiness of their fellow-men on that side of the Atlantic. In the wars of the European powers in matters relating to themselves, we have never taken any part, nor does it comport with our policy so to do. It is only when our rights are invaded or seriously menaced, that we resent injuries or make preparation for our defense. With the movements in this hemisphere we are, of necessity, more immediately connected and by causes which must be obvious to all enlightened and impartial observers. The political system of the allied powers is essentially different in this respect from that of America. This difference proceeds from that which exists in their respective governments. And to the defense of our own, which has been achieved by the loss of so much blood and treasure, and matured by the wisdom of their most enlightened citizens, and under which we have enjoyed unexampled felicity, this whole nation is devoted.

We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered, and shall not interfere. But with the governments who have declared their independence and maintained it and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any intervention for the purpose of oppressing them or controlling in any other manner their destiny, by any European power, in any other light than as the manifestation of an unfriendly disposition toward the United States. . . . Our policy in regard to Europe, which was adopted at an early stage of the war, which have so long agitated that quarter of the globe, nevertheless remains the same, which is, not to interfere in the internal concerns of any of its powers; to consider the government de facto as the legitimate government for us; to cultivate friendly relations with it, and to preserve those relations by a frank, firm, and manly policy; meeting, in all instances, the just claims of every power submitting to injuries from none. But in regard to those continents, circumstances are

minently and conspicuously different. It is impossible that the allied powers should extend their political system to any portion of either continent without endangering our peace and happiness; nor can anyone believe that our southern brethren, if left to themselves, would adopt it of their own accord. It is equally impossible, therefore, that we should behold such interposition, in any form, with indifference."

This doctrine which was considered so fundamental a part of our foreign policy, has been invoked by many presidents since Monroe. When European nations were trying to prevent Texas' annexation to the United States, President Polk declared:

"It should be distinctly announced to the world as our settled policy, that no future European colony or dominion shall, with our consent, be planted or established on any part of the North American continent."

Thus the doctrine was interpreted to include acquisition by voluntary transfer or conquest of occupied territory and a guarantee of the status quo in North America.

Trouble again arose with Europe during the Civil war when the French set up Maximilian of Austria as emperor of Mexico but he United States, torn by war itself, could not protest. However in 1865 the United States minister in Paris was instructed to tell the French government that:

"Presence and operations of a French army in Mexico and its maintenance of an authority there, which rested upon force and not the free will of the people of Mexico, is a cause of serious concern to the United States—they will regard the effort to establish permanently a foreign imperial government in Mexico as disallowable and impracticable."

The French withdrew.

President Grant was the next to revive the Monroe doctrine in relation to his policy with Santo Domingo.

He said:

"The doctrine formulated by President Monroe has been adhered to by all political parties, and I now deem it important to assert an equally important principle, that hereafter no territory on this continent shall be regarded as subject to transfer to European powers."

Again in 1895 when Great Britain and Venezuela were fighting over the boundary between the latter and British Guiana, President Cleveland and Secretary of State Olney demanded that the dispute be arbitrated.

In the constitution drawn up by the Cuban government, the Platt amendment gave the United States power to intervene in the affairs of Cuba. This was called by Secretary of State Root merely the Monroe Doctrine in treaty form.

The Monroe Doctrine, as emphasized by President Theodore Roosevelt's corollary,

gave the United States power to intervene in case that the social, political or industrial demoralization in the Americas demanded intervention by some outside power. The United States had become the "Big Brother" for smaller nations in the Western Hemisphere. It was largely upon this corollary that the United States stepped in on various occasions in Nicaragua, Honduras, Cuba, Haiti, Panama and Santo Domingo.

President Wilson in 1913 announced to the world that the United States respects only "the orderly processes of just government based upon law and not upon arbitrary or irregular force." The same year he made his Mobile speech in which he declared: "The United States will never again seek one additional foot of territory by conquest."

Because of the Monroe Doctrine many American statesmen decried the first League of Nations covenant and so the following was added:

"Nothing in this covenant shall be deemed to affect the validity of international engagements, such as treaties of arbitration or regional understandings like the Monroe Doctrine for securing the maintenance of peace."

President Franklin Roosevelt moved a step closer toward the stand taken by the conference of 1936 when he stated, Dec. 23, 1933, in Washington:

"It therefore has seemed clear to me as president that the time has come to supplement and to implement the declaration of President Wilson by the further declaration that the definite policy of the United States from now on is one opposed to armed intervention."

"The maintenance of constitutional government in other nations is not a sacred obligation devolving upon the United States alone. The maintenance of law and the orderly processes of government in this hemisphere is the concern of each individual nation, within its own borders first of all."

"It is only if and when the failure of orderly processes affects the other nations of the continent that it becomes their concern; and the point to stress is that in such an event it becomes the joint concern of a whole continent in which we are all neighbors."

The main provisions of the Inter-American Conference for the Maintenance of Peace in Buenos Aires of December, 1936, were: that an external threat to one is a threat to all; that the American nations will unite in common resistance to any attempt at intervention by a non-American power; that they will refrain from intervening in one another's internal affairs; and that in case of hostilities between two American states all the others will join together as neutrals and consult in the interests of peace.

The Monroe Doctrine has become a non-intervention pact for all American nations.

FIRST COLLEGES OPEN TO WOMEN IN THE UNITED STATES

The year 1933 marked the 100th anniversary of college education for women. In 1833 Oberlin college in Ohio admitted women to the preparatory department. By 1837 our women were qualified to enter the collegiate department and were graduated in 1842. Antioch college in Ohio was founded by Horace Mann in 1852 as a coeducational institution. The Georgia Female college, Ga., was founded in 1839, the first chartered college for women.

In 1846 the Illinois Women's College was

founded in Jacksonville, Ill., and has been in operation continuously. Its name was changed to MacMurray College for Women in 1930. Rockford (Ill.) College for Women was founded in 1847. Elmira Female college, now Elmira College, Elmira, N. Y., was opened in 1855 and claims to be the first college to confer degrees upon women for courses equivalent to those in colleges for men. After the Civil War, coeducational systems were firmly established.

DECLARATION OF THE UNITED NATIONS

Twenty-six countries at war with the Axis powers pledged themselves (Jan. 2, 1942) in Washington in a "Declaration by the United Nations" not to make a separate armistice or peace and to employ full military or economic resources against the enemy. Signatory powers to the Declaration were the United States, United Kingdom of Great Britain and Northern Ireland, Union of Soviet Socialist Republics, China, Australia, Belgium, Canada, Colombia signed Jan. 17, 1943; Costa Rica, Cuba, Czechoslovakia, Dominican Republic, El Salvador, Greece, Guatemala, Haiti, Honduras, India, Luxembourg, the Netherlands, New Zealand, Nicaragua, Norway, Panama, Poland.

These governments "having subscribed to a common program of purposes and principles embodied in the joint declaration of the President of the United States of America and the Prime Minister of the United King-

dom of Great Britain and Northern Ireland dated Aug. 14, 1941, known as the Atlantic Charter, being convinced that complete victory over their enemies is essential to defend life, liberty, independence and religious freedom, and to preserve human rights and justice in their own lands as well as in other lands, and that they are now engaged in a common struggle against savage and brutal forces seeking to subjugate the world, declare:

"(1) Each government pledges itself to employ its full resources, military or economic, against those members of the Tripartite Pact and its adherents with which such government is at war.

"(2) Each government pledges itself to cooperate with the governments signatory hereto and not to make a separate armistice or peace with the enemies."

PREAMBLE

OF THE SECURITY CHARTER OF THE UNITED NATIONS

We the peoples of the United Nations determined

To save succeeding generations from the source of war which twice in our lifetime has brought untold sorrow to mankind, and

To reaffirm faith in fundamental human rights, in the dignity and worth of the human person, in the equal rights of men and women and of the nations large and small, and

To establish conditions under which justice and respect for the obligations arising from treaties and other sources of international law can be maintained, and

To promote social progress and better standards of life in larger freedom, And for these ends

To practice tolerance and live together in peace with one another as

good neighbors,"and

To unite our strength to maintain international peace and security, and

To insure, by the acceptance of principles and the institution of method, that armed force shall not be used save in the common interest, and

To employ international machinery for the promotion of the economic and social advancement of all peoples,

Have resolved to combine our efforts to accomplish these aims.

Accordingly, our respective governments, through representatives assembled in the City of San Francisco, who have exhibited their full powers found to be in good and due form, have agreed to the present charter of the United Nations and do hereby establish an international organization to be known as the United Nations.

THE SECURITY CHARTER OF THE UNITED NATIONS

(As Drawn at San Francisco)

CHAPTER I PURPOSES AND PRINCIPLES

Article I.

The purposes of the United Nations are:

1. To maintain international peace and security, and to that end: To take effective collective measures for the prevention and removal of threats to the peace and for the suppression of acts of aggression or other breaches of the peace, and to bring about by peaceful means, and in conformity with the principles of justice and international law, adjustment or settlement of international disputes or situations which might lead to a breach of the peace;

2. To develop friendly relations among nations based on respect for the principle of equal rights and self-determination of peoples, and to take other appropriate measures to strengthen universal peace;

3. To achieve international cooperation in solving international problems of an economic, social, cultural or humanitarian character, and in promoting and encouraging respect for human rights and for the fundamental freedoms for all without distinction as to race, sex, language or religion; and

4. To be a center for harmonizing the actions of nations in the attainment of these common ends.

PRINCIPLES

Article 2.

The organization and its members, in pursuit of the purposes stated in Article I, shall act in accordance with the following principles:

1. The organization is based on the principle of the sovereign equality of all members.

2. All members, in order to ensure to all of them the rights and benefits resulting from membership, shall fulfill in good faith the obligations assumed by them in accordance with the present charter.

3. All members shall settle their international disputes by peaceful means in such a manner that international peace and security, and justice, are not endangered.

4. All members shall refrain in their international relations from threat or use of force against the territorial integrity or political independence of any member state, or in any other manner inconsistent with the purposes of the United Nations.

5. All members shall give the United Nations every assistance in any action it takes in accordance with the provisions of the present charter, and shall refrain from giving assistance to any state against which the United Nations is taking preventive or enforcement action.

6. The United Nations shall ensure that states not members act in accordance with these principles so far as may be necessary for the maintenance of international peace and security.

7. Nothing contained in the present Charter shall authorize the United Nations to intervene in matters which are essentially within the domestic jurisdiction of any state or shall require the members to submit such matters to settlement under the present Charter; but this principle shall not prejudice the application of enforcement measures under Chapter VII.

CHAPTER II MEMBERSHIP

Article 3.

The original members of the United Nations shall be the states which, having participated in the United Nations Conference on International Organization at San Francisco, or having previously signed the declaration of the United Nations of January 1, 1942, sign the present Charter and ratify it in accordance with Article 82.

Article 4.

1. Membership in the United Nations is open to all other peace-loving states which accept the obligations contained in the present Charter and which, in the judgment of the organization, are able and willing to carry out these obligations.

2. The admission of any such state to membership in the United Nations will be effected by a decision of the General Assembly upon the recommendation of the Security Council.

3. The action of the General Assembly shall be promptly communicated by the Secretary General to the government of the United States of America, as the depositary of the Charter, and to the governments of all other members of the United Nations.

Article 5.

A member of the United Nations against which preventive or enforcement action has been taken by the Security Council may be suspended from the exercise of the rights and privileges of membership by the General Assembly upon the recommendation of the Security Council. The exercise of these rights and privileges may be restored by the Security Council.

Article 6.

A member of the United Nations which has persistently violated the principles contained in the present Charter may be expelled from the organization by the General Assembly upon the recommendation of the Security Council.

CHAPTER III ORGANS

Article 7.

1. There are established as the principal organs of the United Nations: a General Assembly, a Security Council, an Economic and Social Council, an International Court of Justice and a Secretariat.

2. Such subsidiary organs as may be found necessary may be established in accordance with the present Charter.

Article 8.

The United Nations shall place no restrictions on the eligibility of men and women to participate in any capacity and under conditions of equality in the principal and subsidiary organs.

CHAPTER IV THE GENERAL ASSEMBLY COMPOSITION

Article 10.

The General Assembly shall consist of all the members of the United Nations. Each member shall have not more than five representatives in the General Assembly.

FUNCTIONS AND POWERS

Article 11.

The General Assembly may discuss any questions on any matters within the scope of the present Charter or relating to the powers and functions of any organs provided in the present Charter, and, except as provided in Article 12 (X), may make recommendations to the members of the United Nations or to the Security Council or both on any such questions or matters.

Article 12.

1. The General Assembly may consider the general principles of co-operation in the maintenance of international peace and security, including the principles governing disarmament and the regulations of armaments, and may make recommendations with regard to such principles to the members or to the Security Council or both.

2. The General Assembly may discuss any questions relating to the maintenance of international peace and security brought before it by any members of the United Nations, or by the Security Council, or by a nonmember state in accordance with the provisions of Article 38, Paragraph 2, and, except as provided in Article 12, may make recommendations with regard to any such questions to the state or states concerned or to the Security Council or both. A question on which action is necessary shall be referred to the Security Council by the General Assembly either before or after discussion.

3. The General Assembly may call the attention of the Security Council to situations which are likely to endanger international peace and security.

4. The powers of the General Assembly set out in paragraphs 1, 2 and 3 of this article shall not limit the general scope of Article 11.

Article 12 (X).

1. While the Security Council is exercising in respect of any dispute or situation the functions assigned to it in the present Charter, the General Assembly shall not make any recommendation with regard to that dispute or situation unless the Security Council so requests.

2. The Secretary General, with the consent of the Security Council, shall notify the General Assembly at each session of any matters relative to the maintenance of international peace and security which are being dealt with by the Security Council and shall similarly notify the General Assembly, or the members of the United Nations if the General Assembly is not in session, immediately the Security Council ceases to deal with such matters.

Article 13.

1. The General Assembly shall initiate studies and make recommendations for the purpose of:

A. Promoting international cooperation in the political field and encouraging the progressive development of international law and its codification;

B. Promoting international cooperation in the economic, social, cultural, educational and health fields and assisting in the realization of human rights and basic freedoms for all without distinction as to race, sex, language or religion.

2. The further responsibilities, functions and powers of the General Assembly with respect to matters mentioned in Paragraph B above are set forth in Chapters IX and IX (X).

Article 14.

Subject to the provisions of Article 12 (X), the General Assembly may recommend measures for the peaceful adjustment of any situation, regardless of origin, which it deems likely to impair the general welfare or friendly relations among nations, including situations resulting from a violation of the provisions of the present charter setting forth the purposes and principles of the United Nations.

Article 15.

1. The General Assembly shall receive and consider annual and special reports from the Security Council; these reports shall include an account of the measures that the Security Council has adopted or applied to maintain international peace and security.

2. The General Assembly shall receive and consider reports from the other bodies of the organization.

Article 16.

The General Assembly shall have power to approve the trusteeship agreements for areas not designated as strategic, and to perform such other functions as are assigned to it under chapters XII (X) and XII (Y).

Article 17.

1. The General Assembly shall consider and approve the budget of the organization.

2. The General Assembly shall consider and approve any financial and budgetary arrangements with specialized agencies referred to in Article 60 and shall examine the administrative budgets of such specialized agencies with a view to making recommendations to the agencies concerned.

3. The expenses of the organization shall be borne by the members as apportioned by the General Assembly.

VOTING

Article 18.

1. Each member of the United Nations shall have one vote in the General Assembly.

2. A member which is in arrears in the payments of its financial contributions to the organization shall have no vote if the amount of its arrears equals or exceeds the amount of the contributions due from it for the preceding two full years. The General Assembly may, nevertheless, permit such a member to vote if it is satisfied that the failure to pay is due to conditions beyond the control of the member.

Article 19.

Decisions of the General Assembly on important questions shall be made by a two-thirds majority of those present and voting. These questions shall include: Recommendations with respect to the maintenance of international peace and security, the election of the nonpermanent members of the Security Council, the election of the members of the economic and social council, the election of the members of the United Nations which are to designate the members of the trusteeship council in accordance with the provisions of Article 86 (C), the admission

of new members to the United Nations, the expulsion of members, the suspension of the rights and privileges of members, questions relating to the operations of the trusteeship system and budgetary questions. Decisions on other questions—including the determination of additional categories of questions—shall be decided by a two-thirds majority—shall be made by a majority of those present and voting.

Article 20.

The general assembly shall meet in regular annual sessions and in such special sessions as occasion may require. Special sessions shall be convoked by the secretary general at the request of the security council or a majority of the members of the United Nations.

Article 21.

The general assembly shall adopt its own rules of procedure. It shall elect a president for each session.

Article 22.

The general assembly may establish such subsidiary organs as it deems necessary for the performance of its functions.

CHAPTER V THE SECURITY COUNCIL COMPOSITION

Article 23.

1. The Security Council shall consist of members of the United Nations. The United States of America, the United Kingdom, Great Britain and Northern Ireland, the Union of Soviet Socialist Republics, the Republic of China, and France shall be permanent members of the Security Council. The General Assembly shall elect six other members of the United Nations to be nonpermanent members of the Security Council due regard being specially paid, on the first instance to the contribution of members of the United Nations to the maintenance of international peace and security and to other purposes of the organization, and to equitable geographical distribution.

2. The nonpermanent members of the Security Council shall be elected for a term of two years, in the first election of the nonpermanent members, however, three shall be chosen for a term of one year. A retiring member shall not be eligible for immediate re-election.

3. Each member of the Security Council shall have one representative.

PRIMARY RESPONSIBILITY

Article 24.

1. In order to ensure prompt and effective action by the United Nations, its members confer on the Security Council primary responsibility for the maintenance of international peace and security, and agree to carry out its duties under this responsibility. The Security Council acts on their behalf.

2. In discharging these duties the Security Council shall act in accordance with the purposes and principles of the United Nations. The specific powers granted to the Security Council for the discharge of these duties are laid down in Chapters VI, VII and VIII.

3. The Security Council shall submit an annual and, when necessary, special reports to the General Assembly for its consideration.

Article 25.

The members of the United Nations agree to accept and carry out the decisions of the Security Council in accordance with the provisions of the present charter.

Article 26.

In order to promote the establishment and maintenance of international peace and security with the least diversion for armaments of the world's human and economic resources, the Security Council shall be responsible for formulating, with the assistance of the military staff committee, plans to be submitted to the members of the United Nations for the establishment of a system for the regulation of armaments.

VOTING**Article 27.**

Each member of the Security Council shall have one vote.

Article 28.

Decisions of the Security Council on procedure matters shall be made by an affirmative vote of seven members.

Article 29.

Decisions of the Security Council on all other matters shall be made by an affirmative vote of seven members, including the concurring votes of the permanent members; provided that, in decisions under articles 1 to 17, inclusive, and under the last sentence of paragraph 2 of article 18, a party to a dispute shall abstain from voting.

PROCEDURE**Article 30.**

1. The Security Council shall be so organized as to be able to function continuously. Each member of the Security Council shall for this purpose be represented at all times at the seat of the organization.

2. The Security Council shall hold periodic meetings, at which each of its members may, if it so desires, be represented by a member of the government or by some other specially designated representative.

3. The Security Council may hold meetings at such places other than the seat of the organization as in its judgment may best facilitate its work.

Article 31.

The Security Council may establish such subsidiary organs as it deems necessary for the performance of its functions.

Article 32.

The Security Council shall adopt its own rules and procedure, including the method of selecting its president.

Article 33.

Any member of the United Nations may participate in the discussion of any question brought before the Security Council whenever the latter considers that the interests of that member are specially affected.

Article 34.

Any member of the United Nations which is not a member of the Security Council or any state not a member of the United Nations, if it is a party to a dispute under consideration by the Security Council, shall be invited to participate in the discussion relating to the dispute. The Security Council shall lay down such conditions as it may deem just for the participation of a state which is not a member of the United Nations.

CHAPTER VI**PACIFIC SETTLEMENT OF DISPUTES****Article 36.**

1. The parties to any dispute, the continuance of which is likely to endanger the maintenance of international peace and security, shall, first of all, seek a solution by negotiation, inquiry, mediation, conciliation, arbitration, judicial settlement, resort to

regional agencies or arrangements, or other peaceful means of their own choice.

2. The Security Council shall, when it deems necessary, call upon the parties to settle their dispute by such means.

Article 37.

The Security Council may investigate any dispute, or any situation which might lead to international friction or give rise to a dispute, in order to determine whether its continuance is likely to endanger the maintenance of international peace and security.

Article 38.

1. Any member of the United Nations may bring any dispute or any situation of the nature referred to in Article 37 to the attention of the Security Council, or of the General Assembly which will act in accordance with the provisions of Articles 12 and 12X.

2. A state which is not a member of the United Nations may bring to the attention of the Security Council or of the General Assembly any dispute to which it is a party, if it accepts in advance, for the purposes of the dispute, the obligations of pacific settlement provided in the present charter.

Article 39.

1. The Security Council may, at any stage of a dispute of the nature referred to in Article 36 or of a situation of like nature, recommend appropriate procedures or methods of adjustment.

2. The Security Council should take into consideration any procedures for the settlement of the dispute which have already been adopted by the parties.

3. In making recommendations under this article the Security Council should take into consideration that legal disputes should as a general rule be referred by parties to the international court of justice in accordance with the provisions of the statute of the court.

Article 40.

1. Should the parties to a dispute of the nature referred to in Article 36 fail to settle it by the means indicated in that article, they shall refer it to the Security Council.

2. If the Security Council deems that the continuance of the dispute is in fact likely to endanger the maintenance of international peace and security, it shall decide whether to take action under Article 39 or to recommend such terms of settlement as it may consider appropriate.

Article 41.

Without prejudice to the provisions of Articles 36-40 of this chapter, the Security Council may if all the parties to any dispute so request, make recommendations to the parties with a view to a peaceful settlement of the dispute.

CHAPTER VII**ACTION WITH RESPECT TO THREATS TO THE PEACE****Article 43.**

The Security Council shall determine the existence of any threat to the peace, breach of the peace, or act of aggression and shall make recommendations, or decide what measures shall be taken in accordance with the provisions of Articles 45 and 46, to maintain or restore international peace and security.

Article 44.

In order to prevent an aggravation of the situation, the Security Council may, before making the recommendations or deciding upon the measures provided for in Article 43, call upon the parties concerned to comply

with such provisional measures as it deems necessary or desirable. Such provisional measures shall be without prejudice to the rights, claims or position of the parties concerned. The Security Council shall duly take account of failure to comply with such provisional measures.

Article 45.

The Security Council may decide what measures not involving the use of armed force are to be employed to give effect to its decisions, and it may call upon members of the United Nations to apply such measures. These may include complete or partial interruptions of economic relations and of rail, sea, air, postal, telegraphic, radio and other means of communication, and the severance of diplomatic relations.

Article 46.

Should the Security Council consider that measures provided for in Article 45 would be inadequate or have proved to be inadequate, it may take such action by air, sea or land forces as may be necessary to maintain or restore international peace and security. Such action may include demonstrations, blockade and other operations by air, sea or land forces of members of the United Nations.

Article 47.

1. All members of the United Nations, in order to contribute to the maintenance of international peace and security, undertake to make available to the Security Council, on its call and in accordance with a special agreement or agreements, armed forces, assistance, and facilities, including rights of passage, necessary for the purpose of maintaining international peace and security.

2. Such agreement or agreements shall govern the numbers and types of forces, their degree of readiness and general location, and the nature of the facilities and assistance to be provided.

3. The agreement or agreements shall be negotiated as soon as possible on the initiative of the Security Council. They shall be concluded between the Security Council and member states or between the Security Council and groups of member states and shall be subject to ratification by the signatory states in accordance with their constitutional processes.

Article 48.

When the Security Council has decided to use force it shall, before calling upon a member not represented on it to provide armed forces in fulfillment of the obligations assumed under Article 47, invite that member, if the member so desires, to participate in the decisions of the Security Council concerning the employment of contingents of that member's armed forces.

Article 49.

In order to enable the United Nations to take urgent military measures, members shall hold immediately available national air force contingents for combined international enforcement action. The strength and degree of readiness of these contingents and plans for their combined action shall be determined, within the limits laid down in the special agreement or agreements referred to in Article 47, by the Security Council with the assistance of the military staff committee.

Article 50.

Plans for the application of armed force shall be made by the Security Council with the assistance of the military staff committee.

Article 51.

1. There shall be established a military staff committee to advise and assist the

Security Council on all questions relating to the Security Council's military requirements for the maintenance of international peace and security, the employment and command of forces placed at its disposal the regulation of armaments and possible disarmament.

2. The military staff committees shall consist of the chiefs of staff of the permanent members of the Security Council or their representatives. Any member of the United Nations not permanently represented on the committee shall be invited by the committee to be associated with it when the efficient discharge of the committee's responsibilities requires the participation of that member in its work.

3. The military staff committee shall be responsible under the Security Council for the strategic direction of any armed force placed at the disposal of the Security Council. Questions relating to the command of such forces shall be dealt with subsequently.

4. The military staff committee, with the authorization of the Security Council, after consultation with appropriate regional agencies, may establish regional subcommittees.

Article 52.

1. The action required to carry out the decisions of the Security Council for the maintenance of international peace and security shall be taken by all the members of the United Nations or by some of them as the Security Council may determine.

2. Such decisions shall be carried out by the members of the United Nations directly and through their action in the appropriate international agencies of which they are members.

Article 53.

The members of the United Nations shall join in affording mutual assistance in carrying out the measures decided upon by the Security Council.

Article 54.

If preventive or enforcement measures against any state are taken by the Security Council, any other state, whether a member of the United Nations or not, which finds itself confronted with special economic problems arising from the carrying out of those measures shall have the right to consult the Security Council with regard to a solution of those problems.

Article 55.

Nothing in the present charter shall impair the inherent right of individual or collective self-defense if an armed attack occurs against a member of the organization until the Security Council has taken measures necessary to maintain international peace and security. Measures taken by members in the exercise of this right of self-defense shall be immediately reported to the Security Council and shall not in any way affect the authority and responsibility of the Security Council under the present charter to take at any time such action as it may deem necessary in order to maintain or restore international peace and security.

CHAPTER VIII REGIONAL ARRANGEMENTS

Article 55 (SIC.)

1. Nothing in the present charter precludes the existence of regional arrangements or agencies for dealing with such matters relating to the maintenance of international peace and security as are appropriate for

regional action, provided that such arrangements or agencies and their activities are consistent with the purposes and principles of the organization.

2. The members of the United Nations entering into such arrangements or constituting such agencies shall make every effort to achieve peaceful settlement of local disputes through such regional arrangements or by such regional agencies before referring them to the Security Council.

3. The Security Council should encourage the development of peaceful settlement of local disputes through such regional arrangements or by such regional agencies either by the initiative of the states concerned or by reference from the Security Council.

4. This article in no way impairs the application of articles 36 and 37.

Article 56.

1. The Security Council shall, where appropriate, utilize such arrangements or agencies for enforcement action under its authority. But no enforcement action shall be taken under regional arrangements or by regional agencies without the authorization of the Security Council, with the exception of measures against any enemy state, as described below, provided for pursuant to article 80, or in regional arrangements directed against renewal of aggressive policy on the part of any such state, until such time as the organization may, on request of the governments concerned, be charged with the responsibility for preventing further aggression by such a state.

2. The term "enemy state" as used in paragraph 1 of this article applies to any state which during the Second World War has been an enemy of any signatory of the present charter.

Article 57.

The Security Council shall at all times be kept fully informed of activities undertaken in contemplation under regional arrangements or by regional agencies for the maintenance of international peace and security.

CHAPTER IX INTERNATIONAL ECONOMIC AND SOCIAL CO-OPERATION

Article 58.

With a view to the creation of conditions of stability and well-being which are necessary for peaceful and friendly relations among nations based on respect for the principle of equal rights and self-determination of peoples, the United Nations shall promote:

(a) Higher standards of living, full employment and conditions of economic and social progress and development;

(b) Solutions of international economic, social, health and related problems; and international cultural and educational co-operation and

(c) Universal respect for, and observance of, human rights and fundamental freedoms for all without distinction as to race, sex, language or religion.

Article 59.

All members pledge themselves to take joint and separate action in co-operation with the organization for the achievement of the purposes set forth in Article 58.

Article 60.

1. The various specialized agencies established by intergovernmental agreement, and

having wide international responsibilities as defined in their basic instruments in economic, social, cultural, educational, health and related fields, shall be brought into relationship with the United Nations in accordance with the provisions of Article 65.

2. Specialized agencies thus brought into relationship with the organization are hereinafter referred to as "the specialized agencies."

Article 61.

The organization shall make recommendations for the co-ordination of the policies and activities of the specialized agencies.

Article 62.

The organization shall, where appropriate, initiate negotiations among the states concerned for the creation of any new specialized agency required for the accomplishment of the purposes set forth in Article 58.

Article 63.

Responsibility for the discharge of the organization's functions set forth in this chapter shall be vested in the General Assembly and, under the authority of the General Assembly, in the economic and social council, which shall have for this purpose the power set forth in Chapter IX (X).

CHAPTER IX (X) ECONOMIC AND SOCIAL COUNCIL COMPOSITION

Article 63 (SIC).

1. The economic and social council shall consist of 18 members of the United Nations elected by the General Assembly. Each member of the economic and social council shall have one representative.

2. Subject to the provisions of paragraph 3, six members of the economic and social council shall be elected each year for a term of three years. A retiring member shall be eligible for immediate re-election.

3. At the first election, 18 members of the economic and social council shall be chosen. The term of office of six members so chosen shall expire at the end of one year, and of six other members at the end of two years, in accordance with arrangements made by the general assembly.

FUNCTIONS AND POWERS

Article 64.

1. The economic and social council may make or initiate studies and reports with respect to international economic, social, cultural, educational, health, and related matters and may make recommendations with respect to any such matters to the General Assembly, to the members of the United Nations, and to the specialized agencies concerned.

2. It may make recommendations for the purpose of promoting respect for, and observance of human rights and fundamental freedoms.

3. It may prepare draft conventions for submission to the General Assembly, with respect to matters falling within its competence.

4. It may call, in accordance with the rules prescribed by the United Nations, international conferences on matters falling within its competence.

Article 65.

1. The economic and social council may enter into an agreement, approved by the General Assembly, with any of the agencies referred to in Article 60, defining the terms on which the agency concerned shall be

brought into relationship with the United Nations.

2. It may co-ordinate the activities of the specialized agencies through consultation with and recommendations to such agencies and through recommendations to the General Assembly and to the members of the United Nations.

Article 66.

1. The economic and social council is authorized to take appropriate steps to obtain regular reports from the specialized agencies. It is authorized to make arrangements with the members of the United Nations and with the specialized agencies to obtain reports on the steps taken to give effect to its own recommendations and falling within its competence which are made by the General Assembly.

2. It may communicate its observance on these reports to the General Assembly.

Article 67.

The economic and social council may furnish information to the Security Council and shall assist the Security Council upon its request.

Article 68.

1. The economic and social council shall perform such functions as falls within its competence in connection with the carrying out of the recommendations of the General Assembly.

2. It may, with the approval of the General Assembly, perform services at the request of the members of the United Nations and at the request of the specialized agencies.

3. It may perform such other functions as are specified elsewhere in the present charter and such functions as may be assigned to it by the General Assembly.

VOTING

Article 69.

1. Each member of the economic and social council shall have one vote.

2. Decisions of the economic and social council shall be taken by a majority of the members present and voting.

PROCEDURE

Article 70.

The economic and social council shall set up commissions in economic and social fields and for the promotion of human rights, and such other commissions as may be required for the performance of its functions.

Article 71.

The economic and social council shall invite any member of the United Nations to participate, without vote, in its deliberations on any matter of particular concern to that member.

Article 72.

The economic and social council may make arrangements for representatives of the specialized agencies to participate, without vote, in its deliberations and in those of the commissions established by it, and for its representatives to participate in the deliberations of the specialized agencies.

Article 73.

The economic and social council may make suitable arrangements for consultation with non-governmental organizations which are concerned with matters within its competence. Such arrangements may be made with international organizations and, where appropriate, with national organizations after consultation with the member concerned.

Article 74.

1. The economic and social council shall adopt its own rules of procedure, including

the method of selecting its president.

2. The economic and social council shall meet as required in accordance with its rules which shall include provision for the convening of meetings on request of a majority of its members.

CHAPTER X

THE INTERNATIONAL COURT OF JUSTICE

Article 64 (SIC).

The International Court of Justice shall be the principal judicial organ of the United Nations. It shall function in accordance with the annexed statute, which is based upon the statute of the permanent court of international justice and forms an integral part of the present chapter.

Article 64-A (SIC).

The International Court of Justice shall be the principal judicial organ of the United Nations made in accordance with the provisions of this chapter, placing each territory under the trusteeship system, and until such agreements have been concluded, nothing in this chapter shall be construed in or of itself to alter in any manner the rights whatsoever of any states or any peoples or the terms of existing international instruments to which members may respectively be parties.

Paragraph 1 of this article shall not be interpreted as giving grounds for delay or postponement of the negotiation and conclusion of such agreements for placing mandated and other territories under the trusteeship system as may be concluded in accordance with the provisions of this chapter.

Article 65.

1. All members of the United Nations are ipso facto parties to the statute of the International Court of Justice.

2. A state which is not a member of the United Nations may become party to the statute of the International Court of Justice on conditions to be determined in each case by the General Assembly upon recommendation of the Security Council.

Article 66.

1. Each member of the United Nations undertakes to comply with the decision of the International Court of Justice in a case to which it is a party.

2. If any party to a case fails to perform the obligations incumbent upon it under judgment rendered by the court, the other party may have recourse to the Security Council, which may, if it deems it necessary, make recommendations or decide upon measures to be taken to give effect to its judgment.

Article 67.

Nothing in the present charter shall prevent members of the United Nations from entrusting the solution of their differences to other tribunals by virtue of agreements already in existence or which may be concluded in the future.

Article 68.

1. The General Assembly of the Security Council may request the International Court of Justice to give an advisory opinion on a legal question.

2. Other organs of the United Nations or specialized agencies brought into relationship with it, which may at any time be authorized by the General Assembly, may also request advisory opinions of the court on legal questions arising within the scope of their activities.

CHAPTER XI THE SECRETARIAT

Article 69.

There shall be a secretariat comprising a secretary-general and such staff as the organization may require. The secretary-general shall be appointed by the General Assembly on the recommendation of the Security Council. He shall be the chief administrative officer of the organization.

Article 70.

The secretary-general shall act in that capacity in all meetings of the General Assembly, of the Security Council, of the Economic and Social Council, and of the Trusteeship Council, and shall perform such other functions as are entrusted to him by these organs. The secretary-general shall make an annual report to the General Assembly on the work of the organization.

Article 71.

The secretary-general may bring to the attention of the Security Council any matter which in his opinion might threaten international peace and security.

Article 72.

1. In the performance of their duties the secretary-general and the staff shall be responsible only to the organization. They shall not seek or receive instructions from any government or from any other authority external to the organization. They shall refrain from any action which might reflect on their position as international officials.

2. Each member of the organization undertakes to respect the exclusively international character of the responsibilities of the secretary-general and the staff and not to seek to influence them in the discharge of their responsibilities.

Article 73.

1. The staff shall be appointed by the secretary-general under regulations established by the General Assembly.

2. Appropriate staffs shall be permanently assigned to the Economic and Social Council, the Trusteeship Council, and, as required to other organs of the United Nations.

3. The paramount consideration in the employment of the staff and in the determination of the conditions of service shall be the necessity of securing the highest standards of efficiency, competence and integrity. Due regard shall be paid to the importance of recruiting the staff on as wide a geographical basis as possible.

CHAPTER XII POLICY REGARDING NON-SELF-GOVERNING TERRITORIES

Article 73 (SIC)

Members of the United Nations which have or assume responsibility for the administration of territories whose peoples have not yet attained a full measure of self-government recognize the principle that the interests of the inhabitants of these territories are paramount, and accept as a sacred trust the obligation to promote to the utmost, within the system of international peace and security established by the present charter, the well-being of the inhabitants of these territories, and

(A) To ensure, with due respect for the culture of the peoples concerned, their political, economic, social and educational advancement, their just treatment, and their protection against abuses;

(B) To develop self-government, to take due account of the political aspirations of the peoples, and to assist them

in the progressive development of their free political institutions, according to the particular circumstances of each territory and its peoples and their varying stages of advancement;

(C) To further international peace and security;

(D) To promote constructive measures of development, to encourage research, and to co-operate with one another and with appropriate international bodies with a view to the practical achievement of the social, economic and scientific purposes set forth in this paragraph; and

(E) To transmit regularly to the secretary-general for information purposes, subject to such limitation as security and constitutional considerations may require, statistical and other information of a technical nature relating to economic, social and educational conditions in the territories for which they are respectively responsible other than those territories to which Chapter XII (A) of the present charter applies.

Article 74.

Members of the United Nations agree that their policy in respect to the territories, to which this chapter applies, no less than in respect of their metropolitan areas, must be based on the general principle of good neighborliness, due account being taken of the interests and well-being of the rest of the world, in social, economic and commercial matters.

CHAPTER XII (X) INTERNATIONAL TRUSTEESHIP SYSTEM

Article 75.

The United Nations shall establish under its authority an international trusteeship system for the administration and supervision of such territories as may be placed thereunder by subsequent individual agreements. These territories are hereafter referred to as trust territories.

Article 76.

The basic objectives of the trusteeship system in accordance with the purposes of the United Nations laid down in Article 1 of the present charter, shall be:

(A) To further international peace and security;

(B) To promote the political, economic, social and educational advancement of the inhabitants of the trust territories, and their progressive development toward self-government or independence as may be appropriate to the particular circumstances of each territory and its peoples and the freely expressed wishes of the peoples concerned, and as may be provided by the terms of each trusteeship agreement;

(C) To encourage respect for human rights and for fundamental freedoms for all without distinction as to race, sex, language or religion, and to encourage recognition of the interdependence of the peoples of the world; and

(D) To ensure equal treatment in social, economic and commercial matters for all members of the United Nations and their nationals, and also equal treatment for the latter in the administration of justice, without prejudice to the attainment of the foregoing objectives, and subject to the provisions of Article 80.

Article 77.

1. The trusteeship system shall apply to such territories in the following categories as may be placed thereunder by means of trusteeship agreements: (a) Territories now held under mandate; (b) territories which may be detached from enemy states as a result of the second World War; and (c) territories voluntarily placed under the system by states responsible for their administration.

2. It will be a matter for subsequent agreement which territories in the foregoing categories will be brought under the trusteeship system and upon what terms.

Article 78.

The trusteeship system shall not apply to territories which have become members of the United Nations, relationship among which should be based on respect for the principle of sovereign equality.

Article 79.

The terms of trusteeship for each territory to be placed under the trusteeship system, including any alteration or amendment, shall be agreed upon by the states directly concerned including the mandatory power in the case of territories held under mandate by a member of the United Nations, and shall be approved as provided for in Article 82 and 84.

Article 80.

1. Except as may be agreed upon in individual trusteeship agreements, made in accordance with the provisions of this chapter, placing each territory under the trusteeship system, and until such agreements have been concluded, nothing in this chapter shall be construed in or of itself to alter in any manner the rights whatsoever of any states or any peoples or the terms of existing international instruments to which members may respectively be parties.

2. The Economic and Social Council shall meet as provided in accordance with its rules, which shall include provision for the convening of meetings on request of a majority of its members.

Article 81.

The trusteeship agreement shall in each case include the terms under which the trust territory will be administered and designate the authority which shall exercise the administration of the trust territory. Such authority, hereafter called the administering authority, may be one or more states of the United Nations itself.

Article 81 (X).

There may be designated, in any trusteeship agreement, a strategic area or areas which may include part or all of the trust territory to which the agreement applies, without prejudice to any special agreement or agreements made under Article 47.

Article 82.

1. All functions of the United Nations relating to strategic areas, including the approval of the terms of the trusteeship agreements and of their alteration or amendment, shall be exercised by the Security Council.

2. The basic objectives set forth in Article 76 shall be applicable to the people of each strategic area.

3. The Security Council shall, subject to the provisions of the trusteeship agreements and without prejudice to security considerations, avail itself of the assistance of the trusteeship council to perform those functions of the United Nations under the trusteeship system relating to political, economic,

social and educational matters in the strategic areas.

Article 83.

It shall be the duty of the administering authority to ensure that the trust territory shall play its part in the maintenance of international peace and security. To this end the administering authority may make use of volunteer forces, facilities and assistance from the trust territory in carrying out the obligations undertaken by the administering authority under Article 47 and as well as for local defense and the maintenance of law and order within the trust territory.

Articles 84-85.

1. The functions of the United Nations with regard to trusteeship agreements in all areas not designated as strategic, including the approval of the terms of the trusteeship agreements and of their alteration or amendment, shall be exercised by the General Assembly.

2. The trusteeship council, under the authority of the General Assembly, shall assist the General Assembly in carrying out the functions.

CHAPTER XII (Y) THE TRUSTEESHIP COUNCIL COMPOSITION

Article 86.

The Trusteeship Council shall consist of specially qualified representatives designated as follows: (a) one each by the members of the United Nations administering trust territories; (b) one each by such of the members mentioned by name in Article 23 as are administering trust territories; and (c) one each by as many other members of the United Nations elected for three-year terms by the General Assembly as may be necessary to ensure that the total number of representatives is equally divided between administering and non-administering members of the United Nations.

FUNCTIONS AND POWERS.**Article 87.**

The Trusteeship Council, in carrying out its functions as authorized by the General Assembly, may: (a) consider reports submitted by the administering authority; (b) accept petitions and examine them in consultation with the administering authority; (c) provide for periodic visits to the respective trust territories at times agreed upon with the administering authority; and (d) take these and other actions in conformity with the trusteeship agreements.

Article 88.

The Trusteeship Council shall formulate a questionnaire on the political, economic, social and educational advancement of the inhabitants of each trust territory, and the administering authority for each trust territory within the competence of the General Assembly shall make an annual report on the basis of such questionnaire.

VOTING.**Article 88 (X).**

1. Each member of the Trusteeship Council shall have one vote.

2. Decisions of the Trusteeship Council shall be taken by a majority of the members present and voting.

PROCEDURE.**Article 89.**

1. The Trusteeship Council shall adopt its own rules of procedure, including a method of selecting its president.

2. The Trusteeship Council shall meet as required in accordance with its rules, which shall include provisions for the convening of meetings on the request of a majority of its members.

Article 90..

The Trusteeship Council shall, when appropriate, avail itself of the assistance of the economic and social council and of the specialized agencies in regard to matters with which they are respectively concerned.

CHAPTER XIII

MISCELLANEOUS PROVISIONS

Article 74 (SIC).

1. Every treaty and every international agreement entered into by any member of the United Nations after the present charter comes into force shall as soon as possible be registered with the secretariat and published within 7 it.

2. No party to any treaty or international agreement which has not been registered in accordance with the provisions of paragraph 1 of this article may invoke that treaty or agreement before any organ of the United Nations.

Article 75.

In the event of a conflict between the obligations of the members of the United Nations under the present charter and any other international obligations to which they are subject, their obligations under the present charter shall prevail.

Article 76.

The organization shall enjoy in the territory of each of its members such legal capacity as may be necessary for the exercise of its functions and the fulfillment of its purposes.

Article 77.

1. The organization shall enjoy in the territory of each of its members such privileges and immunities as are necessary for the fulfillment of its purposes.

2. Representatives of the members of the organization and officials of the organization shall similarly enjoy such privileges and immunities as are necessary for the independent exercise of their functions in connection with the organization.

3. The General Assembly may make recommendations with a view to determining the details of the application of paragraphs 1 and 2 of this article or may propose conventions to the members for this purpose.

CHAPTER XIV

TRANSITIONAL SECURITY ARRANGEMENTS

Article 79.

Pending the coming into force of such special agreements referred to in Article 47, in the opinion of the Security Council, it shall be able to begin the exercise of its responsibilities under Article 46, the parties to the Declaration, signed at Moscow, October 30, 1943, and France, shall, in accordance with the provisions of Paragraph 5 of that declaration, consult with one another as occasion arises with other members of the organization with a view to such joint action on behalf of the organization as may be necessary for the purpose of maintaining international peace and security.

Article 80.

Nothing in the present charter shall invalidate or preclude action in relation to any state which during the second World War has been an enemy of any signatory to the

present charter, taken or authorized as a result of that war by the governments having responsibility for such action.

CHAPTER XV

AMENDMENTS

Article 81.

Amendments to the present charter shall come into force for all members of the organization when they have been adopted by a vote of two-thirds of the members of the General Assembly and ratified in accordance with their respective constitutional processes by two thirds of the members of the organization, including all the permanent members of the Security Council.

Article 81 (X).

1. A general conference of the members of the United Nations for the purpose of reviewing the present charter may be held at a date and place to be fixed by a two-thirds vote of the General Assembly and by a vote of any seven members of the Security Council. Each member shall have one vote in the conference.

2. Any modification of the present charter recommended by a two-thirds vote of the conference shall take effect when ratified in accordance with their respective constitutional processes by two-thirds of the members of the organization including all the permanent members of the Security Council.

3. If such a conference has not been held before the 10th annual session of the General Assembly following the entry into force of the present charter, the proposal to call such a conference shall be placed on the agenda of that session of the General Assembly, and the conference shall be held if so decided by a majority vote of the members of the General Assembly and by a vote of any seven members of the Security Council.

CHAPTER XV (X)

RATIFICATION AND SIGNATURE

1. The present charter shall be ratified by the signatory states in accordance with their respective constitutional processes.

2. The ratifications shall be deposited with the government of the United States of America, which shall notify all the signatory states of each deposit as well as the secretary general of the organization when he has been elected.

3. The present charter shall come into force upon the deposit of ratifications by the United States of America, the United Kingdom of Great Britain and Northern Ireland, the Union of Soviet Socialist Republics, the Republic of China and France, and by a majority of the other signatory states. A protocol of such deposit shall be drawn up by the government of the United States of America which shall communicate copies thereof to all the signatory states.

4. The states signatory to the present charter which ratify it after it has come into force will become members of the United Nations on the date of the deposit of their respective ratifications.

Article 83.

The present charter, of which the Chinese, English, French, Russian and Spanish texts are equally authentic, shall remain deposited in the archives of the government of the United States of America. Duly certified copies thereof shall be transmitted by that government to the governments of the other signatory states.

SIGNATORIES TO THE CHARTER OF THE UNITED NATIONS

Source: Department of State Bulletin, Aug. 12, 1945

In faith whereof the representatives of the United Nations have signed the present charter.

Done at the City of San Francisco the twenty-third day of June, one thousand nine hundred and forty-five.

CHAPTERS XII, XII (X) AND XII (Y) HAVE NOT AS YET BEEN REVIEWED BY THE ADVISORY COMMITTEE OF JURISTS.

Following are the names of those countries whose delegates affixed their signature to the Charter of the United Nations, written at the San Francisco Conference, during the summer of 1945:

China
 Union of Socialist Soviet Republics
 United Kingdom
 United States of America
 France
 Argentina
 Australia
 Belgium
 Bolivia
 Brazil
 Byelorussian Socialist Soviet Republic
 Canada
 Chile
 Colombia
 Costa Rica
 Cuba
 Czechoslovakia
 Denmark
 Dominican Republic
 Ecuador
 Egypt
 El Salvador

Ethiopia
 Greece
 Guatemala
 Haiti
 Honduras
 India
 Iran
 Iraq
 Lebanon
 Liberia
 Luxembourg
 Mexico
 Netherlands
 New Zealand
 Nicaragua
 Norway
 Panama
 Paraguay
 Peru
 Philippine Commonwealth
 Poland
 Saudi Arabia
 Syria
 Turkey
 Ukrainian Socialist Soviet Republic
 Union of South Africa
 Uruguay
 Venezuela
 Yugoslavia

As of September 30, 1945, four nations had ratified the Charter drawn up at San Francisco the previous summer. First to ratify was the United States, on August 19, 1945. Following, in order of ratification were France August 31, 1945; Dominican Republic, September 4, 1945; and Nicaragua September 6, 1945.

(1) After the convention of 1787 those favoring the adoption of the Constitution were called "Federalists." Later, those opposing the government called themselves "Anti-Federalists," or "Democratic-Republicans." After Jackson's time the Democratic-Republican party was known as the Democratic party. For further information, see the section on politics.

(2) Historians differ on whether Jackson was born in North or South Carolina, although Jackson himself declared in 1832 that he was a South Carolinian.

PRESIDENTS OF THE UNITED STATES

Name	Nicknames	Years of Term	Death Date	Age at Death	Cause of Death	Burial Place
George Washington	Father of His Country	1789-1797	Dec. 14, 1799	67	Membranous croup	Mt. Vernon, V.

Franklin Delano Roosevelt	New Dealer	1933-1945	April 12, 1945	63	Cerebral hemorrhage	Hyde Park, N. Y.
Harry S. Truman		1945				

OATH OF THE PRESIDENT

"I,, do solemnly swear (or affirm) that I will faithfully execute the office of president of the United States, and will to the best of my ability, preserve, protect and defend the Constitution of the United States." (Constitution, Art. II, Sect. 1.)

In administering the oath to the President elect Herbert Hoover, March 4, 1929, on capitol portico, the late Chief Justice Taft substituted the word "maintain" for "protect," but declared that the validity of oath was not affected by the substituti-

COIN 1,300 YEARS OLD

A rare gold coin with the inscription **PADA** takes its place as the earliest gold issue bearing the name of an English king.

Peada ruled Mercia from 655 to 667 A. and was the first of his line to adopt Christianity.

*Jackson married Mrs. Robards believing the legislature of Virginia had granted her husband a divorce instead of only permission to bring suit for divorce, as was the case. The first ceremony was performed in 1791, the second after the divorce.

THE VICE PRESIDENCY

As stated originally in the Constitution, the person having the largest number of votes was chosen president by the electoral college, the one with the next highest becoming vice president. This was changed in 1804 by the 12th amendment to the Constitution and now electors designate their independent choices for president and vice president.¹

The vice president is president of the senate but has no vote except when there is a tie. During a trial of impeachment of the president, the vice president, however, does not retain his seat as president. He also presides at the joint sessions of Congress when electoral votes are counted.

At the death of the president, his removal from office, resignation or inability to discharge the duties and powers of the presidency, the vice president succeeds to the

presidency. No provision is made for the filling of a vacant vice presidency. The senate, however, elects a president pro tempore in his absence.

The vice president is sworn in prior to the presidency by the presiding officer of the senate, who may be either a retiring vice president or a United States senator elected president pro tempore.

The embarrassment and lack of harmony resulting from the president's being of one political party and the vice president of the opposition, prompted the 12th amendment to the Constitution. From 1797 to 1801 John Adams, a Federalist, was president, his vice president, an Anti-Federalist or Democratic-Republican. In 1801 both officers were of the same political party, but the Constitution was amended to avoid repetition of the earlier result.

OATH OF THE VICE PRESIDENT

Administered by presiding officer of the United States senate in the senate.

"I, . . . do solemnly swear that I will support and defend the Constitution of the United States against all enemies, foreign and domestic that I will

bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion, and that I will well and faithfully discharge the duties of the office on which I am about to enter: So help me God."

*Later elected to the presidency.

†Died in office.

¹Became president at death of chief executive.

THE PRESIDENT'S CABINET

The federal executive departments have been created by Congress in accordance with a constitutional clause that the president "may require the opinion in writing of the principal officer in each of the executive departments, upon any subject relating to the duties of their respective offices." Heads or secretaries of each of these departments are appointed by the president, subject to the consent of the senate, at a fixed salary of \$15,000 a year. The cabinet is an advisory body only, in contrast with several European cabinets which usually are chosen from the majority in the parliamentary body and may introduce and defend legislation. Cabinet

members are accountable to the president only, although Congress exercises an indirect control through its power to make appropriations.

By an act of Congress, Jan. 19, 1886, an office of the president would devolve upon the secretaries of state, treasury, war, attorney general, the postmaster general, the navy and of the interior, in the order named, in case of the death or inability both the president and vice president. The departments of agriculture, commerce and labor were organized after the passage of the act.

SECRETARIES OF STATE

Originally called the department of foreign affairs which was created by an act of Congress, July 27, 1789, the department of state is in charge of foreign affairs. Under the direction of the president, the department, whose secretary ranks as the highest cabinet member, handles all correspondence with foreign powers through the diplomatic and consular

representatives of foreign nations and the United States. In addition, the department of state is the custodian of the acts, records and seal of the United States and publishes the laws, resolutions of Congress and proclamations of the admission of new states to the union.

John Jay was the secretary of foreign affairs, appointed in 1784 by the ninth Continental Congress. He left the post in 1789 to become chief justice.

Washington's Inaugural Briefest

President Washington's second inaugural address holds the record for brevity. It consists of 134 words, his first of 1,300 words.

SECRETARIES OF THE TREASURY

Created by an act of Congress, Sept. 2, 1789, the department of the treasury's main duties were the improvement and management of revenue and support of public credit and the granting of all appropriation moneys. Subsequent acts of Congress, as a result of the expansion of the country, have enlarged the functions of the department to include the coinage and printing of money, the procurement of federal supplies, the construction of public buildings and the control of the secret service of the federal government.

Mason and Dixon Line

Mason and Dixon's line, the boundary line between Maryland and Pennsylvania made by two English surveyors in 1763-67, was known as the dividing line between free and slave states before the Civil war.

SECRETARIES OF WAR

Many of the functions delegated to the department of war by an act of Congress, Aug. 7, 1789, which created the department to succeed a similar one established before the adoption of the Constitution, since have been transferred to the departments of the navy and interior. Organization and maintenance of the army is under the control of the de-

partment of war, as is the military academy at West Point. The department's primary function is national defense, but in addition it performs such non-military duties as river flood control, river and harbor development, administration of civil affairs in certain foreign possessions and operation of the Panama canal.

POSTMASTERS GENERAL

After the adoption of the Constitution in 1789 the post office was established temporarily and the office of postmaster general was created Sept. 22, 1789. The department, however, did not become an executive one until June 8, 1872, although President Jackson in 1829 had recognized the postmaster general as a cabinet member. Benjamin Franklin, who had been a postmaster at Philadelphia in 1737 and co-deputy postmaster general for the British Colonies in North America, 1753, became the first postmaster general under the Continental Congress, July 26, 1775.

SALARIES OF POSTMASTERS

Source: Postal Laws and Regulations.

Postmasters are divided into four classes, as follows: the first class embraces all those whose annual salaries are \$3,200 or more; the second class embraces all those whose annual salaries are less than \$3,200, but not less than \$2,400; the third class embraces all those whose annual salaries are less than \$2,400, but not less than \$1,100; the fourth class embraces all postmasters whose annual compensation amounts to less than \$1,100, exclusive of commissions on money or issued.

SECRETARIES OF THE INTERIOR

The department of the interior was created March 3, 1849. Its duties include supervision of Indian affairs, certain hospitals and charitable institutions, pensions, patents, the geo-

logical survey, national parks and reservations, education, and management of the Alaska railroad.

SECRETARIES OF AGRICULTURE

Until the act of Feb. 9, 1889, the duties of the department of agriculture were administered by a commissioner of agriculture. The department itself, however, had been established May 15, 1862, but by this later act it came the eighth executive department and the secretary a cabinet member. The depart-

ment maintains information services on agricultural problems, enforces the pure food laws, builds roads, inspects meat, engages in forest conservation, wild-life protection, weather reports and has an extensive research department.

SECRETARIES OF COMMERCE AND LABOR

Source: Cong. Directory

The department of commerce and labor was created Feb. 14, 1903, but by the act of March 4, 1913, it was divided into the departments of commerce and labor. The former promotes foreign and domestic commerce, transportation facilities, administers the lighthouse service and conducts population and other censuses. The department of labor, formerly under the department of the interior before being incorporated with the department of commerce and labor, supervises enforcement of the immigration and naturalization laws, investigates working conditions of wage earners and matters pertaining to child welfare.

THE CONTINENTAL CONGRESSES

Virginia was the first state to propose a general conference of the British colonies to denounce the acts of the British parliament, particularly the repressive measures against Massachusetts. Massachusetts, however, in June, 1774, proposed that representatives meet at Philadelphia. September of that year all the colonies except Georgia were represented at the conference which drew up a declaration of rights and grievances and recommended that until redress was obtained colonies should neither "buy nor sell Great Britain." This was the first Continental Congress.

The following year most of the delegates from the colonies were chosen by popular

conventions to the Second Continental Congress. Meanwhile the battle of Lexington had been fought and Congress at once assumed revolutionary powers, organized an army, named Washington as commander in chief, sent representatives abroad, issued Declaration of Independence and proposed the Articles of Confederation. March 1, 1777, the Articles went into effect providing for a league of states than a central government. Each state had certain powers in the federal government only those which states allowed; it had no power to coerce states, nor to raise money to support war with Great Britain.

*Beginning with the 77th Congress, both acts and resolutions were combined in the U.S. Statutes at large.

*The distinction between the terms public and private, as used in the statutes at large, is somewhat arbitrary. Prior to 1845 a number of laws were printed in both groups; these have been classed as public only, in the above. The decided reduction in the number of private acts beginning with the 60th Congress was caused primarily by combining of a large number of pension bills in a single omnibus pension bill.

SECESSION OF STATES FROM THE UNION DURING THE CIVIL WAR

*Missouri, Kentucky, Maryland and Delaware did not pass an Ordinance of Secession and declared themselves neutral.

SPEAKERS OF THE HOUSE OF REPRESENTATIVES

Source: Cong. Directory

The speaker of the house of representatives chosen by caucus of the majority party of the house. He presides over sessions and retains his privileges as a member. In addition he has three powers as speaker, which give him a great deal of control over legislation: (1) He determines to which committee each bill presented shall be referred; (2) he decides which members shall be recognized on the floor; (3) he has the right to decide the order of debate, including power to deal with bustling tactics on the part of the minority.

Until 1910 the committee on rules, a powerful committee, which decides the order of considering bills, the length of time for debate and when the vote will be taken, also was in the power of the speaker. It consisted of the speaker, two majority and two minority members, appointed by the speaker. At that time a resolution was adopted excluding the speaker from membership, enlarging the committee, and means for electing its members by the house itself.

Clock-Stopping

In Congress, as in states with a time limit the length of session (usually 60 days) for the state legislature and there remains "must" legislation, it is customary to stop the face of the clock in the legisla-

tive hall to preserve at least a semblance of law observance. In addition special sessions, called by the governor, are sometimes necessary to pass upon legislation which cannot wait until the next regular assembly.

First American White Child

Off the coast of North Carolina on Roanoke Island 350 years ago, Virginia Dare, the first child of English parents in the New World was born to Virginia and Ananias Dare. Her birthday anniversary, Aug. 18, 1937, was observed by the completion of a Fort Raleigh, a WPA project, and a celebration with President Roosevelt present. Virginia Dare was the granddaughter of Gov.

John White, who had been sent over by Sir Walter Raleigh to act as governor of the original Fort Raleigh. When she was nine days old her grandfather sailed back to England for additional money and settlers. When he returned four years later the colony had disappeared and no trace remained of one of the first unsuccessful colonization attempts in the New World.

FEDERAL GOVERNMENT OFFICIALS

Source: Current Biography

President—Harry S. Truman

Vice-President—
Secretaries to the President—Mathew J. Connelly, Charles G. Ross, and William D. Hassett

Executive Clerk in charge of White House executive offices—Maurice C. Latta
Administrative assistant—Rose A. Con

PRESIDENT HARRY S. TRUMAN

Harry S. Truman, who succeeded to the presidency on the death of Franklin Delano Roosevelt in April, 1945, was born May 8, 1884 at Lamar, Missouri.

He attended the Field Artillery School at Fort Sill, Okla., in 1917-1918 and the Kansas City School of Law in 1923-25. He married Bess Wallace on June 28, 1919, and has one daughter, Mary Margaret.

During World War I, Truman was a first lieutenant with Battery F, and later became captain of Battery D, One Hundred and Twenty-ninth Field Artillery, Thirty-fifth Division, U. S. Army. He saw action in Vosges operations, St. Mihiel and Meuse-Argonne operations, August 18 to November 11, 1918. He was discharged with the rank of major in the U. S. Army Reserve Corps, and in 1927 was promoted to colonel, a position which he still holds.

From 1922-24 Truman officiated as judge of the Jackson County (Mo.) Court, and was presiding judge from 1926 to 1934. In that year he was elected to the United States Senate, being reelected in 1940.

During his two terms as senator, Truman served on such committees as Appropria-

tions, Enrolled Bills, Military Aff Printing, Interstate Commerce, and Public Buildings and Grounds. He was chair of the famous "Truman Committee," Special Committee to Investigate National Defense Program.

In 1944, he was elected Vice President of the United States, sharing the ticket with Franklin Delano Roosevelt, who was elected for a fourth term. On April 12, 1945, he came president on the death of Roosevelt at Warm Springs, Georgia.

Truman found himself heir to many dramatic problems in addition to leading U. S. and her allies to victory in World War II. His first important act was continuing the San Francisco Conference where World Security organization was charted. At his first "Big Three" conference, Potsdam declaration was written.

Down to October, 1945, several shake-ups in the Presidential Cabinet were made, in which left Henry A. Wallace as Secretary of Commerce and Harold L. Ickes as Secretary of the Interior as the only remaining members of the late President Roosevelt's Cabinet.

FIRST LADY, MRS. HARRY S. TRUMAN

Mrs. Harry S. Truman, the former Bess Wallace, was married to Harry Truman June 28, 1919. She is the school teacher daughter of a farmer and the grand daughter of a well-known flour miller. Mrs. Truman is one year younger than her president-husband, having been born in 1883.

Mr. Truman describes her as "the only girl he ever went with." He gives her credit as his chief adviser, saying, "I never make

any decisions unless she is in on them."

When Harry Truman was a Senator acted as his secretary and housewife. sent her daughter, Mary Margaret, to George Washington university.

Since his succession to the presidency, Mrs. Truman has been conspicuous by her absence from public affairs. She has kept herself out of the public eye.

THE VICE PRESIDENT

(Office vacant since April, 1945)

Before the death of Franklin Delano Roosevelt, Harry S. Truman was officiating as Vice President of the United States. When the president died in April, 1945, Truman acceded to that position. Under the U. S. Constitution, the Secretary of State, is next to succeed, in case of the death, removal, or resignation of the present incumbent of the presidency. The present Secretary of State is James F. Byrnes. He was born May 2, 1879, in Charleston, S. C. From 1900-1908 he officiated as court reporter and during 1903-1907 edited a newspaper. He was a member of Congress from 1911-25. From 1925 to 1931 he practiced law, taking a seat in the Senate from 1931 to

1943. During 1941 and 1942 he was a justice of the Supreme Court, later becoming director of the Office of Economic Stabilization by presidential appointment. On March 3, 1942, he was appointed director of the Office of War Mobilization, which he signed on April 2, 1945. He was appointed Secretary of State July 3, 1945, to succeed Edward R. Stettinius. The first meeting of the Council of Foreign Ministers, was closed Oct. 2, 1945 in London was attended by Secretary Byrnes who upon his return said in a radio broadcast to the nation that Russia's unwillingness to participate in democratic procedures had caused the failure of the conference.

BIOGRAPHIES OF SECRETARIES OF EXECUTIVE DEPARTMENTS

Source: Congressional Directory

DEPARTMENT OF STATE

JAMES FRANCIS BYRNES, was born May 2, 1879, in Charleston, S. C. He was appointed Secretary of State July 3, 1945, upon the resignation of Edward R. Stettinius. During 1900-1908, he was an official court reporter and editor of a newspaper 1903-7. He was solicitor, Second Circuit, South Carolina, from 1908-11. In 1911 he

became a member of Congress and remained in that position until 1925, when he began his private law practice. From 1931-43, however, he was a member of the U. S. Senate, and was a Supreme Court justice from 1941-42. See additional information under heading "Vice President."

DEPARTMENT OF THE TREASURY

FRED M. VINSON, of Ashland, Ky., was born at Louisa, Ky., January 22, 1890. He graduated from Kentucky Normal College, and took his B. A. and LL.B. degrees at Centre College, Ky. He married Roberta Dixon, January 24, 1923, and has two sons. From 1911-38 Vinson was engaged in the general practice of law at Louisa and Ashland. He was a member of the House of Representatives 1924-38. He was appointed Chief Justice of the U. S. Court of Appeals

for the District of Columbia May, 1938; designated as chief judge of the United States Emergency Court of Appeals under the Price Control Act, in March 1942; appointed Director of Economic Stabilization, May 28, 1943; Federal Loan Administrator, March 8, 1945; Director of War Mobilization and Reconversion, April 4, 1945; and appointed Secretary of the Treasury July 23, 1945, to succeed Henry Morgenthau, Jr.

DEPARTMENT OF WAR

ROBERT B. PATTERSON was born in Glen Falls, N. Y., Feb. 12, 1891. He was educated at Union College at Schenectady, N. Y., where he received his B. A. degree in 1912. In 1915 he received his LL.B. from Harvard Law School, and was admitted to the N. Y. Bar. He practiced law for the next 15 years. During the first world war, he served as Capt. in the 306th Infantry, later was promoted to major in command of the second battalion of the 306th. In 1930 he

was appointed judge of the U. S. District Court, Southern District, N. Y.; in 1939 became judge of the Circuit Court of Appeals, Second District. He became Assistant Secretary of War in July 1940, and on December 19, 1940, was promoted to Under-Secretary of War. Upon the resignation of Henry L. Stimson, September 18, 1945, Patterson was appointed Secretary of War. Patterson married Margaret T. Winchester in 1920, has three daughters and one son.

DEPARTMENT OF JUSTICE

TOM C. CLARK of Dallas, Tex., was appointed Attorney General of the U. S. in July, 1945. He was born Sept. 23, 1899 in Dallas, and became a student of Virginia Military Institute, but took his A.B. and LL.B. degrees at the University of Texas in 1921 and 1922, respectively. He married Mary Jane Ramsey on November 8, 1924, and has two sons, one, Tom C., Jr., deceased, and a daughter. He served in the One Hundred and Fifty-third Infantry during World War I. During the period 1927 to 1943, he was successively civil district attorney for Dallas County; special attorney, Depart-

ment of Justice, Bureau of War Risk Litigation; special assistant to the Attorney General assigned to the Antitrust Division Chief, West Coast offices, Antitrust Division; coordinator of Alien Enemy Control of the Western Defense Command and Chief of Civil staff for Japanese War Relocation; Chief, War Frauds Unit, and first assistant to Assistant Attorney General in charge of Antitrust Division; Assistant Attorney General in charge of Antitrust Division; Assistant Attorney General in charge of Criminal Division.

POST OFFICE DEPARTMENT

ROBERT E. HANNEGAN was born June 30, 1903, at St. Louis, Missouri. He was educated at Yeatman High School, St. Louis and received his LL.B. from the St. Louis University Law School in 1925. He engaged in the practice of law at St. Louis from 1925-42, when he was appointed collector of internal revenue for the Eastern

District of Missouri on June 1, 1942. On Oct. 10, 1943, he was appointed Commissioner of Internal Revenue, and was elected chairman of the Democratic National Committee on Jan. 22, 1943. He assumed the duties of Postmaster General July 1, 1945. He married Irma Protzmann Nov. 14, 1929 and has two daughters and two sons.

DEPARTMENT OF THE NAVY

JAMES FORRESTAL was born at Beacon, N. Y., February 15, 1892. He was a student at Princeton University from 1911-15; married Josephine Ogden, October 12, 1926 and has two sons. He was associated with N. J. Zinc Co., Tobacco Products Corp., from 1915-16; Dillon, Reed and Co., 1916-40. He was president of the latter com-

pany from 1937-40, when he was appointed Under Secretary of Navy. He served in this capacity until 1944, when he became Secretary of the Navy on the death of Frank Knox. During World War I he served as lieutenant, junior grade, in the United States Naval Air Service.

DEPARTMENT OF THE INTERIOR

HAROLD L. ICKES, Chicago, Ill., is a lawyer by profession. He was born in Frankstown Township, Pennsylvania, March 15, 1874. He received his A.B. from the University of Chicago in 1897; J. D. cum laude, University of Chicago Law school, 1907; L.D., Washington and Jefferson College and Lake Forest College, 1933, Berea College, Pennsylvania Military College, Tufts

College, and Northwestern University, 1934, University of Alabama, 1935, University of New Mexico, 1939. He married Anna Wilmarth Thompson, 1911, who died August 31, 1935. He remarried in 1938 to Jane Dahlgren. He entered Chicago politics in 1897 and became Secretary of the Interior in March, 1933. Since 1934 he has been the author or editor of eight books.

DEPARTMENT OF AGRICULTURE

CLINTON P. ANDERSON, Albuquerque, N. Mex., was born at Centerville, S. D., October 23, 1895. He was educated at Dakota Wesleyan University and the University of Michigan. He is married and has two children. Anderson was president of Rotary International from 1932-33; treasurer of the state of New Mexico, 1933-34; administrator, New Mexico Relief Administration, 1935; field representative, Federal Emergency Relief Administration 1935-36- chairman and executive director,

Unemployment Compensation Commission New Mexico, 1936-38; managing director, United States Coronado Exposition Commission, 1939-40; elected to Seventy-seventh, Seventy-eighth and Seventy-ninth Congresses. He served as chairman of the House of Representatives Special Committee to Investigate Food Shortages, and was appointed Secretary of Agriculture June 30, 1945. He owns and operates farms in New Mexico and South Dakota.

DEPARTMENT OF COMMERCE

HENRY AGARD WALLACE was born on a farm in Adair County, Iowa, October 7, 1888. He received his B.S.A. in 1910 from the Iowa State College, and married Florence May 20, 1914, and has two sons and a daughter. He started out in newspaper work in 1910 and became editor of Wallace's Farmer in 1924-29 and Wallace's Farmer and Iowa Homestead in 1929-33. He developed, raised and marketed hybrid corn

of high yield quality from 1913-1933. In 1933 he was appointed Secretary of Agriculture and served until September 5, 1940, when he resigned. He was elected to the Vice-Presidency of the United States on November 5, 1940, and served for the term 1941-1945. Under appointment of the late Franklin D. Roosevelt, he became Secretary of Commerce March 2, 1945.

DEPARTMENT OF LABOR

LEWIS B. SCHWELLENBACH, of Spokane, Wash., was born in Superior, Wisconsin, September 20, 1894. He married Anne Duffy of Seattle, Wash., in 1935. Schwellenbach received his LL.B. Degree from the

University of Washington in 1917, LL.D., from Washington State College in 1945. He is a lawyer by profession. From 1935-40 he served as U. S. Senator. He became Secretary of Labor July 1, 1945.

SENATE IMPEACHMENT TRIALS

The Senate has sat as a court of impeachment in the cases of the following accused officials, with the result stated, for the crimes named:

William Blount, a senator from Tennessee; charges dismissed for want of jurisdiction; tried Dec. 17, 1798, to Jan. 14, 1799.

John Pickens, judge of the United States district court for the district of New Hampshire; removed from office; tried March 3, 1803, to March 12, 1804.

Samuel Chase, associate justice of the supreme court of the United States; acquitted; tried Nov. 30, 1804, to March 1, 1805.

James H. Peck, judge of the United States district court for the district of Missouri; acquitted; tried April 26, 1830, Jan. 31, 1831.

West H. Humphreys, judge of the United States district court for the middle, eastern and western districts of Tennessee; removed from office; tried May 7 to June 26, 1862.

Andrew Johnson, president of the United States; acquitted; tried Feb. 25, 1868, to May 26, 1868.

William W. Belknap, secretary of war; acquitted; tried March 3, 1876, to Aug. 1, 1876.

Charles Swayne, judge of the United States district court for the northern district of Florida; acquitted; tried Dec. 14, 1904, to Feb. 27, 1905.

Robert W. Archibald, associate judge, United States commerce court; removed from office; tried July 13, 1912, to Jan. 13, 1913.

George W. English, judge of the United States district court for the eastern district of Illinois; resigned office Nov. 4, 1926; Court of Impeachment adjourned to Dec. 13, 1926, when, on request of house managers, impeachment proceedings were dismissed.

Harold Louderback, judge of the United States district court for the northern district of California; acquitted; tried May 15, 1933, to May 24, 1933.

Halsted L. Ritter, judge of the United States district court for the southern district of Florida; removed from office; tried April 6, 1936, to April 17, 1936.

EXECUTIVE DEPARTMENT SALARIES

The president receives \$75,000 a year. In addition he is allowed \$25,000 for traveling and official entertainment expenses. The government pays for the heating, lighting, care, repair and furnishing of the executive mansion but not for the president's ordinary household or other personal expenses.

When the United States first provided for a president's salary it was fixed at \$25,000 and in 1873 the salary was doubled. In 1909 Congress increased the executive salary to \$75,000.

The vice president receives \$15,000 a year, the same as members of the cabinet. The salary has been increased as was the president's. At first it was \$8,000, in 1873 it was

\$10,000 and from then until 1925 it was \$12,000.

Cabinet officers receive \$15,000 a year. Congress in 1853 placed the entire cabinet on an even basis at \$8,000 a year and 3 years later raised it to \$10,000. In 1925 salaries were fixed at their present rate.

Congressmen first received \$6 a day for their labors until 1856 when they were given \$3,000 annually. The president pro tempore of the senate was given \$8,000 and the speaker of the house \$6,000. The act of March 4, 1925 fixed salaries of representatives, senators and delegates at \$10,000 a year and that of the speaker of the house at \$15,000.

WHIPS OF CONGRESS

To insure that members of the house of representatives or the senate are present at important times, each major political party appoints "whips" whose duties consist in "rounding up" party members when a roll call is being taken, when a quorum is needed, etc.

Several years ago a system of electric calls was installed in the buildings of the capital which simplified the duties of the whip in seeing that members were present when votes were needed or a quorum desired. Previously, members had to be sent for by messenger. Now, however, bells are rung, announcing the time for convening, roll calls, etc., and no messenger is needed, except when the senator or representative is in some other part of the city or is out of town.

The whip of the majority party is ex-officio floor leader and in the absence of the floor leader and other assistants, may be called upon to represent his party. He is not supposed to introduce bills, lest his attention be diverted from "keeping tab" on all that goes on. At roll calls he reports absentees and pairs (that is, some absentee or present mem-

ber in favor of a proposed question and some absentee or present member who is opposed to the bill at hand).

Under the English system the party whip has patronage privileges which a congressional whip does not have, nor do United States Congress whips have means of enforcing their "commands" upon recalcitrant members.

The whip also is in close connection with the White House. The president occasionally seeks information from the whip as to the sentiment on particular bills and prospects of passage of others.

"The speaker, the party caucus, or the floor leaders may appoint whips in the house and the committee on committees, a party caucus or the floor leaders select them in the senate," according to Senator Lewis.

Rep. Robert Ramspeck of Georgia is majority whip of the House, and Rep. Leslie C. Arends of Illinois is minority whip. In the Senate, majority whip is Lister Hill of Alabama; minority whip is Kenneth S. Wherry of Nebraska.

STANDING COMMITTEES OF THE U. S. SENATE

Agriculture and Forestry: Elmer Thomas, D, Oklahoma; Burton K. Wheeler, D, Montana; John H. Bankhead, 2d, D, Alabama; Theodore G. Bilbo, D, Mississippi; Allen J. Ellender, D, Louisiana; Scott W. Lucas, D, Illinois; Tom Stewart, D, Tennessee; Richard B. Russell, D, Georgia; Tom Connally, D, Texas; Sheridan Downey, D, California; Clyde R. Hoey, D, North Carolina; Arthur Capper, R, Kansas; Henrik Shipstead, R, Minnesota; Raymond E. Willis, R, Indiana; George D. Aiken, R, Vermont; Harlan J. Bushfield, R, South Dakota; George A. Wilson, R, Iowa; Hugh Butler, R, Nebraska; Guy Cordon, R, Oregon; Milton R. Young, R, North Dakota.

Appropriations: Carter Glass, D, Virginia; Kenneth McKellar, D, Tennessee; Carl Hayden, D, Arizona; Elmer Thomas, D, Oklahoma; Millard E. Tydings, D, Maryland; Richard B. Russell, D, Georgia; Pat McCarran, D, Nevada; John H. Overton, D, Louisiana; John H. Bankhead, 2d, D, Alabama; Joseph C. O'Mahoney, D, Wyoming; Theodore Francis Green, D, Rhode Island; Dennis Chavez, D, New Mexico; James M. Mead, D, New York; Burnet R. Maybank, D, South Carolina; Abe Murdock, D, Utah; Styles Bridges, R, New Hampshire; Wallace H. White, Jr., R, Maine; Chan Gurney, R, South Dakota; C. Wayland Brooks, R, Illinois; Clyde M. Reed, R, Kansas; Harold H. Burton, R, Ohio; Joseph H. Ball, R, Minnesota; Raymond E. Willis, R, Indiana; Homer Ferguson, R, Michigan; Kenneth S. Wherry, R, Nebraska.

Audit and Control the Contingent Expenses of the Senate: Scott W. Lucas, D, Illinois; Millard E. Tydings, D, Maryland; Carl Hayden, D, Arizona; Burnet R. Maybank, D, South Carolina; Charles W. Tobey, R, New Hampshire; C. Wayland Brooks, R, Illinois; Kenneth S. Wherry, R, Nebraska.

Banking and Currency: Robert F. Wagner, D, New York; Carter Glass, D, Virginia; Alben W. Barkley, D, Kentucky; John H. Bankhead, 2d, D, Alabama; George L. Radcliffe, D, Maryland; Sheridan Downey, D, California; Abe Murdock, D, Utah; Ernest W. McFarland, D, Arizona; Glen H. Taylor, D, Idaho; J. William Fulbright, D, Arkansas; Hugh B. Mitchell, D, Washington; E. P. Carville, D, Nevada; Charles W. Tobey, R, New Hampshire; Robert A. Taft, R, Ohio; John Thomas, R, Idaho; Hugh Butler, R, Nebraska; Arthur Capper, R, Kansas; C. Douglass Buck, R, Delaware; Eugene D. Millikin, R, Colorado; Bourke B. Hickenlooper, R, Iowa.

Civil Service: Sheridan Downey, D, California; Kenneth McKellar, D, Tennessee; Walter F. George, D, Georgia; Harry Flood Byrd, D, Virginia; James M. Mead, D, New York; Glen H. Taylor, D, Idaho; William Langer, R, North Dakota; George D. Aiken, R, Vermont; Bourke B. Hickenlooper, R, Iowa; Thomas C. Hart, R, Connecticut.

Claims: Allen J. Ellender, D, Louisiana; James M. Tunnell, D, Delaware; W. Lee O'Daniel, D, Texas; Harley M. Kilgore, D, West Virginia; James O. Eastland, D, Mississippi; Glen H. Taylor, D, Idaho; Brien McMahon, D, Connecticut; Olin D. Johnston, D, South Carolina; Arthur Capper, R, Kansas; Alexander Wiley, R, Wisconsin; Kenneth S. Wherry, R, Nebraska; George A. Wilson, R, Iowa; Wayne Morse, R, Oregon.

Commerce: Josiah W. Bailey, D, North Carolina; John H. Overton, D, Louisiana; Theodore G. Bilbo, D, Mississippi; George L. Radcliffe, D, Maryland; Claude Pepper, D, Florida; James M. Mead, D, New York; W. Lee O'Daniel, D, Texas; Pat McCarran, D, Nevada; Albert B. Chandler, D, Kentucky; John L. McClellan, D, Arkansas; Warren G. Magnuson, D, Washington; Arthur H. Vandenberg, R, Michigan; Owen Brewster, R, Maine; Harold H. Burton, R, Ohio; Alexander Wiley, R, Wisconsin; Edward V. Robertson, R, Wyoming; Guy Cordon, R, Oregon; C. Wayland Brooks, R, Illinois; Thomas C. Hart, R, Connecticut.

District of Columbia: Theodore G. Bilbo, D, Mississippi; Carter Glass, D, Virginia; Millard E. Tydings, D, Maryland; Pat McCarran, D, Nevada; W. Lee O'Daniel, D, Texas; Clyde R. Hoey, D, North Carolina; Olin D. Johnston, D, South Carolina; Frank P. Briggs, D, Missouri; Arthur Capper, R, Kansas; Styles Bridges, R, New Hampshire; Harold H. Burton, R, Ohio; C. Douglass Buck, R, Delaware; H. Alexander Smith, R, New Jersey; Leverett Saltonstall, R, Massachusetts; Milton R. Young, R, North Dakota.

Education and Labor: James E. Murray, D, Montana; David I. Walsh, D, Massachusetts; Elbert D. Thomas, D, Utah; Claude Pepper, D, Florida; Allen J. Ellender, D, Louisiana; Lister Hill, D, Alabama; Dennis Chavez, D, New Mexico; James M. Tunnell, D, Delaware; Joseph F. Guffey, D, Pennsylvania; Olin D. Johnston, D, South Carolina; J. William Fulbright, D, Arkansas; Robert M. La Follette, Jr., P, Wisconsin; Robert A. Taft, R, Ohio; George D. Aiken, R, Vermont; Joseph H. Ball, R, Minnesota; H. Alexander Smith, R, New Jersey; Wayne Morse, R, Oregon; Forrest C. Donnell, R, Missouri.

Enrolled Bills: Clyde M. Reed, R, Kansas.

Expenditures in the Executive Departments: Lister Hill, D, Alabama; Alben W. Barkley, D, Kentucky; Theodore Francis Green, D, Rhode Island; John L. McClellan, D, Arkansas; Brien McMahon, D, Connecticut; George D. Aiken, R, Vermont; Homer Ferguson, R, Michigan; Bourke B. Hickenlooper, R, Iowa.

Finance: Walter F. George, D, Georgia; David I. Walsh, D, Massachusetts; Alben W. Barkley, D, Kentucky; Tom Connolly, D, Texas; Josiah W. Bailey, D, North Carolina; Harry Flood Byrd, D, Virginia; Peter G. Gerry, D, Rhode Island; Joseph F. Guffey, D, Pennsylvania; Edwin C. Johnson, D, Colorado; George L. Radcliffe, D, Maryland; Scott W. Lucas, D, Illinois; Brien McMahon, D, Connecticut; Robert M. La Follette, Jr., P, Wisconsin; Arthur H. Vandenberg, R, Michigan; Robert A. Taft, R, Ohio; John Thomas, R, Idaho; Hugh Butler, R, Nebraska; Eugene D. Millikin, R, Colorado; Owen Brewster, R, Maine; Harlan J. Bushfield, R, South Dakota; Albert W. Hawkes, R, New Jersey.

Foreign Relations: Tom Connolly, D, Texas; Walter F. George, D, Georgia; Robert F. Wagner, D, New York; Elbert D. Thomas, D, Utah; James E. Murray, D, Montana; Claude Pepper, D, Florida; Theodore Francis Green, D, Rhode Island; Alben W. Barkley, D, Kentucky; Joseph F. Guffey, D, Pennsylvania; Carter Glass, D, Virginia.

James M. Tunnell, D, Delaware; Carl A. Hatch, D, New Mexico; Lister Hill, D, Alabama; Scott W. Lucas, D, Illinois; Arthur Apper, R, Kansas; Robert M. La Follette, Jr., P, Wisconsin; Arthur H. Vandenberg, R, Michigan; Wallace H. White, Jr., R, Maine; Henrik Shipstead, R, Minnesota; Warren R. Austin, R, Vermont; Styles Bridges, R, New Hampshire; Alexander Wiley, R, Wisconsin.

Immigration: Richard B. Russell, D, Georgia; Charles O. Andrews, D, Florida; George L. Radcliffe, D, Maryland; Burnet R. Maybank, D, South Carolina; James O. Eastland, D, Mississippi; J. William Fulbright, D, Arkansas; Clyde R. Hoey, D, North Carolina; Harold H. Burton, R, Ohio; Joseph H. Ball, R, Minnesota; C. Douglass Buck, R, Delaware; Homer E. Ferguson, R, Michigan; Forrest O. Donnell, R, Missouri; Milton R. Young, R, North Dakota.

Indian Affairs: Joseph C. O'Mahoney, R, Wyoming; Burton K. Wheeler, D, Montana; Elmer Thomas, D, Oklahoma; Carl A. Hatch, D, New Mexico; Dennis Chavez, D, New Mexico; Ernest W. McFarland, D, Arizona; Glen H. Taylor, D, Idaho; E. P. Carille, D, Nevada; Robert M. La Follette, Jr., P, Wisconsin; Henrik Shipstead, R, Minnesota; William Langer, R, North Dakota; Aiken J. Bushfield, R, South Dakota; E. H. Moore, R, Oklahoma; Edward V. Robertson, R, Wyoming.

Interoceanic Canals: Tom Stewart, D, Tennessee; Claude Pepper, D, Florida; Sheridan Downey, D, California; Albert B. Chandler, D, Kentucky; Warren G. Magnuson, D, Washington; Harlan J. Bushfield, R, South Dakota; Albert W. Hawkes, R, New Jersey; Leverett Saltonstall, R, Massachusetts.

Intrastate Commerce: Burton K. Wheeler, D, Montana; Alben W. Barkley, D, Kentucky; Edwin C. Johnson, D, Colorado; Tom Stewart, D, Tennessee; James M. McInnell, D, Delaware; Ernest W. McFarland, D, Arizona; Clyde R. Hoey, D, North Carolina; Olin D. Johnston, D, South Carolina; Francis J. Myers, D, Pennsylvania; Iven McMahon, D, Connecticut; Hugh B. Mitchell, D, Washington; Frank P. Briggs, R, Missouri; Wallace H. White, Jr., R, Maine; Warren R. Austin, R, Vermont; Henrik Shipstead, R, Minnesota; Charles W. Maybank, R, New Hampshire; Clyde M. Reed, R, Kansas; Chan Gurney, R, South Dakota; Albert W. Hawkes, R, New Jersey; E. H. Moore, R, Oklahoma; Homer E. Capehart, R, Indiana.

Irrigation and Reclamation: John H. Rankin, D, Alabama; Pat McCarran, D, Nevada; John H. Overton, D, Louisiana; Carl A. Hatch, D, New Mexico; Joseph C. O'Mahoney, D, Wyoming; Dennis Chavez, D, New Mexico; Sheridan Downey, D, California; Ernest W. McFarland, D, Arizona; Lee O'Daniel, D, Texas; Hugh B. Mitchell, D, Washington; Chan Gurney, R, South Dakota; John Thomas, R, Idaho; Hugh Butler, R, Nebraska; Eugene D. Millikin, R, Colorado; William Langer, R, North Dakota; Guy Cordon, R, Oregon.

Judiciary: Pat McCarran, D, Nevada; Carl A. Hatch, D, New Mexico; Joseph C. O'Mahoney, D, Wyoming; Albert B. Chandler, D, Kentucky; Harley M. Kilgore, D, West Virginia; Abe Murdock, D, Utah; Ernest W. McFarland, D, Arizona; Burton K. Wheeler, D, Montana; Charles O. Andrews, R, Florida; James O. Eastland, D, Mississippi; Alexander Wiley, R, Wisconsin; Wil-

liam Langer, R, North Dakota; Homer Ferguson, R, Michigan; Chapman Revercomb, R, West Virginia; Kenneth S. Wherry, R, Nebraska; E. H. Moore, R, Oklahoma; H. Alexander Smith, R, New Jersey.

Library: Alben W. Barkley, D, Kentucky; Kenneth McKellar, D, Tennessee; Elmer Thomas, D, Oklahoma; Theodore G. Bilbo, D, Mississippi; George L. Radcliffe, D, Maryland; Theodore Francis Green, D, Rhode Island; Owen Brewster, R, Maine; Albert W. Hawkes, R, New Jersey; Guy Cordon, R, Oregon; Leverett Saltonstall, R, Massachusetts.

Manufactures: John H. Overton, D, Louisiana; Richard B. Russell, D, Georgia; Peter G. Gerry, D, Rhode Island; Joseph F. Guffey, D, Pennsylvania; James M. Mead, D, New York; John L. McClellan, D, Arkansas; Robert M. La Follette, Jr., P, Wisconsin; Eugene D. Millikin, R, Colorado; Joseph H. Ball, R, Minnesota; C. Douglass Buck, R, Delaware; Homer E. Capehart, R, Indiana; Thomas C. Hart, R, Connecticut; Milton R. Young, R, North Dakota.

Military Affairs: Elbert D. Thomas, D, Utah; Edwin C. Johnson, D, Colorado; Lister Hill, D, Alabama; Sheridan Downey, D, California; Albert B. Chandler, D, Kentucky; Harley M. Kilgore, D, West Virginia; James E. Murray, D, Montana; Joseph C. O'Mahoney, D, Wyoming; Robert F. Wagner, D, New York; Tom Stewart, D, Tennessee; Burnet R. Maybank, D, South Carolina; Warren R. Austin, R, Vermont; Styles Bridges, R, New Hampshire; Chan Gurney, R, South Dakota; Chapman Revercomb, R, West Virginia; George A. Wilson, R, Iowa; John Thomas, R, Idaho; Harold H. Burton, R, Ohio.

Mines and Mining: Joseph F. Guffey, D, Pennsylvania; Elbert D. Thomas, D, Utah; Edwin C. Johnson, D, Colorado; Albert B. Chandler, D, Kentucky; Harley M. Kilgore, D, West Virginia; Burnet R. Maybank, D, South Carolina; Hugh B. Mitchell, D, Washington; E. P. Carville, D, Nevada; Clyde M. Reed, R, Kansas; Eugene D. Millikin, R, Colorado; Chapman Revercomb, R, West Virginia; Edward V. Robertson, R, Wyoming; Wayne Morse, R, Oregon.

Naval Affairs: David I. Walsh, D, Massachusetts; Millard E. Tydings, D, Maryland; Richard B. Russell, D, Georgia; Harry Flood Byrd, D, Virginia; Peter G. Gerry, D, Rhode Island; Charles O. Andrews, D, Florida; Allen J. Ellender, D, Louisiana; John L. McClellan, D, Arkansas; James O. Eastland, D, Mississippi; Warren G. Magnuson, D, Washington; Francis J. Myers, D, Pennsylvania; Charles W. Tobey, R, New Hampshire; Raymond E. Willis, R, Indiana; C. Wayland Brooks, R, Illinois; Owen Brewster, R, Maine; Edward V. Robertson, R, Wyoming; Leverett Saltonstall, R, Massachusetts.

Patents: Claude Pepper, D, Florida; Scott W. Lucas, D, Illinois; Joseph C. O'Mahoney, D, Wyoming; Francis J. Myers, D, Pennsylvania; Wallace H. White, Jr., R, Maine; Albert W. Hawkes, R, New Jersey; Homer E. Capehart, R, Indiana.

Pensions: James M. Tunnell, D, Delaware; Burton K. Wheeler, D, Montana; David I. Walsh, D, Massachusetts; Elbert D. Thomas, D, Utah; Theodore G. Bilbo, D, Mississippi; Ernest W. McFarland, D, Arizona; Francis J. Myers, D, Pennsylvania; Henrik Shipstead, R, Minnesota; George D. Aiken, R, Vermont; E. H. Moore, R, Oklahoma; Forrest O. Donnell, R, Missouri.

Magnuson, D, Washington; Arthur H. Vandenberg, R, Michigan; Warren R. Austin, R, Vermont; Robert A. Taft, R, Ohio; Owen Brewster, R, Maine; Hugh Butler, R, Nebraska; Charles W. Tobey, R, New Hampshire; Wayland Brooks, R, Illinois.

PUERTO RICO

Governor—Rexford G. Tugwell, San Juan, Puerto Rico.

Resident Commissioner in U. S.—Jesus T. Pinero, Canovanas, Puerto Rico.

Puerto Rico was ceded to the United States by Spain Dec. 10, 1898 and was under military rule until the Foraker law went into effect May 1, 1900. Following the establishment of a civil government members of the house of delegates to the Puerto Rican legislature and a commissioner to Washington were chosen. The question of church lands arose soon after Puerto Rico was ceded and

the dispute finally was settled by a commission of six members appointed by the United States and Puerto Rico. Puerto Rico now is under the jurisdiction of the department of the interior.

Under an act of March 2, 1917, the legislative power in Puerto Rico was vested in a legislature consisting of two houses, the senate and house of representatives. The senate consists of 19 members elected for four years. The 39 members of the house are elected for four years. Regular sessions of the legislature are held biennially, commencing on the second Monday in February.

CONFEDERATE STATES READMITTED TO THE UNION

State*	Date	New Constitution	
		Adopted	Ratified
Alabama.....	June 25, 1868	Nov. 5, 1867	Nov. 16, 1868
Arkansas.....	June 22, 1868	Jan. 7, 1868	Mar. 13, 1868
Florida.....	June 25, 1868	Feb. 25, 1868	May 4, 1868
Georgia.....	July 15, 1870	Dec. 8, 1867	April 20, 1868

Elections No. 1: James Domengeaux, D. Louisiana; C. Jasper Bell, D. Missouri; Charles A. Buckley, D. New York; Antonio M. Fernandez, D. New Mexico; James J. Delaney, D. New York; Clarence E. Hancock, R. New York; John Jennings, Jr., R. Tennessee.

Elections No. 2: Ed Gossett, D. Texas; Dan R. McGehee, D. Mississippi; A. Leonard Allen, D. Louisiana; Leo F. Rayfield, D. New York; Joe W. Ervin, D. North Carolina; Gerald W. Landis, R. Indiana; Rolla C. McMillen, R. Illinois; Augustus W. Bennet, R. New York; Sherman Adams, R. New Hampshire.

Elections No. 3: O. C. Fisher, D. Texas; Hugh Peterson, D. Georgia; Eugene J. Keogh, D. New York; William T. Granahan, D. Pennsylvania; Charles A. Plumley, R. Vermont; Ralph A. Gamble, R. New York; Angier L. Goodwin, R. Massachusetts; Homer A. Ramey, R. Ohio.

Enrolled Bills: George F. Rogers, D. New York; Mary T. Norton, D. New Jersey; John J. Cochran, D. Missouri; Thomas E. Morgan, D. Pennsylvania; B. Carroll Reece, R. Tennessee; Samuel K. McConnell, Jr., R. Pennsylvania; Edgar A. Sharp, R. New York.

Expenditures in the Executive Departments: Carter Manasco, D. Alabama; John J. Cochran, D. Missouri; William M.

Whittington, D. Mississippi; Edward J. Hart, D. New Jersey; Joseph J. Mansfield, D. Texas; William L. Dawson, D. Illinois; Donald L. O'Toole, D. New York; John S. Gibson, D. Georgia; Jennings Randolph, D. West Virginia; Alfred J. Elliott, D. California; Ed Gossett, D. Texas; Joe W. Ervin, D. North Carolina; Alexander J. Resa, D. Illinois; Clare E. Huffman, R. Michigan; George H. Bender, R. Ohio; Ralph E. Church, R. Illinois; Walter H. Judd, R. Minnesota; Charles M. LaFollette, R. Indiana; Robert F. Rich, R. Pennsylvania; Henry J. Latham, R. New York; Robert K. Henry, R. Wisconsin.

Flood Control: William M. Whittington, D. Mississippi; A. Leonard Allen, D. Louisiana; Alfred J. Elliott, D. California; Henry M. Jackson, D. Washington; J. W. Robinson, D. Utah; Carter Manasco, D. Alabama; O. C. Fisher, D. Texas; Henry D. Larcade, Jr., D. Louisiana; William G. Stigler, D. Oklahoma; Mike Mansfield, D. Montana; Thomas E. Morgan, D. Pennsylvania; A. S. J. Carnahan, D. Missouri; Charles R. Clason, R. Massachusetts; Earl Wilson, R. Indiana; Max Schwabe, R. Missouri; P. W. Griffiths, R. Ohio; J. Glenn Beall, R. Maryland; Edward O. McCowen, R. Ohio; Charles R. Robertson, R. North Dakota; T. Millet Hand, R. New Jersey; Sherman Adams, R. New Hampshire.

Foreign Affairs: Sol Bloom, D. New York; Luther A. Johnson, D. Texas; John Kee, D. West Virginia; James P. Richards, D. South Carolina; Joseph L. Pfeifer, D. New York; Pete Jarman, D. Alabama; W. O. Burgin, D. North Carolina; Wirt Courtney, D. Tennessee; Thomas S. Gordon, D. Illinois; Emily Taft Douglas, D. Illinois; James W. Trimble, D. Arkansas; Helen Gahagan Douglas, D. California; Joseph F. Ryter, D. Connecticut; Daniel J. Flood, D. Pennsylvania; Charles A. Eaton, R. New Jersey; Edith Nourse Rogers, R. Massachusetts; Robert B. Chipfield, R. Illinois; John M. Vorys, R. Ohio; Karl E. Mundt, R. South Dakota; Bartel J. Jonkman, R. Michigan; Frances P. Bolton, R. Ohio; James W. Wadsworth, R. New York; Charles L. Gerlach, R. Pennsylvania; Lawrence H. Smith, R. Wisconsin; Chester E. Mellow, R. New Hampshire.

Immigration and Naturalization: Samuel Dickstein, D. New York; John Lesinski, D. Michigan; Dan R. McGehee, D. Mississippi; A. Leonard Allen, D. Louisiana; Robert Ramspeck, D. Georgia; Ed Gossett, D. Texas; O. C. Fisher, D. Texas; Ralph H. Daughton, D. Virginia; George P. Miller, D. California; E. H. Hedrick, D. West Virginia; William A. Barrett, D. Pennsylvania; Noah M. Mason, R. Illinois; Edward H. Rees, R. Kansas; Hubert S. Ellis, R. West Virginia; Bernard W. (Pat) Kearney, R. New York; Lowell Stockman, R. Oregon; Edward O. McCowen, R. Ohio; Wat Arnold, R. Missouri; James I. Dolliver, R. Iowa; Edgar A. Sharp, R. New York; Joseph R. Farrington, R. Hawaii.

Indian Affairs: Henry M. Jackson, D. Washington; Samuel Dickstein, D. New York; John R. Murdock, D. Arizona; Comp ton I. White, D. Idaho; Antonio M. Fernandez, D. New Mexico; William G. Stigler, D. Oklahoma; Mike Mansfield, D. Montana; Ellis E. Patterson, D. California; William J. Green, Jr., D. Pennsylvania; Cleveland M. Bailey, D. West Virginia; Adam C. Powell, Jr., D. New York; William J. Gallagher, D. Minnesota; Berkeley L. Bunker, D. Nevada; E. L. Bartlett, D. Alaska; Karl E. Mundt, R.

South Dakota; Robert F. Rockwell, R, Colorado; Hal Holmes, R, Washington; Wat Arnold, R, Missouri; Charles R. Robertson, R, North Dakota; Edgar A. Sharp, R, New York; George B. Schwabe, R, Oklahoma; Wesley A. D'Ewart, R, Montana.

Insular Affairs: C. Jasper Bell, D, Missouri; Dan R. McGehee, D, Mississippi; L. W. Robinson, D, Utah; Ed Gossett, D, Texas; James Domengeaux, D, Louisiana; John S. Gibson, D, Georgia; William L. Dawson, D, Illinois; Antonio M. Fernandez, D, New Mexico; Frank W. Boykin, D, Alabama; Donald L. O'Toole, D, New York; Ralph H. Daughton, D, Virginia; George P. Miller, D, California; Herbert J. McClinchey, D, Pennsylvania; Jesús T. Piñero, D, Puerto Rico; Richard J. Welch, R, California; W. Sterling Cole, R, New York; Fred A. Crawford, R, Michigan; Karl M. LeCompte, R, Iowa; Chester H. Gross, R, Pennsylvania; Walter H. Judd, R, Minnesota; Jay LeFevre, R, New York; Leon H. Javin, R, Pennsylvania; P. W. Griffiths, R, Ohio; A. L. Miller, R, Nebraska; Joseph R. Farrington, R, Hawaii.

Interstate and Foreign Commerce: Clarence F. Lea, D, California; Robert Crosser, D, Ohio; Alfred L. Bulwinkle, D, North Carolina; Virgil Chapman, D, Kentucky; Lyle H. Boren, D, Oklahoma; Lindsey Beckworth, D, Texas; J. Percy Priest, D, Tennessee; Oren Harris, D, Arkansas; George G. Sadowski, D, Michigan; Richard J. Harless, D, Arizona; John W. Murphy, D, Pennsylvania; Edward A. Kelly, D, Illinois; Luther Patrick, D, Alabama; John J. Sullivan, D, Missouri; Dwight L. Rogers, D, Florida; Benjamin J. Rabin, D, New York; Vito Marcantonio, AL, New York; Charles A. Wolverton, R, New Jersey; Pehr J. Holmes, R, Massachusetts; B. Carroll Reece, R, Tennessee; Charles A. Halleck, R, Indiana; Carl Hinshaw, R, California; Clarence J. Brown, R, Ohio; Evan Howell, R, Illinois; Leonard W. Hall, R, New York; Thomas D. Winter, R, Kansas; Joseph P. Hara, R, Minnesota; Wilson D. Gillette, D, Pennsylvania.

Invalid Pensions: John Lesinski, D, Michigan; Frank W. Boykin, D, Alabama; Herbert C. Bonner, D, North Carolina; Augustine B. Kelley, D, Pennsylvania; William L. Dawson, D, Illinois; James H. Morrison, D, Louisiana; Charles R. Savage, D, Washington; Thomas E. Morgan, D, Pennsylvania; Adam C. Powell, Jr., D, New York; Clyde Doyle, D, California; E. H. Hedrick, D, West Virginia; J. Harry McGregor, R, Ohio; Charles M. LaFollette, R, Indiana; Robert Hale, R, Maine; Leon H. Javin, R, Pennsylvania; Robert J. Corbett, D, Pennsylvania; T. Millet Hand, R, New Jersey; Edward J. Elsasser, R, New York.

Irrigation and Reclamation: John R. Aurdock, D, Arizona; Compton I. White, D, Idaho; J. W. Robinson, D, Utah; James Domengeaux, D, Louisiana; Andrew L. Somers, D, New York; Antonio M. Fernandez, D, New Mexico; William L. Dawson, D, Illinois; Alfred J. Elliott, D, California; Mike Mansfield, D, Montana; Charles R. Savage, D, Washington; George P. Miller, D, California; Dewey Short, R, Missouri; Robert F. Rockwell, R, Colorado; William Emke, R, North Dakota; Chester H. Gross, D, Pennsylvania; A. L. Miller, R, Nebraska; Lowell Stockman, R, Oregon; John Phillips, D, California; Frank A. Barrett, R, Wyoming; Hal Holmes, R, Washington; Wesley A. D'Ewart, R, Montana.

Judiciary: Hatton W. Sumners, D, Texas; Emanuel Celler, D, New York; Zebulon Weaver, D, North Carolina; Francis B. Walter, D, Pennsylvania; Sam Hobbs, D, Alabama; John H. Tolan, D, California; William T. Byrne, D, New York; Estes Kefauver, D, Tennessee; Joseph R. Bryson, D, South Carolina; Fadio Cravens, D, Arkansas; Sam M. Russell, D, Texas; Thomas J. Lane, D, Massachusetts; Martin Gorski, D, Illinois; Michael A. Feighan, D, Ohio; Frank L. Chelf, D, Kentucky; Clarence E. Hancock, R, New York; Earl C. Michener, R, Michigan; John M. Robison, R, Kentucky; Chauncey W. Reed, R, Illinois; John W. Gwynne, R, Iowa; Louis E. Graham, R, Pennsylvania; Raymond S. Springer, R, Indiana; Joseph E. Talbot, R, Connecticut; Frank Fellows, R, Maine; Earl R. Lewis, R, Ohio; John Jennings, Jr., R, Tennessee; Angier L. Goodwin, R, Massachusetts.

Labor: Mary T. Norton, D, New Jersey; Robert Ramspeck, D, Georgia; Jennings Randolph, D, West Virginia; John Lesinski, D, Michigan; Graham A. Barden, D, North Carolina; Augustine B. Kelley, D, Pennsylvania; O. C. Fisher, D, Texas; James H. Morrison, D, Louisiana; Frank E. Hook, D, Michigan; Ellis E. Patterson, D, California; James P. Geelan, D, Connecticut; William J. Green, Jr., D, Pennsylvania; Adam C. Powell, Jr., D, New York; Jesús T. Piñero, D, Puerto Rico; Richard J. Welch, R, California; Fred A. Hartley, Jr., R, New Jersey; Gerald W. Landis, R, Indiana; Clare E. Hoffman, R, Michigan; Joseph Clark Baldwin, R, New York; Samuel K. McConnell, Jr., R, Pennsylvania; Sherman Adams, R, New Hampshire.

Library: Donald L. O'Toole, D, New York; Graham A. Barden, D, North Carolina; Schuyler Otis Bland, D, Virginia; C. W. (Runt) Bishop, R, Illinois; John W. Heseltin, R, Massachusetts.

Memorials: Antonio M. Fernandez, D, New Mexico; Mary T. Norton, D, New Jersey.

Merchant Marine and Fisheries: Schuyler Otis Bland, D, Virginia; Robert Ramspeck, D, Georgia; Joseph J. Mansfield, D, Texas; Edward J. Hart, D, New Jersey; Frank W. Boykin, D, Alabama; J. Hardin Peterson, D, Florida; Herbert C. Bonner, D, North Carolina; James Domengeaux, D, Louisiana; Henry M. Jackson, D, Washington; Eugene J. Keogh, D, New York; Ralph H. Daughton, D, Virginia; Ellis E. Patterson, D, California; E. L. Bartlette, D, Alaska; Richard J. Welch, R, California; Fred Bradley, R, Michigan; Gordon Canfield, R, New Jersey; Alvin F. Weichel, R, Ohio; Christian A. Herter, R, Massachusetts; Ralph E. Church, R, Illinois; Ellsworth B. Buck, R, New York; Robert Hale, R, Maine; Samuel K. McConnell, Jr., R, Pennsylvania; Joseph R. Farrington, R, Hawaii.

Military Affairs: Andrew J. May, D, Kentucky; R. Ewing Thomason, D, Texas; Overton Brooks, D, Louisiana; John J. Sparkman, D, Alabama; Paul J. Kilday, D, Texas; Carl T. Durham, D, North Carolina; Clifford Davis, D, Tennessee; John Edward Sheridan, D, Pennsylvania; Robert L. F. Sikes, D, Florida; Philip J. Philbin, D, Massachusetts; Paul Stewart, D, Oklahoma; Arthur Winstead, D, Mississippi; Chet Holifield, D, California; James A. Roe, D, New York; Melvin Price, D, Illinois; E. L. Bartlett, D, Alaska; Jesus T. Piñero, D,

Puerto Rico; Walter G. Andrews, R, New York; Dewey Short, R, Missouri; Leslie C. Arends, R, Illinois; Charles R. Clason, R, Massachusetts; J. Parnell Thomas, R, New Jersey; Paul W. Shafer, R, Michigan; Thomas E. Martin, R, Iowa; Charles H. Elston, R, Ohio; Forest A. Harness, R, Indiana; Ivor D. Fenton, R, Pennsylvania; J. Leroy Johnson, R, California; Clare Booth Luce, R, Connecticut; Joseph R. Farrington, R, Hawaii.

Mines and Mining: Andrew L. Somers, D, New York; J. Hardin Peterson, D, Florida; John R. Murdock, D, Arizona; Jennings Randolph, D, West Virginia; Augustine B. Kelley, D, Pennsylvania; Compton I. White, D, Idaho; Clair Engle, D, California; E. H. Hedrick, D, West Virginia; A. S. J. Carnahan, D, Missouri; William J. Gallagher, D, Minnesota; Thomas E. Morgan, D, Pennsylvania; Berkeley L. Bunker, D, Nevada; E. L. Bartlett, D, Alaska; John M. Robson, R, Kentucky; Fred Bradley, R, Michigan; Gerald W. Landis, R, Indiana; Robert F. Rockwell, R, Colorado; Harris Ellsworth, R, Oregon; Walter E. Brehm, R, Ohio; Robert J. Corbett, R, Pennsylvania; George B. Schwabe, R, Oklahoma; Wesley A. D'Ewart, R, Montana.

Naval Affairs: Carl Vinson, D, Georgia; Patrick H. Drewry, D, Virginia; Lyndon B. Johnson, D, Texas; Michael J. Bradley, D, Pennsylvania; Ed. V. Izac, D, California; Lansdale G. Carnahan, D, Missouri; Tom Pickett, D, Texas; William J. Green, Jr., D, Pennsylvania; Leo F. Rayfiel, D, New York; Walter B. Huber, D, Ohio; Edith Nourse Rogers, R, Massachusetts; Paul Cunningham, R, Iowa; Bernard W. (Pat) Kearney, R, New York; Marion T. Bennett, R, Missouri; Errett P. Scrivener, R, Kansas; James C. Auchincloss, R, New Jersey; Charles W. Vursell, R, Illinois; Homer A. Ramey, R, Ohio.

TERRITORY OF ALASKA

Governor—Ernest Gruening, Juneau, Alaska
Secretary—Llewellyn Williams.
Delegates to Congress—E. L. Bartlett, Juneau, Alaska.

The Territory of Alaska was purchased from Russia in March, 1867 for \$1,720,000 and organized as a noncontiguous possession by act of Congress March 7, 1868. For several years the boundary line between British territory in Canada and Alaska had been the cause of dispute between the two countries and finally in 1902 a dispute, after the Anglo-American commission had failed to settle it, was referred to an Alaska Boundary tribunal which was created by a treaty between the United

States and Great Britain. In 1903 the tribunal reached an agreement, which supported most of the United States' claims except several islands which were divided between the two countries.

The governor of Alaska is appointed by the United States. The senate of the legislature has eight members, elected for four years. The house has 16 members, elected for two years. The sessions are biennial, on odd-numbered years, beginning the second Monday in January. The limit of regular sessions is 60 days, and of special sessions, 15 days. The delegate to Congress is elected on the second Tuesday in September on even-numbered years.

WAKE ISLAND

Wake Island, 2,000 miles west of Hawaii and annexed to the U. S. in 1898, has become one of the most useful places in the North Pacific since development of trans-Pacific aviation. The U. S. put powerful naval and

air establishments there in 1939-1941. Japs attacked and occupied the atoll Decemb 24, 1941. It was returned to the U. August 31, 1945. Peale and Wilkes islets a part of Wake.

MIDWAY ISLAND

Midway Island is at the end of a chain of rocks extending from Hawaii 1,200 miles

from Honolulu. The reef has a circumference of 15 miles. It is used for defensive purposes.

EQUATORIAL ISLANDS

Jarvis, Howland and Baker Islands, situated approximately on the equator south of the Hawaiian Islands were placed under the

jurisdiction of the department of interior President Roosevelt in 1936 for administration.

OTHER UNITED STATES POSSESSIONS

Swan Island in the Caribbean sea.
Swains Island in the Pacific ocean.
Johnston Island off Hawaii.
Guam Island in the Pacific ocean.
Virgin Islands of the U. S.
Panama Canal Zone.

Antarctica—Approximately 200,000 square miles of frozen wastes in the antarctic have been added to the United States through the explorations of Adm. Richard Byrd in 1929-1935.

The electoral vote for vice-president in 1900 was 696 for Republican, 271 for Democratic, 149 for Populist, 27. *The 4 electoral votes of Utah and the 4 electoral votes of Vermont in 1912 were cast for the Republican candidates

W. H. Taft for president and Nicholas Murray Butler for vice-president. †The 13 votes of Wisconsin in 1924 were cast for the Progressive candidate, Robert M. La Follette.

AMERICAN SAMOA

Governor—U. S. Naval officer appointed by President.

By agreement between U. S., Great Britain and Germany Dec. 2, 1899, the Samoan Islands were partitioned between Germany and the U. S.

American Samoa, the eastern section of the islands made up of Tutuila, Manua and

uninhabited Rose islands, has a total area of 60 square miles and a population of 12,908 according to 1940 census reports. The administrative seat, Pago Pago, Tutuila, acquired as a coaling station in 1872, is one of the best harbors in the South Seas. Islands are partially self-governing. Copra is grown for export.

SENATE FUNERALS

The state funeral of Sen. Joseph T. Robinson, of Arkansas, was the 14th such funeral to be held in the senate chambers since the Civil war.

Others have been: Solomon Fott, 1866; John E. Kenna, 1893; Zebulon B. Vance, 1894; Isham G. Harris, 1897; Edward O. Walthall, 1898; Marcus A. Hanna, 1904;

William B. Bate, 1905; Augustus O. Bacon, 1914; Theodore E. Burton, 1929; Francis E. Warren, 1929; Lee S. Overman, 1930; William J. Harris, 1932, and Thomas J. Walsh, 1933.

Usually Congress designates one day during a session to eulogize recently deceased members of Congress and to offer memorials.

HEART DISEASES CAUSE THREE DEATHS IN TEN

During the war decreases occurred in the death rates for nephritis, tuberculosis, pneumonia and influenza, according to the Bureau of the Census.

Diseases of the heart accounted for 29.6 percent of deaths in 1944, excluding armed forces overseas, compared with 29.2 percent in 1943 and 26.9 percent in the three-year period, 1939-1941.

The second leading cause of death, cancer and other malignant tumors, resulted in 12.1 percent of the deaths in 1944 compared with 11.4 percent of the deaths in 1943 and 11.2 percent in the 1939-1941 period. The third leading cause of death, intracranial lesions of vascular origin, was responsible for 8.8 percent of the deaths in 1944 compared with 8.7 percent of the deaths in 1943 and 8.4 percent of the deaths in the 1939-1941 period.

Nephritis caused 6.5 percent of the deaths

in 1944 compared with 7.5 percent of the deaths in the 1939-1941 period, deaths from pneumonia and influenza were 5.8 percent in 1944 compared with 6.6 percent in the 1939-1941 period. Tuberculosis caused 3.9 percent of the deaths in 1944 compared with 4.3 percent of the deaths in the 1939-1941 period.

While there were 1,411,338 deaths from all causes in 1944, a decline of 48,206 from 1943, there were 4,323 more deaths from cancer and other malignant tumors and 459 more deaths from motor vehicle accidents. Yet the 1944 death rate for motor-vehicle accidents, 18.3 per 100,000 population, was 32.2 percent below the motor-vehicle accident rate of 27.0 for the 1939-1941 period, a decrease due chiefly, if not entirely, to war-time restrictions on speed, tires and gasoline.

ILLEGITIMATE BIRTHS

The number of illegitimate births rose 5.3 per cent between 1943 and 1944 according to the Census Bureau. Reports from 38 state

governments and the District of Columbia listed 87,001 such births in 1944 as compared with 81,586 in the previous year.

¹ "Military" voting is used here to include voting by members of the Army, the Navy, and the Merchant Marine, and by civilian members of organizations attached to and serving with the armed forces of the United States, including (as defined by Public Law 277 of the 78th Congress, 2nd Session) the American Red Cross, the Society of Friends, the Women's Auxiliary Service Pilots, and the United Service Organizations. Some slight variations occur among the States for the use of State ballots, as shown in table 6.

² Includes State ballots and Federal war ballots.

³ Source: Statistics of the Presidential and Congressional Election of November 7, 1944 compiled by the Office of the Clerk of the House of Representatives, corrected to January 16, 1945.

⁴ Includes State ballots only. Federal War Ballot not accepted as valid.

A SENATOR'S COSTS

Source: Taken from Report of the Secretary of the Senate, 1944.

A Senator gets \$10,000 per year. The total cost of the Senate at the close of the fiscal year June 30, 1944 was \$4,954,164.51. This included salaries of 96 Senators; franking privileges; fuel and heating; storage of documents; automobiles, maintenance of an mileage. Total salaries of "officers and employees," was \$2,481,973. Thus, for upkeep of the senators and the Senate chambers total of \$2,472,191.51 above salaries was paid.

STATISTICS OF THE PATENT OFFICE, 1942

Following is presented the usual statistical information regarding the activities of the Patent Office.

* Applications received during the fiscal year ended June 30, 1942¹.

With fees:

Applications for patents for inventions.....	47,710	
Applications for patents for designs.....	5,568	
Applications for reissue of patents.....	273	
Applications for registration of trade-marks.....		53,551
Total, with fees.....		212,103

Without fees:

Applications for inventions (act March 3, 1883).....	759	
Applications for reissue (act March 3, 1883).....	2	
Applications for reissue (rule 170).....	3	
Total, without fees.....		764

Grand total..... 66,418

¹ Including applications in which fees were refunded and transferred.

² Includes 3,106 applications for renewal of trade-mark registrations.

U. S. POPULATION PASSES 140 MILLION MARK

The population of the United States passed the 140,000,000 mark about October 1, according to an estimate by Director J. C. Capron of the Bureau of the Census, Department of Commerce.

On this basis, the population increased by

about 8,330,725 in five and one-half years following the 1940 Census, compared with an increase of 8,894,229 during the 10 years between the 1930 and 1940 Censuses. The population of the United States in 1930 was 122,775,046 and in 1940 was 131,669,275.

TRUMAN'S RECONVERSION PROGRAM

In one of the longest presidential messages to Congress, President Truman outlined the following 21-point reconversion program on Sept. 6, 1945:

1. Unemployment compensation—supplementing of state benefits to provide 26 weeks' protection at a \$25 a week maximum.
2. Fair Labor Standards act—a "substantial" increase over the current 40 cents an hour minimum wage to eliminate living substandards.
3. Wartime controls—caution on removal by Congress.
4. Executive agencies reorganization—authorization to the President to reorganize the executive branch of the government.
5. Full employment—early action on the bill to provide machinery for a continuous full employment policy.
6. Fair Employment Practice commission—putting it on a permanent basis.
7. U. S. Employment Service extension—continuation until at Least June 30, 1947 before returning it to the states.
8. Labor disputes and wage stabilization—labor-management cooperation in peace as in war to keep disputes "at a minimum" and adjustments in wage rates to eliminate inequities.
9. Agriculture—transfer of \$500,000,000 of lend-lease funds to the CCC for price support; crop insurance; scientific research; development of farm export markets.
10. Selective service—inducements for voluntary enlistments and induction from the 18-25 age group for a maximum of two years' service.
11. Housing—aid to private enterprise in building 10,000,000 to 15,000,000 houses in the next 10 years; slum clearance; low rent housing; speeding rural housing.
12. Research—a single agency for federal scientific research and promotion and support of private research.
13. Transition tax revision—limited tax reduction for 1946 and later modernization and cuts.
14. Surplus property disposal—a single administration.
15. Small business—protection and encouragement.
16. Veterans—liberalized hospital and medical care; vocational training and education; loan guarantees and life insurance; social security coverage for the period of service.
17. Public works and national resources—regional development of the nation's river valleys; construction of federal buildings, roads and airports; grants to states and municipalities for public works and hospitals.
18. Lend-lease and post war reconstruction—liberal settlements to permit "a sound world wide economy;" continued economic assistance abroad; appropriations of \$550,000,000 and \$1,350,000,000 for UNRRA.
19. Congressional salaries—increase to \$20,000 for House and Senate members; repeal of House expense allowance; adequate retirement system for members of Congress; adequate wage scale for executive and judicial branches.
20. Sale of ships—disposal of surplus tonnage to expedite resumption of normal merchant operations.
21. Stockpiling of strategic materials—acquisition and retention of materials in which the U. S. was naturally deficient but which were necessary to national defense.

TRUMAN'S FOREIGN POLICY

In a Navy day dedication of the 45,000-ton carrier, "Franklin D. Roosevelt," Oct. 27, at the New York Navy yard, President Truman outlined the following 12 points of American foreign policy:

1. We seek no territorial expansion or selfish advantage. We have no plans for aggression against any other state, large or small. We have no objective which need clash with the peaceful aims of any other nation.
2. We believe in the eventual return of sovereign rights and self-government to all peoples who have been deprived of them by force.
3. We shall approve no territorial changes in any friendly part of the world unless they accord with the freely expressed wishes of the people concerned.
4. We believe that all peoples who are prepared for self-government should be permitted to choose their own form of government by their own freely expressed choice, without interference from any foreign source. That is true in Europe, in Asia, in Africa, as well as in the Western Hemisphere.
5. By the combined and cooperative action of our war allies, we shall help the defeated enemy states establish peaceful democratic governments of their own free choice. And we shall try to attain a world in which Nazism, Fascism, and military aggression cannot exist.
6. We shall refuse to recognize any government imposed upon any nation by the force of any foreign power. In some cases it may be impossible to prevent forceful imposition of such a government. But the United States will not recognize any such government.
7. We believe that all nations should have the freedom of the seas and equal rights to the navigation of boundary rivers and waterways and of rivers and waterways which pass through more than one country.
8. We believe that all states which are accepted in the society of nations should have access on equal terms to the trade and the raw materials of the world.
9. We believe that the sovereign states of the Western Hemisphere, without interference from outside the Western Hemisphere, must work together as good neighbors in the solution of their common problems.
10. We believe that full economic collaboration between all nations, great and small, is essential to the improvement of living conditions all over the world, and to the establishment of freedom from fear and freedom from want.
11. We shall continue to strive to promote freedom of expression and freedom of religion throughout the peace-loving areas of the world.
12. We are convinced that the preservation of peace between nations requires a United Nations Organization composed of all the peace-loving nations of the world who are willing jointly to use force if necessary to insure peace."

*Money order business temporarily suspended with Spain.

The following countries have had International money order business temporarily suspended: Albania, Belgium, Bulgaria, Cape Verde Islands, China, Czechoslovakia, Denmark, Estonia, Finland, France, Germany, Greece, Hong Kong, Hungary, Italy, Japan, Latvia, Lithuania, Luxembourg, Malaya, Netherlands, Netherlands Indies, Norway, Poland, Rumania, Spain, Sweden, Switzerland, Thailand (Siam), Regency of Tunis, and Yugoslavia.

UNITED STATES POSTAL INFORMATION

Domestic Mail

The domestic rates and conditions apply to the United States, including Hawaii, Alaska, Puerto Rico, the Virgin Islands, the Philippine Archipelago, Guam, Tutuila and Manua and other islands of the Samoan group

east of longitude 171° west of Greenwich and the Canal Zone which includes the islands in the Bay of Panama named Perico, Naos Culebra and Flamenco.

Air Mail

The rate of postage on air mail is 8 cents for each ounce or fraction thereof, including Alaska, and also from one post office to another in the Hawaiian Islands, Puerto Rico, and the Virgin Islands of the United States, and between the latter islands and Puerto Rico, but not between the mainland of the United States and any of these islands.

The air mail rate to members of the armed forces and also to civilian employees and contractors receiving mail through Army and Navy post offices outside continental United States is 6 cents per half ounce, or fraction thereof.

Effective June 30, 1945, air mail postage rate to Cuba was reduced to 8 cents per half ounce, from the continental United States, Alaska, Puerto Rico, and the Virgin Islands of the United States.

The air mail rate was reduced to 8 cent per half ounce on mail to Naval Operating Base, Guantanamo, Cuba, from the United States, Alaska, Puerto Rico, and the Virgin Islands.

The postage on articles mailed in the United States possessions in the Pacific to be carried by the trans-Pacific air service to the United States and thence by air to Cuba or the Naval Operating Base, Guantanamo will be the prescribed postage carriage by air to the continental United States plus the postage for air service from the United State to destination.

Air mail rates from the United States or Alaska to the Union of Socialist Soviet Republics is 30 cents per half ounce or fraction thereof.

First Class

First class matter includes letters, postal cards, private post cards, business reply cards and letters in business reply envelopes and all matter wholly or partly in writing, whether sealed or unsealed, except manuscript copy accompanying proof sheets or

corrected proof sheets of the same and the writing authorized by law to be placed upon matter of other classes. Matter sealed or otherwise closed against inspection is also of the first class.

Second Class

Second class matter includes newspapers and periodicals bearing notice of entry as

second class matter. No limit of weight prescribed.

Postage

Fee

Letters and written and sealed matter, each ounce or fraction thereof..... 3¢
For local delivery..... 3¢
Government post cards and other private

mailing cards conforming to Post Office regulations.....
Business reply cards and on letters in business reply envelopes, regular postage plus.....

Postage

Newspapers and magazines, each two ounces or fraction of, except when the

postage at the fourth class rate is lower, in which the lower rate applies.....

Third Class

Third class matter embraces books (including catalogues) having, including the covers, 24 pages or more, and other printed matter on paper not having the nature of personal correspondence, proof sheets, corrected proof sheets and manuscript copy, accompanying the same, matter in point print or raised characters used by the blind,

drawings, merchandise, seeds, bulbs, cuttings, roots, scions and plants, and all other mailable matter not embraced in the first and second classes when sent in packages weighing up to and including 8 ounces. The same matter when sent in parcels exceeding 8 ounces in weight is embraced in fourth class or parcel post mail.

Postage

Merchandise and loose printed matter, for each 2 ounces or fraction to 8 ounces inclusive..... 1½¢
Books and catalogues, seeds, scions and bulbs, for each 2 ounces or fraction to

8 ounces inclusive..... 1¢
Bulk mail of not less than 20 pounds, not less than 200 separately addressed identical pieces. Apply at post office for privilege

Fourth Class

Fourth class matter embraces that known as domestic parcel post mail exceeding 8 ounces in weight and includes merchandise, farm and factory products, seeds, cuttings, bulbs, roots, scions and plants, books (including catalogues), circulars and other printed matter and all other mailable matter not embraced in the first and second class.

The limit in size of fourth class matter is 100 inches in length and girth combined. In measuring a parcel, the greatest distance in a straight line between the ends (but not

around the parcel) is taken as its length, while the distance around the parcel at its thickest part is taken as its girth. For example, a parcel 35 inches long, 10 inches wide and 5 inches high measures 65 inches in length and girth combined.

On parcels exceeding 84 inches the minimum postage charge is the 10-pound rate for zone addressed.

The limit of weight for fourth class matter is 70 pounds for all zones.

Registered C. O. D. Mail

The fees for collect-on-delivery service for registered sealed domestic mail of any class bearing postage at the first-class rate and the limits of indemnity for the loss, rifling, or damage thereof in the mails, shall, in addition to postage and any other required additional fees, be as follows:

Amount Collectible and Limit of Indemnity Payable	Fee, including Registration
From \$.01 to \$ 10.00	\$.40
From 10.01 to 50.00	.55
From 50.01 to 100.00	.75
From 100.01 to 200.00	1.00

When indemnity in excess of \$200 is desired, the fees for domestic registered C. O. D. mail, shall, in addition to postage and any other required additional fees, be as follows:

Amount of Indemnity	Fee, including Registration
From \$200.01 to \$300	\$1.05
From 300.01 to 400	1.10
From 400.01 to 500	1.15
From 500.01 to 600	1.20
From 600.01 to 700	1.25
From 700.01 to 800	1.35
From 800.01 to 1000	1.40

Demurrage Charges—Domestic C. O. D. Mail

(Registered and Unregistered)

C. O. D. mail held at office of address longer than 20 days will be subject to a demurrage charge of 5c a day. Parcels will not be held longer than 30 days. Collect-on-Delivery mail is not subject to demurrage

when it bears the instructions of the sender limiting its retention to not exceeding 20 days after the day of receipt at any post office of address.

Charge for Service

(Covering C. O. D. Mail at Office Where Held)

Each request for the alteration or cancellation of charges on a C. O. D. article or for the delivery of the article to other than the addressee at the postoffice where held must be accompanied with 10 cents. Requests of this character should be filed with the postmaster at the mailing office and not transmitted direct to the postmaster at the office of address. This charge is in addition to the postage at the local rate required for the second attempt at delivery if the parcel is

addressed for delivery by carrier (city, village or rural) or for delivery to other than the original addressee at the post office where held.

When a C. O. D. article is undeliverable, the sender or sender's representative shall be so notified only when the article is endorsed to show that notice is desired, and for such notice a charge of 5 cents shall be made and will be collected on delivery of the notice.

First Class vs. Air Mail to 20 Cities

Elapsed time required for delivery of letters sent by air mail and first class mail between Chicago and 20 other cities. Figures for time are in hours and minutes:

	Air mileage	From Chicago		To Chicago	
		Air mail	First class	Air mail	First class
Washington, D. C.	625	18:54	32:53	21:54	37:43

International Ordinary (Parcel Post) Mail

Limited indemnity may be paid in the amount of the loss, rifling, or damage to ordinary parcel post packages exchanged with certain countries.

Fees

A charge of 5 cents shall be made for an inquiry or complain concerning any ordinary article (parcel-post package or Postal Union article) addressed for delivery in a foreign country, unless the sender is able to show, as prescribed, prima facie loss or other irregularity through fault of the postal service.

Return Receipts

(Domestic Insured and Registered Mail)

Upon payment of a fee of 4 cents at the time of mailing, or of 7 cents subsequent to time of mailing, a receipt will be obtained insured or registered mail matter showing whom and when the article was delivered, which receipt will be returned to the sender. These charges are plus postage and fee for insurance and registration. An additional charge of 10 cents is made when domestic registered insured, or C. O. D. mail is restricted in delivery to addressee only, or to the addressee or order.

Foreign Mail

(Consult postmaster for details)

The foreign letter rate is 3 cents an ounce or fraction thereof to the following countries: Argentina, Bolivia, Brazil, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Haiti, Honduras (Republic of), Mexico, Newfoundland, (including Labrador), Nicaragua, Panama, Paraguay, Peru, Salvador (El), Spain (including Andorra, Balearic Islands, Canary Islands, Morocco (Spanish zone), Rio de Oro, Spanish Guinea (including Annobon Island) and the Spanish possessions in northern Africa), Uruguay and Venezuela.

The postage rate on letters to all other

foreign destinations is 5 cents for the first ounce or fraction and 3 cents for each additional ounce or fraction thereof.

The rate of postage on single post cards for any destination above named is 2 cents each; for all other foreign destinations, cents each.

The postage rate for all parcel post packages to foreign destinations is 14 cents pound or fraction thereof. In addition there are in many countries transit charges to be paid. For particular countries, consult local post office.

Canada and Newfoundland

Mailable merchandise and printed matter designated as third and fourth-class matter and Postal Union "prints" addressed to Canada or Newfoundland may be insured for the same fees and under the same conditions in so far as applicable, including payment of indemnity, as apply to domestic mail of these classes. Third-class or "printed matter" may be registered, if desired, but fourth-class parcels of general merchandise may be registered only when sealed and postage is paid at letter rate.

Senders' return receipts are not obtained for insured parcels addressed to Canada, but may be obtained for insured parcels addressed to Newfoundland by payment of a fee of 5 cents, in addition to postage and insurance fee, when requested at the time of mailing; when requested subsequent to the time of mailing, a charge of 10 cents is made.

The following articles and those of simi-

lar character shall not be accepted for transmission as insured mail for or from Canada or Newfoundland, but when mailable, may be sent as registered matter provided they are sealed and the letter rate of postage paid: Precious stones, mounted or unmounted; all articles commonly known as jewelry used for personal adornment, such as rings, brooches, tie pins, chains, cuff link dress sets, fobs, bracelets, rosary beads, lockets, necklaces, etc.; all articles of gold or other precious metals for personal use, such as cigarette holders, cigarette cases, vanity cases, card-cases, gold and silver pencil lorgnettes, mesh bags, watches, etc.; gold scrap, jeweler's filings, fountain pens, money packets (which are construed as including bank notes, coin, including coins not current in bullion, gold dust, bonds, and coupons payable to bearer, stocks, and other securities negotiable by bearer).

International C. O. D. Service

International C. O. D. service is in effect with Denmark, Finland, Norway, Mexico and Sweden.

The C. O. D. service with Denmark, Finland, Norway and Sweden applies to insured parcels, whereas the C. O. D. service with Mexico applies to registered parcels. Also, the C. O. D. service with Mexico is extended

to postal union printed matter, 8-ounce packages of merchandise and small packet.

The C. O. D. service to Austria, Germany and Hungary has been suspended.

The C. O. D. service to Belgium, Denmark, (including Faroe Islands and Greenland), Finland, Lithuania, Norway and Sweden is temporarily suspended.

C. O. D. Fees

C. O. D. fees which provide limited indemnity, range from 30 cents to 70 cents. (Consult postmaster.)

Return receipts for C. O. D. parcels sent to the countries mentioned above, except

Mexico, will be furnished upon request to the sender and upon payment of a fee of 5 cents for each receipt; 10 cents for each receipt requested after mailing.

International Registered Mail

Letters, prints of all kinds, including raised prints for the blind, single and reply paid post cards, small packets, samples of merchandise and commercial papers may be registered to practically all foreign countries.

A registration fee of 15 cents in addition to postage is chargeable to all postal union articles addressed to foreign countries. Parcel post packages may be registered to certain foreign countries, subject to fees ranging from 15 cents to 60 cents.

A charge of 5 cents is collected from the sender, in addition to the postage and registry fee, for a return receipt for a postal

union registered article requested at the time of mailing, and 10 cents if requested after mailing. Consult postmaster as to fee chargeable for return receipts for registered international parcel post packages.

A charge of 10 cents is made for an inquiry as to the disposal of any registered or insured article addressed to a foreign country unless the sender has failed to receive a return receipt for which he paid the required fee, or able to show, as prescribed, *prima facie* evidence of other irregularity through fault of the postal service. (Consult postmaster.)

Indemnity

Limited indemnity is payable for the total loss (cover and content) of postal union registered articles addressed to foreign countries. Limited indemnity in the case of a

few foreign countries only, is payable also for the loss, rifling, or damage of international parcel post packages. (Consult postmaster.)

International Insured Mail

International insured parcel post service has been inaugurated between the United States and Austria, the Bahamas, Brunei, Canada, Denmark (including Faroe Islands and Greenland), Dutch Guiana, Ecuador, Fanning Island, Federated Malay States, Finland, France (including Algeria and Corsica), French Indo-China, Great Britain and Northern Ireland, Greece, Hungary, Irish Free State, Italy and colonies, Leeward Islands, Macao, Malay states (non-federated), The Netherlands, Newfoundland (including Labrador), New Zealand, North

Borneo (state of), Norway, Portugal (including Madeira and the Azores), Portuguese West Africa, Sarawak, Straits Settlements, Sweden, Switzerland, Turkey, Western Samoa and Windward Islands. Parcel post packages for Ecuador, Macao, The Netherlands, Portugal and Portuguese West Africa also may be registered. In the case of Canada and Newfoundland (including Labrador) prints and packages of merchandise weighing 8 ounces or less may be insured.

Insurance Fees

Insurance fees range from 5 cents to 55 cents, providing for indemnity, in the event of loss, rifling or damage. The limit of indemnity in most cases is \$100. (Consult postmaster). The insurance fees, however, on parcels exchanged between continental United States (not including Alaska) and Great Britain and Northern Ireland range from 20 cents to \$1.50, providing for indemnity, in the event of loss, rifling or damage, up to \$2,000. Also, the maximum

indemnity payable for the loss, rifling or damage of insured parcels addressed to Canada is \$200; to Portuguese West Africa, \$9.65; to Ecuador, \$50 and to Portugal (including Madeira and the Azores), \$50.

Return receipts for insured parcels addressed to foreign countries except Canada will be furnished only upon request by the sender and upon payment of a fee of 5 cents for each receipt requested at time of mailing and 10 cents if requested after mailing.

¹ Data represent audited expenditures; in 1880 and 1890 they include some incidental expense.

NOTE.—Free city delivery was inaugurated in 1863; rural free delivery in 1897. Star routes are mail routes between towns which are let on a contract basis. Star route service in Alaska is not included in the accompanying table, data for 1942 being as follows: Number of routes, 87; length, 16,676 miles; annual travel, 709,615 miles; annual rate of expenditure, \$245,976.

THE PHILIPPINE ISLANDS

President—Sergio Osmena.

American Representative—United States high commissioner—Paul V. McNutt.

Duties transferred to the Secretary of Interior by Executive Order No. 9245, September 16, 1942.

Resident Commissioner—Carlos P. Romulo, Manila.

The Philippine Islands were ceded to the United States by Spain Dec. 10, 1898 and Maj. Gen. Wesley Merritt was the first military governor. In 1900 the Philippine commission, appointed by President McKinley, became the legislative body of the islands. The natives of the islands first were given a share in the government under William Howard Taft, as the first governor-general and this policy was continued.

After repeated promises of independence to the islands, Congress in 1916 passed a bill which gave the islands their own legislative authority under the Philippine legislature. The governing body was composed of two houses, the senate of 24 members and the house of 94. The next bill was the Hawes-Cutting Independence bill, which was passed over presidential veto in 1933. This was rejected by the Philippine legislature. The Tydings-McDuffie act of 1934 gave the islands independence when they would adopt

a constitution acceptable to the United States.

The Philippine legislature voted May 2, 1934 to accept the offer and called a constitutional assembly which drafted a constitution. This document was accepted by a plebiscite May 15, 1935 in which 1,000,000 votes were cast and Filipino women balloted for the first time. President Roosevelt approved the constitution March 23, 1935.

The new government was styled the Commonwealth of the Philippines. It has, in place of the former bicameral legislature, a national assembly, which is a unicameral body, consisting of 96 members. It entered upon actual operation Nov. 15, 1935, with the inauguration of its new president, Manuel L. Quezon.

Although the islands were occupied after the surrender of U. S. Forces to Japan at Corregidor, April 11, 1942, they were regained by conquest and the surrender terms of August 31, 1945. The Philippines are a self-governing commonwealth under the sovereignty of the U. S. They were promised complete independence after July 4, 1945, but the war interrupted this process. Manila is the headquarters for the Pacific Allied Military Command, created by President Truman August 15, 1945.

BIOGRAPHIES OF SUPREME COURT JUSTICES

Harlan F. Stone, of New York City Chief Justice of the United States; born Chesterfield, N. H., Oct. 11, 1872; married Agnes Harvey Sept. 7, 1899; two sons Marshall and Lauson; graduate of Amherst College, B.S., 1894, M.A., 1897, honorary LL.D., 1913; Columbia Law School graduate, receiving LL.B. 1898; honorary LL.D., 1925; honorary LL.D., Yale University, 1924 and others; member International Academy of Comparative Law since 1923; fellow of the American Academy of Arts and Sciences, 1933; member American Philosophical Society, 1939; honorary member, Society of Public Teachers of Law, London, 1939; honorary bencher of Lincoln's Inn, 1941; member of the Athenaeum, London, 1944; trustee of Amherst College and of Folger Shakespeare Library, 1933; chancellor Smithsonian Institution, 1941; chairman Board of Trustees National Gallery of Art, 1941; admitted to New York bar 1898; became member of law firm of Wilmer and Canfield and later of its successor, Satterlee, Canfield and Stone; also lectured on law at Columbia Law School, 1899-1902, 1910-23; member of Sullivan & Cromwell in 1923; appointed Attorney General of the United States, Apr. 7, 1924; nominated Associate Justice of the Supreme Court of the United States by President Coolidge Jan. 5, 1925; confirmed by Senate, Feb. 5, 1925 and entered upon the duties of that office on Mar. 2, 1925. Served as Associate Justice until July 3, 1941, when he took oath of office of Chief Justice of the United States, having been appointed to that position by President Roosevelt on June 12 and confirmed by the Senate on June 27, 1941; took seat on Oct. 6, 1941.

Hugo Lafayette Black, of Alabama, Associate Justice, born Harlan, Clay County, Alabama, Feb. 27, 1886; son William Lafayette and Martha Ardellah (Toland) Black; LL.B. University of Alabama, 1906; married Josephine Foster, Feb. 1921; children, Hugo Lafayette, Stirling Foster, Martha Josephine; began practice at Birmingham, 1907; served as police judge, 1910-11; solicitor, (prosecuting attorney) Jefferson

County, Alabama, 1915-17; general practice Birmingham, 1919-27; U. S. Senator from Alabama, 1927-39; nominated by President Roosevelt on August 12, 1937; confirmed to Senate August 17, 1937; took office October 4, 1937.

Stanley Forman Reed, Associate Justice, born in Kentucky, Dec. 31, 1888; studied law at the University of Virginia, Columbia University and University of Paris; married Winifred Elgin; two sons John A. and Stanley Forman, Jr.; general practice in Kentucky, 1910-29; member General Assembly of Kentucky, 1912-16; American Legion; American Law Institute counselor and member, executive committee American Red Cross, 1935-38; general counsel, Federal Farm Board, 1929-32; general counsel, Reconstruction Finance Corporation, 1932-35; Solicitor General of the United States, 1935-38; nominated Associate Justice by President Roosevelt, January 15, 1938 confirmed January 25, 1938; took office January 31, 1938.

Felix Frankfurter, Associate Justice, born in Vienna, Austria, November 15, 1882; brought to the United States in 1894; received LL.B. from Harvard in 1906; assistant U. S. attorney, southern district of New York, 1906-10; law officer Bureau of Insular Affairs, War Department, 1911-14; professor at Harvard Law School, 1914-39; author: *The Business of the Supreme Court* (with James M. Landis), 1928; *The Labor Injunction* (with Nathan Greene), 1930; *The Public and Its Government*, 1930 and others; nominated Associate Justice by President Roosevelt January 5, 1939; confirmed January 17, 1939, and took office January 30, 1939.

William Orville Douglas, Associate Justice; born at Maine, Minn., on October 16, 1898; LL.B., Columbia University Law School, 1925; member of Securities and Exchange Commission, 1936-39, chairman 1937-39; nominated Associate Justice by President Roosevelt March 20, 1939; confirmed April 4, 1939, and took office April 17, 1939.

Frank Murphy, Associate Justice born at Harbor Beach, Mich., April 13, 1890; son of John F. and Mary (Brennan) Murphy; LL.B. from the University of Michigan, 1914; admitted to Michigan Bar, 1914; law clerk with Monaghan and Monaghan, Detroit; first lieutenant and captain of Infantry, American Expeditionary Forces, serving also with Army of Occupation, German Rhineland; chief assistant United States district attorney, 1919-21; private practice, 1921-23; instructor in law, University of Detroit, 1922-27; judge of recorder's court, Detroit, 1923-30; mayor of Detroit 1930-33; appointed last Governor General of Philippine Islands, 1933 and first United States High Commissioner to Philippines in 1935; elected Governor of Michigan, 1936; appointed Attorney General of the United States, January 1, 1939; nominated Associate Justice by President Roosevelt January 4, 1940; confirmed January 15, 1940; took office February 5, 1940.

Robert H. Jackson, of Jamestown, N. Y., Associate Justice; born February 13, 1892, in Spring Creek, Pa.; son of William Eldred and Angelina (Houghwout) Jackson; married Irene Gerhardt of Albany, N. Y.; children, William Eldred and Mary Margaret; confirmed as Solicitor General, March 4, 1938; confirmed as Attorney General January 16, 1940; nominated Associate Justice by President Roosevelt June 12, 1941; confirmed July 7, 1941, and took office October 6, 1941.

Wiley Rutledge, Associate Justice; born in Cloverport, Ky., July 20, 1894; LL.B.

University of Colorado, 1922; taught in high schools, Bloomington and Connersville, Ind., Albuquerque, N. Mex., and Boulder, Colo., 1915-22; associated with the law firm of Goss, Kimbrough & Hutchinson, Boulder, Colo., 1922-24; member of law faculties, University of Colorado, 1924-26; Washington University, 1926-35; the State University of Iowa, 1935-39; also dean, School of Law, Washington University, 1930-35; College of Law, the State University of Iowa, 1935-39; associate justice of the United States Court of Appeals for the District of Columbia, 1939-43; member National Conference of Commissioners on Uniform State Laws, from Missouri, 1931-35; from Iowa, 1937-43; nominated Associate Justice by President Roosevelt, January 11, 1943; confirmed February 8, 1943, and took office February 15, 1943.

Harold Hitz Burton, Associate Justice; born Jamaica Plain, Mass., June 22, S. Truman, Sept. 18, 1945; confirmed Sept. 19, 1945; took office Oct. 1, 1945. married Selma Florence Smith, June 15, 1912; children, Barbara (Mrs. H. Charles Weidner, Jr.), Lt. (j.g.) William Smith, Deborah (Mrs. R. Wallace Adler), 2nd Lt. Robert Smith; private practice, 1912-35; Ohio House of Representatives, 1929; director of law, city of Cleveland, 1929-32; acting mayor 1931-32; mayor 1935-40; United States Senator from Ohio, 1941-45; nominated associate justice by President Harry S. Truman, Sept. 18, 1945; confirmed, Sept. 19, 1945; took office Oct. 1, 1945.

AGE OF SUPREME COURT JUSTICES

During the 1937 hearings before the senate judiciary committee on the president's plan to enlarge the Supreme court the ages of the justices were considered frequently.

In a chart prepared by Dean Justin Miller, of the Board of Tax Appeals, it was shown that the average age of justices has advanced rapidly since the beginning of the Supreme court and that as the ages advanced there also was an increase in the number of laws declared unconstitutional.

When the average age was below 62 the largest number of laws declared unconstitutional in any age group was one and that was only in age group 53 and 61.

By 1945, the average age of Supreme

His chart showed:

Year	Age (average)	Year	Age (average)
1790	51	1900	65
1810	49	1930	68
1840	59	1937	72

Also the number of laws nullified as ages increased:

Age (average)	Laws nullified	Age (average)	Laws nullified
63	8	67	7
64	10	68	8
65	7	69	6
66	9	70	7

Court justices had dropped to 59 years.

SUPREME COURT SECRECY

Although the federal government maintains its own printing office, the Supreme court prefers to have the printing of its major decisions and official business done by a small printing establishment in the congested district of Washington, D. C., where for more than 65 years the printing has been done of major decisions which if their nature were known beforehand, might upset both the stock market and the dignity of the court.

Often the opinions of Monday, which is the day set by custom for decisions to be read, are sent late Sunday night to this printing office where a foreman, name unknown, snips up the decisions into tiny meaningless parts and parcels them out to

trusted typesetters. The finished type is placed into a secret form and finally put together by the foreman, the only one in the printing plant who finally reads the complete decision.

There have been, however, several suggestions of leaks but the plant where the Supreme court has been sending its printing for so many years never has been involved. In 1895 a forecast of the decision on the unconstitutionality of the income tax law of that time was published in a Chicago newspaper and other papers. In 1919 there was another reported leak and a secretary of one of the justices was indicted; the case, however, never came to trial.

UNITED STATES COURT OF CLAIMS

Chief Justice—Richard S. Whaley, Washington, D. C.

Judges—Benjamin H. Littleton, Sam Whitaker, Marvin Jones, J. Warren Macdonald, all of Washington, D. C.

UNITED STATES COURT OF CUSTOMS AND PATENT APPEALS

Presiding Judge—Finis J. Garrett, Washington, D. C.

Associate Judges—Oscar E. Bland, Charles S. Hatfield, Joseph R. Jackson, Ambrose O'Connell, all of Washington, D. C.

UNITED STATES COURT OF APPEAL FOR THE DISTRICT OF COLUMBIA

Chief Justice—D. Lawrence Groner, Washington, D. C.

Associate Justices—Harold M. Stephens, Justin Miller, Henry White Edgerton, Thomas W. Arnold, all of Washington, D. C.

UNITED STATES EMERGENCY COURT OF APPEALS

Chief Judge—Albert Branson Maris, Philadelphia, Pa.

Judges—Calvert Magruder, Boston, Mass.; Thomas F. McAllister, Grand Rapids, Mich.; Walter C. Lindley, Danville, Ia.; Bolitha J. Laws, Washington, D. C.

LEGAL AID ORGANIZATIONS

The first legal aid society in the United States was incorporated March 8, 1876, in New York by a group of lawyers and laymen concerned over the extent to which German immigrants were victims of frauds and impositions. For ten years the New York German society made up the annual deficits; during that time \$105,729 was recovered for 23,051 clients, about half in unpaid wages. The second legal aid society was the Chicago Protective Agency for Women and Girls (1886) and the third the Bureau of Justice fostered by the Ethical Culture society of Chicago (1888). The last was the first to offer its services to all needy persons regardless of race, nationality or sex.

The National Alliance of Legal Aid societies was formed in 1912 and was succeeded in 1923 by the National Association of Legal Aid organizations with Chief Justice William Howard Taft as honorary president. For 25 years, beginning in 1890,

the prime mover in legal aid work was Arthur V. Briesen, president of the New York society.

LEGAL AID IN WORLD WAR II

The greatest legal aid organization in history was created and conducted by the Army and Navy of the United States during World War II. A legal assistance office was set up at every post, camp, and base in the United States and wherever practicable other installations including overseas commands, so that military personnel could obtain legal aid and assistance from civilian lawyers, the established legal aid organizations, and lawyers in military service. A approximately 1,100 legal assistance offices were established under this program. The Judge Advocate General's Office estimated that during 1943, the Legal Assistance Offices handled approximately two million cases.

Growth of Legal Aid Work

PROPOSED REORGANIZATION OF THE FEDERAL JUDICIARY

Most important of the legislation before the first session of the 75th Congress was President Roosevelt's bill to reorganize the federal court system, including the Supreme court. From the president's message to Congress Feb. 5, 1937, outlining the plan to the signing of a substitute bill Aug. 25, 1937, which omitted any mention of the highest tribunal, the bill caused dissension in the "solid Democratic majority," nationwide discussion, postponement of major "must" bills and threatened the president's prestige.

President Roosevelt asked for a bill to provide:

1. Power of appointment of one additional judge for any federal judge not retiring within six months after he reached 70. No more than 50 judges, however, would be so appointed, nor could the membership of the Supreme court ever exceed 15. The quorum of judges in inferior courts also would be fixed.

2. Appointment of a proctor by the Supreme court to investigate the volume, character and status of litigation in circuit and district courts and to make suggestions to expedite cases and to recommend the temporary assignment of judges to other courts if dockets became crowded.

3. The government always to be a party to any suit involving constitutionality, prompt notice being given to the attorney general.

Congressmen, Democratic and Republican alike, accused the president of attempting to pack the court. The American Bar association, the Junior Bar conference, many

newspapers and even Democratic New Dealers came out against the plan.

President Roosevelt personally made a plea for his court bill at the Democratic victory dinner, March 4, and again a week later, in a radio fireside chat declared, "We must take action to save the Constitution from the court." The next day the senate judiciary committee opened hearings on the bill which its members by a 10 to 8 adverse report, denounced June 14 as "wholly without precedent."

Meanwhile a series of incidents influenced the ultimate outcome. The Supreme court, through the changed voting habits of Mr. Justice Roberts validated old age pensions and unemployment insurance, the Wagner Labor Relations act and the Washington State minimum wage law for women (reversing its former opinion in the Adkins case). With the announced retirement of Associate Justice Willis Van Devanter, one of the conservative members of the court, an opportunity thus was given President Roosevelt to appoint a liberal.

After June 14, the administration said it would accept a substitute bill which had the backing of Sen. Joseph Robinson, senate majority leader. This bill would have given the president power to appoint to the Supreme court one additional justice each calendar year if incumbents past 75 did not retire. With the sudden death of Senator Robinson, who had personally pledged enough senators to force it through, the bill was doomed. Vice President Garner, given the responsibility by President Roosevelt to

effect a compromise, agreed with opposing senators that the bill be dropped.

In 59 minutes, Aug. 7, 1937, the Senate passed a compromise bill which had the support of the judiciary committee. It provided for: 1. Direct appeals to the Supreme court from decisions in district courts involving constitutionality of federal laws; 2. Intervention by the department of justice in all suits involving the validity of federal statutes; 3. Trial of all suits to enjoin the operation of federal laws by a three-judge court, consisting of one circuit judge and two district judges; 4. Reassignment of district court judges by the senior circuit judge of each circuit, wherever additional help may be needed to relieve congested dockets.

This bill was signed by President Roosevelt Aug. 25, 1937, with, however, reservations that it did not make the necessary reforms and that he believed a majority of Americans were behind him in wanting more complete reforms.

It is said that, not supreme self confidence, but an agreement with Senator Robinson, prevented President Roosevelt, from seeking a compromise early in the spring when his bill probably would have passed. As the fight dragged out, it, more than any other occurrence in recent years, brought about a new alignment on liberal-conservative rather than Democratic-Republican grounds.

The Supreme court issue, however, was not ended with the passage of the compromise bill. Sen. Hugo L. Black, Alabama Democrat, was appointed to the place which some be-

lieved would have gone to Senator Robinson. Instead of immediately confirming Black's appointment as is customary when a senate is named, the senate prolonged the confirmation. Meanwhile it was reported that Senator Black had been a member of the Ku Klux Klan, that he had been given a life-membership although he had resigned, soon after he was elected to the senate. Black was in Europe, refused to answer queries, and the appointment was confirmed. The hubbub over a klansman being on the bench of the court grew, President Roosevelt made no comment. Petitions were circulated to impeach Black. Then Associate Justice Black, who had secretly taken his oath before sailing, returned and in a radio address admitted he had been a member of the klan but said he no longer approved of its principles. Amid a flurry in the press Black took his seat Oct. 4, 1937. A week later the court refused to accept two suits to unseat Black because he was in the senate when it voted life pensions at full pay to retiring judges. Appointments to the Supreme Court since October 4, 1937, when Black was seated, include: Stanley Forman Reed, Solicitor General of the United States; Felix Frankfurter, Harvard law professor; William Orville Douglas, chairman of the Securities and Exchange Commission; Frank Murphy, attorney general of the United States; Robert H. Jackson, attorney general of the United States; and Wiley Rutledge, associate justice of the United States Court of Appeals for the District of Columbia, and Harold Hitz Burton, senator from Ohio.

HOW GERMANY REPUDIATED VERSAILLES TREATY

By the 18th anniversary of the Versailles treaty, Germany had repudiated the treaty almost in its entirety but had not regained her lost colonies which were demanded back by Adolf Hitler at the annual Nazi congress in September, 1937. Despite the readjustments of the Dawes and Young plans, Germany had avoided paying her reparations, had succeeded in building up her army and navy, enforcing conscription, in reoccupying the demilitarized Rhine zone and finally in 1937, denouncing the war guilt clause of the treaty.

Germany announced when she sent troops into the Rhineland March 7, 1936, and again three days later sent more troops, bringing the total to 50,000, that she no longer considered herself bound by the Locarno treaty which provided that the demilitarized Rhine zone be inviolable by either France or Germany. Because of the mutual assistance treaty between France and Soviet Russia, Germany further added the original Versailles treaty was no longer in force.

A clause in the Versailles treaty forcing Germany to take full responsibility for the World war was repudiated by these words of Hitler Jan. 30, 1937: "I hereby and above all else solemnly annul the signature extorted

from a weak and impotent government against its better knowledge, confessing Germany's responsibility for the late war.

Under the Dawes plan of 1924 Germany agreed to repay her Allied debtors \$250,000,000 annually and to increase that amount over a period of four years until it reached a normal figure of \$625,000,000 a year. Economic depression resulted in another revision of reparations and the Young plan was formulated in 1929. By this it was agreed that for the first 37 of 58½ years Germany was to pay an average annuity of \$73,700,000. With the acceptance of this plan the Allies completely and unconditionally evacuated the Rhineland, four-and-one-half years before the date fixed by Versailles. Again Germany was finding it difficult to pay reparations in 1931 and the Hoover moratorium was promulgated to last until June 30, 1932, also to relieve payments of war debts by the allied countries to the United States.

After the general outline of the Lausanne treaty of 1932, an agreement between Germany and her European creditors that German reparations would be reduced to 3,000,000,000 gold marks to be paid at one time was made public.

CALORIE QUOTAS

In a newspaper article written by James W. Barton, M.D., men 5 feet 7 inches in height, weighing 150 pounds were advised to consume about 2,000 calories of food during days of complete rest. Similar energy expenditures for 130 pound women require 1,800 calories.

Moderate work uses 25 calories per pound of weight making a daily diet for men of

3,500 calories and 3,000 for women.

Hard work requires 6,000 calories for males and 5,200 calories for females.

One part meat and eggs with two parts fats and four parts starch foods is considered a balanced diet. As the need for working energy increases, the proportion of meat and egg foods must rise to repair tissue deterioration.

*The principal limitations are these: Only parties designated in the Constitution may institute actions to determine constitutionality; or only laws of a particular nature, usually those involving individual rights, may be tested.

†The Danish government has not taken a definite position to the question, whether the "Højesteret" has a limited power to pass on the constitutionality of laws, but when questions of the constitutionality of laws have been presented to the courts by persons claiming that their individual rights have been violated by legislative acts, the government has, up till now, acquiesced in the decision by the courts of the said question.

‡The Supreme court of the Union of South Africa may, however, declare invalid any law which has not been passed by Parliament in the manner prescribed by the Constitution.

POLITICS AND POLITICAL PARTIES

STATE PRIMARY LAWS AND NEW POLITICAL PARTIES

(Source: Prepared by the Council of State Governments from a digest of state laws made by the legislative reference service of the Library of Congress)

The initiation of a new member into the family of United States politics is marked by varying degrees of difficulty, as the table below indicates.

Some states welcome even the smallest and newest group, while other states bar the way to all parties except those of proved strength. The western states tend to be more lenient to the newcomers than are the southern states, but no other geographic classification of the laws can be made.

State primary laws generally limit places on the primary ballot to parties which received a specified minimum vote in the last general election. When a political group has passed this test it has attained its majority and is accepted into the family. In some states, for example Ohio, if at any time the party receives less than the required number of votes, it may be cast forth again. The percentage of previous votes required varies from 30 per cent of the entire vote in the last general election (Florida) to the provision in five states that all parties, irrespective of prior votes, may participate. This percentage would be reduced by a bill passing the Florida senate in 1937 to 15 per cent. In Connecticut, New Mexico and Rhode Island there are no primary elections. In New York only certain specified officers are nominated by this means.

In seven states new political parties desiring to hold primary elections may submit a petition to the secretary of state signed by a number of qualified electors equal to a certain vote in the last general election. In California a party also may be recognized by inspection of the registration statements of the

voters. If it is clear to the secretary of state upon examination of the statements, that number of electors equal to 1 per cent of the entire vote of the state in the last general election desire to affiliate with the party, is entitled to a place on the ballot.

In 27 states parties which are too small hold statewide primaries and ambitious independent candidates may obtain positions on the ballot without participation in the primaries by means of a petition signed by certain number of qualified voters. The required number of signatures ranges from 12,000 in New York to two in Virginia.

The laws prescribing these petitions have certain requirements other than the number of signatures. The addresses and qualifications of the candidates and usually some statements of policy similar to a platform may be required.

Conventions and caucuses may be held in the smaller parties in 14 states, and in Rhode Island and New Mexico they take the place of the primary. In New Mexico no regulations of the conventions are specified. In most other states, however, a certain number of qualified voters must participate in order to have the nominations recognized on the ballot, and a certificate of nomination signed by the officers of the party must be filed.

The following table gives the methods, obtaining a place on the election ballot, the first two columns showing the requirements for participation in primary elections, and the last two giving the methods by which parties and independent candidates may be listed.

¹Number required. ²Total vote of state at last general election. ³25,000 voters, including 200 from each of 50 counties. ⁴No information available. ⁵Two per cent of vote in at least 10 counties, but must be equal to 2 per cent of largest entire state vote cast for any elected candidate. ⁶10,000 votes for governor in previous election required. ⁷Signatures of one-sixth of electors in each of 10 counties required. ⁸Of vote for office. ⁹Or caucus. ¹⁰Of the vote. ¹¹Of vote for assembly. ¹²Fifty from each county. ¹³Or presidential electors. ¹⁴Of vote for governor. ¹⁵Of vote for president. ¹⁶Of largest vote. ¹⁷Total vote of all representatives in Congress. ¹⁸Of vote for representative.

Note—In the above table only nominations for state officers were considered.

POLITICAL PARTY ORIGINS

POLITICAL PARTIES THAT HAVE ELECTED PRESIDENTS

Federal. 1787-1816. Formed from the strong Government or Constitutional party.

Democratic - Republican. 1792 - 1828. Formed from the Anti-Federal (1787-1793), the Republican, or Jefferson party (1791-1793), and Democrats or sympathizers with the French Revolutionists (1791-1793).

Coalition. 1825. Formed from a union of the supporters of Henry Clay with those of John Quincy Adams.

Democratic. 1828. The Democratic-Republican party divided into four parts in the campaign of 1824, and never reappeared again in a national contest. The Democratic

and National-Republican parties were constructed out of its ruins, and perfected organizations.

Whig. 1834-1854. Formed from a union of the National-Republicans, the Nullifiers, extreme States' Rights men, Anti-Masons, and the personal opponents of President Jackson.

Republican. 1854. Formed from the greater part of the Northern Whigs, Free-Soilers—both of Democratic and Whig antecedents—Anti-Nebraska Democrats, and anti-slavery men of the Democratic party—on the issues of the slave question.

OTHER PARTIES WHOSE PRESIDENTIAL CANDIDATES HAVE RECEIVED VOTES IN THE ELECTORAL COLLEGE

Opposition. 1820. One elector in New Hampshire voted against his party candidate.

National - Republican. 1825-1834. Formed from a union of the Adams and Clay factions.

Independent. 1832. South Carolina chose electors pledged to candidates of her own. In 1872, one "Liberal Republican" elector in Missouri voted for an Independent—David Davis.

Anti-Masonic. 1826-1834. Formed from opponents of Freemasonry.

American (Know-Nothing). 1852-1860. Formed from members of other parties dissatisfied with the influx and power of the foreign element.

Breckinridge Democrats. 1860. Formed from southern Democrats. Their platform

avowed a purpose to carry slavery into the territories.

Constitutional Union. 1860. Formed from the relics of the Whigs and Know-Nothings, and Democrats declaring their political principles to be "The Constitution of the country, the union of states, and enforcement of the laws."

People's (Populist). 1891. The legitimate successor of the following parties: Greenback, 1874; became National Greenback, 1878; became Union Labor, 1887. These various elements uniting with the "Farmers' Alliance" formed the People's, or Populist party.

Progressive (Bull Moose). 1912. Formed from the Republican party. In 1924 the LaFollette-Wheeler ticket also called itself Progressive.

CONGRESSIONAL VOTE ON UNO

Senators voting on Dec. 4, 1945, 65 to 7 in favor of full United States participation in the United Nations Organization were listed as follows in the Congressional Record.

For Passage (65)

Democrats—Bankhead, Barkley, Bilbo, Briggs, Byrd, Carville, Chavez, Connally, Downey, Eastland, Ellender, Fulbright, Gossett, Green, Guffey, Hayden, Hill, Hoey, Iuliano, Johnson, Olin Johnson, Kilgore, Lucas, Magnuson, Maybank, McClellan, McKellar, McMahon, Mead, Mitchell, Murdock, Myers, Overton, Radcliffe, Rus-

sell, Stewart, Taylor, Tunnell, Tydings, Wagner, Walsh (41).

Republicans—Austin, Ball, Brooks, Bushfield, Butler, Capper, Donnell, Ferguson, Gurney, Hart, Hawkes, Hickenlooper, Knowland, Millikin, Saltonstall, Smith, Stanfill, Vandenberg, White, Wiley, Willis, Wilson, Young (23)

Against Passage (7)

Democrat—Wheeler (1).

Republicans—Langer, Moore, Revercomb, Shipstead, Taft, Wherry (6).

(a) No date set, primary to be held in May.

(c) Date of primary conditioned on close of war: if the war is over, the primary will be held Se 10, 1946; if it is not over, primary will be held July 16, 1946, under Chapter 21, Laws, 1944, sec special session.

(e) Unless changed by special session.

(f) Date set by party authority.

(g) Delegates to state party conventions elected at primary, candidates for offices nominated convention.

(l) In July; date not officially set as yet.

(m) All primaries are subject to party rules only, as all statute law has been repealed. Above formation applies to Democratic party only.

(o) For parties with vote of 200,000 or over in last general election.

(r) By present law; change contemplated in present session.

THE ELECTORAL COLLEGE

Source: **Platforms of the Two Great Political Parties**, compiled by Leroy D. Brandon under the direction of South Trimble, clerk, U. S. House of Representatives. Revised August, 1944)

The president and vice president of the United States are chosen by officials (in each state) termed "electors," who are, under existing state laws, chosen by the qualified voters thereof by ballot on a general state ticket on the first Tuesday next succeeding the first Monday in November in every fourth year preceding the year in which the presidential term expires.

The electors equal the whole number of senators and representatives to which the state may be entitled in Congress. (Constitution, Art. II, Sec. 1.)

The electors of each state meet on the first Monday after the second Wednesday in December next following their appointment, at such place as the state legislature may direct, and cast their votes.

The governors of states are required to send a certificate as to the ascertainment of electors to the secretary of state of the United States, and to give six duplicates thereof to the electors on or before the day of their meeting; and at the first meeting of Congress hereafter the secretary of state transmits to the two houses of Congress copies of each and every such certificate.

The electors sign six certificates of all the votes given by them, each of which certificates shall contain two distinct lists, one of the votes for president, and the other of the votes for vice president, and to each list annex one of the lists of electors' lists to be sent forthwith as follows: one to the president of the senate, two to the secretary of state of the state, one to be held subject to the order of the president of the senate; two on the day after the count to the secretary of state at Washington, one to be held subject to the order of the president of the senate, the other certificate to be delivered to the judge of the district in which the electors assembled.

If by the fourth Wednesday in the following December no certificate and list shall have been received by the president of the senate or by the secretary of state, the president of the senate, or in his absence the secretary of state, shall request expeditiously the secretary of state of such state to transmit by registered mail the certificate and list lodged with him by the electors. If no certificates from any state are received at the seat of government by the fourth Wednesday in December after the meeting of electors, the president of the senate, or in his absence, the secretary of state, shall obtain by special messenger the certificate and list lodged with the district judge. (Act of May 29, 1928.)

Congress shall be in session on the sixth day of January succeeding every meeting of the electors. The senate and house of representatives shall meet in the hall of the house at 1 p. m. on that day, and the president of the senate shall be their presiding officer. That at such joint meeting of the two houses seats shall be provided as follows: For the president of the senate, the speaker's chair; for the speaker, immediately upon the left; for the senators in the body of the hall upon the right of the presiding officer; for the representatives, in the body of the hall not provided for the senators; for the tellers, secretary of the senate, the clerk of the house of representatives, at the clerk's desk; for the other officers of the two houses, in front of the clerk's desk and upon each side of the

speaker's platform. Such joint meeting shall not be dissolved until the count of electoral votes shall be completed and the result declared. Two tellers shall be previously appointed on the part of the senate and two on the part of the house, to whom shall be handed, as they are opened by the president of the senate, all the certificates and papers purporting to be certificates of the electoral votes, which certificates and papers shall be opened and acted upon in the alphabetical order of the states; and said tellers, having then read the same in the presence of the two houses, shall make a list of the votes as they shall appear from the said certificates, and the votes having been ascertained and counted, the result of the same shall be delivered to the president of the senate, who shall thereupon announce the state of the vote, which announcement shall be deemed a sufficient declaration of the persons, if any, elected president and vice president of the United States, and, together with a list of the votes, be entered on the journals of the two houses; and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as president, the house of representatives shall choose immediately by ballot, the president. But in choosing the president the votes shall be taken by states, the representation from each state having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the states and a majority of all the states shall be necessary to a choice. And if no person have a majority of votes for vice president, then from the two highest numbers on the list the senate shall choose the vice president; a quorum for the purpose shall consist of two-thirds of the whole number of senators, and a majority of the whole number shall be necessary to a choice. (Act of Congress Feb. 3, 1887, and amendment XII, Constitution. For procedure on objections, incorrect returns, etc., see Secs. 4 to 7, act of Feb. 3, 1887, and constitutional amendment XII.)

Before the twelfth amendment to the Constitution was declared in force (Sept. 25, 1804) each elector voted (under the original clause of the Constitution, Art. II, Sec. 1, par. 3) for two candidates for president; the candidate having the greatest number of electoral votes (if a majority of the whole) became president and the one having the next greatest number vice president.

The acts of Congress executory of the electoral system are as follows: The resolve of Congress Sept. 13, 1788 (Journals of Congress, vol. 4, 1823, ed. 866), provided for appointing electors and fixed the day they should assemble in their respective states and vote for a president; act of March 1, 1792 (1 Stat., 239), provided for election of president and vice president and temporary filling of vacancies; act of March 26, 1804 (2 Stat., 295) supplementary provision for election of president and vice president and temporary filling of vacancies; act of Jan. 23, 1845 (5 Stat., 721), established a uniform time for the electors to vote for president and vice president; joint resolution of Feb. 3, 1865 (13 Stat., 567), declaring certain states not entitled to representation in the electoral college; joint resolution of July 20,

1868 (15 Stat., 257), excluding from the electoral college votes of states lately in rebellion, which shall not have been reorganized; act of May 23, 1872 (17 Stat., 157), fixes a uniform time for holding election for electors of president and vice president; act of Jan. 29, 1877 (19 Stat., 227), created an electoral commission for counting the votes for president and vice president for the term commencing March 4, 1877; act of May 29, 1928

(public 569, 1st sess. 70th cong.), providing for the meeting of electors for president and vice president and for the issuance and transmission of certificates of electoral votes; act of June 5, 1934 (public 286, 2d sess. 73d cong.), provided for changing time of meeting of Congress, the beginning of the terms of members of Congress and the time when the electoral votes shall be counted for other purposes.

INTERNAL REVENUE COLLECTIONS

U. S. taxpayers dropped \$43,793,339,387 greenbacks into treasury coffers during the fiscal year ending June 30, 1945. This total revenue collection represents an increase of \$3,674,519,579 over the similar 1944 period. Corporation collections declined \$298,565,222 while individual returns climbed \$732,134,235.

*Includes vote of liberal and American-Labor parties.

¹Before 1804 each elector voted for two candidates for president; the one obtaining the largest number of votes assumed the office and the one obtaining the second largest number of votes became vice president. In 1800 Jefferson and Burr tied in the electoral college and the House of Representatives elected the former. As a result the constitution was amended to provide for separate elections for the two highest offices.

²Since no candidate had a majority the election went to the House of Representatives, which selected John Quincy Adams, who was second

highest in the electoral vote. The House vote was: Adams, 87; Jackson, 71, and Crawford, 54.

³There was no majority for vice president in the electoral college. Johnson was elected by the Senate.

⁴Greeley received 66 electoral votes but died between election day and the meeting of the electors. Most of his votes cast for Hendricks.

⁵The disputed Hayes-Tilden result was decided by an electoral commission.

⁶Butler was nominated Republican vice president by the electoral college after John S. Sherman, the party convention nominee, died, Oct. 30, 1912.

CONGRESSIONAL REPRESENTATION

The Constitution provides that the total membership of the House of Representatives never shall exceed one for every 30,000 persons but that each state shall have at least one representative. After each federal census every ten years (in the years equally divisible by ten as 1910, 1920, 1930) the number of representatives is redistributed among the states whereupon it devolves upon each state to rearrange its own congressional districts to equal the total assigned it.

By a series of acts Congress has increased the total membership of the House of Representatives to its present 435.

Prior to 1870, the population basis for apportionment was the total free population

of the States, omitting Indians not taxed, plus three-fifths of the number of slaves. After the apportionment of 1860 the scaling down of the number of slaves, of course, disappeared from the procedure; and, in 1940 it was determined that there were no longer any Indians who should be classed as "not taxed" under the terms of the apportionment laws. The last apportionment was therefore made on the basis of the entire population of the States. All apportionments are made under the constitutional provision that each State should have at least one Representative, no matter how small its population.

In five states in 1892 the electoral vote was divided: California gave 8 electoral votes for Cleveland and 1 for Harrison and Ohio gave 1 for Cleveland and 22 for Harrison; in Michigan, by act of the legislature, each congressional district voted separately for an elector; in Oregon one of the four candidates for electors on the People's party ticket was also on the Democratic ticket; in North Dakota, one of the two People's party electors cast his vote for Cleveland, thus causing the electoral vote of the state to be equally

divided among Cleveland, Harrison and Weaver.

In 1896 California gave 8 electoral votes to McKinley and 1 to Bryan; Kentucky gave 12 to McKinley and 1 to Bryan. In Maryland in 1907 of the presidential electors chosen were Democrats and 1 Republican. In 1908 Maryland elected 6 Democrats and 2 Republican electors. In 1912 California elected 11 Progressives and Democrats. In 1916 West Virginia elected Democrat and 7 Republicans.

NATIONAL PARKS

Number 27; Area, acres, 11,054,759.56)

Name and Date	Location	Area (square miles)	Area (acres)	Special Characteristics
Adirondack 1919	Maine		27,870.99	Mostly on a sea-encircled island, with a bold promontory on nearby mainland.
Big Bend 1944	Texas		691,388.95	Last great wilderness of Texas; spectacular mountain and desert scenery; unusual geologic structures.
Bryce Canyon 1928	Utah		35,980.08	Box canyon filled with countless array of fantastically eroded pinnacles of vivid coloring.
Carlsbad Cavern 1930	New Mexico		43,087.12	Series of connected caverns, believed to be the largest in the world, with magnificent limestone decorations.
Crater Lake 1902	Oregon		160,213.54	Vividly blue lake of exceptional depth and clearness in vast crater; surrounded by lava cliffs 1,000 feet high.
Glacier 1910	Montana		997,400.36	Remarkable for its picturesquely modeled peaks, gigantic precipices, 250 lakes of romantic loveliness, 60 small glaciers.
Grand Canyon 1919	Arizona		645,084.31	A highly colored, mile deep gorge. One of world's greatest spectacles.
Grand Teton 1929	Wyoming		94,852.84	Most spectacular portion of the Teton Range, whose mountains of granite were formed by glaciers.
Great Smoky Mountains 1926	N. C. and Tenn.		460,881.55	Includes the most massive mountain uplift in the East and the largest and finest virgin hardwood forest in the United States.

NATIONAL PARKS—Cont.

Number 27; Area, acres, 11,054,759.56)

Name and Date	Location	Area (square miles)	Area (acres)	Special Characteristics
Hawaii..... 1916	Hawaii.....		173,384.00	Large volcanoes, two active, including the periodic Kilauea I of Fire.
Hot Springs..... 1921	Arkansas.....		1,015.27	Medicinal hot springs said to possess healing properties.
Isle Royal..... 1940	Michigan.....		133,838.51	Forested island, the largest in Lake Superior, distinguished for wilderness character; great moose herd; pre-Columbian copper mines.
Kings Canyon..... 1940	California.....		453,048.02	Sublime mountain wilderness designated by the two enormous canyons of the Kings river and summit peaks of the High Sierras. Former Gen. Grant Nat'l I with its great sequoias is a detached section of the parks.
Lassen Volcanic..... 1916	California.....		101,880.41	Recently active volcano and interesting display of lava formations and hot springs.
Mammoth Cave..... 1936	Kentucky.....		51,244.51	Series of caverns, including spectacular onyx cave formations. Became nationally known during War of 1812 when saltpeter from cave was used in manufacture of gunpowder.
Mesa Verde..... 1906	Colorado.....		51,149.12	Contains most notable and best preserved prehistoric cliff dwellings in America.
Mount McKinley..... 1917	Alaska.....		1,939,199.04	Highest mountain in North America, on whose slopes rise the largest northward-flowing glaciers of the Alaska Range. Having been built.
Mount Ranier..... 1899	Washington.....		239,899.92	Glacier system far exceeding in size and impressive beauty of any other in the United States. Famous subalpine wildflower fields.
Olympic..... 1938	Washington.....		845,759.47	Mountain wilderness contains finest remnant of Pacific Northwest rain forests active glaciers rare Roosevelt elk.
Platt..... 1906	Oklahoma.....		911.97	Hot and cold springs with distinctive mineral properties.
Rocky Mountain..... 1915	Colorado.....		252,625.87	Straddles Continental Divide at point of supreme magnificence. Contains 68 named peaks with an altitude of over 10,000 feet.
Sequoia..... 1890	California.....		385,100.13	Contains largest and probably the oldest trees in the world (Sequoiagigantea); highest peak in continental United States; magnificent canyons.
Shenandoah..... 1935	Virginia.....		193,472.98	Embraces outstanding scenic region of the Blue Ridge Mountains.
Wind Cave..... 1903	S. Dakota.....		11,818.34	Limestone caves with boxwork formations. Herds of bison, wild and pronghorn antelope.
Yellowstone..... 1872	Wyo.—Mon.— Idaho		2,213,206.55	Geysers and hot springs; wonderfully colored canyon; large variety of bird and animal refuge.
Yosemite..... 1890	California.....		756,294.65	Unique valley of unusual character. Spectacular waterfalls; an extraordinary granite wilderness of marvelous beauty.
Zion..... 1919	Utah.....		94,201.06	Vividly colored and fantastic carved sandstone cliffs border a deep valley.

NATIONAL MILITARY PARKS

(Number, 11; Area, acres, 23,977.72)

Name and Date	Location	Area (acres)	Special Characteristics
Chickamauga and Chattanooga 1890	Ga. and Tenn..	8,146.33	Beautiful natural park; embraces battlefields of Chickamauga and Missionary Ridge and scenes of other conflicts of the Civil War fought in the vicinity of Chattanooga during 1863.
Fort Donelson 1928	Tennessee	102.54	Site of Civil War fort (1862); now military Cemetery.
Fredericksburg and Spotsylvania County Battle Fields Memorial 1927	Virginia	2,420.15	Scene of battles of Fredericksburg, Spotsylvania, Wilderness, Chancellorsville, and Salem Church at or near Fredericksburg (1862-1864).
Jettysburg 1895	Pennsylvania	2,425.25	Beautiful natural park; scene of Civil War combat; probably better marked than any other battlefield in the world (1863).
Guilford Courthouse 1917	N. Carolina	148.83	Near Greensboro; scene of one of the great battles of the Revolution; fought in 1781.
Kings Mountain 1931	S. Carolina	4,012.29	Commemorating the Revolutionary War Battle of Kings Mountain fought at this place Oct. 7, 1780.
Koore's Creek 1926	N. Carolina	30.00	Scene of one of most memorable battles of Revolutionary War (1776).
Petersburg 1926	Virginia	1,328.23	Scene of campaign and siege and defense of Petersburg, Va., in 1864 and 1865.
Shiloh 1894	Tennessee	3,716.66	Natural park embracing the battlefield of Shiloh near Pittsburg Landing (1862).
Stones River 1927	Tennessee	323.86	Scene of the Battle of Stones River in Tennessee (1862).
Vicksburg 1899	Mississippi	1,323.56	Beautiful natural park; scene of the siege and surrender of Vicksburg in 1863 during the Civil War.

NATIONAL HISTORICAL PARKS

(Number 4; Area, acres, 8,249.36)

Name and date	Location	Area (Square mile)	Area (Acres)	Special characteristics
Abraham Lincoln 1916	Kentucky		110.50	Embraces homestead of Abraham Lincoln and log cabin in which he was born.
Battleground 1905	Louisiana		29.52	Erected in memory of the battle of New Orleans, which was fought Jan. 8, 1815.
Colonial 1936	Virginia		7,057.78	Includes three areas of historic importance in our colonial history—Jamestown, Williamsburg, and Yorktown.
Fort Mifflin 1933	New Jersey		1,051.56	Strategic base of the Continental Army during the American Revolution; Main camp of the army in 1777, 1779, and 1780; contains typical 18th century houses, important historical museum and library.

MISCELLANEOUS FACTS ABOUT WORLD WAR I

The average American soldier who fought in France had 16 months of training in the United States, two months overseas before entering the line and one month in a quiet sector before going into battle.

There were 21,700,000 blankets, 131,800,000 pairs of wool stockings, 85,000,000 undershirts and 26,500,000 flannel shirts delivered to the American army from April 1917 to May 31, 1918.

Two out of every three American soldiers who reached France took part in battle.

There were 7,485,600 battle deaths on both sides.

The death rate from disease in the Mexican war was 110 per year for each 1,000 men; in the Civil war this was reduced to 65; in the Spanish war to 26 and in the World war, to 19. Pneumonia was the greatest cause of death; septicemia, 6 per cent; empyema accounted for 11 per cent; bright's disease, peritonitis and typhoid, all 5 per cent; appendicitis, 4 per cent; organic heart disease 4 per cent; scarlet fever, 3 per cent, and measles, 2 per cent.

NATIONAL MONUMENTS

(Number, 84; Acre-Area, 9,273,657.66)

Name and Date	Location	Area (Acres)	Special characteristics
Ackia Battleground... 1938	Mississippi	49.15	Site of a Chickasaw village and a memorial commemorating the Battle of Ackia, which the Chickasaws, aided by Brit repulsed French and their Choctaw allies May 26, 1736.
Andrew Johnson... 1942	Tennessee	17.08	President Andrew Johnson's home, tomb, shop, and grave.
Appomattox Court-house 1940	Virginia	973.30	Scene of surrender on April 9, 1865 of Confederate army under Gen. Robert E. Lee to the Federal Army under Gen. Ulysses S. Grant.
Arches... 1929	Utah	34,139.70	Contains extraordinary examples of weathering erosion in the form of gigantic arches, windows and other unique formations.
Aztec Ruins... 1923	New Mexico	25.88	Has a pre-historic ruin of pueblo type containing 500 rooms; also other ruins.
Badlands... 1939	South Dakota	122,812.46	Eroded layers of Badlands deposits containing great numbers of prehistoric animal fossils.
Bandelier... 1916	New Mexico	25,971.89	Noted for its great number of cliff-dweller ruins of unusual ethnological and educational interest.
Big Hole Battlefield... 1910	Montana	200.00	Site of battlefield where in 1877 a small force of United States troops fought a much larger force of Nez Perce Indians, resulting in rout of latter.
Black Canyon of the Gunnison 1933	Colorado	12,040.55	Contains 10 miles of the deepest and most scenic portion of the Black Canyon; is predominantly black or dark-colored granite formation streaked with light-colored granites.
Cabrillo Monument... 1913	California	.50	At this point in 1542 Juan Rodriguez Cabrillo, discoverer of California, first sighted land.
Canyon de Chelly... 1931	Arizona	83,840.00	Has many cliff dwellings in caves and crevices containing records of cultural progress covering a longer period than any other ruins so far discovered in the Southwest.
Capulin Mountain... 1916	New Mexico	680.37	Principal feature a huge cinder cone of geologically recent formation.
Casa Grande... 1889	Arizona	472.50	Contains ruins that are one of the most noteworthy relics of a pre-historic age and people within the limits of the United States.
Castle Pinckney... 1924	South Carolina	3.50	Fortification built in 1810 to replace a Revolutionary fort.
Capitol Reef... 1937	Utah	33,068.74	Twenty-mile long buttressed sandstone of Gothic appearance, with dome-shaped white formations super-imposed on local colorful strata.
Cedar Breaks... 1933	Utah	6,066.60	Series of amphitheaters eroded to a depth of 2,000 feet in pink Cliff formation. Spectacular canyons and cliffs of vivid colors.
Chaco Canyon... 1907	New Mexico	18,039.39	Contains a large number of pre-historic communal dwellings of intense archeological interest.
Chiricahua... 1924	South Carolina	10,529.80	Natural rock formations, resembling mammals, faces, etc.
Colorado... 1911	Colorado	18,060.45	Wonderful example of erosion, with local monoliths.
Crater of the Moon... 1924	Idaho	47,540.70	Fissure eruptions, volcanic cones, crater lava flows, caves, and other volcanic phenomena.
Death Valley... 1933	California-Nevada	1,850,565.20	Fascinating desert region, including the lowest point in the United States, 279.80 feet below sea level; is interesting for its historical associations, geology, and plant life.
Devils Postpile... 1911	California	798.46	Consists of peculiar hexagonal basaltic columns, like an immense pile of posts. Said to rank with famous Giant's Causeway in Ireland.
Devils Tower... 1906	Wyoming	1,193.91	Contains a remarkable natural rock tower of volcanic origin over 1,200 feet high.
Dinosaur... 1915	Utah-Colorado	183,221.56	Has the fossil remains of great pre-historic animals.
El Morro... 1909	New Mexico	240.00	Contains an enormous sandstone rock erosion

NATIONAL MONUMENTS — Continued

Name and Date	Location	Area (Acres)	Special characteristics
1906			
Father Millet Cross... 1925	New York....	.01	in the form of a castle upon which inscriptions were carved by the early Spanish explorers; also cliff-dweller ruins. Site for erection of cross to commemorate a cross erected by Father Millett on good Friday, 1688, on what is now the Port Niagara Military Reservation.
Frederick C. C. ... 1922	South Dakota...	320.00	Has deposits of interesting plant fossils.
Fort Jefferson... 1935	Florida.....	86.82	Fortification built in 1846 to command and hold fine harbor in Tortugas Keys; unusual marine display in crystal water surrounding it.
Fort Laramie... 1938	Wyoming.....	214.41	Buildings of old fort that served as principal U. S. military post guarding caravans on route of '49ers and the Oregon Trail.
Fort Matanzas... 1924	Florida.....	18.34	Relic of Spanish invasion.
Fort McHenry... 1939	Maryland....	47.64	The successful defense of this fort on Sept. 13-14, 1814, inspired the writing of our national anthem.
Fort Pulaski... 1924	Georgia.....	5,427.39	Built in 1829, completed in 1846, to replace Fort Greene of the Revolution.
George Washington Birthplace... 1930	Virginia.....	395.44	The birthplace of George Washington where upon the old foundations the birth house has been reproduced as far as possible; also the old family burial plot.
Gila Cliff Dwellings... 1907	New Mexico..	160.00	Well-preserved cliff dwellings in 4 natural cavities in the face of an overhanging cliff 150 feet high.
Glacier Bay... 1925	Alaska.....	2,299,520.00	Contains great tidewater glaciers.
Grand Canyon... 1932	Arizona.....	195,231.00	Its main feature is one of the earliest Spanish mission ruins in the Southwest; also Pueblo ruins.
Grand Quivira... 1909	New Mexico..	370.94	Adjoins the Grand Canyon National Park; provides new views of the famous Grand Canyon.
Great Sand Dunes... 1932	Colorado.....	36,849.19	Contains sand dunes which are among the largest and highest, if not the greatest, of any such dunes in the United States.
Holy Cross... 1929	Colorado.....	1,392.00	Two crevices on side of Mount of the Holy Cross, which when filled, or partially filled, with snow form a figure in the shape of a Greek cross.
Homestead National Monument of America... 1939	Nebraska.....	160.82	Site of first claim under Homestead Act of 1861, marking beginning of "homesteading," the American democratic land settlement policy.
Hovenweep... 1923	Utah-Colorado	285.80	Has four groups of historic towers, Pueblos and cliff dwellers.
Jackson Hole... 1943	Wyoming.....	173,064.62	Foreground from which superb Teton mountains are viewed; part of range of our greatest elk herd; significant geological phenomena; symbolizes dramatic fur trade era.
Jewel Cave... 1936	South Dakota..	1,274.56	Cavern of limestone formation. Consists of series of chambers, connected by narrow passages, with numerous side galleries.
Joshua Tree... 1936	California....	653,123.70	Representative stand of the rare and rapidly diminishing Joshua tree; many other varieties of desert flora.
Katmai... 1918	Alaska.....	2,698,590.00	Dying volcanic region of scientific interest; includes the Valley of Ten Thousand Smokes.
Kaweah Beds... 1925	California....	45,727.00	Unusual exhibits of volcanic action and lava flows in the shape of peculiar lava caves and tunnels in great numbers and of considerable size. Battle ground of Modoc Indian war of 1873.
Kaman Caves... 1922	Nevada.....	639.31	Caves of light-gray and white limestone, honeycombed by tunnels and galleries of stalactite formations.
Kriewether Lewis... 1925	Tennessee....	300.00	Contains grave of Captain Lewis of the Lewis and Clark Expedition.
Kiwiwaka Castle... 1906	Arizona.....	520.00	Contains a prehistoric cliff-dweller ruin of unusual size, situated in a niche in face of a vertical cliff.

NATIONAL MONUMENTS — Continued

Name and Date	Location	Area (Acres)	Special characteristics
Mound City Group..... 1923	Ohio.....	57.00	Famous group of pre-historic mounds Camp Sherman Military Reservation.
Muir Woods..... 1908	California.....	424.56	Notable for its great grove of redwood trees
Natural Bridges..... 1908	Utah.....	2,740.00	Has three natural bridges, the largest being 223 feet high and 65 feet thick at the base of the arch.
Navajo..... 1909	Arizona.....	360.00	Has numerous cliff-dweller ruins in a good state of preservation.
Ocmulgee..... 1936	Georgia.....	683.48	Contains remains of mounds, pre-historic towns.
Old Kasaan..... 1916	Alaska.....	38.00	Site of abandoned Haida Indian village
Oregon Caves..... 1909	Oregon.....	480.00	Caves in limestone formation of great variety and beauty.
Organ Pipe Cactus..... 1937	Arizona.....	328,161.73	Examples of Organ Pipe Cactus and other desert plant found nowhere else in U. S.
Perry's Victory..... 1936	Ohio.....	14.25	At Put in Bay Commodore Perry won his greatest naval battle in the War of 1812 commemorates a century of peace between U. S. and Canada.
Petrified Forest..... 1906	Arizona.....	84,597.77	Is of great scientific interest because of abundance of petrified coniferous trees, one of which forms a natural bridge.
Pinacles..... 1908	California.....	12,817.77	Has many spire-like rock formations 600 to 1,000 feet high, and also numerous caves and other formations.
Pipe Spring..... 1923	Arizona.....	40.00	Contains an old stone fort, connected with early Mormon history, and a spring of pure water, most important to the early pioneers in the desert region.
Pipestone..... 1937	Minnesota.....	115.08	Notable for quarry from which Indians obtained materials for making peace pipes used in ceremonies.
Rainbow Bridge..... 1910	Utah.....	160.00	A unique natural bridge in the shape of a rainbow. This bridge, very symmetrical in form, rises 300 feet above the water.
Saguaro..... 1933	Arizona.....	53,669.24	Contains many giant cacti of unusual scientific interest.
Santa Rosa Isle..... 1939	Florida.....	9,500.00	A barrier reef, 44 miles long and from one-eighth to one-half mile wide, of unusual scientific and historic value.
Scotts Bluff..... 1919	Nebraska.....	2,292.15	A region of historic and scientific interest. Many famous old trails traversed by early pioneers passed this way.
Shoshone Cavern..... 1909	Wyoming.....	212.37	A cave of considerable extent decorated with incrustations of crystals.
Sitka..... 1910	Alaska.....	57.00	Contains 16 totem poles of the best native workmanship; is of historic interest in the history of the Russians and early Indians.
Statue of Liberty..... 1924	New York.....	10.38	Site of Statue of Liberty.
Sunset Crater..... 1930	Arizona.....	3,040.00	A volcanic crater with lava flows and caves, near famous San Francisco Peaks.
Timpanogos Cave..... 1922	Utah.....	250.00	Limestone cavern almost 600 feet in length.
Tonto..... 1907	Arizona.....	1,120.00	Two cliff-dweller ruins consisting of 2 and 3 storied walls of adobe with the support beams and lintels of windows and lintels of doors still in place.
Tumacacori..... 1908	Arizona.....	10.00	Contains a ruined Franciscan mission dating back to the seventeenth century.
Tuzigoot..... 1939	Arizona.....	42.67	Excavated ruins of a pre-historic pueblo which flourished between 1000 and 1300 A. D.
Verendrye..... 1917	North Dakota.....	253.04	Includes Crowhigh Butte, from which explorer Verendrye first beheld land beyond the Mississippi river.
Walnut Canyon..... 1915	Arizona.....	1,635.32	Contains cliff dwellings of marked scientific and popular interest, built under the overhanging sloping canyon walls, utilizing projecting limestone ledge foundations.
Wheeler..... 1908	Colorado.....	300.00	Remarkable examples of extinct volcanic action and eccentric erosion combining fantastic pinnacles and deep gorges.

NATIONAL MONUMENTS — Continued

Name and Date	Location	Area (Acres)	Special characteristics
White Sands 1933	New Mexico...	137,885.91	An area of glistening sands or deposits of wind-blown gypsum almost crystal clear and in a bright light resembling a vast snow field; has interesting plant and animal life.
Whitman 1940	Washington...	45.93	Site where Dr. Marcus Whitman and wife, ministered to spiritual and physical needs of Indians, until massacred by them in 1847; landmark along Oregon trail.
Wupatki 1924	Arizona.....	34,693.03	Contains prehistoric dwellings of ancestors of Hopi Indians.
Uccia House 1919	Colorado.....	9.47	Has great mounds containing prehistoric ruins which when excavated are estimated to be of great archeological interest.
Union 1937	Utah.....	33,533.01	Contains colorful Kolob Canyon and famous Hurricane Fault, notable examples of geologic phenomena.

NATIONAL CEMETERIES

Name and Date	Location	Area (Acres)	Special characteristics
Antietam 1862	Md.....	10.36	Cemetery divided into segments, each representing a state. Interments: 4,833.
Battleground 1864	D. C.....	1.03	On Georgia Avenue, between Van Buren and Whittier Streets. Interments: 44.
Chattanooga 1863	Tenn.....	136.15	Interments: 14,725.
Custer Battlefield 1886	Mont.....	757.84	On site of famous battle of little Bighorn river, June 25, 1876, in which Lt. Col. George A. Custer and his command of 226 were destroyed to the man by the Sioux Indians.
Fort Donelson 1867	Tenn.....	15.34	Interments: 684.
Fredericksburg 1865	Va.....	12.00	Interments: 15,260.
Gettysburg 1863	Pa.....	15.55	Interments: 3,785.
Poplar Grove 1866	Va.....	9.02	Cemetery is on camping ground of the 50th Regiment of New York Engineers. The cemetery is named for the old Poplar Grove meeting house close by. Men interred there are those who fought in the ten month siege of Petersburg, and the engagements close by. (Interments: 6,265 (unidentified 2,163))
Shiloh 1866	Tenn.....	10.25	Men who fell at battle of Shiloh and the surrounding area. Terraced grounds enclosed by a wall. Interments: 3,653 (unidentified, 2,417).
Vicks River 1865	Tenn.....	20.09	Interments: 6,179 (unidentified, 2,560).
Vicksburg 1865	Miss.....	119.76	Two miles north of city on Highway 61, on high ground which was field of operations for right wing of General Sherman's Corps in Grant's army besieging Vicksburg. Includes many who died in a radius of 150 miles from Vicksburg during the Civil War. Interments: 17,450 (unidentified, 12,911).
Yorktown 1866	Va.....	2.91	Interments: 2,204 (unidentified, 1,466). Last interment 1923. No more grave sites available.

ACRE-AREA, NATIONAL HISTORICAL SITES IN NON-FEDERAL OWNERSHIP

(Source: Department of Interior, Annual Report, 1944)

Name	Acreage	Name	Acreage
Loria Dei (Old Swede's Church).....	1.53	McLoughlin Home.....	.63
Independence Hall.....	4.55	St. Paul's Church.....	6.09
Westtown Isle.....	22.00	San Jose Mission.....	4.13

AREA, BATTLEFIELD SITES

Name and Date	Location	Area (acres)	Special characteristics
Antietam Battlefield.. 1890	Md.	50.00	Scene of one of the greatest battles of the Civil War, Sept. 16 and 17, 1862.
Brices Cross Roads... 1929	Miss.	1.00	Civil War Battle of Brices Cross Roads June 1864.
Cowpens..... 1929	S. C.	1.00	Site of Revolutionary War Battle of Cowpens, Jan. 17, 1781.
Fort Necessity..... 1931	Pa.	2.00	Monument commemorating the Battle of Fort Necessity between troops under Maj. George Washington and French and Indian troops, July 1754.
Kennesaw Mountain.. 1917	Ga.	60.00	Site of important Civil War engagement fought July 27, 1864.
Tupelo..... 1929	Miss.	1.00	Commemorates the Battle of Tupelo, July 13-14, 1864.
White Plains Battle-field.. 1926	N. Y.		Memorial tablet to indicate the position of the Revolutionary Army under the command of General Washington, Oct. 28, 1776.

NATIONAL HISTORIC SITES

Name and Date	Location	Area (Acres)	Special Characteristics
Atlanta Campaign.... 1940	Georgia.....	20.96	Follows the route of Sherman's march from Chattanooga to Atlanta, prelude to the "March to the Sea" which finally trisected the Confederacy.
Federal Hall Memorial 1939	New York....	.49	Site of Federal Subtreasury Building, where once stood famous Federal Hall, first seat of the new Federal Government.
Fort Raleigh..... 1941	North Carolina	16.45	Place of first attempted English settlement within confines of U. S., 1585-87.
Home of Franklin D. Roosevelt.. 1944	New York....	33.23	Birthplace, home and "Summer White House" of late President Franklin Roosevelt.
Hopewell Village..... 1938	Pennsylvania	6,197.00	One of best examples of American eighteenth and early nineteenth century iron-making villages; includes ruins of the old furnace and numerous structures, making up the village.
Jefferson National Expansion Memorial.. 1940	Missouri.....	82.58	To commemorate the territorial expansion of U. S. and conspicuous persons and events connected therewith.
Manassas National Battlefield Park.. 1940	Virginia.....	1,604.57	Battles of First and Second Manassas were fought here, famous battle, "Bull Run" 1861, 1862.
Old Philadelphia Custom House.. 1939	Pennsylvania	.79	This building, completed in 1824, is best example of American revival of Greek architecture; famous as Second Bank of U. S., figuring prominently in controversies of Pres. Andrew Jackson and White over national banking policies.
Salem Maritime..... 1938	Massachusetts	8.61	Includes Derby Wharf, the Richard Derby House, Hawkes House, and the Old Customs House in which Nathaniel Hawthorne worked.
Vanderbilt Mansion.. 1940	New York....	211.65	Mansion and grounds of the late Frederick W. Vanderbilt.

NATIONAL BATTLEFIELD SITE PROJECT

Name, location, date	Estimated acreage	Characteristics
Eutaw Springs, South Carolina, 1936.	75.00	Site of Revolutionary battle fought on Sept. 8, 1781.

NATIONAL MEMORIAL PROJECTS

Name, location, date	Estimated acreage	Characteristics
Coronado International Memorial, Arizona, 1941.	2,880.00	A memorial to Coronado and his exploration in Mexico and the Southwest, 1539-42.
Spanish War, Florida, 1935.....	(undetermined)	Proposed memorial on Davis Island, Tampa, Florida, commemorating the services of the American forces in the War with Spain.

NATIONAL MEMORIALS

Name and Date	Location	Area (acres)	Special Characteristics
House Where Lincoln Died 1896	District of Columbia.	.05	Lincoln died here on April 15, 1865.
Devil Hill..... 1927	North Carolina	314.40	Site of first sustained flight by a heavier-than-air machine, made by Wilbur and Orville Wright.
Mansion..... 1925	Virginia.....	.50	Home of Robert E. Lee, general of the Confederate Armies.
Lincoln Memorial.... 1922	District of Columbia.	.61	Classical structure of great beauty with a seated figure, 20 feet high, of Abraham Lincoln.
Lincoln Museum..... 1932	District of Columbia.	.18	Located in this building was Ford's Theatre in which Lincoln was shot. Contains famous collection of Lincolniana.
Mount Rushmore.... 1929	South Dakota.	1,710.00	Colossal figures carved on the face of Mount Rushmore, of four great presidents: George Washington, Thomas Jefferson, Abraham Lincoln, and Theodore Roosevelt.
New Echota Marker... 1930	Georgia.....	1.00	Site of last capital of the Cherokee Indians in Georgia.
Washington Monument 1885	District of Columbia.	.37	Built in commemoration of George Washington, in the form of an obelisk, 555 feet high, is one of dominating features of the Nation's Capital.
Thomas Jefferson..... 1943	District of Columbia.	1.20	Circular colonnaded structure or rotunda in classic style introduced in this country by Jefferson.

NATIONAL CAPITAL PARKS, PARKWAYS

Name and Date	Location	Area (acres)	Special Characteristics
National Capital Parks 1790	District of Columbia, Virginia, Maryland.	27,790.36	Park system of the Nation's Capital, comprising more than 730 units in District of Columbia and vicinity.
Blue Ridge..... 1933	Virginia-North Carolina.	38,910.00	Scenic parkway averaging 3,000 feet above sea level; follows Blue Ridge mountains, embraces scenic and recreational areas en route.
Natchez Trace..... 1934	Mississippi-Tennessee-Alabama.	13,648.87	Follows general location of the Old Indian Trail between Nashville and Natchez.
George Washington Memorial. 1930	Virginia-Maryland.	2,458.68	Embraces landmarks associated with life of Washington.

NATIONAL PARK PROJECTS

Source: Department of Interior

Name, location, year	Estimated acreage	Characteristics
Everglades, Florida, 1934.....	2,112,467.00	Only tropical area in continental U. S. Notable for rare birds, abundance of unusual fish, and mangrove forests.

NATIONAL HISTORICAL PARK PROJECTS

Name, location, year	Estimated acreage	Characteristics
Shenandoah Gap, Kentucky-Tennessee-Virginia, 1940	10,000.00	Historic mountain pass traveled by Daniel Boone and others; gateway through which flowed westward travel over "Wilderness Road" during Revolution.
Statue of Liberty, New York, 1938.....	2,479.60	Scene of American victory over British, 1777, turning point of Revolution, recognized as one of the fifteen decisive battles of world history.

NATIONAL MONUMENT PROJECTS

Name, location, date	Estimated acreage	Characteristics
Fort Frederica, Georgia, 1936.....	80.00	Built in 1736 by General Oglethorpe, co- nizer of Georgia, as an English out- post against Spain.
Fort Stanwix, New York, 1935.....	5.00	Here in 1768 the Iroquois ceded a large a- rea in central New York and Pennsylvania lands south of the Ohio river to Brit- ish crown. Scene of unsuccessful siege of Americans by the British during Rev- olution.
George Washington Carver, Missouri, 1943.....	215.50	Birthplace of George Washington Car- ver, Negro scientist and educator.
Palm Canyon, California, 1922.....	1,600.00	Probably the most notable of all native p- ark areas in California.
Patrick Henry, Virginia, 1935.....	960.61	Consists of Red Hill, the last estate of Patrick Henry.
Pioneer, Kentucky, 1934.....	250.00	Four areas in Kentucky—Fort Boon borough, Boone's Station, Bryan's Sta- tion and Blue Lick's Battlefield—commem- orating heroism of American pioneers un- der Daniel Boone's leadership.

NATIONAL MILITARY PARK PROJECTS

Name, location, date	Estimated acreage	Characteristics
Monocacy, Maryland, 1934.....	(undetermined)	Battlefield in Civil War, July 9, 1864, v- ast earthworks and breastwork remains.

NATIONAL BATTLEFIELD PARK PROJECTS

Name, location, year	Estimated acreage	Characteristics
Kennesaw Mountain, Georgia, 1935..	3,834.21	Historic field on which occurred one of heavy assaults made by Sherman on C- onfederate positions during the Atl- antic Campaign.
Richmond, Virginia, 1936.....	688.04	Scene of several battles in defense of R- ichmond during Civil War.

NATIONAL PARKWAY PROJECTS

Name, location, date	Estimated acreage	Characteristics
Oglethorpe National Trail and Park- way, Georgia, 1938.....	111.00	Ancient Indian Trail; scene of colonizati- on in Georgia.
Olympic, Washington, 1939.....	75.00	To be located along Pacific Coast of No- rthern western Washington, will reveal or scenery, beaches, and picturesque h- ill lands of Olympic Coast.

NATIONAL SEASHORE RECREATIONAL AREA PROJECT

Name, location, date	Estimated acreage	Characteristics
Cape Hatteras, North Carolina, 1937..	57,359.00	Notable for beaches, migratory waterf- owl fishing, and points of historical inte- rest which include the Cape Hatteras Li- ght house overlooking the "graveyard of the Atlantic."

TREATIES OF PEACE AFTER WORLD WAR I

With Germany—Treaty of Versailles, June 28, 1919.	27, 1919.
With Austria—Treaty of St. Germain, Sept. 10, 1919.	With Hungary—Treaty of the Grand anon, June 4, 1920.
With Bulgaria—Treaty of Neuilly, Nov. 27, 1919.	With Turkey—Treaty of Sevres, Aug. 10, 1920.

MAP SHOWING CHANGES IN CIVILIAN POPULATION OF THE UNITED STATES, BY COUNTIES

April 1, 1940, to November 1, 1943

The accompanying map showing by counties the increase or decrease in civilian population between April 1, 1940, and November 1, 1943, was released by Director J. C. Capt of the Bureau of the Census, Department of Commerce. This map presents in graphic form the changes indicated by the estimates of civilian population (based on registrations for War Ration Book Four) which were published in Release No. 3 of Series P-44.

Because inductions into the armed forces had exceeded natural increase (the excess of births over deaths) plus net immigration, the total civilian population of the United States was smaller by 3.1 percent on November 1, 1943, than on April 1, 1940. This decrease, however, has not by any means been evenly distributed over the country. As a result

partly of civilian migration to centers of war activity and partly of inductions into the armed forces, 2,620 counties, or more than 84 percent of the whole number in the United States, have decreased in civilian population since the 1940 Census; and all but 156 of these counties have decreased more than the 3.1 percent which represents the national average. On the other hand, there were 469 counties which increased in civilian population, including 152 in which the increase amounted to 15.0 percent or more, these being, for the most part, counties containing important centers of war activity.

The distribution of counties in accordance with the extent of increase or decrease and the estimated civilian population in each group of counties for both 1943 and 1940 are shown in the table below.

AREA AND PERCENT CHANGE	Number of Counties	ESTIMATED CIVILIAN POPULATION		Change between 1940 and 1943
		November 1 1943	April 1 1940	
United States.....	*3,089	127,307,884	131,329,104	-4,021,220
Counties showing increase.....	469	49,398,831	44,540,946	+4,857,885
15.0 percent or more.....	152	11,491,797	8,788,048	+2,703,749
0 to 14.9 percent.....	317	37,907,034	35,752,898	+2,154,136
Counties showing decrease.....	2,620	77,909,053	86,788,158	-8,879,105
0.1 to 3.1 percent.....	156	16,014,433	16,309,184	-294,751
3.2 to 14.9 percent.....	1,286	46,709,291	51,394,947	-4,685,656
15.0 percent or more.....	1,178	15,185,329	19,084,027	-3,898,698

*Includes, in addition to the actual counties, the District of Columbia, Yellowstone National Park and most of the independent cities—a few of these last having been combined with adjoining or surrounding counties.

ESTIMATED PERCENT CHANGE IN CIVILIAN POPULATION, BY COUNTIES
APRIL 1, 1940, TO NOVEMBER 1, 1943

UNITED STATES

CENTER OF POPULATION IN THE U. S.

The center of population in the United States can be said to represent the center of gravity of the population, giving the population weight and a point on which to pivot over the flat plain of an imaginary surface. In the period from 1790 to 1940 the center has moved 602 miles west from the then center 23 miles east of Baltimore, Maryland. The greatest movement westward was dur-

ing the decade from 1850 to 1860, when the center advanced 80.6 miles. The least movement westward was during the decade from 1910 to 1920, when it advanced only 9.8 miles. The point farthest north was the 1790 location, and the point farthest south, the 1940 location, but the difference between the north and south extremes was only 22.5 miles.

CENTER OF POPULATION: 1790 TO 1940

Census Year	North latitude			West longitude			Approximate location by important towns	Movement in Miles during Preceding Decade			
	O	I	"	O	I	"		Indirect line	Westward	Northward	Southward
1790..	39	16	30	76	11	12	23 miles east of Baltimore, Md.				
1800..	39	16	6	76	56	30	18 miles west of Baltimore, Md.	40.6	40.6		0.5
1810..	39	11	30	77	37	12	40 miles northwest by west of Washington, D. C. (in Virginia)				
1820..	39	5	42	78	33	0	16 miles east of Moorefield, W. Va.	36.9	36.5		5.3

URBAN AND RURAL POPULATION: RACE, NATIVITY, AND PARENTAGE, BY SEX

NOTE: Prior to 1930 all incorporated places and also town (townships) in Massachusetts, Rhode Island, and New Hampshire having 2,500 or more inhabitants were classified as urban areas. For 1930 and 1940, urban areas also included unincorporated police subdivisions with a total population of 10,000 or more inhabitants and a population density of 1,000 per square mile and included for the three New England States named above those towns which contain a village of more than 2,500 inhabitants comprising, either itself or when combined with other villages within the same town, more than 50 per cent of the population of the town.

JULY 1 ESTIMATES OF POPULATION, UNITED STATES AND TERRITORIES, 1850-1943

(Source: Statistical Abstract of U. S.)

[Estimates, except those for continental United States, 1900 to 1943, for Hawaii, 1930 to 1942, and for Puerto Rico, 1940 to 1942, are based on linear interpolation or extrapolation of census figures. Estimates for the United States, 1900 to 1910, are the sums of State estimates based on available local data indicative of population change. Estimates for the United States, 1910 to 1943, Hawaii, 1930 to 1942, and for Puerto Rico, 1940 to 1942, are based on birth and death statistics and on statistics of civilian emigration and immigration. Figures for the United States do include troops abroad.]

¹Estimates not made because population changes associated with war are of unknown magnitude.

²Based on births, deaths, and civilian immigration and emigration since last census. They contain no allowance for changes in military population.

³No estimate.

Jewish Immigrants Admitted, Departed, Debarred, and Deported, U. S., July 1, 1942 to June 30, 1943

(Source: Jewish Yearbook, 1944-45)

July 1, 1942 to June 30, 1943			
	Total	Jews	Percent of Jews
Admissions ¹	23,725	4,705	19.83
Departure ²	5,107	88 ³	1.72
Increase.....	18,618	4,617	24.80
Debarred.....	1,495	32	2.14
Deported.....	4,207	6	0.14

¹ In addition, 18,117 non-immigrants, including 1,122 Jews, (1.32%), were admitted during this period.

² In addition, non-emigrant aliens departed during this period, were 53,615, of which 867 were Jews, (1.62%).

³ 61 to Britain; 12 to Mexico; 10 to Canada; 2 to Central and South America; and 3 to other countries.

Stradivarius Violins

Inscriptions in the earliest violins made by the great master Antonio Stradivarius read Antonius Stradivarius Cernomensis Alumnus Nicolai Amati, Faciebat Anno (the date), followed by the Maltese cross and the initials A. S., enclosed in a double circle. On later instruments, "Pecit" appears in place of "Faciebat", and his name is

spelled "Stradivarius", the change from "u" to "v" having been made in the early part of the 18th century. So many excellent imitations of the genuine Stradivarius have appeared from time to time that careful inspection by a connoisseur is now necessary to determine the instrument's authentic

Number of Native Whites, Ranking of Cities

There were twenty-five cities in the United States in 1940 with a population of 100,000 or more in which 85 percent or more persons were native whites. Seven of these cities were 90 percent or more native white. These seven were, in order: Fort Wayne, Ind., 41.1; Wichita, Kas., 93.1; Peoria, Ill., 92.1; Long Beach, Cal., 91.4; Des Moines, Iowa, 91.3; Reading, Pa., 91.2; and Salt Lake City, Utah, 90.3.

Those cities with between 85 and 90 percent native white in 1940, having a population of over 100,000, were, in order: Denver, Colo., 89.7; Oklahoma City, Okla., 89.0; Spokane, Wash., 88.6; Tulsa, Okla., 87.4; San Diego, Cal., 87.3; Erie, Pa., 87.2;

St. Paul, Minn., 86.8; Scranton, Pa., 86.4; Albany, N.Y., 86.1; Canton, Ohio, 86.0; Grand Rapids, Mich., 86.0; Toledo, Ohio, 86.0; Dayton, Ohio, 85.9; Minneapolis, Minn., 85.9; South Bend, Ind., 85.7; Syracuse, N.Y., 85.5; Flint, Mich., 85.1; Portland, Ore., 83.5 percent.

In eight cities of over 100,000 in 1940, Negroes numbered 30 percent or more of the population. These were, in order: Memphis, Tenn., 41.5; Birmingham, Ala., 40.7; Jacksonville, Fla., 35.7; Atlanta, Ga., 34.6; Norfolk, Va., 31.8; Richmond, Va., 31.7; Charlotte, N.C., 31.1; and New Orleans, La., 30.1 percent.

MADISON SQUARE GARDEN

1945 marked the twentieth anniversary of the formal opening of Madison Square Garden on Eighth avenue between 49th and 50th streets in New York City.

Seating from 16,000 to 18,500 persons, the Garden was erected for five and one-half million dollars including land and building costs. A hockey game between the Montreal Canadians and New York Rangers officially opened the new sporting arena on Dec. 15, 1925, before more than 16,500 spectators.

The site of the Old Garden, between 26th and 27th streets from Madison to Fourth avenue, is now occupied by the New York Life Insurance company building. Two and one-half million dollars cheaper than its successor, the Old Garden was wrecked following a boxing bout between Terris and Dundee May 4, 1925. A ballet accompanied by the music of composer Edouard Strauss formally opened the Old Garden June 16, 1890.

LIQUOR CONSUMPTION DOUBLES SINCE 1934

Americans are drinking three times as much liquor today as they did in 1934, according to the Women's Christian Temperance Union. A W.C.T.U. bulletin reported that public consumption of alcoholic beverages totaled 1,300,700,000 gallons in 1934. A decade later the total had increased 1,434,300,000 gallons to 2,735,000,000.

The nation's liquor bill of \$7,100,000,000 in 1944 amounted to \$54 per capita for 20.48 gallons of intoxicants, said the W.C.T.U. Totals for 1944 represent an increase of \$38.20 in per capita consumption of liquor since 1934.

ALABAMA

Alabama was first visited by De Soto in the sixteenth century. The French settled in the area at the end of the seventeenth century, but ceded it to the British in 1763. In 1778 the Spanish got it as a part of West Florida. In 1783 the United States came into possession of the northern part of it, and secured the rest in 1819. In that same year, Alabama was admitted to the Union as a state.

Alabama seceded in 1861 and Montgomery served as capital of the Confederate states for part of the duration of the Civil War. The state was re-admitted to the Union in 1868.

Geography and Economics

Alabama is bounded on the north by Tennessee; on the east by Georgia and Florida; on the south by Florida and the Gulf of Mexico; on the west by Mississippi.

It is an agricultural state, in the heart of the Cotton Belt. It raises, besides cotton, peanuts, corn, white and sweet potatoes, oats, sugar, tobacco, hay and fruits.

Coal and iron ore are found in the state and in recent years industry has developed to the point that Birmingham is now referred to as the "Pittsburgh of the South."

Muscle Shoals, on the Tennessee River, is 37 miles long, with a vertical fall of 134 feet creating rapid current and water power. Nitrate fixation plants were built here by the federal government during World War I.

The Allegheny mountain range enters the state at the northeast and extends into the central portion. The mountain districts are covered with forests of fine hardwood timber.

Alabama has a large Negro population, numbering almost one million.

The state's water-borne commerce enters to the Mobile docks through a channel from the Gulf of Mexico which is thirty miles long and thirty feet deep.

Educational Institutions

The University of Alabama is located at University; Alabama Polytechnic Institute at Auburn. Tuskegee Institute for Negroes was founded in 1880 by the late Dr. Booker T. Washington. It was here that Dr. George Washington Carver carried on his important scientific investigations.

There are also four State Teachers' Colleges.

Capital, Montgomery; Called the Cotton State; State Flower, Golden Rod; Motto: We Dare Defend Our Rights; Area, 51,609 square miles, rank, 28th; Population, 2,832,961, rank 17th.

ARIZONA

Among the first white men to visit Arizona were the Franciscan and Jesuit missionaries who lived among the Indians from the days of the earliest explorations on this continent. Arizona was originally a part of Mexico, and was ceded to the United States in 1848. Settlement in the region was slow because of trouble among the Indians. During the Civil War, Arizona joined with the Confederacy because of pressure from Texas troops within her borders. In 1863, after the Texans had been expelled, Arizona was organized as a territory. Arizona became a state in 1912.

Geography and Economics

Arizona is bounded on the north by Nevada and Utah; on the east by New Mexico; on the south by Mexico; on the west by Mexico, California and Nevada. It is an arid state, whose land has been made productive by extensive irrigation. Principal crops are cotton, wheat, corn, barley, oats, hay, potatoes and citrus fruits and dates. In its mountainous areas are found extensive deposits of copper, gold, silver, lead, asbestos and zinc.

Among the engineering and irrigation projects in the state are the Boulder Dam on the Colorado River, and Roosevelt Dam which brings water from the Salt and Verde Rivers.

Chief attraction in the state for tourists is the Grand Canyon of the Colorado, one of the great natural wonders of the world, which lies in the northern part of the state. It is 217 miles in length and its walls rise to a height of 5,500 feet above the Colorado River. Its width at the top is from four to 18 miles. Vast amounts of geologic history have been revealed by the canyon walls.

Nearby are the Painted Desert and the Petrified Forest, whose trees were turned to stone in ages past by the action of mineral-laden waters.

Educational Institutions

The University of Arizona is located at Tucson. The state also supports two Teachers' Colleges. Lowell Observatory is located at Flagstaff.

Capital, Phoenix; Called the Baby State;

State Flower, Saguaro Cactus; Motto: Ditat Deus (God Enriches); Area, 113,909 square miles; rank 5th; Population, 499,261, rank, 44th.

ARKANSAS

Arkansas was settled by French traders in the seventeenth century. In 1763 Spain took possession of the territory, but in 1800 it went back to France and was part of the territory of Louisiana purchased by the United States in 1803. It was made a separate territory in 1819, became a state in 1836. Arkansas seceded with the Confederacy in 1861 and was reinstated in the Union at the conclusion of the Civil War.

Geography and Economics

Arkansas is bounded on the north by Missouri; on the east by Tennessee and Mississippi; on the south by Louisiana; on the west by Texas and Oklahoma. The Mississippi River forms the entire eastern boundary of the state. The Ozark Mountains are located in the western part of the state.

Arkansas is principally an agricultural state, producing cotton, wheat, corn, oats, potatoes, hay and fruit. Its forests are an abundant source of lumber.

Arkansas produces more bauxite than any other state in the union. It also produces lead, petroleum, manganese and coal.

The state is noted for its numerous hot springs, some of which are government owned and operated, and to which thousands of health seekers come each year.

Educational Institutions

The University of Arkansas is situated at Fayetteville; Arkansas Agricultural and Mechanical College at Monticello; Arkansas College, Batesville; Arkansas State College, State College; College of the Ozarks, Clarksville; Harding College, Searcy; Hendrix College, Conway; John Brown University, Siloam Springs; Ouachita College, Arkadelphia. There are also two State Teachers' Colleges; six junior colleges; five Negro colleges.

Capital, Little Rock; Called the Wonder State; State Flower, Apple Blossom; Motto: Regnat Populus (The People Rule); Area, 53,102 square miles, rank 26th; Population 1,949,387, rank, 24th.

CALIFORNIA

Among the first settlements made in the state of California were those of the Franciscan fathers, who established a chain of missions up and down the state in the latter part of the eighteenth century. California belonged to Mexico until the time of the Mexican War, when the United States occupied it. It was formally annexed in 1848. The next year gold was discovered in the state and thousands of people from other parts of the country rushed there, many of them staying on. California was admitted to the Union as a state in 1850. The Union Pacific Railroad, connecting the west coast with the rest of the country was opened in 1869. In 1906 came the great San Francisco fire which destroyed most of that city.

Geography and Economics

California is bounded on the north by Oregon; on the east by Nevada and Arizona; on the south by Mexico; on the west by the Pacific Ocean. Its coast represents more than

half the Pacific coastline of the United States.

Two mountain ranges cross the state, the Sierra Nevada in the east, and the Coast Range in the west. In between lie the beautiful and fertile Sacramento and San Joaquin Valleys. The state has both the highest and lowest points in the country, Mount Whitney, 14,501 feet above sea level, and, 70 miles away, Death Valley, 276 feet below sea level.

The northern part of the state is mountainous and produces timber, minerals and fruit. In this region are found the giant redwood trees, thousands of years old.

The central and southern portions of the state, except in the desert portions to the west, are exceptionally fertile. Crops grown are grapes, oranges, lemons, grapefruit, raisins, plums, prunes, peaches, cantaloupes, apples, apricots, pears, olives, walnuts, almonds, sugar beets, wheat and cotton.

Minerals found in the state are gold, silver, petroleum, natural gas, copper, lead, mercury and borax.

Hollywood, near Los Angeles, is the center of the vast motion picture industry.

The climate of the state varies from tropical temperatures in the lowlands to cold in the snow-capped mountains. Because of the variety of climate and topography, California is a popular year-round resort, where every kind of outdoor sport can be found. Yosemite National Park, in the northern part of the state, is considered one of the most beautiful spots in the world.

Lick Observatory, at Mt. Hamilton, is one of the best-equipped in the world.

The San-Francisco-Oakland and the Golden Gate Bridges, which connect San Francisco with the mainland, are considered outstanding engineering feats, and among the most beautiful bridges in the world.

California has many navigable rivers, chief of which are the Sacramento and the San Joaquin. It has more land under irrigation than any other state, and has developed water power of more than two and a half million horse-power a year.

Educational Institutions

The University of California is located at Berkeley, with its main branch at Los Angeles; other branches of the state university are in San Francisco, Davis and Riverside. The university is one of the largest in the country, and its Berkeley campus is generally considered among the most beautiful. Leland Stanford University is at Palo Alto; the University of Southern California at Los Angeles. In addition there are many other colleges and universities, professional schools, and junior colleges. The state supports seven State Teachers' Colleges.

Capital, Sacramento; Called the Golden State; State Flower, Golden Poppy; Motto: Eureka (I Have Found It); Area, 158,693 square miles, rank 2nd; Population, 6,907,387, rank, 5th.

COLORADO

The state of Colorado belonged at various times to the territories of Kansas, Nebraska, Utah, New Mexico, and the Republic of Texas. About half the land now in Colorado was included in the Louisiana Purchase acquired by the United States from France in 1803. In 1859, the area was organized into a unit called Jefferson Territory, with Robert W. Steele as first governor. In February,

1861, the section was organized in Washington under the name of Colorado Territory, with substantially the same boundaries as the state has today. At about the same time, large tracts of land were set aside as reservations for the Cheyenne, Ute and Arapahoe Indians.

After the discovery of rich mineral deposits, particularly gold, in the middle of the 19th century, white settlers came in rapidly.

The first capital of the territory was at Colorado City, but this was later moved to Denver, which has been permanent capital since 1867.

Colorado was admitted as a state in 1876.

Geography and Economics

One of the Rocky Mountain states, Colorado is bounded on the north by Nebraska and Wyoming; on the east by Kansas and Nebraska; on the south by New Mexico and Oklahoma; on the west by Utah. The only spot in the United States where a boundary post marks the corners of four states is at the point where Colorado, New Mexico, Arizona and Utah meet.

The state has both mountainous regions and rolling plains, with a difference of more than 11,000 feet between the highest and lowest points. In 1806, while exploring the region for the government, Zebulon M. Pike discovered the famous peak named for him. The Continental Divide through the state separates the waterheads of the Pacific and of the Mississippi River.

The state has many famous gorges and national parks, of which the most famous is Rocky Mountain National Park. The Arkansas River, winding through the scenic "Royal Gorge" is spanned by the world's highest suspension bridge, whose floor is 1,053 feet above the river bed. Main span of the bridge is 880 feet in length, and the total length, minus approaches, is 1,260 feet.

The highest automobile road in the country is the Mount Evans highway in Cedar Creek County, which has an altitude of 14,260 feet.

Because of its scenic wonders, Colorado is visited annually by thousands of tourists and vacationists. Big game hunting is a favorite pastime.

Chief industries are farming, dairying, stock raising, manufacturing, mining, quarrying, lumbering and oil. Principal crops are sugar beets, cantaloupes, wheat, corn, barley, alfalfa, oats, potatoes. Minerals include gold, silver, copper, coal, lead, zinc, molybdenum, radium and tungsten. Helium is also found in large quantities in Colorado.

Within Colorado are also found ruins of ancient Indian pueblos and cliff-dwellings where the earliest inhabitants of the region lived. Cliff Palace, in Mesa Verde National Park, is the largest such ruin in the world.

Educational Institutions

Colorado State University is located in Boulder; Colorado College in Colorado Springs; the University of Denver at Denver; State College of Agriculture and Mechanic Arts in Fort Collins; State College of Education in Greeley; Western State College in Gunnison; the Colorado School of Mines in Golden.

Capital, Denver; Called the Centennial State; State Flower, Columbine; Motto: Nil Sine Numine (Nothing Without God); Area, 104,247 square miles, rank 7th; Population, 1,123,296, rank, 33rd.

CONNECTICUT

Connecticut is the most southern of the New England States, and is one of the original thirteen colonies. It was settled in the seventeenth century by the Dutch from New York, who came there to establish trading posts. The English took over from the Dutch about 1634, settling in the Connecticut Valley. Puritan colonists from Massachusetts later came into Connecticut. The constitution adopted by those early settlers in 1639, and called the Fundamental Orders, has been called the first written democratic constitution. The Constitution of the United States was patterned after it in many respects.

In 1637 a war with the Pequot Indian was fought in Connecticut. Slavery was abolished in the state in 1818.

Geography and Economics

Connecticut is bounded on the north by Massachusetts; on the east by Rhode Island; on the south by Long Island Sound on the west by New York.

Connecticut has hilly land in the east and west, and a broad central plain. There are a number of hardwood forests in the state. Dairy farming is the leading agricultural pursuit, but truck garden crops are also raised, and tobacco, potatoes and fruit, with an important poultry raising industry. Primarily, however, Connecticut is an industrial state. It manufactures firearms, typewriters, hats, cutlery, clothing, boots, clocks, sewing machines, airplane motors and various other products. Connecticut is also the headquarters for most of the insurance business of the United States, being the home of 47 insurance companies' main offices. Most of the insurance business is transacted in Hartford.

With its lakes, rolling countryside and the area bordering on Long Island Sound, Connecticut has much to attract tourists and vacationists. Many camps for children are located in the state.

Thousands of people who live in the southern part of the state commute into New York City daily for business.

Educational Institutions

Connecticut has always been a pioneer in the field of education. It has outstanding public schools and many private schools of note. Yale University in New Haven was founded in 1701; Trinity College, Hartford, and Wesleyan University in Middletown are both more than a hundred years old. The University of Connecticut is at Storrs and Connecticut College for Women is at New London. There are also five state teachers' colleges.

Capital, Hartford; Called the Nutmeg State; also the Constitution State; State flower, Mountain Laurel; Motto: Qui Transtulit Sustinet (He Who Has Transplanted Still Sustains); Area, 5,009 square miles, rank 46th; Population, 1,709,242; rank, 31st.

DELAWARE

Delaware was one of the original thirteen states. Next to Rhode Island, it is the smallest state in the union. Its total area is 2,370 square miles, and of that, 405 square miles is water surface. In its early days, Delaware belonged successively to four different countries, the Netherlands, Sweden, Great Britain and the United States. Delaware River and Bay were first explored in

1609. by Henry Hudson. Consequently the Dutch claimed the territory and settled there in 1631. The Dutch settlement was destroyed later by Indian attack. In 1638 the Swedish made the first permanent white settlement. In 1655 the Dutch again took control of the region and held it until 1664, when it became English at the same time that New Netherlands was transferred to the English. Delaware took an active part in the Revolutionary War and was the first state to ratify the Federal Constitution on December 7, 1787. Delaware was named for Lord De La Warr, English Governor of Virginia, who traveled into Delaware Bay in 1610.

Geography and Economics

Delaware is bounded on the north by Pennsylvania; on the east by Delaware River and Delaware Bay and the Atlantic Ocean; on the south and west by Maryland.

Because of its lakes and coastline, fishing is an important industry for Delaware. Among ocean fish brought in by fishing fleets are sturgeon, oysters, shad and herring. In the Bay are found oysters, clams, crabs and lobsters. Fresh water streams provide bass, pike, yellow perch and catfish.

Fruit raising, especially peaches and strawberries, has become an important Delaware industry. Fruit canning is another state industry, as are paper and leather making plants, machinery, hardware and ship-building plants. Wilmington is the headquarters for the E. I. duPont de Nemours and Company, manufacturer of various chemical products.

Kaolin clay is found in the state.

Other agricultural products are wheat and corn.

Educational Institutions

The University of Delaware is located at Newark. A State College for Negroes is at Dover.

Capital, Dover; Called the Diamond State; State flower, Peach blossom; Motto: Liberty and Independence; Area, 2,370 square miles, rank 47th; Population, 266,505, rank, 47th.

DISTRICT OF COLUMBIA

The District of Columbia was especially created to be the seat of the government of the United States of America. It is an area of 70 square miles on the eastern bank of the Potomac River, and contains the cities of Washington and Georgetown, as well as several small villages. In 1788 and 1789 the states of Maryland and Virginia ceded territory of 100 square miles to form the District, but in 1846 Virginia's portion south of the Potomac was ceded back. The Federal government was moved to the District in 1800.

Each house of Congress has a committee on the District of Columbia and control of the District's affairs rests in a Commission of three members, two residents of the District appointed by the President and confirmed by the Senate, and one appointed from the Army corps of engineers. Taxation is borne by District residents, but they are not permitted to vote on municipal or national affairs. This form of government was instituted to keep the District free from local control.

The design of the city of Washington was created by the French architect L'Enfant, who was appointed by President George

Washington. He modeled the new capital on the plan of Versailles, capital of Louis XIV, with the main streets stemming from the axis of the Capitol building. L'Enfant's plan was enlarged upon in 1901 and is now called the McMillan Plan after Senator James McMillan, who headed the commission at that time.

The District contains beautiful parkways and bridges, and many national monuments, in addition to all the government buildings. Arlington National Cemetery is located across the Potomac River.

The Potomac flows into Chesapeake Bay, and is navigable, being both wide and deep enough to accommodate large ships. Washington is the chief railway stop between the north and south on the eastern seaboard.

Educational Institutions

Institutions of higher education in the District of Columbia include George Washington University, Georgetown University, Catholic University of America, Trinity College for women, American University, Howard University for Negroes, Gallaudet College for the deaf and dumb. There are also several junior colleges and technical schools.

Official Flower, American Beauty Rose; Motto: *Justitia Omnibus* (Justice for all); Area, 70 square miles, rank 49th; Population, 663,091, rank, 37th.

FLORIDA

Florida, on the southeastern tip of the United States, was discovered in 1513 by the Spanish explorer Ponce de Leon, in his search for the "fountain of youth." French Huguenots settled in the territory in 1562, and the city of St. Augustine was permanently settled by Spanish in 1565. St. Augustine is the oldest city of European origin in the United States, and has been under domination, successively, of the Spanish, French, and British. The Confederates also held it for a time.

The Seminole Indians, original inhabitants of the area, retreated to the Everglades, vast swamplike regions in the southern part of the state, when white men came in. In 1818 they were attacked by the forces of General Jackson, but they have never formally recognized the government of the United States and still live under their own ancient tribal laws in remote areas of the state.

Florida was admitted to the Union in 1845, seceded with the South in 1861, and was readmitted to statehood in 1868.

Palm Beach, on the eastern coast, has become a famous winter resort for the wealthy of the American and European continents. Miami, further south, is also a leader in resort life and, in addition, the largest business city in southern Florida.

Geography and Economics

Florida is bounded on the north by Alabama and Georgia; on the east by the Atlantic ocean; on the west by the Gulf of Mexico and Alabama; on the south by Florida Strait and the Atlantic Ocean. The state is of coral formation and has no high land. The Everglades are now being drained by the government to provide land for agricultural purposes.

The state grows grapefruit and other citrus fruits, tomatoes, tobacco, rice, corn, oats and peas. Land fertilizer is secured from natural deposits of phosphate rocks. Lime,

kaolin, stone and Fullers earth are other mineral deposits. Cattle are raised on the Gulf Coast and deep-sea fishing is an important industry.

A Tropical National Park has been established in the Everglades by the Federal government. The park runs from the Tamiami Trail to Cape Sable, which is 350 miles farther south than Cairo, Egypt. The park covers 2,500 square miles, making it twice the size of the state of Rhode Island.

Florida also has several extensive forts, which have been made national monuments notably Fort Marion, Fort Jefferson, and Fort Matanzas.

Educational Institutions

The University of Florida is located at Gainesville, and its woman's branch, the Florida State College for Women, at Tallahassee. There is also Miami University, the University of Tampa, Barry College at Coral Gables, four Negro and three junior colleges.

Capital, Tallahassee; Called the Peninsula State; State Flower, Orange Blossom; Motto: In God We Trust; Area, 58,560 square miles; rank, 21st; Population, 1,897,414; rank, 27th.

GEORGIA

Georgia was named for King George II of England. The territory was first visited by DeSoto in 1540. Later, it formed part of the tract of land granted to the Lords Proprietors of Carolina in 1663. It received a provincial charter in 1719. In 1732 it became an independent colony under James Oglethorpe who founded it as a refuge for debtors and persons seeking freedom for religious beliefs. In 1763 Georgia became a Royal Province and was the fourth state to ratify the Federal Constitution in 1788. In 1861 Georgia joined the Confederate States and seceded from the Union. Many Civil War battles were fought within her boundaries. Jefferson Davis, Confederate president was captured in Irwinville, Georgia, on May 10, 1865. The state was readmitted to the Union in July 1870.

Geography and Economics

Georgia is bounded on the north by Tennessee and North Carolina; on the east by South Carolina and the Atlantic Ocean; on the south by Florida; on the west by Alabama. It is the largest state east of the Mississippi River. The Blue Ridge Mountains are in the north and northwest, some of them more than 3,000 feet high. There are fertile valleys throughout the state and agriculture is important, chief crops being cotton, peanuts, tobacco, corn, peaches, rice, sweet potatoes, truck produce and sugar cane syrup. Cattle and swine are also raised. Georgia has the largest area of woodland of any state, mostly pine, from which resin and turpentine are extracted. Minerals are kaolin, clay products, granite, marble, Portland cement, Fullers earth, limestone, barites, sand and gravel, manganese, coal, talc, bauxite, gold, silver and mica.

The most important river in the state is the Savannah, and the city of Savannah is the chief port. Georgia has many vacation spots, notably Sea Island, just off the coast. There are seven national parks and 21 state parks.

At Warm Springs is the national foundation for infantile paralysis sufferers established by Franklin D. Roosevelt.

Fort Pulaski, on Cockspur Island, is a national monument. The federal government constructed it for coastal defense purposes in the early nineteenth century. Fort George and Fort Green are also on the island. Fort Pulaski was erected at a cost of one million dollars. Its walls are of solid brick, from seven to 11 feet thick, and 32 feet high. It is surrounded by a moat crossed by drawbridges.

Educational Institutions

Georgia School of Technology is at Atlanta; the University of Georgia, chartered in 1785, in Athens; Emory University in Atlanta; and Atlanta University for Negroes in Atlanta.

Capital, Atlanta; Called the Cracker State; State Flower, Cherokee Rose; Motto: Wisdom, Justice, Moderation; Area, 58,876 square miles, rank, 20th; Population, 3,123,723, rank, 14th.

IDAHO

Idaho, one of the Mountain States, was first explored by white men in 1805 when Lewis and Clark entered that territory. Five years later the Missouri Fur Company established Fort Henry on the Snake River. Fifteen years later, in 1835, both Catholics and Protestants were establishing missions for the Indians and Fort Hall was founded in eastern Idaho. The territory which is now Idaho was, however, contained from 1843-1853 in the territory of Oregon. From 1854 to 1859, the southern portion of the present state of Idaho was a part of Oregon and the northern portion a part of Washington territory. On March 3, 1863, Idaho was organized as a territory, which included both Montana and Wyoming as well, and was three times the size of the present state. In May, 1864, a part was organized as Montana, and in 1868 Wyoming was organized and Idaho assumed its present boundaries. In 1860 gold was discovered in Idaho and the population increased rapidly. In 1890 Idaho was admitted into the Union. Between 1857 and 1877 there were a number of serious Indian outbreaks in the territory, and in later years conflicts in the mining areas of the state necessitated the calling of United States troops.

Geography and Economics

Idaho lies between latitudes 42 and 49 degrees north and 111 and 117 degrees west. It is bounded on the north by British Columbia and Montana, on the east by Montana and Wyoming, on the south by Utah and Nevada, and on the west by Oregon and Washington. The state runs 490 miles from north to south, and has an extreme width from east to west of 305 miles. It ranks twelfth in area among the states, with a total of 83,888 square miles, of which 543 are water surface.

It is a mountainous state with broad, level plateaus. Mount Borah in the Sawtooth Range, the highest peak in the state, is 12,665 feet.

The Snake River flows through the state to the Columbia River, winding through Hell's Canyon, which averages 5,510 feet for over 40 miles. At one point the canyon's depth and width exceeds that of the Grand Canyon. At its widest point it is ten miles from rim to rim. Other important rivers are the Salmon and the St. Joe, the highest navigable river in the world.

Besides the Sawtooth mountain range,

the state has the Cabinet, Coeur d'Alene, Beaverhead, Bitter Root, Salmon River and Lost River Ranges, the Bear, Blackfoot and Snake River mountains. The Snake, or Shoshone River is noted for several waterfalls, the American, Shoshone and Salmon. Shoshone Falls is 46 feet higher than Niagara and is called the Niagara of the West. Other attractions are Kaniksú, Pend Oreille and Coeur d'Alene lakes in the northern part of the state, and Bear Lake in the southeastern corner. Lake Pend Oreille is one of the largest freshwater lakes in the country, with a shore line of more than 500 miles and a depth of 1100 feet in some places.

Chief Products

Idaho has 4,000 Indians residing on reservations within the state.

The state has never developed all its mineral resources, but it is a leader in wild life resources, issuing 125,000 fishing and hunting licenses each year. Thousands of miles of rivers offer all kinds of fishing and there is pheasant, grouse and duck shooting, as well as big game hunting, including mountain goat, elk, deer, bear and antelope. Excellent skiing is found in the winter months.

Farmers in the state, which is largely agricultural, market potatoes, wheat, hay, oats, barley, beans, peas, sugar beets, apples and prunes. The state also produces much field and garden seed. Stock-raising, especially sheep, is an important industry. The world's largest individually-owned orchards are located near Mesa. The state ranks high in lead and silver production. Gold mining is gaining rapidly.

The old Oregon Trail, famous route of pioneer migration, enters Idaho from Wyoming at the southeast, and leaves the state at Weiser on the west.

Educational Institutions

The University of Idaho is at Moscow, with a southern branch (junior college) at Pocatello. The College of Idaho is in Caldwell. Northwest Nazarene College is in Nampa and there are normal schools in Lewiston and Albion. The state has a total of three junior colleges.

Capital, Boise; Called Gem of the Mountain State; State Flower, Syringa; Motto, Esto Perpetua (It Is Perpetuated, or It Is Forever); Area, 83,557 square miles; rank, 12th; population, 524,873; rank, 43rd.

ILLINOIS

Illinois takes its name from an Indian word meaning River of Men. French traders and missionaries were the first white men to explore the territory of Illinois, where, in 1675, Father Marquette established a mission. Fort Crevecoeur was built by La Salle in 1679 near Lake Peoria. After 1682, permanent settlements were established by the French, some by Jesuit priests, others by traders.

In 1763 the English came into possession of all the country between the Ohio and Mississippi Rivers when France lost the Seven Years' War. The United States secured the Northwest Territory, including Illinois, by the Treaty of Paris of 1783. Illinois was made part of the Indiana Territory in 1800, and became a separate territory in 1809. It was admitted to the Union as a state in 1818. In 1839, the capital was moved from Vandalia to Springfield. In 1838, the first railroad in the state was

built, forerunner of the extensive network of railways which today make Chicago a great railway center of the country.

Among the many settlers who came to Illinois were the Mormons, under their leader, Joseph Smith. They built a city and a temple at Nauvoo, and became prominent in Illinois life, but after Smith and some of his leaders were assassinated at Carthage, the Mormons left for the Far West.

There was much abolitionist controversy in the state around the time of the Civil War, and slave-smuggling took place through the underground railway.

Abraham Lincoln practiced law in Springfield before he became president of the United States, and after his death his body was returned to Springfield, where his tomb has become a national shrine.

From Illinois came many of the great Civil War generals, Grant, Logan, Pope, McClelland, Palmer, Hurlburt, Grierson and Oglesby. Although no actual battles took place in the state, many Illinois men fought in the war.

In 1877, as a result of the Panic of 1873, and the depression which followed, railroad strikes in Illinois became almost open warfare. Out of this trouble grew strong labor unions.

Illinois today contains the second largest city in the nation, Chicago, and heads the waters of the Great Lakes which lead to the Atlantic, and of the Mississippi River, which leads to the Gulf of Mexico.

Geography and Economics

Illinois is bounded on the north by Wisconsin and Iowa; on the east by Lake Michigan, Indiana and Kentucky; on the south by Kentucky and Missouri; on the west by Missouri and Iowa. Although the southern part is hilly, the state is largely flat prairie. The Mississippi River flows along the western border, and the Ohio River along the southern boundary. The land is so level that in one part a railroad line travels in a straight line for 100 miles.

The state is important in industry, agriculture and mining, and a leader in rail and water transportation. The Illinois River is the principal river flowing within the state. The Chicago Drainage Canal is an artificial waterway running 40 miles from Chicago to Joliet, and reversing the course of the Chicago River. The canal has been extended from Lockport to the Illinois River at Starved Rock and a nine-foot channel dredged in the river to the Mississippi.

Chief Products

Chief industries are meat packing, steel mills, blast furnaces, foundries, machine shops, petroleum refining, electric machine shops, automobile plants, railroad car construction, and repair shops, and agricultural implement factories. Printing and publishing plants are important.

Illinois ranks third in the country in soft coal production. Other minerals are petroleum, fluorspar, pig iron and zinc.

The Chicago Board of Trade is the chief grain dealing exchange in the country.

Main agricultural products are corn, wheat, oats, barley, rye, potatoes, hay, soy beans and wool.

Educational Institutions

The University of Illinois is at Urbana-Champaign; the University of Chicago and Loyola University in Chicago; Northwestern University in Evanston and Chicago; De-

Paul University, Chicago; Augustana College, Rock Island; Bradley Polytechnic Institute, Peoria; Knox College, Galesburg; Rockford College, Rockford. There are nine State Teachers' Colleges and 21 junior colleges.

Chicago has many art centers, including the Field Museum, and the Chicago Art Museum.

Capital, Springfield; Called the Sucker State; State Flower, Violet; Motto: National Union and State Sovereignty; Area, 56,400 square miles, rank, 23rd; Population, 7,897,241, rank, 3rd.

INDIANA

French traders settled in Indiana in the 18th century, and Vincennes, the first permanent settlement in the state, was established in 1732. Indiana was part of the Northwest Territory, and was organized as a separate territory in 1809. The region was the scene of many Indian wars up to the time of the Battle of Tippecanoe in 1811. Indiana was admitted as a state in 1816. Although the state permitted slavery at one time, it fought on the side of the Union in the Civil War. Capital of the state has been successively, Vincennes, Corydon, Indianapolis.

Geography and Economics

Indiana is bounded on the north by Michigan and Lake Michigan; on the east by Ohio and Kentucky; on the south by Kentucky; on the west by Illinois. The Wabash River forms most of the western boundary.

The greater part of the state is prairie, with sand hills in the north, and some rocky hills along the Ohio River in the south. Also in the south, in areas abounding in limestone, are many picturesque caves. Mineral springs are found in the south and the southwest.

Indiana is well supplied with railroad service and with water transportation, and its northern steel-refining cities of Gary, Hammond, East Chicago and Whiting form one of the great industrial centers in the country. Gary and Indiana Harbor, on Lake Michigan, are important freight harbors. Other industries in the state are automotive parts, rolling mill products, furniture, soap, glass, refrigerators, farm implements and clothing. The state produces bituminous coal, limestone, Portland cement, coke, petroleum, natural gas and pig iron.

Among its agricultural crops are corn, wheat, tomatoes, oats, rye, hay and tobacco. Peppermint and spearmint oil are produced in northern Indiana. There are also large factories for canning vegetables and vegetable juices.

Educational Institutions

Indiana University is located at Bloomington; Purdue University at Lafayette; Indiana State Teachers' College at Terre Haute; Ball State Teachers' College, Muncie; DePauw University, Greencastle; University of Notre Dame, South Bend; Wabash College, Crawfordsville; Butler University, Indianapolis. There are also four junior colleges.

Capitol, Indianapolis; Called the Hoosier State; State Flower, Zinnia; Motto: The Crossroads of America; Area, 36,291 square miles, rank 37th; Population, 3,427,796, rank, 12th.

IOWA

Iowa takes its name from a Sioux Indian term meaning "sleepy ones". The first white men to come to Iowa, the French explorers

Marquette, Joliet and Hennepin, in the late seventeenth century, found the area inhabited by the Sioux. The first white settlement was made in 1788 by the Frenchman Julier Dubuque, near the site of the city which now bears his name. In 1763, Iowa was ceded to Spain. It returned to the possession of the French in 1801, and came to the United States by way of the Louisiana Purchase in 1803. Following that date, the region was successively part of the Territories of Louisiana, Indiana, Missouri, Michigan and Wisconsin. In 1838 it was made a separate territory, and became a state, with its present boundaries, in 1846.

Geography and Economics

Iowa is bounded on the north by Minnesota; on the east by Wisconsin and Illinois; on the south by Missouri; on the west by Nebraska and South Dakota. The Mississippi River forms the entire eastern boundary line, and the Missouri River most of the western line.

Iowa is one of the leading agricultural states in the country because of its rolling, fertile prairies. The valleys of the Red Cedar, Iowa and Des Moines Rivers are especially productive. Leading products are corn, oats, butter, eggs, fruit and nuts.

Transportation is highly developed, with numerous railways, and large volumes of traffic carried over the Mississippi and Missouri Rivers.

Iowa produces coal, gypsum, building stone, cement, sand, gravel and clay products.

Leading industries are meat-packing, processing of agricultural and dairy products, manufacture of farm implements.

Educational Institutions

The University of Iowa is located at Iowa City; Iowa State Teachers' College at Cedar Falls; Iowa State College of Agriculture in Ames. The latter institution is especially noted for its scientific investigation and original research.

There are also two professional and technological schools and 34 junior colleges.

Capital, Des Moines; Called the Hawkeye State; State Flower, Wild Rose; Motto: Our Liberties We Prize and Our Rights We Will Maintain; Area, 56,280 square miles, rank, 24th; Population, 2,538,263, rank, 20th.

KANSAS

The expedition of the Spanish explorer Coronado in 1541 touched Kansas, and there was a brief French occupation of the territory between 1719-1725. Except for those interludes, the region remained in the hands of Indians until 1803, when it formed part of the Louisiana Purchase. As settlers made their way across the country, Kansas became colonized by both free and slave state settlers. Fort Leavenworth was established in 1827 for defense of the frontier, Fort Scott in 1842 and Fort Riley in 1853.

When the Kansas-Nebraska Bill was passed in 1854, Kansas was created a territory, and at once became the center of a great slave struggle which served as prelude to the Civil War. People opposing slavery feared that it would be forced on Kansas by Missouri, a slave state. Anti-slavery leaders in the East planned, therefore, to colonize Kansas with settlers from the free states. At the same time, pro-slavery settlers moved in. When elections were held to determine whether the territory should be slave or free,

great frauds were perpetrated at the ballot boxes. Such violence resulted that in 1856 federal troops were used to put down disturbances. Finally, in 1859, a constitutional convention was called at Wyandotte, which adopted a constitution prohibiting slavery, and Kansas was admitted as a state on January 29, 1861. Topeka was selected as the capital city in November, 1861. Kansas fought on the side of the Union in the Civil War.

Geography and Economics

Kansas is bounded on the north by Nebraska; on the east by Missouri; on the south by Oklahoma; on the west by Colorado. The state is 200 miles north and south, 400 miles from east to west, and almost rectangular in shape.

It is a prairie state and agriculture is the chief industry, main crops being wheat, corn, potatoes, fruit and flax.

Kansas produces about a quarter of all the wheat in the United States, and ranks first in the milling of flour. It is also a leader in the raising of cattle and in dairy-farming.

The state produces quantities of coal, oil and natural gas, as well as lead, zinc, salt and Portland cement.

Educational Institutions

The University of Kansas is located at Lawrence; the Kansas State College of Agriculture and Applied Sciences at Manhattan; Washburn College at Topeka; Wichita Municipal University and Southwestern College, Winfield. Fort Riley has the nation's largest cavalry school, and the Haskell Indian School at Lawrence is the largest Indian school in the United States.

Capital, Topeka; Called the Sunflower State; State Flower, Sunflower; Motto: Ad Astra per Aspera (To the Stars through Difficulties); Area, 82,276 square miles, rank 13th; Population, 1,801,028, rank 29th.

KENTUCKY

In the middle of the eighteenth century, Kentucky was explored by Dr. Thomas Walker, John Finley and Daniel Boone. The first settlement was made at Harrodsburg in 1774. In 1776, Kentucky was made a county of Virginia. In 1792 Kentucky was admitted to the Union as a separate state, the first to be admitted after the union was formed.

Although Kentucky was one of the slave states, she did not secede during the Civil War, and at one time and another during that conflict was occupied by both Federal and Confederate troops. Several campaigns were fought on her soil.

Geography and Economics

Kentucky is bounded on the north by Ohio, Illinois and Indiana; on the east by West Virginia and Virginia; on the south by Virginia and Tennessee; on the west by Missouri and Illinois.

The Appalachian Mountains cross the eastern end of the state. In the center part of the state is the famous Blue Grass region with gently undulating hills and valleys. Between the Green and Cumberland rivers is a flat area called The Barrens because no heavy timber is grown there. The western part of the state is level. The soil of the state is very fertile. In the Blue Grass area are bred and raised the famous race horses for which the state is noted.

Corn, oats and wheat are grown in abundance. Other agricultural crops are Indian corn, oats, potatoes, tobacco, flax, cotton, and fruit.

Kentucky also produces bituminous coal, petroleum, natural gas, fluorspar and natural cement.

In addition to horses, sheep, cattle and swine are raised.

The state has extensive forest areas, including pine, cedar, ash, oak, maple, beech and walnut.

Among her industries are flour and grist mills, tobacco manufacturing, men's clothing, cotton goods and lumber products. There are also foundries and machine shops, iron and steel works, railroad shops, printing houses, meat-packing plants.

Among natural beauties in the state is Mammoth Cave, one of the wonders of the modern world, located in Mammoth Cave National Park. Its subterranean passages extend miles below the surface of the earth.

Cumberland Waterfalls is the only falls in the Western Hemisphere where a moon-bow may be seen.

Abraham Lincoln National Park is three miles south of Hodgenville and contains the log cabin in which Lincoln is supposed to have been born.

Jefferson Davis, president of the Confederacy, was also born in Kentucky.

Educational Institutions

The University of Kentucky is located at Lexington. Louisville University is in Louisville; Berea College in Berea; Centre College in Danville; Transylvania College in Lexington. There are five State Teachers' Colleges and 14 junior colleges.

Capital, Frankfort; Called the Blue Grass State; State Flower, Goldenrod; Motto: United We Stand, Divided We Fall; Area, 40,395 square miles, rank, 36th; Population, 2,845,267, rank, 16th.

LOUISIANA

Louisiana had its beginnings in 1528, when Narvez, the Spanish explorer, discovered the mouth of the Mississippi River. Louisiana's history is divided into two major periods; the Colonial, extending from the first attempts at colonization about 1712 to the cession in 1803; and the American, from the latter date to the present time. The Cabildo, early seat of government, is now a museum owned by the state.

The Colonial period comprises the French and Spanish domination from 1712 to 1803. The American domination began on Dec. 20, 1803 and has been interrupted only by the period during which Louisiana formed part of the Southern Confederacy during the Civil War. Historians usually include in the story of Louisiana the attempt at colonization by DeSoto as well as the travels and explorations of Marquette and Joliet in 1673 and of LaSalle between 1682 and 1684.

In 1699 Iberville, a French officer, entered and explored the lower part of the Mississippi and landed on the present site of New Orleans. He was accompanied by his brother, Jean Baptiste Lemoine Bienville. In 1 the colony they established was moved to Mobile. Antoine Crozat, a wealthy French merchant, obtained the "concession" of Louisiana in 1712 for a period of fifteen years, but his venture was a failure and he surrendered his charter at the end of five.

Louisiana was then handed over to the Company of the West, headed by John Law. Bienville was made governor and in 1718 he founded a settlement at New Orleans. In 1722 the seat of the government was moved there. The Company of the West sent out

many explorers and Louisiana increased rapidly in population, though not in prosperity. There were Indian wars, slaves were introduced and the Black Code formulated. In June, 1731, the Company surrendered its charter to the king.

By the secret treaty of Fontainebleau, 1762, France ceded to Spain all the territory known as Louisiana west of the Mississippi River, together with the Isle of Orleans, east of the river. The following year marked the end of the Seven Years War (the French and Indian War) and in the Treaty of Paris, 1763, France lost that part of her Louisiana territory east of the Mississippi, except the Isle of Orleans, to England. It was not until the fall of 1764 that the people of New Orleans learned officially that they had been transferred to Spain.

From 1760 to 1790, about 4,000 Acadians, expelled by the British from Nova Scotia, in 1755, settled in Louisiana. Their descendants today number about 300,000 and form a large part of the population of southwest Louisiana.

A hospital was established in 1799 when a humble French sailor, Jean Louis, left his savings to establish a medical center for the poor. It has become Charity Hospital, one of the largest institutions of its kind in the world, owned and operated by the state.

Unzaga, a Spaniard, was governor of Louisiana during the early years of the American Revolution and much contraband passed through the colony to the American colonies. Unzaga was succeeded by Galvez, during whose administration Spain declared war upon England, on the side of the American colonies and France. Galvez captured Baton Rouge from the British. On Good Friday, 1788, a major fire in New Orleans destroyed most of that city and when it was rebuilt it followed Spanish architecture. Of the French built residences escaping the fire, the most notable is that made famous by George Cable in "Madame John's Legacy".

In 1794 appeared the first newspaper in Louisiana, *La Moniteur de la Louisiane*. In 1795, sugar was first successfully granulated by Etienne de Bore of Louisiana.

The Revolution and Reign of Terror in France (1789-91) resulted in many royalists fleeing to Louisiana where they were given generous land grants along the Mississippi River and in the northern part of the state. Uprisings in France's West Indian holdings resulted in the settlement in Louisiana of many refugees from Haiti and Santo Domingo. The census of 1810 revealed sufficient population in the Territory for admission to the Union, and in 1812 statehood was granted to Louisiana.

Important events in the history of Louisiana in the early part of the American regime were the Battle of New Orleans in which the famous pirate Jean Lafitte took part, and in which Jackson defeated the British, Jan. 8, 1815; the fixing of the western boundary of Louisiana at the Sabine River by a treaty between the United States and Spain in 1819; the formation of the first Congressional districts in 1821; the opening of the first railroad in the state, running between New Orleans and Lake Pontchartrain in 1831; the adoption of a second state constitution in 1845, and a third in 1852.

On Jan. 26, 1861, Louisiana adopted an ordinance withdrawing from the government of the United States. For several months before entering the Confederacy, the state operated as an independent nation. From that date until 1865, Louisiana was involved

in the Civil War, and the state furnished 50,000 men to the Confederate armies.

New Orleans was captured by Farragut's fleet in 1862, and later Baton Rouge fell. The attempt of Federal forces to take Shreveport in 1864 was unsuccessful and there was little further fighting in Louisiana.

Recovery of Louisiana following the war was hastened by James H. Eads in deepening the channel at the mouth of the Mississippi River, which contributed to further development of the port of New Orleans. The state's capital was moved five times, but has been at Baton Rouge since 1882.

Geography

The state is situated in the South Central region of the United States, on the Gulf of Mexico, at the mouth of the Mississippi. It is bounded on the north by the states of Arkansas and Mississippi, on the east by Mississippi State and the Gulf, on the south by the Gulf, and on the west by Texas. Its land is flat, with few hills of any size, and much of its area lies lower than the banks of the Mississippi, necessitating a system of levees and spillways to guard against dangers of annual floods.

The climate is semi-tropical, very warm in summer, and with little cold in the winter. The average annual temperature is 66.4 degrees and the average annual rainfall 55.33 inches. The western part of the state, towards Texas, tends to dryness.

Louisiana has 4,794 miles of navigable waterways, much of them in large bayous in the south, and including the Mississippi, Red and Sabine rivers.

Products

With more than 6,000 square miles covered by water, propagation of oysters is a big industry. There is a large shrimp catch and much commercial fishing. Louisiana produces more fur pelts than any other state in the union. Trappers market muskrat, opossum, raccoon, mink and other furs, muskrats alone yielding approximately 6,000,000 pelts annually.

Louisiana leads also in production of sugar cane, sugar cane syrup, and rice. Other large crops are corn, sweet potatoes, truck garden vegetables, citrus fruits and pecans. Cotton also is grown throughout the state. The state ranks high in production of lumber and paper. Four of the world's largest salt mines are in Louisiana, and there are also several sulphur mines there. The state produces large amounts of petroleum and natural gas.

The start of the present century found Louisiana beginning an era of intensive commercial development accompanied by creation of statewide improvements including railways, highways, bridges and waterways. Lake Charles, with two outlets to the Gulf of Mexico, is one of the finest inland ports on the Gulf.

Education, Recreation

Louisiana has eleven institutions of higher education including Louisiana State University, Baton Rouge; Tulane University and Loyola University (R.C.), New Orleans; for Negroes there are Southern University in Scotlandville; Dillard University and Xavier University, both in New Orleans. There are two Junior Colleges and one State Teachers' College and five Negro colleges. Tulane is the oldest university in the lower Mississippi Valley, founded in 1834 as a medical college to combat yellow fever. The H. Sophie Newcomb College for Women is one of its divisions.

Louisiana is famous for its Mid-Winter Sports Carnival, a six-day event during which nationally famous college athletes compete in all forms of sports at New Orleans. The sports events, beginning Dec. 26, are climaxed by the famous Sugar Bowl football game held on New Year's Day.

The famous Mardi Gras, annual attraction for thousands of tourists, usually occurs annually on the day preceding Ash Wednesday, but it has been cancelled since start of the war.

In March the state features the New Orleans Spring Fiesta and Flower Show, the Audubon Pilgrimage in St. Francisville (a memorial to the famous naturalist, John James Audubon); the Azalea Trail in Lafayette and the Garden Tour in Shreveport. During April the Tri-State Sing is held in Shreveport, with hundreds of singers from Louisiana, Arkansas and Texas as participants.

In August is held the Blessing of the Shrimp Fleet in Morgan City, Golden Meadow, the vicinity of Houma and other bayou settlements. The custom of blessing the boats of fishermen was taken to Louisiana by French priests. During this month there is also held the Tarpon Rodeo in Grand Isle, Louisiana, with scores of fishermen taking part.

Capital, Baton Rouge; Called the Pelican State; State Flower, Magnolia; Motto: Union, Justice, Confidence; Area, 48,523 square miles, rank, 30th; Population, 2,363,880, rank, 21st.

MAINE

The coast of Maine was visited by early explorers to this continent, including the Cabots, Verrazano, Gomez, and others. In 1604, Champlain discovered Mount Desert Island, just off the coast, on which Acadia National Park is now located. The Popham colonists made an early settlement (1607) at the mouth of the Kennebec River. The eastern part of Maine was part of Acadia or Nova Scotia until 1691, when all of Maine was made a part of the Massachusetts Bay Colony. It became a separate state in 1820, as part of the Missouri Compromise.

Maine played a large part in early United States colonial history. The first city to be chartered in America was founded by Sir Ferdinando Gorges in 1641 at the site of the present town of York. In the Revolutionary War, the first naval battle was fought off the coast of Maine.

Geography and Economics

Maine is the most northeasterly state in the Union, and is bounded on the north by the Canadian province of Quebec, on the east by New Brunswick, Canada, and the Bay of Fundy; on the south by the Atlantic Ocean, and on the west by New Hampshire and Quebec. The town of Eastport is the most eastern city in the United States.

The northern part of the state is largely wilderness of forest land with coniferous trees and mountainous elevations. Except on the fertile lands of Aroostook County, his part of the state is thinly populated. In the northeast, on the St. John River, are a number of French-Canadian settlements. Mount Katahdin, in the central part of the state, is the highest point in Maine, rising 2,737 feet.

The coast of Maine is rugged and picturesque and is indented with many harbors. Along the center of the coastline are many islands.

The climate is extremely cold in winter, but pleasant in summer, making the state a favorite summer resort. Hunting and fishing are popular.

Maine's chief crop is the potato, grown in Aroostook County. Other crops are hay, oats, buckwheat, apples and blueberries. There are many poultry farms.

Granite is quarried in large amounts. Lumber is also an important product, and with her rich forests, Maine leads the country in production of pulp and paper. Along the coast, where water power is plentiful, there are textile, tanning, boot and shoe and canning factories.

Portland is the state's chief port.

Educational Institutions

The University of Maine is situated at Orono. Bowdoin College is in Brunswick, Bates College in Lewiston, and Colby College in Waterville. There are also two State Teachers' Colleges and three Junior Colleges.

Capital, Augusta; Called the Pine Tree State; State Flower, Pine Cone; Motto: Digo (I Direct); Area, 32,215 square miles, rank, 38th; Population, 847,226, rank, 35th.

MARYLAND

Maryland was named for Queen Henrietta Marie, wife of King Charles I of England. The first settlement in Maryland was made at St. Mary's in 1634 after Charles I had made a grant of the territory to George Calvert, first Lord Baltimore. Maryland was one of the first thirteen colonies, and during colonial times was involved in the Claiborne Rebellion and in boundary disputes. During the Revolution, Baltimore was an important naval center, and 18 guns were erected to guard the entrance to the harbor. They were the beginning of Fort McHenry, named for Colonel James McHenry of Baltimore, who had been an aide to General Washington in the Revolution and later served as Secretary of War.

In 1649, religious toleration had been acknowledged in Maryland for all sects and churches which professed belief in the Trinity. Later there was a period when religious privileges were denied Catholics.

The boundary line between Maryland and Pennsylvania was established between 1763-69 by Charles Mason and Jeremiah Dixon, who established the Mason-Dixon Line which runs along the parallel 39°43'26.3" N. Lat.

Geography and Economics

Maryland is bounded on the north by Pennsylvania, on the east by Delaware and the Atlantic Ocean, on the south and southwest by Virginia, the District of Columbia and West Virginia. The Chesapeake Bay, an arm of the Atlantic Ocean, penetrates the state from the south and makes Baltimore an important seaport. The Potomac River flows along the southern border. The state is flat towards the ocean, but has mountainous areas in the western section. Great Backbone Mountain which rises 3,340 feet, is the highest point.

The state extends 200 miles along the Pennsylvania border and varies from two to 130 miles in length. Chesapeake Bay is 180 miles in length and from three to 30 miles in width. Maryland has more river frontage than any other state, principal rivers being the Potomac, Susquehanna, Patuxent, Patuxent, Severn, Wicomico, Chester, Sassafras, Choptank, Nanticoke, Pocomoke, Tred Avon, Wye, Miles, Bush, Gunpowder, Elk, Northeast and Bohemia.

Baltimore's harbor has approximately 40 miles of deep water frontage. The city is the country's second port in import tonnage and total foreign trade. It is also one of the leading Atlantic and Gulf ports in the handling of intercoastal traffic moving through the Panama Canal.

Maryland's chief agricultural products are tobacco, wheat, corn, hay, potatoes, strawberries, spinach and sweet potatoes. It packs more tomatoes than any other state and cans other vegetables in quantity. It ranks first in production of black muskrat pelts. The state also produces pig iron, coal and coke, clay and asbestos.

Maryland's capitol building dates from before the Revolution, and is the third on the same site.

Educational Institutions

Most famous educational institution in Maryland is Johns Hopkins University, Baltimore. Its international reputation in medicine brings patients and students from all over the world to its clinics. The United States Naval Academy is located in Annapolis. St. John's College, also in Annapolis, is a noted center of progressive education. Goucher College for Women is in Baltimore and the University of Maryland in College Park and Baltimore. There are also four colleges for Negroes, three State Teachers' Colleges, and three junior colleges. The Peabody Institute of Music, the Maryland Institute School of Art and Design, and Walter's Art Gallery are also in Maryland.

Points of interest for tourists are the house in Brookeville to which President Madison and his family fled when Washington was burned by the British in 1814; Antietam battlefield, near Hagerstown, where one of the bloodiest battles of the Civil War was fought; the Crystal Grottoes near Boonesboro, considered one of the country's great natural wonders.

Capital, Annapolis; Called the Free State; State Flower, Black-eyed Susan; Motto, Fatti Maschii Paoole Femine, (Manly Deeds and Womanly Words); Area, 10,577 square miles, rank, 41st; Population, 1,821,244, rank 28th.

MASSACHUSETTS

Massachusetts takes its name from the Massachusetts Indians who formerly lived in the Great Blue Hill region south of Boston. The Indian word is supposed to mean "at or about the Great Hill".

The coast of Massachusetts was explored long before the Mayflower landed on its shores. According to legend, Eric the Red and his Norsemen touched the shores in the year 1000 and fishermen from France and Spain are thought to have stopped en route to the Great Banks to net cod. In 1497 John Cabot carried out the explorations on which England based her original claim to North America. Other landings were made by explorers seeking a new route to the East. In 1602 Bartholomew Gosnold explored the Bay and named Cape Cod for the fish which abounded in its waters. Twelve years later John Smith wrote glowing accounts of his travels through New England, and in 1634, William Wood wrote the "New England Prospect".

In 1620 the Pilgrims established their colony in Plymouth after coming to this country in search of religious freedom. Their democratic government followed the terms of the Mayflower Compact, an agreement which bound everyone to follow the will of the ma-

jority. Because their colony prospered in spite of great hardship, they established the first Thanksgiving Day in 1621. In 1628 the Puritans, also seeking religious freedom, set up their colony in Salem, under the leadership of John Endicott. The following year royal charter was granted to the Massachusetts Bay Company to promote the settlement of the territory. The charter given to the company was the foundation of the democratic government of the Massachusetts Bay Colony. By 1640, immigrants in Massachusetts numbered 16,000.

After 1660, when the Stuarts were restored to the throne of England, Massachusetts resisted all attempts at domination from abroad, and as a consequence, lost its charter in 1684, becoming a part of the Dominion of New England. In 1691 Massachusetts was made a royal colony under a governor appointed by the Crown. The new restrictions placed upon the Crown colony led to a series of controversies that culminated in the Revolutionary War. On April 19, 1775, the "embattled farmers", warned by the historical rides of Paul Revere and William Dawe, engaged the British regulars at Lexington and Concord, firing the "shot heard round the world".

The Commonwealth of Massachusetts still governed by the original instrument drawn up in 1780, and its constitution serves as a model for that of the United States.

In 1812, Massachusetts opposed war with England because it put a stop to her prosperous ocean trade. Following that period Massachusetts and the other New England states began to industrialize, and, to prevent a westward migration of her people, instituted needed governmental and religious reforms. In 1833 a Constitutional amendment completely separated Church and State.

The early decades of the nineteenth century were marked by vigorous intellectual activity of Emerson, Thoreau and their fellow Transcendentalists. In that same period Horace Mann crusaded for universal education; Dorothea Dix crusaded for the welfare of the insane; and colonies of idealists crusaded at Brook Farm for the sharing of labor and ideal community living.

It was partly from this intellectual wealth that abolitionist sentiment sprang. In 1833 William Lloyd Garrison, an uncompromising foe of slavery, founded his weekly, *The Liberator*. The next year the New England Anti-Slavery Society was formed in Boston. Many slaves were aided in escaping through the underground railway to Canada. To the Civil War, Massachusetts gave unstintingly of men and money.

Geography and Economics

Massachusetts is bounded on the north by Vermont and New Hampshire; on the east by the Atlantic Ocean; on the south by Rhode Island, Connecticut and the Atlantic and on the west by New York.

The Berkshire Mountains are in the western part of the state and the remainder of the area is fairly level. It is one of the leading industrial states in the union, with huge water power resources. Manufactures are cotton goods, woolens, worsteds, boots and shoes. There are many tanneries, foundries, paper mills, printing establishments, and machine shops.

It is one of the leading states in production of fish, and Boston is the leading fishing port in the country.

Mineral products are granite and Lee Marble.

Agriculturally, hay, tobacco, potatoes, apples, wheat, corn, oats, rye, buckwheat and maple syrup are produced. Cape Cod produces many cranberries.

The North Shore and Cape Cod are among the most popular summer resorts in the country.

Educational Institutions

Harvard University, founded as Harvard College in 1636, and located in Cambridge, is the oldest college in America. Other leading educational institutions are the Massachusetts Institute of Technology in Cambridge; Boston College; Boston University; Northeastern University in Boston; Amherst and Massachusetts State College in Amherst; Tufts in Medford; Williams College in Williamstown; Holy Cross and Clark Universities in Worcester; Wellesley College, Wellesley; Smith College, Northampton; Radcliffe, the woman's college of Harvard, in Cambridge; Mount Holyoke in South Hadley; Wheaton, Norton and Simmons Colleges, in Boston. There are also 15 State Teachers' Colleges and 10 junior colleges.

The state has many spots of historic interest, which attract visitors.

Capital, Boston; Called the Bay State, the Colony State, the Old Bay State, the Puritan State, and the Baked Bean State; State Flower, Mayflower; Motto: Ense Petit Placidam Sub Libertate Quietem (By the sword we seek peace, but peace only under liberty); Area, 8,257 square miles, rank, 44th; Population, 4,316,721, rank, 8th.

MICHIGAN

The state of Michigan was first settled by the French. Jean Nicolet established a colony at Sault Ste. Marie in 1634, and Father Marquette settled in the same area in 1668. Detroit was settled in 1701 by Cadillac, and Mackinac was the scene of another French colony. In 1763, the territory was ceded by France to Great Britain, who surrendered it to the United States in 1796. It was part of the Northwest Territory, and later belonged to the Territory of Indiana. In 1805 it was made the Territory of Michigan. It was the scene of fighting during the war of 1812, at which time Detroit was captured by the British. The United States recovered it in 1813 and Michigan was made a state in 1837.

The name Michigan comes from the language of the Mishigamaw Indians who inhabited the region. "Michi" means "great" and "gama" means "water". The term applied to Lake Michigan.

Geography and Economics

Michigan is bounded on the north by Lake Superior; on the east by Lake Huron, Lake St. Clair and Lake Erie; on the south by Ohio and Indiana; on the west by Wisconsin and Lake Michigan.

The state consists of two peninsulas. The lower one is the more populous and wealthy. This section is a level region given to industry. It has extensive forest lands. There are more than 6,000 lakes in this part of the state, making it a popular resort for sportsmen and vacationists.

The northern peninsula is more rugged and is given to copper and iron mining and lumbering.

Because it has a water boundary line of about one thousand miles, Michigan is important in lake commerce.

The ship canal between Lake Huron and Lake Superior at Sault Ste. Marie handles more traffic than any similar canal in the

world, including the Suez and Panama Canals.

Detroit is the fourth largest city in the country and the center of a vast automotive industry.

Grand Rapids is famous for the manufacture of furniture.

Chief agricultural crops are oats, corn, wheat, clover seed, hay, potatoes, sugar beets, cherries, apples, peaches, grapes, pears and beans.

Minerals found in the state include iron ore, copper, coal, natural gas, cement, gypsum, silver, petroleum. The state also produces large quantities of salt.

Educational Institutions

The University of Michigan at Ann Arbor was the first such institution in the country to admit women on the same basis as men. Michigan State College of Agriculture and Applied Science is at East Lansing, and is the oldest agricultural college in the country; Michigan College of Mining and Technology is in Houghton; Wayne University is in Detroit. In addition, there are four State Teachers' Colleges and 10 junior colleges.

Capital, Lansing; Called the Wolverine State; State Flower, Apple Blossom; Motto: Si Quaeris Peninsulam Amoenam Circumspice (If you seek a pleasant peninsula, look about you); Area, 58,216 square miles, rank, 22nd; Population, 5,256,106, rank seventh.

MINNESOTA

Minnesota is a land of lakes, left in the wake of glaciers which covered most of its area in the ice age. Other relics of the glacier period are terminal moraines, rising like bluffs or mounds along the landscape, and fine, rich soil.

French, English and American explorers found their way into Minnesota territory soon after white men came to the eastern shores of the country. Notable among them were Radisson, Groselliers, Nicolas Perrot, Du Lhut, Michel Accault, Father Hennepin, Le Sueur, La Verendrye and La Jemayay. Before the coming of the whites, Minnesota had been inhabited by tribes of Indians, the Ojibways (Chippewas) and the Sioux. The two tribes were embroiled in constant clashes, the Sioux forcing the Chippewas to retreat toward the west and south until they became a prairie tribe.

At the end of the Seven Years' War, in 1763, eastern Minnesota came under British domination, and many British explorers and traders came to the region to carry on commerce with the Indians. Among them was Jonathan Carver, who wrote an account of his travels in Minnesota which became a "best seller".

After the War of 1812, the United States prohibited foreigners from serving as chief traders in the fur trade of the country, with the result that after 1816 the Northwest Company left Minnesota and the American Fur Company of John Jacob Astor took over. Fort St. Anthony, later called Fort Snelling, was established in 1819 to protect American fur traders and to serve as frontier defense.

In 1832 Henry R. Schoolcraft discovered Lake Itasca, source of the Mississippi River. In the later 1830's, Joseph N. Nicollet made the first scientifically accurate map of Minnesota. About that same time lumber camps began to be built in the area, and in 1849 Minnesota came into the Union as Minnesota Territory. It remained a territory until 1858, during which period counties were established, roads built, large tracts of land

surveyed and sold, and the lumber industry greatly developed.

Minnesota was created a state on May 11, 1858.

In 1862 the Sioux Indians, aroused by lack of food and failure to receive their annual payments, rose against the whites and massacred settlers in the Minnesota Valley. Soldiers from St. Paul, under General Sibley, quelled the riot, and afterwards the Sioux were sent to a reservation outside the state boundaries.

In the 1860's and 1870's, railroads were built through the state, connecting it with the rest of the country. The Northern Pacific, a link to the Pacific coast, was completed in 1883, under the direction of Henry Villard.

Geography and Economics

Minnesota is bounded on the north by the Canadian provinces of Manitoba and Ontario, on the south by Iowa, on the west by North and South Dakota, and on the east by Wisconsin and Lake Superior. The Mississippi, St. Lawrence and Red Rivers have their headwaters in this state, and there are numerous other rivers and lakes which supply abundant water power. Most of the state is prairie, with extensive forest tracts in the north. Because there are more than 11,000 lakes within its borders, Minnesota is called the 'Land of Ten Thousand Lakes'. Minnesota is an Indian word meaning "cloud-tinted water".

With its lakes, forests, and state and national parks, Minnesota is a summer vacation spot for thousands of tourists.

The state is one of the world's great wheat-producing centers, and the largest flour mills in the world are in Minneapolis. The state leads, too, in production of corn. Other agricultural products are barley, rye, flaxseed, oats, hay and potatoes. Lumbering is an important industry. In the northern part of the state are found rich beds of iron ore, the Vermilion, Mesabi and Cuyuna Ranges. Sixty percent of all the iron ore in the United States comes from Minnesota, and Duluth, on Lake Superior, serves as the chief port from which iron ore is shipped. Manganece is also found in this area.

Minnehaha Falls, which Longfellow immortalized in his poem, "The Song of Hiawatha", are located in Minnehaha Park in Minneapolis.

Educational Institutions

The University of Minnesota is located in Minneapolis; Hamline University in St. Paul; St. John's University in Collegeville; Carleton and St. Olaf Colleges in Northfield; Gustavus Adolphus College in St. Peter; the College of St. Catherine in St. Paul.

Capital, St. Paul; Caded the North Star State; State Flower, Lady Slipper or Moccasin flower; Motto: L'Étoile du Nord (The Star of the North); Area, 84,068 square miles, rank, 11th; Population, 2,792,300, rank, 15th.

MISSISSIPPI

Among the first known facts about the territory which is now the state of Mississippi is the exploration of the Mississippi River by Marquette and La Salle in 1681. More than a century earlier, however, in 1540, De Soto had visited the area. In 1699, the French attempted a settlement at Iberville, and a second settlement was made in 1719 at Natchez. France ceded the territory to Great Britain in 1763, at the conclusion of the Seven Years' War, and the United States

acquired it partly in 1783, the remainder in 1811.

Mississippi was organized as a territory in 1798, and was admitted to the Union as a state in 1817.

In 1861 it joined the Confederacy in seceding from the Union, and was the scene of some heavy fighting in the Civil War. The battlefield at Vicksburg, where one of the critical campaigns of the war was waged, has been made into a national monument.

Mississippi was readmitted to the Union in 1870.

Geography and Economics

Mississippi is bounded on the north by Tennessee, on the east by Alabama, on the south by Louisiana and the Gulf of Mexico; on the west by Louisiana and Arkansas. The Mississippi River is the western boundary.

The state is hilly in the eastern part, and slopes downward to the Mississippi shores. It is an agricultural state, raising cotton, pecans, sweet potatoes, peanuts, sugar cane, corn, rice, wheat, oats and fruit. Cotton is the top-ranking crop, and the state contains within its borders the world's largest single cotton plantation, 35,000 acres.

Minerals found in Mississippi are coal, gypsum, clay and hydrated limestone.

In 1927, Mississippi was the scene of a national disaster when the Mississippi River overflowed its banks and destroyed 45 million dollars worth of crops and property. Flood control projects have since been put into effect.

Mississippi remains as typical of the old south as any state in the southern United States. Many of the old plantations and large estates are still in existence.

Educational Institutions

The University of Mississippi is located at Oxford; Mississippi State College at Starkville; Mississippi State College for Women at Columbus. In addition, there are two state teachers' colleges, 17 junior colleges, eight negro colleges.

Capital, Jackson; Called the Magnolia State; State Flower, Magnolia; Motto: Virtute et Armis (By Valor and Arms); Area, 47,716 square miles, rank, 31st; Population, 2,183,376, rank, 23rd.

MISSOURI

Missouri was originally a part of the French colony of Louisiana and was ceded to Spain in 1763 and back to France in 1800. The United States took possession of the territory by virtue of the Louisiana Purchase in 1803. A separate Territory of Missouri was formed in 1812 and Missouri was admitted to the Union as a state in 1821. It received its present boundaries in 1835. Although Missouri almost seceded at the time of the Civil War, she finally fought for the Union cause. St. Louis was founded in 1764, and in 1904 a large World's Fair was held there to commemorate the Louisiana Purchase.

Geography and Economics

Missouri is bounded on the north by Iowa, on the east by Illinois, Kentucky and Tennessee, on the south by Arkansas, and on the west by Oklahoma, Kansas and Nebraska. The Mississippi River forms the entire eastern boundary line. The Missouri River flows across the state from west to east, just north of the center. North of the Missouri, the land is generally level, but south of it, it becomes hilly, ending in the rugged Ozark Mountains.

In the southeast, along the banks of the Mississippi, there is extensive marshland, called the "Sunk Country", caused by the earthquake of 1811. The land along the large rivers is being reclaimed by levees and drainage canals.

Missouri has about one thousand miles of navigable waterways, and St. Louis is a hub for extensive rail traffic. A bridge across the Mississippi at this point accommodates more freight cars than any other span in the world. St. Louis is also the center for north and south tourist travel.

Some of the country's largest stockyards and meat-packing plants are located at Kansas City.

Corn leads among the state's agricultural crops. Winter wheat, oats, potatoes and tobacco are also raised in quantity.

Its mineral output includes coal, lead, zinc, Portland cement, pig-iron, barites, copper, limestone, marble, sandstone and granite.

The Bagnell Dam across the Osage River in the Ozarks forms an enormous artificial lake and floods 60,000 acres. It is part of the hydro-electrical development designed to supply power to St. Louis and Kansas City.

The Ozarks are popular with fishermen and vacationists.

Educational Institutions

The University of Missouri is located at Columbia; St. Louis University and Washington University in St. Louis; the University of Kansas City at Kansas City; there are also eight teachers' colleges, 22 junior colleges and a college for Negroes.

Mark Twain's boyhood home is in Hannibal, and the home of Jesse James is near Excelsior Springs.

Capitol, Jefferson City; Called the Show Me State; State Flower, Hawthorn; Motto: Salus Populi Suprema Lex Esto (Let the Welfare of the People Be the Supreme Law); Area, 69,674 square miles, rank, 18th; Population, 3,784,664, rank, 10th.

MONTANA

Montana was first visited by white men in 1742, when French explorers from Canada, searching for the Columbia River, visited the area. No more white men came until the time of the Lewis and Clark expedition in 1804-06. Later, traders, trappers and Jesuit missionaries settled in the region.

The section of Montana lying east of the Rocky Mountains was included in the Louisiana Purchase, and the section west of the mountains formed in succession part of Oregon, Washington and Idaho. The section included in the Louisiana Purchase became, successively, part of the Territories of Missouri, Nebraska, Dakota and Idaho. Between 1850 and 1860, gold was discovered in the region and hundreds of settlers were attracted. In 1864, Montana was organized as separate territory, and in 1889 it was made a state.

Geography and Economics

Montana is bounded by Saskatchewan and Alberta, Canada, on the north; by North and South Dakota on the east; by Wyoming and Idaho on the south; by Idaho on the west.

The Rocky mountains occupy the western two-fifths of the state's area. To their east, the land forms part of the "Great Plains". Irrigation has been highly developed, with the Madison and Missouri Rivers the chief source of water supply. Temperate zone

fruits are produced in quantity. Wheat, oats, barley, flaxseed, rye, corn, hay, potatoes and dairy products are other important products. Much livestock is raised and the production of wool is important.

In the earth are found gold, silver, copper, lead, zinc, petroleum, manganese, coal, asbestos and natural gas.

Montana's forests furnish vast amounts of timber, including white pine, larch, spruce, cedar, Douglas fir, hemlock and yellow pine.

The mountainous area of Montana is one of the most beautiful scenic sections in the United States. Glacier National Park, which extends to the Canadian border, is one of the finest public parks in the world. The state offers unsurpassed recreational facilities, with 500 lakes and fishing streams, thousands of miles of mountain trails, national forests, dude ranches and camps.

There are seven Indian reservations in the state for the tribes which lived in that region—the Blackfeet, Sioux, Flatheads, Crows and Cheyennes.

Educational Institutions

The University of Montana is at Missoula; Montana State College at Bozeman; Montana School of Mines at Butte. There are also two state teachers' colleges, one normal college and three junior colleges.

Capital, Helena; Called the Treasure State; State Flower, Bitterroot; Motto: Ore y Plata (Gold and Silver); Area, 147,138 square miles, rank, 3rd; Population, 559,456, rank 40th.

NEBRASKA

The area which is now the state of Nebraska was at one time the bottom of a huge inland sea, according to geologic records contained in huge fossil beds and glacial deposits which have been found in the state. From what archaeologists have gleaned, it is presumed that prehistoric man also lived in this area.

The Spanish explorer Coronado visited the region in 1541 and found it inhabited by Pawnee Indians. Other Indian tribes who lived there were the Otoe, Omaha, Ponca, Sioux, Cheyenne and Arapahoe. In the early part of the eighteenth century, French fur traders followed the Missouri River as far as Nebraska. Because of explorations and discoveries, the French, British and Spanish all laid claim at one time or another to the region. At the close of the Seven Years' War, in 1763, when France ceded all her claims west of the Mississippi to Spain, Nebraska became part of the Spanish province of Louisiana. In 1803, the territory was included in the Louisiana Purchase and reverted to the United States.

Lewis and Clark headed the first American expedition to visit Nebraska in 1804-06. In the years that followed, many other explorers came into the region. Fort Atkinson, the first military post, was established in 1819, and abandoned in 1827. It was on the present site of Fort Calhoun, 16 miles above Omaha.

Many of the famous overland trails crossed Nebraska in the early 19th century, including the Oregon Trail, the California Trail, and the Denver Trail.

The Nebraska region was part of the Territory of Indiana from 1804 until 1805. From 1805-1812, it formed part of the Territory of Louisiana, which had its capital at St. Louis. It was then part of the Territory of Missouri until 1821 when Missouri was made a state, and Nebraska became a part of the

unorganized territory commonly called the Indian country. The name Nebraska first appeared in literature about 1842, in connection with the Nebraska River, Nebraska being an Indian name for the Platte, and meaning "flat water". Stephen A. Douglas of Illinois introduced the first bill to organize Nebraska on Dec. 17, 1844. However, it did not pass. Two succeeding bills also failed. In 1854, the Kansas-Nebraska Bill was passed after a struggle and signed by President Pierce. The struggle between slave and free states for dominance in Nebraska led to the organization of the Republican party and to conflicts which brought on the Civil War.

Nebraska was admitted as a state in 1867 and its state constitution was adopted in 1875. In 1934 Nebraska voted an amendment to its constitution, substituting a unicameral legislature for its former bicameral form. The new chamber has 43 members elected without party designation.

Geography and Economics

Nebraska is bounded on the north by South Dakota, on the east by Iowa and Missouri, on the south by Kansas and Colorado, and on the west by Colorado and Wyoming. The Missouri River forms the eastern boundary.

It is an agricultural state, leading in the production of wild hay, and also producing corn, oats, wheat, barley, rye, alfalfa hay, potatoes, sugar beets, sorghums and soybeans. It produces large quantities of cattle and swine. There are extensive stockyards located at Omaha.

The western part of the state lies in the foothills of the Rockies, and there are high table lands near the Bad Lands of Wyoming and South Dakota. The eastern part of the state consists of grassy prairies sloping down to the Missouri. The average altitude is about 2,000 feet. Three rivers, the Platte, the Niobrara and the Big Blue, drain into the Missouri.

Educational Institutions

The state has 12 institutions for higher education, including the University of Nebraska at Lincoln; Creighton University, Omaha; Nebraska Wesleyan University at Lincoln; Hastings College at Hastings; Municipal University at Omaha; Doane College at Crete; Union College, Lincoln.

Capital, Lincoln; Called the Tree Planter's State; State Flower, the Goldenrod; Motto: Equality Before the Law; Area, 77,237 square miles, rank, 14th; Population, 1,315,834, rank, 32nd.

NEVADA

Nevada was first visited by white men when Franciscan monks crossed the territory in 1775, en route to California. About fifty years after that time, American and Canadian trappers used the Humboldt River, discovered by Peter Ogden, as a thoroughfare for their trade. Later in the 19th century, when the rush to California was on, many white men crossed Nevada. The Mormons settled there after their expulsion from the Middle West.

In 1848, as a result of the Treaty of Guadalupe-Hidalgo, ending the Mexican War, Nevada became United States territory. Until 1850, it was a part of California, known as the Washoe Country. In 1850 the territory of Utah was organized and the state of Nevada was included in it. In 1861, the territory of Utah was divided, and in

1864, Nevada was admitted to the Union as a separate state.

Population in Nevada grew rapidly after the discovery of the Comstock Lode in 1859. From the lode, millions of dollars of gold and silver have been taken, and men became wealthy from it overnight.

Nevada is a popular resort today because of the ease and speed of its divorce laws. Gambling has been legalized in the state.

Geography and Economics

Nevada is bounded on the north by Oregon and Idaho; on the east by Utah and Arizona; on the south and west by California. It is a mountainous state, with table lands which are flat and arid. Boulder Dam, the highest dam in the world, is situated near Las Vegas. It was built for purposes of irrigation, flood control, water storage, silt control and power development.

Nevada mountains have produced more than a billion dollars of wealth, including gold, silver, copper, lead, zinc, quicksilver, tungsten, sulphur, graphite, borax, gypsum and building stone.

The state also raises sheep, cattle, horses, hogs and poultry. Agricultural products are wheat, barley and potatoes.

Nevada has a number of ancient caves in whose recesses has been discovered proof that prehistoric men and animals once lived in that area. The best known of these is Gypsum Cave, 20 miles northeast of Las Vegas.

The name Nevada is taken from a Spanish word meaning "snow clad."

Educational Institutions

The University of Nevada was founded in 1864 at Elko, and was moved to Reno in 1886.

Capital, Carson City; Called the Battle Born State; State Flower, Sage Brush; Motto: All for our country; Area, 110,540 square miles, rank, 6th; Population, 110,247, rank, 49th.

NEW HAMPSHIRE

The state of New Hampshire formed part of a grant made in 1620 by James I. King of England, to the Plymouth Company, formed to develop the "New World." Fishermen, traders and farmers settled in the present towns of Dover and Portsmouth in 1623. The name of New Hampshire was first given to the area in 1629 when the Plymouth Company granted this section of its territory to Captain John Mason of Hampshire, England. However, boundaries were not definitely settled until more than a century later. From 1641-79, 1689-92, and 1699-1741, New Hampshire formed part of the Massachusetts Colony. During the intervening periods, and until 1775 it was under its own royal governors. During the periods when it was under the same governorship as Massachusetts, New Hampshire retained its own identity. In 1776 the state formed a provisional government, and its state constitution was adopted in 1784. New Hampshire was the ninth state to ratify the Federal Constitution, in 1788.

During the Civil War, about 39,000 New Hampshire men fought on the side of the Union.

Geography and Economics

New Hampshire is bounded on the north by the Canadian province of Quebec; on the east by Maine and the Atlantic Ocean; on the south by Massachusetts; on the west by Vermont.

The northern part of the state has a rugged

terrain. The White Mountains there reach the highest elevation in the United States, (Mount Washington, 6,293 feet). Toward the ocean, the land is more level, and is given over to agriculture and industry. The Connecticut River rises in New Hampshire, and forms most of the border between New Hampshire and Vermont. The state has more than 1300 lakes, and provides a wealth of recreational opportunities for summer vacationists and campers. It is popular, too, for winter sports. Some of the best skiing on this continent is found in the Conway and Pinkham Notches, at Franconia, Plymouth and Gilford.

Among the state's most famous tourist attractions are the Old Man of the Mountains, Mount Washington, the Fiume, Glen Ellis Falls, Dixville Notch, Lake Winnepesaukee. The Cannon Mountain Aerial Tramway, operated by the state, was the first such mountain tram of its kind in this country.

About one-third of the state's area is devoted to agriculture. Since the land is sandy and stony, it requires constant fertilization. Leading crops are berries, apples, peaches and garden produce. Dairy products are of wide importance. Minerals found in the state are granite, gravel, sand, clay products, feldspar, mica, garnet, quartz, beryl, fluor-spar, molybdenum, lead, silver, zinc, copper, gold.

The state manufactures paper and paper products, textiles, and leather products. Also manufactured are wood, lumber, iron and steel products, stone and clay products, and electrical equipment.

Educational Institutions

Dartmouth College at Hanover is one of the oldest and most famous colleges for men in this country. Daniel Webster was one of its graduates. The annual Dartmouth ice festival is one of the outstanding collegiate events on the eastern seaboard. The University of New Hampshire is located at Durham and St. Anselm's College in Manchester. There are two State Teachers' Colleges and two junior colleges.

Capital, Concord; Called the Granite State; State Flower, Purple Lilac; Motto: None; Area, 9,304 square miles, of which 310 square miles are water surface; rank, 43rd; Population, 491,524; rank, 45th.

NEW JERSEY

The Delaware Indians, a branch of the Algonquins, were the first inhabitants, in modern times, of what is now known as the state of New Jersey.

The territory was settled by Swedish and Dutch immigrants in the seventeenth century. In 1664, the British sent a fleet to capture the territory, in order that the New England States might be joined with Virginia, Maryland and the Carolinas. The Dutch, then in control, surrendered following negotiations. The territory of New Jersey was then given to Lord Berkeley and Sir George Carteret. Carteret had been administrator of the Isle of Jersey, and so the new colony was named New Jersey. The liberal government set up by Berkeley and Carteret attracted settlers from England, Scotland, New England, Long Island and Connecticut. Many of them were Calvinists and brought with them definite views about religion and government.

In 1676, the territory was divided into East and West Jersey, the former under Carteret and the latter under Berkeley. At

about that time, the Society of Friends established a number of communities in West Jersey.

In 1702 the Boards of Proprietors surrendered their rights to the Crown, East and West Jersey were reunited and the two provinces became the royal colony of New Jersey. From then until the outbreak of the Revolution, there was constant friction between the legislature and the Governor and his council. During this period, New Jersey had the same governor as New York, but retained a separate legislature.

New Jersey played an important part in the Revolution, although when it started there were three distinct elements in the population. Tories, Conservatives who favored compromise, and those who favored the war. Many of the Revolutionary battles were fought on Jersey soil.

At the end of the war, delegates from the state attended the Constitutional Convention in Philadelphia and presented the New Jersey Plan which led to the compromise on the question of representation, whereby in the Senate of the United States the states were given equal vote, with representation in the House based upon population.

New Jersey, greatly developed between the Revolutionary and Civil Wars, furnished both money and men for the latter conflict.

Geography and Economics

New Jersey is bounded on the north by New York; on the east by New York and the Atlantic Ocean; on the south by the Atlantic Ocean and Delaware Bay; on the west by Delaware and Pennsylvania. The Delaware River flows along the western boundary and the Hudson River, New York Bay, Staten Island Sound and Raritan Bay separate it from New York. With New York it manages the Port of New York Authority which has control of bridge and tunnel traffic between the two states.

The state is flat except for the rolling hill section in the northern part. It is very industrial, with textile manufacturing, silk mills, petroleum refining, copper smelting, foundries, machine shops, rolling mills, paint and chemical plants, canneries, meat-packing houses, soap, perfume and jewelry factories.

The southern part of the state is agricultural, producing truck garden crops, apples, peaches, tomatoes, asparagus, cranberries, potatoes, hay and corn.

Iron ore, magnetite, zinc and clay products are also produced in the state.

New Jersey contains many spots of historical and scenic interest. The oldest lighthouse in the United States is at Sandy Hook. Palisades Interstate Park, containing high walls of rock rising from the Hudson River, is maintained jointly by New Jersey and New York. The Delaware Water Gap, is a break in the Kittatinny Mountains through which the Delaware River flows, 1,200 feet below the summits of the mountains.

In the southern part of the state are many famous ocean resorts, best known of which is Atlantic City. The northern part of the state is popular for winter sports.

Educational Institutions

Princeton University in Princeton is an old and famous college for men. Rutgers College and the New Jersey College for Women are in New Brunswick. Stevens Institute of Technology is in Hoboken, and there are also seven state teachers' colleges, and eight junior colleges.

Capital, Trenton; Called the Garden State; State Flower, Violet; Motto: Liberty and Prosperity; Area, 7,836 square miles, rank, 45th; Population, 4,160,165, rank, 9th.

NEW MEXICO

The territory which is now New Mexico was first entered by Spanish travelers in the 16th century. As a result, a large segment of the territory was claimed for the Spanish government and the city of Santa Fe was founded as a capital. The city, called "La Villa Real de Santa Fe de San Francisco de Assisi", or, "The Royal City of the Holy Faith of Saint Francis of Assisi", was planned and laid out according to Spanish custom. From here, the Spanish ruled until 1680, when a war of independence waged by the Pueblo Indians cleared the southwest of all white invaders for twelve years during which complete freedom from the Christian faith and all Spanish domination was maintained. In 1693 the Spanish reconquered the territory, and held it for a little more than a century. In 1819 Mexico took over the governorship without bloodshed.

In 1846 the territory was conquered by the Americans and the Stars and Stripes were raised over the Palace of the Governors in Santa Fe on August 18 of that year, ending Mexican sovereignty. In 1862 the Confederates entered Albuquerque and Santa Fe, but they were defeated at Glorieta and withdrew from the state before the end of the year.

In 1879 the Santa Fe railroad brought new immigration and wealth to the area. New Mexico was admitted to statehood in 1910.

Geography and Economics

New Mexico, in the southwestern part of the United States, is bounded on the north by Colorado, on the west by Arizona, on the east by Oklahoma and Texas, and on the south by Texas and Mexico. The Rocky Mountains run through the center of the state. The east is flat tableland, and the southern part is desert. The Continental Divide runs north and south through the western portion of the state. Climate is dry, with an annual rainfall of from eight to 16 inches.

The state produces many agricultural crops, including corn, wheat, potatoes, sorghums and cotton. Fruit and sugar beets are also extensively raised.

The state has large undeveloped coal resources, and also produces copper, turquoise, petroleum, gold, silver, lead, zinc, granite, sandstone, limestone and clay.

For purposes of irrigation, many large dams and reservoirs have been built. Among the largest are the Elephant Butte on the Rio Grande, Conchas Dam on the Canadian River, Alamogordo, Avalon and McMillan Dams on the Pecos River.

The state has seven national forests and as a result lumbering is a large industry and there is much big game hunting and fishing.

Next to St. Augustine, Fla., Santa Fe is the oldest city in the United States.

Points of Interest

One of the major attractions in New Mexico are the pueblo villages. Ruins of these Indian community dwellings, built between 900 and 1200 A.D., are still standing and some are still used as homes by Indians. Some of the buildings contain more than a thousand rooms.

The Pueblo Indians developed in these regions a culture so advanced, especially in the fields of government, religion and drama,

that they can be termed savage only in that they lacked written language. Their dances and ceremonials are still held at certain times of the year. There are still 18 Indian Pueblos in the state as well as reservations for the Navajo, Apache, and Ute Indians. The Navajos have the world's largest reservation there—16 million acres—and are noted for their silverwork, weaving and handicrafts. The Pueblos are especially skilled in ceramics.

Other ruins within the state give evidence of civilizations going back to the Stone Age.

One of the most famous sights in New Mexico is Carlsbad Caverns, a National Park open the year round. The Caverns were made by water eating into limestone rock, which, about 200 million years ago, was an inland extension of the ocean. Although many explorations have been made through the caverns, their exact size is not yet known. Temperature within the caverns remains stationary at 56 degrees Fahrenheit throughout the year.

Educational Institutions

The University of New Mexico is located at Albuquerque; the New Mexico College of Agriculture and Mechanic Arts is at State College; New Mexico College of Mines at Socorro. There are also two Teachers' Colleges and the New Mexico Military Institute, a junior college, at Roswell.

Capital, Santa Fe; Called the Sunshine State, and the "Land of Enchantment"; State Flower, Yucca; Motto, Crescit Eundo (It Grows As It Goes); Area, 121,666 square miles, rank 4th; Population, 531,818, rank, 42nd.

NEW YORK

New York is one of the original thirteen states in the Union and has always played an important role in the country's history. The region was originally inhabited by Indians of the Five Nations, whose names are commemorated in the famous Finger Lakes of central New York State. In the early part of the seventeenth century the French explorer, Champlain, entered the northeastern part of the state, near the lake named for him, and Henry Hudson, an Englishman in the employ of the Dutch, traveled the river later called by his name as far as the site of the present city of Albany. On the basis of his travels, the Dutch claimed that area and founded Nieuw Amsterdam (now New York City), in 1623. For about 40 years they ruled the region under such famous governors as Peter Minuit, Wouter van Twiller, Peter Stuyvesant.

In 1664, after the Dutch had been weakened by a war with the Indians, the English seized their territory and renamed Nieuw Amsterdam, calling it New York after the Duke of York, who got his patent to the land from his brother, King Charles II of England. In 1686, New York was consolidated with New England and New Jersey. New York was the scene of conflict during the French and Indian wars, but in 1673 the French were driven out.

New York played an important part in the Revolutionary War and was the scene of Burgoyne's surrender in 1777. In that same year, New York adopted her own separate state constitution, joined the Confederation the next year, and, 11 years later, by ratifying the Federal Constitution, became one of the thirteen original states. For a short period, New York City was the national capital, and George Washington

was inaugurated there as first President on April 30, 1789.

The completion of the Erie, or Barge Canal, across the state, in 1825, helped population to spread through other sections of the state.

Geography and Economics

New York is bounded on the north by Lake Ontario and the provinces of Ontario and Quebec, Canada; on the east by Vermont, Massachusetts, Connecticut and the Atlantic Ocean; on the south by the Atlantic Ocean, New Jersey and Pennsylvania; on the west by Pennsylvania and Lake Erie. In the eastern part of the state are the Adirondack and Catskill Mountains. In the central and western parts it is hilly, with fertile valleys. The state produces nearly every kind of fruit, vegetable, grain and forage crop that can be grown in the temperate zone. Chief among them are corn, wheat, oats, barley, apples, peaches, pears, cherries, grapes, cabbage, onions, potatoes, beans, buckwheat, maple sugar, maple syrup. Dairy farming is also important and the state ranks high in cheese production.

New York ranks very high industrially producing clothing, textiles, liquors, wines tobacco. There are plants for sugar refining, meat-packing, flour milling.

Transportation facilities are of the finest. The state is covered by a network of railways and there are about 800 miles of navigable waterways. The Barge Canal connects the Great Lakes with the Hudson River. The Port of New York is one of the greatest in the world.

Many types of lumber are marketed from New York's forest stands in the mountainous regions.

Minerals found in the state include salt, iron, sandstone, limestone, fire clay, marble, granite, slate, gypsum, oil, natural gas, cement, talc.

As a vacation spot, New York offers its mountainous regions, the shore of Long Island, Niagara Falls near Buffalo, Saratoga Springs, famous spa and racing spot, and its many inland lakes.

Lake Placid, in the Adirondacks, is a famous winter resort where the Olympic Winter Games were held in 1932 and where the famous Mt. Van Hovenberg Bobsled run is located. Saranac Lake, nearby, is a famous resort for the treatment of tuberculosis.

Educational Institutions

New York has almost 60 institutions of higher education, including Columbia University, New York University, the College of the City of New York, Fordham University, all in New York City; Cornell University in Ithaca; Syracuse University, Syracuse; the University of Buffalo, Buffalo; University of Rochester and the Eastman School of Music, Rochester; Hamilton College, Clinton; Union College, Schenectady; Colgate University, Hamilton; St. Lawrence University, Ogdensburg; Hobart College and William Smith College, Geneva; Rennselaer Polytechnic Institute, Troy; Albany State College for Teachers, Albany; Vassar College, Poughkeepsie; Elmira College, the oldest college for women in the United States, Elmira; St. John's College, Brooklyn.

Capital, Albany; Caled the Empire State; State Flower, Rose; Motto: Excelsior (Higher, More Elevated); Area, 49,576 square miles, rank 29th; Population, 13,479,142, rank 1st.

NORTH CAROLINA

The first attempt at colonization in America by English-speaking people was made in North Carolina, when, in 1584-87, under a charter granted to Sir Walter Raleigh by Queen Elizabeth, a colony was begun on Roanoke Island. The settlement was a failure, and later became known as the "Lost Colony."

Immigrants from Virginia made the first permanent settlement about 1650. In 1663, King Charles II granted to eight Lords Proprietors a charter for the territory which now comprises both North and South Carolina. The new colony was called Carolina (from the Latin version *Carolus* of his own name). In 1669 John Locke wrote the Fundamental Constitutions as a model for the government of Carolina. They were adopted by the Lords Proprietors who directed the governor to put them into operation. In 1670 there were four precincts, later changed to counties, and called Pasquotank, Perquimans, Chowan and Currituck. North Carolina has one hundred counties today.

On Dec. 7, 1710, Carolina was divided into North and South Carolina, and on May 12, 1712, Edward Hyde became the first governor of North Carolina. In 1729 seven of the eight Lords Proprietors sold their interest in Carolina to the Crown and North Carolina thereby became a royal colony. George Burrington was the first royal governor.

In 1776, North Carolina instructed her delegates in the Continental Congress to vote for independence from the British crown, and in December of that year she adopted an independent state constitution. North Carolina was the last of the thirteen colonies to enter the Union, doing so in 1789 after demanding a clause guaranteeing religious freedom before ratifying the constitution.

During the Civil War, North Carolina seceded from the Union and her losses in dead and wounded surpassed those of any other state in the Civil War. She was readmitted to the Union in July, 1868.

The state has had two capitals, New Bern and Raleigh. The present capitol building in Raleigh was completed in 1840, after the preceding one had been destroyed by fire.

In 1790, the state ceded her extensive western lands to the federal government, and in 1796 they entered the Union as the state of Tennessee.

Economics and Geography

North Carolina is bounded on the north by Virginia, on the east by the Atlantic Ocean, on the south by South Carolina, Georgia and the Atlantic Ocean, and on the west by South Carolina and Tennessee. The state is divided into three topographical areas, each quite distinct. One is the flat coastal area, the second the central Piedmont area, which attains an elevation of about one thousand feet, and from which the Blue Ridge Mountains rise, and the third the Appalachian Mountains. Geologists consider the mountains in western North Carolina to be the oldest on the continent. Mount Mitchell, (6,684 feet) is the tallest peak east of the Mississippi River.

Part of the Great Smoky National Park is found in the northwestern portion of the state. The park is noted for the beauty of the Great Smoky Mountains which traverse it, and for its acres of virgin hardwoods, especially red spruce, the largest stand of that tree on the continent.

North Carolina is primarily an agricultural state, raising cotton, corn, hay, potatoes, peanuts and soya beans. The state ranks third in the nation in the value of its farm crops.

The state leads in production of tobacco and grows 70 percent of all the leaf cigarette crop produced in the United States.

Many minerals are found in the state, chiefly clay products, mica, barytes, kyanite, talc, kaolin, coal, feldspar, zircon, columbite, allamite and wolframite.

In Charlotte, N. C., on May 20, 1775, was signed the first American Declaration of Independence, antedating by more than a year the national Declaration.

The state has many famous resort cities, including Asheville, Pinehurst, Southern Pines and Tryon. A Cherokee Indian Reservation is located in the Great Smoky area.

Educational Institutions

North Carolina has 17 institutions of higher education. The University of North Carolina, at Chapel Hill, was the first in the country to have three units, the university proper, the State College for Women in Greensboro, and the College of Agriculture and Engineering in Raleigh. Duke University is located in Durham; Davidson College at Davidson; Guilford College in Guilford; Meredith College in Raleigh; Wake Forest College in Wake Forest. There are five state Teachers' Colleges, 12 Negro, 19 junior colleges.

Capital, Raleigh; Called the Tar Heel State, or the Old North State; State Flower, Dogwood; Motto: Esse Quam Videri (To Be Rather Than To Seem); Area, 52,712 square miles, rank 27th; Population, 3,571,623, rank, 11th.

NORTH DAKOTA

North Dakota's modern history begins at the end of the 18th century, when the territory now comprising that state was visited by Hudson Bay Company traders. The same land was part of the region ceded by France to the United States in the Louisiana Purchase of 1803. It was successively a part of the District of Louisiana, of the Louisiana Territory, the Missouri Territory, the Territory of Michigan, the Territory of Wisconsin, the Territory of Iowa and the Territory of Minnesota. On March 2, 1861, the Dakota territory was organized, with the capital at Yankton. The name Dakota, taken from the Sioux language, means "confederation of tribes."

Three centuries ago, Indian tribes including the Mandans, Arikara and others, had a civilization along the Missouri River in what is now North Dakota. In the early 18th century, Spanish traders from New Mexico had outposts in Dakota, and later in the same century, French traders, trappers and adventurers joined with the Sioux Indians to drive away the other Indian tribes. The Hudson's Bay Company, established there by the middle of the century, encouraged the French and the Sioux. North Dakota gradually became a part of the theater where the English, French, Spanish and Americans fought for control of the Northwest.

During the winter of 1804-1805, the Lewis and Clark expedition entered North Dakota territory and found among the Hidatsa Indians the Indian girl Sakakawea ("bird woman") who guided the expedition over a treacherous pass in the Rocky Mountains. Her statue now stands on the state capitol grounds at Bismarck.

Other explorers who followed Lewis and Clark into this area were Bradbury and Breckenridge in 1811; Catlin and Maximilian in 1832; and John Fremont in 1839.

In the early 1860's, North Dakota was the scene of many wars between the Indians and the white settlers. Previously, the discovery of gold in California and Idaho and Montana brought thousands of people through Dakota. Many saw opportunity in its fertile prairies and stayed. In the 1870's, these settlers suffered from famines and grasshopper plagues. The building of the Northern Pacific Railroad in 1873, however, brought many other settlers to the state. A gold rush to the Black Hills section in 1874 was caused by a statement from Custer that there was "gold in the grass roots". The resulting influx of white men was a violation of the treaty of 1868 with the Sioux, who had been promised the territory west of the Missouri River. The result was the Battle of the Little Big Horn, June 25, 1876, when Custer and his command were annihilated. White settlement continued, however, and Indian supremacy was gradually overcome.

The capitol of the Dakotas was at Yankton until 1883 when it was moved to Bismarck where it remained until formation of the two states, North and South Dakota, in 1889. Bismarck is now the capitol of North Dakota and the first session of the legislature of that state was held in Bismarck on November 19, 1889.

Geography and Economics

North Dakota is a West North-Central State and lies between latitudes 45°56' and 49° North, and longitudes 96°32' and 104°3' West. It is bounded on the north by the Dominion of Canada, on the east by Minnesota; on the west by Montana; and on the south by South Dakota. The state runs 360 miles from east to west and 210 miles north to south. Its area is 70,837 square miles, of which 654 are water surface. It ranks 16th among the states in area.

The geographic center of North America is in Pierce County, N. D.

North Dakota is famous for its wheat production. "Number One Northern Hard" wheat originated there and is one of the finest grades of that cereal. The state also produces rye, durum wheat, flaxseed, potatoes, wild hay, oats, barley and corn. The western part of the state produces lignite coal and manufactures briquettes and other lignite products. Fine clays are also found in the western part of the state, and pottery is manufactured there.

The section called the "Bad Lands" in the western part of the state was so-called because the Indians found them "bad lands to travel through". This area has been made accessible now with good roads and is popular with vacationists. When Theodore Roosevelt was a rancher he made his headquarters in that area, and his cabin now stands on the capitol grounds in Bismarck.

The Turtle Mountains of North Dakota are noted for a variety of song birds. A joint American-Canadian Commission has set aside three thousand acres on the northern border of these high hills for a Peace Garden commemorating the years of peace between the two countries.

Educational Institutions

The University of North Dakota is located in Grand Forks; North Dakota Agricultural College is in Fargo; Jamestown College is located in Jamestown.

The State Historical Building in Bismarck

contains a large Indian collection, as well as displays of state wildlife and of pioneer equipment. The library in the same building has the largest known collection of reference material on the state and on the Northwest in general.

Capital, Bismarck; Called the Sioux State; State Flower, the Wild Prairie Rose; Motto, Liberty and Union, One and Inseparable, Now and Forever; Area, 70,665 sq. mi., rank, 16th; Population, 641,935, rank, 39th.

OHIO

Ohio, together with Michigan, Indiana, Illinois, Wisconsin, and part of Minnesota, formed the Northwest Territory which was won for the United States during the Revolutionary War by George Rogers Clark. Previously, the area had been claimed by both France and England as the result of explorations there by their nationals. After the Seven Years' War between the two powers, England secured the entire region and annexed it to the province of Quebec in Canada. This act displeased the colonies, which felt that the region should belong to them, and they secured it as a result of the War of Independence.

During the period when Ohio belonged to the Northwest Territory, the capital was moved several times, being successively at Marietta, which was founded in 1788 and is the oldest permanent settlement in the state; at Cincinnati; at Chillicothe, and at Zanesville. In the early part of the 19th century a commission was appointed to select a permanent capital not more than 40 miles from the center of the state. As a result, the capital city of Columbus was laid out and became the capital of Ohio in 1817. Ohio had been admitted to the Union as a separate state in 1803.

In Ohio have been found many evidences of the existence of prehistoric man. These traces are found especially in the works of the prehistoric Mound Builders, who once inhabited the region from the Great Lakes to the Gulf of Mexico.

Ohio was the scene of action during the War of 1812, the outstanding event occurring there being the victory of Commodore Perry on Lake Erie in 1813.

Ohio is sometimes called the State of Presidents, because it has given the nation five leaders. It is frequently considered a key state in national elections.

Geography and Economics

Ohio is bounded on the north by Michigan and Lake Erie; on the east by Pennsylvania and West Virginia; on the south by West Virginia and Kentucky; on the west by Indiana. The general surface of the state is that of a plateau about one thousand feet above sea level. A divide which separates the drainage of Lake Erie from that of the Ohio River passes diagonally across the state, at a height of about 600 feet above the lake. The state has an undulating surface as the result of small valleys cut by rivers and lakes, and as a result agriculture of all types flourishes. Corn, oats, winter wheat, potatoes, hay, tobacco and grapes are principal crops.

Ohio has navigable waterways which include the 430-mile length of the Ohio River, 230 miles of lake frontage, and 100 miles up the Muskingum River in the southeast. Rail transportation is very heavy, in all directions. Ohio produces more lime than any other state in the Union. Other minerals found there are coal, iron, petroleum, gyp-

sum and salt. Cleveland on Lake Erie is the heaviest handler of iron ore in the world.

The manufacture of rubber tires, motor vehicles and parts for automobiles is extensive.

Educational Institutions

Ohio has 43 institutions of higher education, including the Ohio University at Athens; Ohio State University, Columbus; Cincinnati University, Cincinnati; Ohio Wesleyan University, Delaware; Western Reserve University, Cleveland; Oberlin College, Oberlin; Miami University, Oxford; Akron University, Akron; Wittenburg College, Springfield; Toledo University, Toledo. Oberlin College was the first in the world to admit women on equal terms with men, and the first in this country to admit Negroes on equal terms with whites.

Wilberforce University is solely for Negroes. In addition, there are two State Teachers' Colleges, and three Junior Colleges.

Capital, Columbus; Called the Buckeye State; State Flower, Scarlet Carnation; Motto: None Imperium in Imperio (A Government Within a Government) was adopted in 1866 and repealed in 1868; Area, 41,222 square miles, rank, 34th; Population, 6,997,612, rank 4th.

OKLAHOMA

The present state of Oklahoma was established in 1834 as the Indian Territory, to provide a home for the Cherokee, Creek, Choctaw, Chickasaw and Seminole Indian tribes. Excepted from this area were the present counties of Beaver, Texas and Cimarron. White people were barred as settlers from the Indian Territory, and many Indians from other sections of the country migrated there. In 1889, by virtue of payment by the government to the Indians of a large sum of money, the clause barring white settlers from the area was rescinded and the territory was thrown open to white settlers. More than 50,000 persons entered in one day.

In 1890 the portion of Indian territory open to the whites, and the three counties of Beaver, Texas and Cimarron were combined into Oklahoma Territory, and in 1898 the Curtis Act was passed, providing for an individual allotment of land to the Indians of the Indian Territory, and for a government for them administered from Washington. When the allotments had been made, in 1906, Oklahoma and the Indian Territory applied for admission to the Union as one state, and it was admitted on November 16, 1907. Today the state has 27 Indian reservations on which more than one-fifth of the Indian population of the United States lives. The Indians still carry on many of their ancient dances and festivals.

Geography and Economics

Oklahoma is bounded on the north by Kansas, on the east by Arkansas and Missouri, on the south and west by Texas. In the west, the surface is a vast, rolling, treeless plain, but in the east are the forest areas of the Chautauqua, Wichita and Ozark Mountains. The Arkansas and Red Rivers are navigable for boats of light draft. Most of the soil is a dark red loam. The state is primarily agricultural and leads in production of broom corn. Other crops are corn, wheat, oats, grain, sorghums, potatoes, hay, fruits and cotton.

Petroleum was found in Oklahoma at the beginning of this century, and oil found on lands owned by the Indians made many of

them wealthy. For a time Oklahoma ranked first in the nation in production of oil. Since 1933, Texas, California, and Illinois have ranked higher.

The leading industry is petroleum refining. There are also zinc smelters and refineries, lead and natural gas industries, flour mills, cotton seed oil, cake and meal factories.

The Great Salt Plains of northwest Oklahoma are believed to have been left when a prehistoric inland sea drained away. They consist of a level white salt plain six by eight miles in size. A new federal dam is planned across the Great Salt Plain and the region will be used as a wild game refuge. Many visitors come to Oklahoma for quail, deer, turkey and waterfowl hunting. In the central part of the state are found many mineral wells which are visited by people suffering from rheumatism and arthritis. The mountain areas offer beautiful scenery and camping facilities.

Educational Institutions

The University of Oklahoma is located at Norman; Oklahoma Agricultural and Mechanical College at Stillwater. There is also Langston University for Negroes, in addition to six Teachers' Colleges and 21 junior colleges.

Capital, Oklahoma City; Called the Sooner State; State Flower, Mistletoe; Motto: Labor Omnia Vincit (Labor Conquers All Things); Area, 69,919 square miles, rank, 17th; Population, 2,336,434, rank 22nd.

OREGON

In the sixteenth and seventeenth centuries the coast of Oregon was visited by several English and Spanish explorers. The earliest of these, as far as is known, was Sir Francis Drake, who, in 1579 took possession of the area in the name of Queen Elizabeth and called it New Albion. In 1792 Captain Robert Gray sailed into the mouth of the river later named for his ship, the Columbia. More thorough exploration of the Oregon territory was made in 1803 by the Lewis and Clark expedition. In 1811 a trading post was established by John Jacob Astor, pioneer fur trader, at a spot named Astoria.

Great Britain and the United States disputed for many years the territory between latitudes 40 degrees and 54 degrees, 40' north. A treaty signed in 1846 finally decided the claim. Oregon Territory was then organized in 1849 and was admitted as a state in 1859.

Geography and Economics

Oregon is bounded on the north by Washington, on the east by Idaho, on the south by Nevada and California and on the west by the Pacific Ocean. The Cascade Mountains divide the state unequally. East of the range the surface of the state is undulating table land with high hills and deep canyons. The Willamette Valley lies between the Cascades and the Coast Range, and is exceedingly fertile throughout its entire length of 150 miles. From the coast range westward the surface is mountainous and broken.

The fruit-growing industry is the most important in the state, which is especially noted for its fine apples, shipped to eastern markets. The state also does much dairying, wool-growing and stock-raising and grows winter wheat, fliberts, barley, oats and hay. Prune growing and drying is also an important industry. Oregon has immense stands of timber and furniture manufacture

is a sizeable industry. The lumber cut averages more than three billion feet annually.

The salmon fisheries at the mouth of the Columbia River are among the greatest in the world.

Gold, silver and copper are found in the state, as well as lead, oil, quicksilver, iron ore, platinum and clay.

Several large irrigation projects have been started in the arid land at the southeastern part of the state. The Owyhee Dam is one of the largest in the world and provides water for more than 100,000 acres of land near the Idaho border. The Bonneville Dam is a gigantic power and navigation project situated on the Columbia River at Bonneville, near Portland.

The Columbia River on the north carries tonnage along its entire 400 miles from the Idaho line and makes one of the finest harbors in the world at the spot where it flows into the Pacific. The Snake River on the east also carries much traffic.

In scenic beauty, Oregon ranks near the top of all the United States. The famous Columbia Highway, Crater Lake, Mount Hood, 11,245 feet and the highest spot in the state, are the mecca of tourists.

Educational Institutions

The University of Oregon is located at Eugene; Oregon State College at Corvallis; Reed College in Portland. There are eight other state institutions of higher learning, and two junior colleges.

Capital, Salem; Called the Beaver State; State Flower, Oregon Grape; Motto: The Union; Area, 96,981 square miles, rank ninth; Population, 1,089,684, rank 34th.

PENNSYLVANIA

The Commonwealth of Pennsylvania was one of the original thirteen colonies and was named in honor of Admiral William Penn, father of William Penn, founder of the province. Charles II gave a charter for the territory in 1681 to William Penn, a member of the Society of Friends, for land in America to be called Pennsylvania, meaning Penn's Woods. The grant was made to settle a debt of 16,000 pounds which King Charles and the British Government owed Admiral Penn.

The first General Assembly of the province was held at Chester, Pa., Dec. 4, 1682. After Penn extended an invitation to Europeans to come to his province and enjoy personal freedom, many English, Scotch, Irish, German, Dutch, Welsh, French and Swedish settled in the area, principally in the lower valley of the Delaware River. The term "Commonwealth" was applied to the province and "General Assembly" to the law-making body of the Commonwealth.

The Commonwealth of Penn grew rapidly because of the policy of religious and political tolerance which always characterized it. It became the most prosperous and populous of all the thirteen colonies. Philadelphia, its capital, was the largest and most important of all the provincial capitals. Benjamin Franklin, one of the leading Americans of Colonial days was closely associated with the colony. Other champions of civil rights and liberties in Pennsylvania were John Dickinson, James Wilson, Thomas McKean, and Benjamin Rush. Military leaders who came from there were Mad Anthony Wayne, Arthur St. Clair, Thomas Mifflin, and others. The Continental Congress met in Philadelphia and the Declaration of Independence was framed in that city. The Articles of Confederation

were adopted while Congress was sitting in York, Pa.

From the Revolution to the present time, Pennsylvania has continued to be one of the most important states in the Union. It has contributed one President, James Buchanan, to the country, and hundreds of leaders in every walk of life.

Philadelphia was the seat of the Federal Government from 1776 until 1800, except for a brief period in 1789-90.

The state bore a heavy part in the Civil War, and is the site of the Gettysburg Battlefield, mecca annually for thousands of visitors. A large portion of Pennsylvania farmers are of German descent and are referred to as "Pennsylvania Dutch".

Geography and Economics

Pennsylvania is bordered on the north by Lake Erie and New York; on the east by New York and New Jersey, on the south by Delaware, Maryland and West Virginia, and on the west by West Virginia and Ohio. The state at one time had boundary disputes with neighboring states, that with Maryland being settled by establishment of the Mason-Dixon Line in 1763-69. An argument with the state of Connecticut over the Wyoming Valley was settled in favor of Pennsylvania in 1782.

The state has level lands to the east and mountain ranges in the central and western parts—the Poconos and the Appalachian Range. Its important rivers are the Susquehanna, the Delaware, the Alleghany, the Monongahela, which unite at Pittsburgh to form the Ohio.

Pennsylvania is of enormous importance to the industrial life of the nation. It produces about half the steel of the country. Electrical supplies are manufactured in large quantity. Pittsburgh is one of the greatest metal production centers in the country.

At Scranton and Wilkes-Barre are the largest hard coal mines in the country. The state produces about one hundred million tons of bituminous coal and fifty million tons of anthracite annually, petroleum, iron ore, pig iron, steel for rails, steel for structural purposes, lime and slate.

In the agricultural field, Pennsylvania produces winter wheat, rye, oats, corn, potatoes, tobacco, apples, peaches, pears and grapes. It leads in the production of buckwheat.

The state has many miles of forest preserves, and its mountain areas are popular as summer and winter resorts.

The state is drained by the Delaware River in the east, the Susquehanna in the middle, and the Ohio in the west. Water surface covers 294 square miles.

Educational Institutions

The University of Pennsylvania in Philadelphia was founded in 1740; Washington and Jefferson College is in Washington, Pa.; Pennsylvania State College at State College; University of Pittsburgh and Carnegie Institute of Technology in Pittsburgh; Lafayette College in Easton; Lehigh University at Bethlehem; Temple University, Philadelphia; Bucknell University, Lewisburg; Dickinson College, Carlisle; Franklin and Marshall College, Lancaster; Alleghany College, Meadville; Duquesne College, Pittsburgh; Grove City College, Grove City; Haverford College, Haverford; Swarthmore College, Swarthmore; Bryn Mawr College, Bryn Mawr; Wilson College, Chambersburg. There are 13 state Teachers' Colleges, seven junior colleges, two colleges for Negroes.

Capital, Harrisburg; Called the Keystone State; State Flower, Mountain Laurel; Motto: Virtue, Liberty and Independence; Area, 45,333 square miles, rank 32nd; Population, 9,900,180, rank 2nd.

RHODE ISLAND

Rhode Island, one of the original thirteen colonies, was founded in 1640, when previous settlements at Providence and at Portsmouth, on the island of Aquidneck, were consolidated under one government. The name "Rhode Island" was taken after Aquidneck's name was changed, in 1644, to the Isle of Rhodes. The first settlement in the territory of Rhode Island was made in 1636 by Roger Williams who fled to the Narragansett Bay area and founded Providence after he had been banished from Massachusetts because of his religious beliefs. In 1644 a Parliamentary Charter was granted to Providence, Portsmouth and Newport, which then incorporated under the title, "Incorporation of Providence Plantations in the Narragansett Bay in New England." Actual union of the towns was prevented by the Massachusetts Bay and Plymouth Colonies until 1647. In 1663, King Charles II granted a charter to the "English Colony of Rhode Island and Providence Plantations", and in 1664 the Seal of the Colony was established. The official name of the State has remained "The State of Rhode Island and Providence Plantations."

The General Assembly of Rhode Island withdrew allegiance from the British King and Parliament in 1776, four months before the signing of the Declaration of Independence.

Geography and Economics

Rhode Island is the smallest state in the union in area, but has the densest population. Its area is 1,067 square miles, and its population 713,346. Massachusetts bounds it on the north and east, the Atlantic Ocean on the south and Connecticut on the west. It is an industrial state, with many textile mills and jewelry factories. It exceeds all other states in per capita industrial output, with a population 91.6 percent urban.

The state is perhaps best known as a vacation resort and summer playground, especially for the very wealthy, whose magnificent estates in Newport have been show places since the 1890's.

Rhode Island is only 48 miles long at its longest point and its greatest width is 37 miles. Its coastline extends about 400 miles. Its most elevated section is in the north and its highest point is Durfee Hill, 805 feet.

In the southern part of the state, mild climate and fertile soil combine to make dairy and stock farms, orchards and truck gardens profitable.

Narragansett Bay, with its tributaries, extends through the state, and has about one-fifth the state's area on its east side, and about four-fifths on its west. As a result of its proximity to the ocean and the Gulf Stream, Rhode Island has the mildest climate of the New England states. It is noted for its beautiful trees and its abundance of flowering dogwood and rhododendron.

Rhode Island was the last state of the union to ratify the Federal Constitution, not doing so until 1790.

Educational Institutions

Rhode Island is the home of Brown University, Rhode Island State College,

Rhode Island College of Education, Providence College, and two state teachers' colleges.

The Naval War College is located at Newport.

Capitol, Providence; Called Little Rhody; State Flower, Violet; Motto, Hope; State Tree, Maple; State Bird, Bobwhite; Area, including water, 1,300 square miles, rank, 48th; Population, 713,346, rank, 36th.

SOUTH CAROLINA

The first English settlement in South Carolina was made in 1670 and Charleston was founded in 1680. Until 1729, when it became a separate colony, South Carolina, with North Carolina formed one large colony.

South Carolina was the scene of many Revolutionary battles and in 1780-81 was held by the British.

It was the foremost advocate of secession in the years before the Civil War, and was the first state to secede, doing so on Dec. 20, 1860. It opened the warfare by the bombardment of Fort Sumter on April 12, 1861. The state suffered severely during the war. It was readmitted to the Union in 1868.

Geography and Economics

South Carolina is bounded on the north by North Carolina; on the east by North Carolina and the Atlantic Ocean; on the southeast by the Atlantic Ocean; on the west by Georgia.

The Blue Ridge Mountains are situated in the western part of the state, and the land toward the coast is a wide, flat, sandy belt. The state has several harbors, the chief one being Charleston, an important shipping center.

The state is chiefly agricultural, with cotton the principal crop. Others are corn, tobacco, hay, oats, sweet potatoes, and peanuts.

Its forests supply yellow pine, from which turpentine is derived in large quantities.

Minerals found in South Carolina are phosphate rock, granite, clay products, gold, silver, manganese, iron ore and lime.

With a mild climate, South Carolina serves as a year-round resort for vacationists. Aiken and Camden are well known resort towns.

Educational Institutions

The University of South Carolina is in Columbia. Clemson Agricultural College and Presbyterian College are other important institutions of higher education. The state has four junior colleges and 12 Negro colleges.

Capital, Columbia; Called the Palmetto State; State Flower, Yellow Jessamine; Motto: Dum Spiro, Spero (While I Breathe, I Hope); also, Animus Opibusque Parati (Prepared in Spirit and Wealth); Area, 31,055 square miles, rank 39th; Population, 1,899,804, rank 26th.

SOUTH DAKOTA

South Dakota belonged originally to the District of Louisiana, and later to the Territories of Louisiana, Wisconsin, Iowa and Minnesota. The western section of the state was at one time a part of the Territory of Nebraska. The Territory of the Dakotas was created in 1861, and included the present states of North and South Dakota, and parts of Wyoming and Montana. In 1882 the Dakotas were given their present limits. In 1887 the territory was divided into the two

states and both were admitted to the Union in 1889.

Economics and Geography

South Dakota is bounded on the north by North Dakota, on the east by Minnesota and Iowa, on the south by Nebraska, and on the west by Wyoming and Montana. The Missouri River divides the state nearly in half.

The state has many fertile plains which produce corn, wheat, oats, rye, barley, flaxseed and fruits, although rainfall is light. Raising of livestock is one of the main industries, which include meat packing, butter and cheese making, and flour milling.

The Black Hills are located in the southwestern part of the state. They have large stands of timber, mainly yellow pine and spruce. Harney Peak in the Black Hills is 7,242 feet high, and is the highest point in the United States east of the Rockies. Near the Black Hills are located the Bad Lands, vast waste spaces, in which is found Big Stone Lake, the lowest point in the United States east of the Rockies.

Mount Rushmore in the Black Hills is 6,200 feet high and is noted for the sculptured figures on its granite face of Washington, Jefferson, Lincoln and Theodore Roosevelt.

Gold and silver are found in many parts of the Black Hills, and the largest gold-producing mine in the United States is at Lead, S. D. Other minerals found in the state are feldspar, lithium, lignite, bentonite, stone and clay.

The state has a number of large Indian reservations.

The Bad Lands cover an area of about one million acres in which many fossil deposits have been found, indicating the presence of prehistoric life.

The Black Hills are a favorite summer vacation spot.

Educational Institutions

The University of South Dakota is at Vermillion; South Dakota State College at Brookings; South Dakota School of Mines at Rapid City; and there are also four teachers' colleges and five junior colleges.

Capital, Pierre; Called the Coyote State; State Flower, the Pasque; Motto: I Lead; Area, 77,047 square miles, rank, 15th; Population, 642,961, rank 38th.

TENNESSEE

Tennessee is one of the East-South Central States of the Union. It lies between latitudes 35° and 36°39' North, and longitudes 81°37' and 90°28' West. Its northern boundaries are Kentucky and Virginia; its eastern boundary North Carolina; its southern boundary Georgia, Alabama and Mississippi; and its western boundaries Arkansas and Missouri. The state extends 400 miles from east to west and 120 miles north and south. It ranks 34th in areas among the United States, with 42,022 square miles, of which 335 are water surface.

History

Tennessee was a part of the grant of land from England to Sir Walter Raleigh in 1584, and in the Stuart grants in 1663. The region was claimed in early times by the state of North Carolina, which, in 1784, ceded to the United States all the territory which is now the state of Tennessee. The cession was not to take effect until Congress signified its intention of accepting it within two years. In the meantime dissension arose among the

inhabitants of the occupied territory on the grounds that North Carolina had made no provision for the government of her western territory and there was fear that the United States would not do so. The people therefore devised a government of their own, calling themselves the state of Franklin (or Frankland). However, the state was never strong, and after a stormy career of three years it ceased to exist.

Tennessee was admitted to the Union as a state in 1796. It seceded June 8, 1861 and, next to Virginia, was the chief battleground of the Civil War. Among the stirring events of the period were the capture of Fort Henry and Fort Donelson and of Island No. 10, the battles of Shiloh, Memphis, Murfreesboro, Lookout Mountain and Chickamauga; the relief of Chattanooga and Knoxville; and the battles of Franklin and Nashville.

The state was readmitted to the Union in 1866, and since 1880 has grown rapidly in wealth, population and industrial development.

Geography and Economics

The Great Smoky Mountains are located in the eastern part of the state, and the state's surface slopes towards the west, to an elevated tableland and then to the Mississippi River, which skirts the western border. The Tennessee River flows into Alabama from the northeast and returns to flow north through Tennessee and Kentucky into the Ohio.

With forests covering about 30,000 square miles, the state has a huge annual yield of lumber—oak, yellow pine, gum, yellow poplar, hemlock and chestnut.

The state produces coal, iron-ore, copper, zinc, gold, silver, clay products, phosphate rocks, sandstone, marble and limestone. Agriculture is an important industry as well, and the leading crop is corn. Others are wheat, oats, hay, potatoes, sweet potatoes, peas, peanuts and cotton.

Points of Interest

Tennessee has three of the nation's outstanding wonders, Reelfoot Lake, the reservoir basin of the Mississippi River, formed by an earthquake in 1811; Lookout Mountain, a rock-faced promontory carved by the currents of the Tennessee River and overlooking Moccasin Bend at Chattanooga; and the Great Smoky Mountain National Park which is divided between North Carolina and Tennessee. Norris Dam, 27 miles north of Knoxville, on the Clinch River, creates a large lake, covering more than 80 square miles, with a shoreline in excess of 800 miles.

One of America's most unusual sports events is held annually in November at Tellico Plains where hunters gather to attempt to bag the wild Prussian boars that roam the Tennessee mountains in Cherokee National Forest. The boars are descendants of wild boars from the Black Forest of northern Germany which were imported many years ago.

Educational Institutions

Tennessee has 23 institutions of higher education, including the University of Chattanooga; the University of Tennessee in Knoxville; Vanderbilt University, Nashville; Cumberland University, Lebanon; University of the South, Seawane; Maryville College, Maryville; George Peabody College for Teachers, Nashville; Carson-Newman College, Jefferson City; Southwestern, Memphis; Scarritt College for Christian Workers, Nashville; East Tennessee State College, Johnson City; Middle

Tennessee State College, Murfreesboro; Memphis State College, Memphis; Tennessee Polytechnic Institute, Cookeville. Among the eight Negro colleges in the state is Fiske University, Nashville. There are also five State Teachers Colleges and nine Junior Colleges.

The TVA

The Tennessee Valley Authority was set up by Congress in 1933 to promote navigation and control floods on the Tennessee River, to generate power and to aid in the national defense. To accomplish these objectives, four dams have been built across the Tennessee River and its tributaries, creating a chain of lakes with a minimum nine-foot channel on the Tennessee River extending from the Ohio River to Knoxville, a distance of 652 miles. To prevent these reservoirs from filling with silt, a gigantic project of reforestation and soil erosion control has also been carried out. As a result, tremendous benefits have accrued to the timber and agricultural interests of Tennessee, and, at the same time, the inexpensive electricity generated at the dam is providing an abundance of power for manufacturing.

Creation of the lakes has also provided fishing grounds and place for pleasure boats, as well as sites for recreational parks and because of this factor, recreation, a TVA by-product, has become a large industry in Tennessee. When the TVA project is completed, there will be over 400,000 acres of T.V.A. waters in the state. The T.V.A. is also engaged in other activities, including experiments to produce better fertilizers and to test and assess the value of T.V.A. phosphate. In some counties, T.V.A. has provided county agents to assist the farmers. Attention is also given to the wildlife resources of the reservoirs and surrounding areas. Large fish hatcheries are operated and fish are released in the lakes and tributary streams.

TEXAS

The state of Texas belongs to the West South-Central group and lies between latitudes 25°51' and 36°31' N., and longitudes 93°40' and 106°30' W. The state is bounded on the north by New Mexico, Oklahoma and Arkansas; on the East by Oklahoma, Arkansas and Louisiana; on the South by Mexico and the Gulf of Mexico; on the West by Mexico and New Mexico. With a gross area of 265,896 square miles, of which 3,498 square miles are water surface, Texas is the largest state in the union. It ranks sixth in population, with 6,414,824 people residing within its borders.

History

Texas was first settled in 1685 by the French explorer Sieur La Salle. After he was murdered in 1687, the Spanish assumed control over the territory and in the 18th century, many Spanish missions were established. In the early 19th century, Texas formed a state with Mexico, but between 1820-1830 American colonists settled there. Many of these colonists came from the southern states and brought their slaves with them. In 1835, a rebellion against Mexico broke out, and the next year, within the walls of the Alamo, a mission founded in San Antonio by the Franciscan monks in 1718, 187 heroes gave their lives in a hopeless stand against Santa Anna and his army of 6,000 Mexicans. The Mexicans were finally defeated by Sam Houston and his men at San Jacinto April 21, 1836.

From 1836-1845, Texas was an independent republic, but in 1845, by joint resolution of Congress, Texas was admitted to the union. Under terms of this resolution, Texas may subdivide its area into any number not exceeding four additional states of convenient size, having sufficient population, which shall be entitled to admission into the union. In 1945-46 Texas plans to celebrate the centennial of her admission as the 28th state in the union. Plans for the celebration are under direction of A. Garland Adair, curator of history in the Texas Memorial Museum, and chairman of the Statehood Commission organized by the 47th Texas Legislature.

By terms of the treaty ending the war between Texas and Mexico, the Rio Grande River became the boundary between Texas and Mexico.

As one of the slave states during the Civil War, Texas seceded in 1864 and the last battle of the war was fought at Palmito, near Palo Alto, May 13, 1865, a month after the surrender at Appomattox.

Geography and Economics

Texas is mountainous in the western part, with great plains in the northwest, prairie in the central part, and a low-lying region near the Gulf. The "Panhandle" is the northern tip of the state, so called because it looks on the map like the handle of a frying pan. Western Texas is unforested, but in the eastern area of the state there is a wooded region. Trees native to Texas are: ash, basswood, bay, beech, birch, bois d'arc, catalpa, cats' claw, cedar, cherry, chinquapin, corkwood, cottonwood, chinaberry, cypress, dogwood, elm, fir, gum, gum elastic, hackberry, hawthorn, hickory, holly, hop hornbean, huckleberry, ironwood, locust, maple, magnolia, mesquite, mimosa, mulberry, oak (50 species), pine (8 species), pecan (State tree), persimmon, planer tree, swamp privet, redbud, sycamore, Texas ebony, walnut, wild China, willow, youpon, Mexican or wild plum.

Chief Products

The chief fruit grown in Texas is the peach. Others are apples, cantaloupes, citrus fruits, dates, figs, strawberries, blackberries.

Texas leads the union in the production of cotton and in the total number of head of domestic animals on farms and ranches. It also has a huge output of petroleum. Texas ranks first in the beef cattle industry and in the number of sheep and the average annual production of wool. It also has more mules and horses than any other state.

The state has a large yield of coal, sulphur, natural gas, gypsum, granite, sandstone, limestone, silver and potash. Amarillo is the chief source in the country for helium gas.

Largest farm crops in Texas are, in addition to cotton, corn, wheat, oats sorghum, potatoes, rice, tomatoes, peanuts, pecans and onions.

The Texas cotton crop is the most valuable crop grown in a single political subdivision in the world, approaching the total value of the production of the gold, silver, lead, zinc and copper mines in the United States. About 50 crops are produced in the state on a commercial scale, and of them cotton represents about 53 per cent of the total crop value of the state. Cotton is produced in 223 Texas counties, leaving only 31 as non-cotton producers.

Diversion of the Rio Grande at the southern end of the coastal belt of the state has created a fertile belt where between 300,000

and 400,000 acres are under intensive cultivation in two counties alone. A wide variety of winter and spring vegetables, and many citrus fruits are grown there.

Because of its position, size and shape, Texas has great variety in its weather. In the southern part, the average annual temperature is 74 degrees; in the North Panhandle, 56 degrees; the average temperature in the middle of the state is 65 degrees. The average rainfall is 31 inches, with vast differences in depth in various parts of the state.

Texas has the tallest highway bridge in the South, the Port Arthur-Orange Bridge. It spans the Neches River on State Highway 87, six miles north of Port Arthur. In Brewster County is the deepest canyon of the Rio Grande, the Santa Helena. Its walls rise perpendicularly 2000 feet.

Galveston, Houston and Beaumont-Port Arthur are the state's leading ports.

Educational Institutions

Among its 24 institutions of higher learning are the University of Texas in Austin; Agricultural and Mechanical College in College Station; State College for Women in Denton; Baylor University, Waco; Texas Christian University, Fort Worth; Southern Methodist University, Dallas; Rice Institute, Houston; Texas Technological College, Lubbock. There are seven State Teachers' Colleges, 12 Negro Colleges and 36 Junior Colleges.

Capital, Austin; Called the Lone Star State; State Flower, the bluebonnet; Motto, Friendship.

UTAH

The state of Utah was first settled permanently in 1847 by Mormon pioneers, but long before that white men were in the region, coming first in 1540 when a detachment of Spanish conquistadores reached the Grand Canyon of the Colorado and is believed to have descended to the brink of the Colorado near the southern rim of Glen Canyon, making them the first white men ever to set foot in what is now Utah. However, the leader of the group, Cardenas, reported to his commander, Coronado, that the area was a desert, and there was no further exploration there until 1776, when a party of Spanish under Father de Escalante and Father Francisco Dominguez entered Utah near the White River, in search of a route to Monterey, Calif.

Later, Spanish trading expeditions came into the region to do business with the Indian tribes, using a route now called "The Old Spanish Trail." One result of this commerce was that slave-trading began when some tribes sold their children to the Spanish.

In 1823 Anglo-American trappers began to come to the northern part of the state for beaver and other pelts. The following year the Great Salt Lake was discovered by Jim Bridger, a trapper who made a solitary voyage down the Bear River to the lake, which he took to be part of the Pacific. Claims for the discovery of the lake have also been made for Etienne Provost, Jedediah Smith and Peter S. Ogden.

The first government explorer to enter Utah was John Charles Fremont, who visited the Great Salt Lake in 1843 and drew maps of that region.

In 1847, the Mormons, under Brigham Young, reached Utah from the Midwest where they had been persecuted and driven out. The sect settled in the state and their

Church of the Latter Day Saints now claims three-fourths of all church membership in Utah. Salt Lake City, the state capital, is the site of the famous Temple and Tabernacle of the church.

Utah was organized as a territory in 1850 and admitted to the Union as a state in 1896.

Geography and Economics

The state is noted for its great desert area in the northwest, called the "Great American Desert," and for its magnificent canyons in the Southwest. In Zion and Bryce National Parks are found unusual erosional formations, exquisite coloring, and cliff ruins which indicate that prehistoric people once inhabited that region. Canyon walls reveal traces of geologic history for three billion years. Study of the rocks indicates that the region was once covered by an ocean, and was later a vast desert swept by desert winds.

The state belongs to the Mountain group of the Far West. Idaho and Wyoming bound it on the north, Wyoming and Colorado on the east, Arizona on the south, and Nevada on the west.

The Great Salt Lake in the northwest is 4,213 feet above sea level and has no known outlet. Its waters are twenty percent salt. Area of the lake is 2,360 square miles.

The state's chief crop is sugar beets. It also produces fruits, wheat, oats, potatoes, hay, alfalfa, corn, barley and rye. Many sheep, cattle and horses are also raised in Utah.

Utah is famous, too, for the products of its mines, which include copper, silver, gold, lead, petroleum, sulphur, zinc, coal, salt, uranium, vanadium, marble and onyx.

Educational Institutions

The state university is located in Salt Lake City. Brigham Young University is in Provo and the State Agricultural College in Logan. There are also six Junior Colleges.

Capital, Salt Lake City; Called the Beehive State; State Flower, Sego Lily; Motto, Industry; Area, 84,916 square miles, rank, 10th; Population, 550,310, rank, 41st.

VERMONT

Vermont, the only one of the New England states which lies entirely inland, was probably first discovered in 1609 when Samuel de Champlain, French governor of Quebec, discovered the lake named for him and laid claim to the region for France. Later, Massachusetts claimed part of the area and made the first permanent white settlement there in 1724 at Fort Dummer (now Brattleboro).

After 1750, New Hampshire established settlements in the territory and also laid claim to it. By virtue of a charter granted by King Charles II to the Duke of York in 1664, New York also claimed the territory as far as the Connecticut River. King George III had decided the issue among the three states in favor of New York in 1764, but there was such dissension as a result that in 1771 the people in the territory declared their independence and drew up their own constitution. Vermont was admitted to the Union in 1791, the first state added to the original thirteen. Residents of the state, calling themselves the "Green Mountain Boys," fought with distinction in the Revolutionary War. Their forces, under command of Ethan Allen, captured Fort Ticonderoga in 1775. Another important battle of that war was fought at Bennington, Vt., and the site is now marked by the Benning-

ton Monument, tallest battle monument in the world (302 feet.)

In 1805, Montpelier was chosen as state capital, and the state's legislature held its first session there in 1808.

Geography and Economics

Vermont is bounded on the north by Canada, on the east by New Hampshire, on the west by New York and by Lake Champlain, and on the south by Massachusetts. The Green Mountains run through the state from north to south. Lake Champlain, on the west, is the largest body of fresh water east of the Great Lakes. It is more than one hundred miles long and twelve miles wide in some spots.

The highest point in the state is Mt. Mansfield (4,393 feet), from which the White Mountains, the Adirondacks, Lake Champlain, and Mount Royal at Montreal can sometimes be seen.

The state contains more than 400 small lakes and miles of forest parks. As a result, it is a famous vacation spot in all seasons of the year.

The state is primarily a dairy-farming region, with fruit growing and truck-farming also important economically. It produces maple syrup and apples in abundance. Vermont also has many quarries which produce marble, granite, slate and talc. It produces more asbestos than any other state in the union.

Educational Institutions

Among its institutions of higher learning, the state has the University of Vermont, chartered in 1791; Norwich University in Northfield, the oldest military college in the United States, after West Point; Bennington College, Bennington; Middlebury College, Middlebury; St. Michael's College, Winooski; Trinity College in Burlington. There are also two junior colleges and three state normal schools.

Capital, Montpelier; Called the Green Mountain State; State Flower, Red Clover; Motto, Freedom and Unity; Area, 9,528 square miles of which 430 square miles are water; rank in area, 42nd; Population, 359,231, rank, 46th.

VIRGINIA

The first permanent English settlement in North America was made at Jamestown, Va., in 1607. Leader of the settlement was Captain John Smith who headed the government.

Slavery in America began in the Virginia colony in 1619. During the colonial period, Virginia became the most populous and prosperous of all the original thirteen colonies, and took a leading part in the protests against British domination which led to the Revolutionary War. Washington, Jefferson, Patrick Henry, the Lees and Madison were all sons of Virginia. The end of the Revolution came in Virginia with the surrender of Cornwallis at Yorktown in 1781.

In the Civil War, Virginia, a Confederate State, furnished General Robert E. Lee as commander of the rebel armies. The Civil War, too, terminated in Virginia, when Lee surrendered to General Grant at Appomattox Courthouse near Lynchburg in April, 1865.

Virginia has given eight presidents to the Union, and many of their homes are preserved as shrines which thousands of tourists visit annually. Among them are Mount Vernon, Washington's home, on the grounds of which he and his wife are buried; Montpelier.

cello, Jefferson's beautiful estate on a hill above Charlottesville, and on which he and his wife are buried; Wakefield, the birthplace of Washington; and Stratford, Lee's birthplace. Also in Virginia are Arlington National Cemetery, the National Military Parks at Manassas, Fredericksburg, Petersburg and Appomattox; the Colonial National Historical Park, which includes Yorktown, Jamestown Island and part of Williamsburg. Williamsburg, the colonial capital of Virginia, has been restored to its original form by John D. Rockefeller, Jr., and is one of the most picturesque spots in America.

Geography and Economics

Virginia is bounded on the north by West Virginia and Maryland; on the east by Maryland and the Atlantic Ocean; on the south by North Carolina and Tennessee; on the west by West Virginia and Kentucky. Its territory at one time included Illinois, Indiana, Ohio, Kentucky and West Virginia.

Virginia is divided topographically into sections. The Coastal Plain is called the Tidewater, and consists of flat land intersected by tidal estuaries and rivers. The central part of the state is the Piedmont region, in which, between the Alleghany and the Blue Ridge Mountain ranges lies the Shenandoah Valley, one of the most fertile agricultural regions in the country. In Southwest Virginia, a region of mountains and valleys, is the cattle-raising area, and south of the James River a section where cotton and tobacco are raised.

Chief Crops

Chief agricultural crops are tobacco, truck crops, potatoes, sweet potatoes, flaxseed, peanuts, soy beans, apples, wheat, rye, rice, buckwheat, corn, oats, barley, grain sorghums, hay, peaches. From the mountain regions come valuable hardwoods. In Newport News is a large shipbuilding industry and the United States government maintains a navy yard in Hampton Roads.

Many race horses are raised in the Piedmont area, noted for its hunting and racing.

Virginia produces bituminous coal, limestone, cement, clay, feldspar, gold, gypsum, lead, manganese, mica, pyrite, salt, sand, gravel, slate, soapstone, zinc.

Richmond is an important center for cigarette manufacture. Chemical plants are found in the state, and much furniture is made there. Cotton textiles are also manufactured.

Along the ocean front are many popular vacation resorts. The mountain regions, too, attract thousands of visitors.

Virginia was named in honor of Queen Elizabeth, the daughter of Henry VIII, who was called the "Virgin Queen." The name was selected by Sir Walter Raleigh who fitted out the expedition of discovery in 1584.

Educational Institutions

The University of Virginia is in Charlottesville. It was designed and founded by Thomas Jefferson in 1819 and is one of the most beautiful institutions of higher education in the country. Washington and Lee University in Lexington had Robert E Lee as president after the Civil War. The College of William and Mary, founded in 1693, is in Williamsburg; Virginia Polytechnic Institute is in Blacksburg; Virginia Military Institute is in Lexington; Randolph-Macon College in Ashland; Randolph-Macon for Women in Lynchburg; Richmond University in Richmond. There are 11 junior colleges in the state, four State Teachers'

Colleges, six Negro Colleges, including the famous Hampton Institute.

Capital, Richmond; Called the Old Dominion State; State Flower, American Dogwood; Motto: Sic Semper Tyrannis (Thus Always to Tyrants); Area, 40,815 square miles, rank, 35th; Population, 2,677,773, rank, 19th.

WASHINGTON

The first white men to enter the state of Washington were Spaniards who landed at Point Grenville in 1775. Fourteen years later American fur traders, Captain Robert Gray and John Kendrick explored the Northwest coastline, and in 1792 Gray discovered the Columbia River. Between 1803-1806 the Lewis and Clark expedition entered Washington territory via an overland route.

For some time the British, with their large fur trading companies, the Northwest Company and the Hudson's Bay Company, were the only white people living in the territory. A little later, the Pacific Fur Company, headed by John Jacob Astor, conducted operations in the same region.

Although Spain, Russia, France and England at various times laid claim to the country, the right of any nation to the territory was never recognized until 1846, when the boundary between Canada and the United States was established, with the area now comprising Washington going to the U. S. The region was known at that time as the Oregon Territory. White settlers who moved in were harassed by Indians, who were forced eventually to move onto reservations.

Although the California gold rush of 1849 drew many early settlers away from the Northwest, some of them returned soon afterwards, disappointed in their hopes for quick wealth, to settle down to lives of farming or business. Cities sprang up around Puget Sound, Olympia in 1850, Port Townsend in 1851, Bellingham and Seattle in 1852.

Washington was organized as a separate territory in 1853, and in 1889 was admitted to the Union. With the coming of the transcontinental railroads at about the same time, Washington began to develop economically and socially.

Geography and Economics

Washington is bounded on the North by British Columbia; on the east by Idaho; on the south by Oregon; on the west by the Pacific Ocean. The state runs 360 miles east to west and 240 miles north to south. The Puget Sound makes the state a great commercial center, and Seattle is the chief port.

Agriculture is the leading occupation. Washington leads the nation in the production of apples. Other crops are wheat, oats, barley, corn, potatoes, pears, peaches, hops and peas. Sheep and cattle raising is another important industry.

The state has quantities of minerals—coal, gold, silver, lead, mercury and zinc. Clays, granite, sandstone, marble, limestone and cement are also produced in quantity. Antimony, arsenic, tungsten and platinum are found in commercial quantities. Washington also leads in lumber output, with large stands of Douglas fir, white and yellow pine, spruce, larch and cedar. The Cascade Mountains cut through the western part of the state.

Grand Coulee Dam on the Columbia River is a part of the federal Columbia River Reclamation Project, planned to irrigate 1,200,000 acres of land, regulate the river's flow, and generate electric power.

Mount Ranier, the third highest moun-

tain in the continental United States, rises 14,408 feet, 11,000 feet above its base, which covers 100 square miles of territory. It is topped by a huge, inactive volcano.

Educational Institutions

The University of Washington is located at Seattle; State College in Pullman; Gonzaga University in Spokane. There are five teacher and seven junior colleges.

Capital, Olympia; Called the Evergreen State; the Chinook State; State Flower, Rhododendron; Motto: Al-ki (Bye and Bye); Area, 68, 192 square miles, rank, 19th; Population, 1,736,191, rank, 30th.

WEST VIRGINIA

West Virginia has been termed "the most northern southern state, the most eastern western state, the most western eastern state, and the most southern northern state." It became a state in 1863, when it separated from Virginia, whose northern and western counties it had previously been. The West Virginia area had been settled in great part by immigrants from Pennsylvania who were German and Irish. Slavery was unprofitable to them because the country and the climate were rugged and the soil rocky and difficult to cultivate. Social conditions between these people and the more leisured classes of Virginia proper were so great that at the outbreak of the Civil War, West Virginia remained loyal to the federal government, and in 1863 was admitted as a separate state.

The first engagement of the Civil War took place on West Virginia soil, at Philippi on June 3, 1861. The state has always played an important role in wars. The French and Indian wars grew out of the conflicts between early French and English settlers in the area. West Virginians fought with great distinction in the Revolution, though at the same time they were fighting the British, they were also holding the Indians at bay at their back door. Later the Indian wars were fought there, with General Anthony Wayne finally conquering at the Battle of Fallen Timbers in 1794. In that same year, hundreds of men from the western Virginia area took part in the Whiskey Rebellion. In the war of 1812, settlers crossed the state to defend Norfolk. West Virginians also volunteered for service in the War with Mexico.

It is a mountainous state, with several spurs of the Appalachian Mountains. Land on the west drains down to the Ohio River, on the east, via the Potomac, into the Atlantic Ocean. It is the largest soft coal producing state in the union, and also produces quantities of petroleum, natural gas, iron ore, iron and steel products, glass and glassware, chemicals and chemical products. The Kanawha Valley is considered one of the most important chemical centers in the country. With the sole exception of Arkansas, West Virginia produces more hardwood than any other state, her timber wealth including yellow poplar, oak, spruce, ash, birch, walnut and hemlock. Agricultural products are wheat, corn, oats, hay, potatoes, apples, tobacco, peaches, plums, grapes.

West Virginia has two national forests, Monongahela and George Washington, and several state parks. With these facilities and her natural mountain scenery, she offers many recreational spots for tourists.

White Sulphur Springs, in Greenbrier County, is world famous as a health resort. During the recent war it was used as a spot

to accommodate diplomatic representatives of enemy nations awaiting transportation home. It is now being used as a convalescent spot for wounded American fighting men.

The University of West Virginia is in Morgantown; West Virginia Wesleyan is in Buckhannon; West Virginia Institute of Technology in Montgomery. There are also seven private and denominational colleges, five State Teachers' Colleges, three junior colleges, three Negro colleges.

Capital, Charleston; Called the Mountain State; State Flower, Rhododendron; Motto: Montani Semper Liberi (Mountaineers Always Free); Area, 24,181 square miles, rank 40th; Population, 1,901,974, rank 25th.

WISCONSIN

French explorers were the first visitors to the state of Wisconsin. The French settled the area and remained in possession from 1634 until the end of the Seven Years' War in 1763, when it became part of the English territory in the New World. In 1783 it came into possession of the United States and in 1787 was included in the Northwest Territory. Later, it was part of Indiana Territory, Illinois Territory, Michigan Territory. In 1836 Wisconsin Territory was organized separately and Wisconsin was admitted as a state in 1848.

Geography and Economics

The state is mainly agricultural and is high in production of dairy products and cheese. Crops produced include cranberries, apples, cherries, plums, corn, wheat, barley, rye, hay, flaxseed, potatoes, peas, tobacco and maple syrup. Lumber is produced in the Great Lakes region, although the states' formerly high lumber cut has been reduced because of exhaustion without sufficient reforestation. Wisconsin produces much butter and refines beet sugar. Other industries are woodworking, pig iron. Zinc and iron ore are found in the state. Fishing is another extensive industry.

Wisconsin has been a leader in progressive social legislation. It adopted the first unemployment compensation act in the country in 1934; it was also the first state to set up a cooperative crop reporting organization to work with the Federal Government.

Wisconsin is a popular spot for vacationists because of its many lakes which offer camping, fishing and swimming opportunities.

There are also many opportunities for winter sports in cold weather.

Educational Institutions

The University of Wisconsin is at Madison; Marquette University in Milwaukee; Milwaukee-Downer College in Milwaukee. There are also 12 state teachers' colleges and four junior colleges.

Capital, Madison; Called the Badger State; State flower, violet; Motto: Forward; Area, 56,154 square miles, rank, 25th; Population, 3,137,587, rank 13th.

WYOMING

The first white settlement in Wyoming was Fort Laramie, established in 1834 to control the fur trade among the Indian tribes. Fremont's Expedition explored the area in 1842. The federal government built Fort Kearney in 1848 and bought Fort Laramie in 1849. In 1853 some of the Mormons stopped in the state, but later moved

on to Salt Lake City. There was always difficulty with the Indian tribes during these years. Indians remaining in the state now are on the Shoshone Reservation in the central part of the state. Gold was discovered in 1867, and after that time the population increased considerably. The Territory of Wyoming was organized in 1868, and in 1890 Wyoming was admitted to the Union as a state.

Geography and Economics

The state is a broad plateau, crossed by the Rocky Mountains, whose highest point within the state is Mount Gannett, 13,785 feet. Although there are many rivers in Wyoming, the soil requires irrigation. Crops raised there include wheat, corn, oats, potatoes, hay, alfalfa and fruits. Sugar beets is an important crop. Minerals found are coal, gold, petroleum, silver, iron and copper. It is one of the most important livestock states in the Union, with thousands of head of beef cattle, sheep and lambs. The size of the wool clip is high. Dairying is also an extensive industry.

Recreational Facilities

Yellowstone National Park is situated in the northwestern part of Wyoming, and extends into Montana and Idaho. It is one of the oldest, largest and most beautiful national parks in the country and is the main reason why thousands of travelers visit the state each year. The region was discovered in 1807 by John Colter. Grand Teton National Park, south of Yellowstone, was established in 1929 and contains 150 square miles of lakes, mountains and forest preserve. Wyoming has six national forests.

Thermopolis Hot Springs in Hot Springs County is believed to be the largest hot springs in the world. It flows 18,600,000 gallons of water at 135 degrees Fahrenheit every 24 hours.

Educational Institutions

The University of Wyoming is at Laramie. Capital, Cheyenne; Called the Equality or Suffrage State; State flower, Indian paintbrush; Motto: Cedant Arma Togae (Let Arms Yield to the Gown); Area, 97,914 square miles, rank eighth; Population, 250,742, rank, 48th.

ORIGIN OF STATES' NAMES

(Source: Questionnaires answered by departments of state)

Alabama—Old Creek Indian word meaning "place of rest," and popular legend, "Here We Rest."

Arizona—Indian for "place of small springs."

Arkansas—Name of Quapaw Indian tribe.

California "Caliento forno" (hot furnace), originally applied to Lower California. Also was name given to a fabled island, said to be the home of a tribe of Amazons, in Spanish romance.

Colorado—Spanish word meaning red, apparently was named "Colorado" on account of the red hue of the soil.

Connecticut—Indian word "Connecticut," meaning on or beside the long tidal river.

Delaware—Lord de la Warr, first governor of Virginia.

Florida—Spanish "Pascua Florida" Feast of Flowers, (Easter Sunday).

Georgia—Named for George II of England.

Idaho—Shoshone Indian exclamation "E-Dah-Ho," meaning "Behold! The sun coming down the mountain."

Illinois—French interpretation of Indian word "Illini" meaning "a great man."

Indiana—No definite source known, probably means "land of the Indians."

Iowa—Indian name meaning "sleepy waters," first given to the river and later to the state.

Kansas—Indian Kaw tribe, meaning "wind people."

Kentucky—Not definite, probably Indian name "Kentake," meaning "prairie."

Louisiana—Named by LaSalle in honor of Louis XIV of France.

Maine—From charter of 1622 where land is called "Province of Maine," probably from name of a province in France.

Maryland—In honor of Queen Henrietta Maria of England, wife of Charles I.

Massachusetts—Two Indian words believed to mean "great hills."

Michigan—Indian name for "great lake."

Minnesota—Indian name "Min-nee-so-tah," meaning "cloud tinted water."

Mississippi—Two Indian words, "meeche" and "cebe," meaning "great river."

Missouri—Tribe of Indians, the Missouri; the word meaning "town of the large canoes."

Montana—Latin word for mountainous.

Nebraska—Otoe Indian name "Nebrathka," meaning "flat water."

Nevada—Spanish adjective, meaning "covered with snow."

New Hampshire—Given by Capt. John Mason, former governor in Hampshire, England, to his part of the grant made by the Council of Plymouth.

New Jersey—For the Isle of Jersey.

New Mexico—Indian name "Mexitli," an old Aztec divinity.

New York—For Duke of York, later James II.

North Carolina—In honor of Charles II.

North Dakota—Indian name for "allies."

Ohio—Indian name for "beautiful river."

Oklahoma—Two Choctaw words, "okla" and "humma," meaning "red people."

Oregon—Name given to Columbia river, popularized in *Thanatopsis* (Bryant).

Pennsylvania—In honor of William Penn, father of William Penn, founder of the state. Also meaning Penn's woods (Pennsylvania).

Rhode Island—Giovanni da Verrazzano, the explorer, referred to the island as similar to the Isle of Rhodes in the Mediterranean. In 1637 Roger Williams wrote "Aquednetick. Called by Us Rhode Island."

South Carolina—In honor of Charles I of England. Derived from Latin word "carolus."

South Dakota—Indian name for "allies."

Tennessee—Indian name given to the river, meaning unknown.

Texas—Indian word "tejas," meaning "friends or allies."

Utah—Ute tribe of Indians.

Vermont—French "vert mont," meaning "green mountain."

Virginia—In honor of Elizabeth, virgin queen of England.

Washington—For George Washington.

West Virginia—Named for Virginia, from which state it was formed.

Wisconsin—Indian name for "meeting of the rivers."

Wyoming—For the Wyoming valley, Pennsylvania. Means mountains and valleys alternating, while the Indian interpretation means "the large plains."

AMERICAN CITIES

ORIGIN OF THE NAME OF COOK COUNTY

Cook County was named for Daniel Pope Cook, a young Kentucky lawyer who had actively championed Illinois' struggle for statehood. He served as a territorial delegate in Congress, and was appointed to a judgeship in the western part of the state in 1817.

His vigorous editorials in the Western Intelligencer, which he had purchased, won him a brilliant reputation. In 1819 he was elected to the United States House of Representatives and served until 1827.

MAYORS OF PRINCIPAL AMERICAN CITIES

P President or President of Council.

THE PHILADELPHIA AWARD

To the Philadelphian who during the previous year has contributed the most to the advancement of the best and largest interests of the community is awarded the Philadelphia award. Founded by Edward W. Bok, magazine editor, in June, 1921, the award consists of \$10,000 and an illuminated scroll of the individual's achievements. Clarence Gardner is secretary of the committee with headquarters at 1300 Packard building, Philadelphia.

Awards have been:

- 1921 Leopold Stokowski, founder and leader, Philadelphia orchestra.
- 1922 Russell H. Conwell, religious leader, founder of Temple university.
- 1923 Samuel S. Fleisher, art patron and founder of the Graphic Sketch club.
- 1924 Charles Custis Harrison, provost of the University of Pennsylvania, and patron of higher learning.
- 1925 Samuel Yellin, metal craftsman
- 1926 Chevalier Jackson, inventor of the broncoscope, and internationally known doctor and surgeon.
- 1927 W. Herbert Burk, pastor, Washington Memorial chapel at Valley Forge, and creator of memorial and national shrine at Valley Forge
- 1928 Eli Kirk Price, leader in development of park system and donor of Museum of Art
- 1929 Cornelius McGillicuddy, manager, Philadelphia American baseball club, the Athletics
- 1930 Paul Philippe Cret, architect who contributed to city planning and construction
- 1931 The Unknown Citizen, for valor during the depression. The \$10,000 check was given to charitable relief

- 1932 Earl D. Bond, psychiatrist, director of the Institute of Mental Hygiene at the Pennsylvania hospital
- 1933 Lucy L. W. Wilson, principal of South Philadelphia Girls' high school
- 1934 Charles M. B. Cadwalader, director of the Academy of Natural Sciences
- 1935 Francis Fisher Kane, attorney, for founding and promoting the Philadelphia Voluntary Defender association
- 1936 George W. Wilkins, for establishing and maintaining "The Shelter for Homeless Men"
- 1937 Alfred Newton Richards, pharmacologist, for research relating to functions of the kidney
- 1938 Rufus M. Jones, and Clarence E. Pickett, President and Secretary of The Friends Services Committee for humanitarian service
- 1939 Thomas Sovereign Gates, President of The University of Pennsylvania, for eminence in business and education
- 1940 Marian Anderson, negro contralto
- 1941 No award
- 1942 William Loren Batt, industrialist, for voluntary service in war production as Vice-Chairman of the War Production Board
- 1943 James M. Skinner, industrialist, for work as Vice-President and Chairman of Industry and Finance Department of the United War Chest
- 1944 William Draper Lewis, lawyer, Director of The American Law Institute since 1923, upon completion of the final and nineteenth volume of "The Restatement of American Common Law" which he edited

CHIEF SOURCE OF CITY NAMES

(Source: Chamber of Commerce of the United States)

Following a study of the names of cities included in Henry Gannett's monograph on **The Origin of Certain Place Names in the United States** (U. S. Geological Survey

Bulletin No. 258, 1905), 1,159 city names were arranged into a general classification as follows:

Derivation of Names of American Cities

	Cases
Named for person : founder, prominent citizen, government official, patron, king.....	575
Indian name.....	154
Named for geographic feature relating to height, natural scenery, vegetation, animal life, industries, etc.....	154
Named for English town , or city, etc.....	70
Spanish name.....	64

	Cases
French name.....	60
Classical (Greek or Latin).....	30
Religious name.....	25
German name.....	9
Dutch name.....	7
Swiss name.....	6
Italian name.....	5
Total	1,159

Duplication of Names

A problem of considerable importance has developed as the result of duplication, in whole or in part, of city names. The reductio ad absurdum occurred a few years ago when Salem, Ore. (as an advertising stunt), wrote to Salem, Mass., politely requesting, — as Salem, Ore. was a live city while Salem, Mass. was a dead one — that the last-mentioned city change its name. Lacking a sense

of humor it is stated that the city council of Salem, Mass. replied somewhat heatedly to the upstart western town.

From a postal viewpoint it is evident that duplication is a serious problem. Because of this the Post Office department's information service issued a newspaper release, dated July 10, 1923, in which following duplications in names were listed:

Times	Times
Franklin.....31	Glenwood.....26
Clinton.....30	Kingston.....26
Chester.....29	Newport.....26
Arlington.....29	Ashland.....25
Washington.....28	Centerville.....25
Troy.....27	Cleveland.....25
Salem.....27	Auburn.....24
Madison.....27	Dover.....24
Marion.....27	Hillsboro.....24
Manchester.....27	Lincoln.....24
Clayton.....27	Monroe.....24

Times	Times
Oxford.....24	Liberty.....22
Princeton.....24	Milford.....22
Springfield.....24	Plymouth.....22
Warren.....24	Burlington.....21
Union.....24	Lebanon.....21
Greenville.....23	Portland.....20
Wilson.....23	Lexington.....20
Belmont.....22	Jamestown.....20
Canton.....22	Hudson.....20
Dayton.....22	Danville.....20
Eureka.....22	

It is perhaps fitting that Franklin, the first postmaster general, should head the list. It should be noticed that George Washington was not only president but also inspiration for the names of 28 towns and cities. Other presidents include Madison 27, Cleveland 25, Lincoln 24, Monroe 24, Wilson 23, Roosevelt 13, Adams 15, Taft 12 and Harding 5. Capitals of nations of the world have been another source of duplication, there being 18 towns named Paris, 18 Geneva, 17 Berlin, 12 Moscow, 11 Vienna, 6 Pekin, and 2 Brussels. The

post office remarks further: "Not only may the capitals of the world be seen in America first but also the world's measure of perfection in the concrete form of 2 Utopias, 22 Eureka's, 18 Arcadias, 15 Hopes and 14 Eldorados."

In Pennsylvania alone there are 13 communities with the prefix Green (Greenbriar, Greensburg, etc.) and there are 5 New York towns with the prefix Bloom (Bloomingdale, Bloomington, etc.).

GROWTH OF COUNCIL-MANAGER PLAN*

(Source: Municipal Year Book, 1945)

Year	Charter	Ordinance	Total	Cities Accu- mulated Total	Aban- don- ing
1908-14	24	7	31	31	0
1915-19	82	10	92	123	1
1920-24	131	19	150	273	4
1925-29	78	18	96	369	5
1930	15	4	19	388	1
1931	15	3	18	406	2
1932	19	2	21	427	2
1933	8	1	9	436	2
1934	8	0	8	444	2
1935	10	2	12	456	0
1936	9	4	13	469	1

Year	Charter	Ordinance	Total	Cities Accu- mulated Total	Aban- don- ing
1937	6	3	9	478	3
1938	9	6	15	493	1
1939	14	2	16	509	1
1940	15	3	18	527	2
1941	19	1	20	547	0
1942	17	12	29	576	0
1943	7	4	11	587	0
1944	23	3	26	613	1
Total	509	104	613		28

*This table is a historical summary of the adoption of the council-manager plan only in those cities where the plan was in effect December 31, 1944.

‡Does not include 28 abandonments, 5 where plan does not become effective until 1945 and 2 where becomes effective in 1946.

APPROXIMATE AMOUNT PER \$1,000 OF INCOME WHICH VARIOUS RETAIL SALES TAXES TAKE FROM DIFFERENT INCOME GROUPS

Source: Compiled by Dr. Mabel L. Walker, Executive Secretary Tax Policy league

Income	Exempting Food			Including Food		
	1% rate	2% rate	3% rate	1% rate	2% rate	3% rate

AGRICULTURE

Farm Lands, Population, Values, Tenancy

U. S. FARMS GROW BY 82 MILLION ACRES

Area of the average American farm grew nearly one-tenth, from 174 acres in 1940 to 190.1 acres in 1945, according to the Bureau of the Census, Department of Commerce, in announcing preliminary totals in the 1945 Census of Agriculture.

"With about 86,000 fewer farms there are nearly 82,000,000 more acres in farms," Director of the Census, J. C. Capt said. "The preliminary totals are now 1,142,817,821 acres comprising 6,010,572 farms, compared with 1,060,852,374 acres and 6,096,799 farms in 1940."

The most uniform pattern is shown in the 12 North Central States, all of which lost farms while gaining land in farms. This corn-belt region, which in 1939 accounted for over two-fifths of the Nation's 7.8 billion-dollar farm production, alone lost more farms than the United States as a whole. Thus:

Area	Loss in Number of Farms	Gain in Land in Farms
United States	86,227	81,965,447 acres
North Central States	88,903	10,869,147 acres

Utah scored the greatest proportionate gain in land in farms, nearly three million acres, or more than two-fifths of its 1940

acreage. This and the seven other Rocky Mountain States account for a gain of more than 45 million farm acres, over half of the national gain. Thus:

Area	Loss in Number of Farms	Gain in Land in Farms
United States	86,227	81,965,447 acres
Mountain States	19,508	45,727,592 acres

Much of this reported gain in Mountain States land in farms probably is due to inclusion of grazing lands not previously reported as land in farms.

Greatest proportionate loss in number of farms was to Arizona, which lost more than one-fourth of the 18,468 farms it had in 1940. The Mountain states as a whole had the greatest proportionate loss in number of farms, 8.4 percent of the 233,497 farms they had in 1940.

Greatest proportionate gain in number of farms was to Massachusetts, which added more than half the 31,897 farms it had in 1940. The New England States as a whole had the greatest proportionate gain in number of farms, 23.5 percent of the 135,190 farms they had in 1940.

HILL'S RECIPE FOR SUCCESS

"If you want to know whether you are destined to be a success or not, you can easily find out. The test is simple and infallible. Are you able to save money? If not, drop out.

You will lose; you may think not, but you will lose as sure as fate, for the seed of success is not in you."

J. J. Hill.
